Investment Manager's Report

STOXX Europe 600 Index FAM Fund (the "Sub-Fund")

STOXX Europe 600 Index FAM Fund returned +15.5% net of fees in 2023.

Eurozone shares notched up strong gains in Q1 despite volatility in the banking sector. Gains were led by the information technology, consumer discretionary and communication services sectors. Laggards were real estate and energy. Financials had a turbulent time in March following the failure of US lender Silicon Valley Bank. A week later, troubled lender Credit Suisse was bought by UBS in a deal brokered by the Swiss authorities. However, the eurozone financials sector posted gains for the quarter overall, with Credit Suisse's problems largely seen as being contained.

Shares in the Eurozone again posted gains in Q2 with the advance led by the financials and IT sectors, with the latter boosted by semiconductor stocks. This came in the wake of higher-than-expected sales projections from some US chipmakers, which helped demonstrate the growth potential stemming from AI. The European Central Bank (ECB) raised interest rates twice in the quarter, taking the main yet headline inflation declined during the period, with annual inflation estimated at 5.5% in June, down from 6.1% in May. However, the core inflation rate crept up to 5.4% in June from 5.3% in May. Growth data showed that the eurozone experienced a mild recession over the winter, with GDP declines of -0.1% in both Q4 2022 and Q1 2023.

However, Eurozone shares fell in Q3 amid worries over the negative effects of interest rate rises on economic growth. However, data released at the very end of the period showed eurozone inflation slowed to a two-year low of 4.3% in the year to September, down from 5.2% in August. PMI data showed that the eurozone private sector was in contraction, although the composite reading edged up to 47.1 in September from 46.7 in August. The European Central Bank raised interest rates twice in the quarter. In Q3, the Eurozone faced a 0.1% GDP contraction, reversing the previous quarter's 0.1% growth. This marked the first GDP decline since Q4 2022, influenced significantly by a negative contribution of 0.3 percentage points from inventory changes.

The final quarter of the year was a strong one for eurozone shares, boosted by expectations that there may be no further interest rate rises. Shares were supported by softer inflation figures from both the eurozone and the US, which raised hopes that interest rates may not only have peaked, but that cuts could soon be on the way in 2024. Euro area annual inflation fell to 2.4% in November from 2.9% in October. A year previously, the annual inflation rate was 10.1%.

When it came to sector performance, Industrials and Financials were the leading industries for 2023 with +3.95% and +3.89% contributions, respectively. No sector saw a negative performance overall for the year, but Real Estate was nevertheless the smallest contributor to returns with +0.24%

On a country basis, France and Germany were the biggest contributor for the year as they respectively contributed +3.32% +2.36% to annual returns.

From an individual security standpoint, Novo Nordisk was the primary contributor with +1.12%. At the other end of the table however, there were the laggards of Diageo and British American Tobacco with each dragging down overall returns by -0.08%.

FAM Series UCITS ICAV

Investment Manager's Report (continued)

FAM MSCI World Index Fund (the "Sub-Fund")

MSCI World Index fund returned +19.3% net of fees in 2023.

In the first quarter of 2023, we saw increased investor risk appetite following China's re-opening and encouraging global inflation readings in the midst of market volatility. Investors quickly calibrated expectations in February however, as better-than-expected economic indicators pushed back notions regarding a change by the US Federal Reserve. In March, difficulties for several US regional banks and some limited knock-on effect of this on European banks gave rise to the idea of a financial crisis. However, the authorities' rapid reaction to this banking problem helped equities end the first quarter of 2023 sharply up (+6.8% for the MSCI AC World index in US dollar terms).

Moving into the second quarter, we saw endless debate in April over future rate hikes and concerns about the banking sector. In May, global equities faced challenges and the European Central Bank moderated its pace of rate hikes in response to economic growth concerns. June saw a global stock market recovery however, fuelled by good US corporate results and enthusiasm for stocks likely to benefit from the AI theme. The rise extended into July before giving way to three consecutive monthly declines due to sharp rises in government bond yields. The final quarter started badly as geopolitical risk raised its head again on October 7th with the attack by Hamas in Israel, subsequently leading to conflict in Palestine. This came as investors were facing increased upward pressure on long-term bond yields, coupled with the European macro backdrop remaining bleak and US PMI data indicating ongoing fragility.

In the final weeks of the year, convinced that the cycle of policy rate hiking was over and that a Fed pivot was finally just around the corner, investors began to anticipate more, and earlier, policy rate cuts. Throughout the year, the fund's performance was influenced by fluctuations in central bank policies, varying inflation trends, and global economic uncertainties. Despite facing challenges and fluctuations the fund delivered strong absolute returns.

During 2023, Information Technology was the clear winner as it significantly contributed +9.64% while Consumer Discretionary was a distant second despite a 3.20% contribution. Conversely, Utilities and Consumer Staples were the worst-performing sectors, yet both only detracted slightly with their -0.07% contributions each.

On an individual stock basis, Apple and Microsoft were the top contributors with +1.91% and +1.87% contributions, respectively. At the other end however, Pfizer was the biggest laggard with a -0.25% contribution.

In terms of countries, the primary contributor by some distance was the United States with a massive +15.29% contribution. However, the worst-performing nation was Hong Kong with its -0.16% contribution.

FAM Series UCITS ICAV

Investment Manager's Report (continued)

S&P 500 Index FAM Fund (the "Sub-Fund")

S&P500 Index FAM fund returned +21.6% net of fees in 2023.

2023 proved to be a particularly strong year for equity markets - largely driven by anticipation of artificial intelligence's potential. January started with investor assumptions that monetary tightening would rapidly start to ease; giving equities a good start. Investors quickly calibrated expectations in February however, as better-than-expected economic indicators pushed back notions regarding a change by the US Federal Reserve. In March, difficulties for several US regional banks and some limited knock-on effect of this on European banks gave rise to the idea of a financial crisis. However, the authorities' rapid reaction to this banking problem helped equities end the first quarter of 2023 sharply up.

Monetary policy expectations remained unclear as the rise in global equities continued in the second quarter, fuelled by good US corporate results and enthusiasm for stocks likely to benefit from the AI theme. The rise extended into July before giving way to three consecutive monthly declines due to sharp rises in government bond yields. The fourth quarter started badly as geopolitical risk raised its head again on October 7th with the attack by Hamas in Israel, subsequently leading to conflict in Palestine. This came as investors were facing increased upward pressure on long-term bond yields. The resilience of the US economy and higher-than-expected inflation explained the behaviour of the bond market.

From November, expectations rising of a rapid cut in key rates by the Fed in 2024 underpinned a rally in both bonds and equities. This theme dominated until the end of the year; fuelled by the significant slowdown in inflation in October and November, before official comments and Fed forecasts in December. In the latter weeks, convinced that the cycle of policy rate hiking was over and that a Fed pivot was finally just around the corner, investors began to anticipate more, and earlier, policy rate cuts.

During 2023, the best performing sector was comfortably Information Technology as it contributed an enormous +12.76% of the index's +21.85% annual return. The principal laggard segment was Health Care (-0.36%) and Utilities (-0.34%).

In terms of individual securities, Microsoft and Apple were the top contributors for the year with +3.04% and +2.77% contributions, respectively. At the opposite end, Pfizer was the main letdown, dragging with its -0.39% contribution.

Fineco Asset Management Designated Activity Company

FAM Series UCITS ICAV

Investment Manager's Report (continued)

FAM MSCI AC Asia Pacific Ex Japan Index Fund (the "Sub-Fund")

FAM MSCI Asia Pacific ex-Japan Index Fund returned +2.5% net of fees in 2023.

Asia ex-Japan equities recorded a positive performance in the first quarter of 2023. Chinese shares achieved robust gains at the start of the quarter after Beijing loosened its Covid-19 restrictions that had constrained the country's economic growth. Supportive property market measures and a loosening of the regulatory crackdown on China's technology companies also bolstered investor sentiment. Fears of a global recession weakened investor sentiment towards the region in February, as investors took profits following a strong performance in January on investor optimism sparked by China's reopening. However, equities were broadly higher in March, with all index markets achieving a positive performance as fears of market contagion following the collapse of Silicon Valley Bank eased.

Negative performance for Q2 followed with Chinese equities were sharply lower as the economic rebound, following the country's reopening after the pandemic, started to cool. Factory output in China started to slow due to lacklustre consumer spending and weak demand for exports following interest rate rises in the US and Europe. Although, Equities in Taiwan advanced, driven by gains in technology stocks as investors rushed to buy AI-related stocks. Investor enthusiasm for AI-related stocks also boosted share prices in South Korea, which also ended the second quarter firmly in positive territory.

Shares in Asia declined in the third quarter. Most markets in the MSCI Asia ex-Japan Index ended the quarter in negative territory as concerns over the Chinese economy and fears over global economic growth weakened investor sentiment. Chinese stocks experienced sharp declines in August, with the country's property sector performing particularly badly as investors doubted that Beijing will deliver enough stimulus to put the world's second-largest economy back on track. Although China's official PMI manufacturing index rose in August it marked the fifth straight month of contraction as the reading remained below the 50-point threshold.

Lastly, Asia ex-Japan equities gained in the final quarter. Hopes that US interest rates may have peaked led to renewed investor appetite for risk assets across the region. All markets in the MSCI AC Asia ex-Japan index ended the quarter in positive territory apart from China, where shares fell due to investor concerns over weaker economic growth. There were fears that stimulus measures by the Chinese government may not be sufficient to spur growth in the world's second-largest economy. The ongoing real estate crisis and uncertainty over China's regulatory regime also weakened sentiment towards Chinese stocks; as worries about pressure on tech companies from potential gaming regulation had a negative impact later in the year.

In terms of sectors, the biggest positive contributor in 2023 was easily Information Technology with a +4.95% contribution. The primary negative industry was Consumer Discretionary with a -0.72% contribution.

On a country basis, Taiwan was the best performing nation for the year with a +3.41% contribution. The main negative was mostly from China with a hugely disappointing -4.33% contribution for the year.

At an individual security level, Samsung and Taiwan Semiconductors were the top contributors to performance in 2023, posting +1.61% and 1.16% contributions, respectively. Whereas on the downside, Meituan was the worst contributor for the year, as it dragged the index down with a contribution of -0.87%.

Fineco Asset Management Designated Activity Company
March 2024

FAM Series UCITS ICAV

Investment Manager's Report (continued)

FAM MSCI Emerging Markets Index Fund (the "Sub-Fund")

FAM MSCI Emerging Markets Index Fund returned +4.8% net of fees in 2023.

Emerging markets posted positive returns over the quarter, but lagged the MSCI World Index. The start of the year brought with it renewed optimism about EM, given the re-opening of China's economy. However, February and March saw US-China tensions re-escalate and a widespread loss of confidence in US and European banks. Central banks continued to raise interest rates, with US rates reaching their highest level since 2007 in March.

EM equities delivered a small gain over Q2, albeit behind developed markets. Tension between the US and China was a contributing factor behind EM underperformance, as were concerns about China's anaemic economic recovery. US debt ceiling uncertainty added to the negative mood, although this was resolved in early June.

Despite a strong start, the MSCI Emerging Markets Index ended the third quarter in negative territory, albeit ahead of MSCI World. Concerns that strength in the US economy will keep interest rates higher for longer had a negative impact on risk appetite. This was combined with ongoing weakness in the Chinese economy and concerns about the property sector.

There was pressure early in the final quarter, when rising bond yields and conflict in the Middle East weighed on emerging market returns, overall EM equities were relatively strong in Q4 2023. Signs of a "soft landing" for the US economy and increased expectations for interest rate cuts in 2024 were supportive. However, China continued to be a drag on broad EM performance.

In terms of sectors, the primary positive contributor for 2023 was Information Technology with a +5.26% contribution. The largest negative contribution however came in the form of Consumer Discretionary (-0.88%).

On a country basis, top contributor to performance for the year was Taiwan with its +3.63% contribution. The bottom country in terms of contribution was China as it lagged on a particularly poor -4.60% contribution.

In terms of individual securities, the top-performing stocks from a contribution perspective were Taiwan Semiconductors and Samsung with +1.72% and +1.24%, respectively. On the other hand, Meituan was the clear laggard as it dragged down the index with a -0.92% contribution.

Fineco Asset Management Designated Activity Company
March 2024

FAM Series UCITS ICAV

Investment Manager's Report (continued)

Fineco AM Smart Factors Europe Fund (the "Sub-Fund")

FAM Smart Factors Europe showed positive absolute performance, recording 15% in 2023.

Throughout the first half of the year, the Smart Factors Europe fund strategy consistently demonstrated positive absolute returns, driven by increased investor risk appetite following China's re-opening and positive economic indicators suggesting receding European recession risks. Although the European economy remained in contraction territory based on PMI indicators, the headline inflation declined, providing some positive signs. European equities performed well, and the European Central Bank's commitment to tackling inflation contributed to the positive sentiment. However, the factor overlay strategy showed mixed performance during this period.

In the second half of the year, the fund's performance remained somewhat volatile. While absolute returns were positive in some months, they were negative in others, with the fund occasionally underperforming its benchmark amidst fluctuations in market returns. The European Central Bank's continued efforts to combat persistent inflation and economic uncertainties impacted market sentiment, leading to mixed factor performance in some months. Additionally, speculation about future rate cuts and weak signals from the Eurozone economy contributed to the fund's lagging performance in certain months. Despite these challenges, the factor overlay strategy maintained a slightly positive or slightly negative performance throughout the second half of the year, driven by mixed factor performance across individual factors.

Fineco Asset Management Designated Activity Company
March 2024

FAM Series UCITS ICAV

Investment Manager's Report (continued)

Fineco AM Smart Factors US Fund (the "Sub-Fund")

The FAM Smart Factors USA showed positive absolute performance, recording 22.3% in 2023.

In the first quarter of the year, the fund achieved positive absolute returns driven by increased investor risk appetite following China's re-opening and encouraging inflation readings in the US. However, the factor strategy experienced declines in January and February as most factor premia remained flat, and momentum and min vol factors suffered substantial drops amidst market fluctuations and concerns about high inflation.

Moving into the second quarter, the fund's absolute returns fluctuated, with positive performance in some months and negative performance in others. Despite positive absolute returns in March, the fund underperformed its own previous performance due to continued rate hikes by the Federal Reserve and shocks in the banking sector.

Transitioning to the third quarter, the fund's performance remained relatively in line with its benchmark, with occasional variations. In July, the fund performed in-line with its benchmark amidst positive market returns driven by the US Fed's rate hike and market skepticism about further hikes. However, the factor overlay strategy was flattish due to mixed performance across factors. August saw the fund slightly outpace its benchmark with positive market returns, while Fed Chair Jerome Powell discussed potential additional interest rate hikes. The factor overlay strategy performance was mixed during this period.

Entering the fourth quarter, the fund fell short of its benchmark in September amidst negative market returns as the Fed kept interest rates steady, hinting at potential cuts next year. The factor overlay strategy also performed slightly negatively with significant drawdowns in certain factors early in the month. Similarly, the fund strategy aligned with its benchmark in October amidst ongoing fragility in the Eurozone economy and mixed factor performance.

Concluding the year, the fund aligned with its benchmark in November amidst positive market returns, with fears of a weakening US economy delayed and mixed factor performance contributing to slightly negative factor overlay strategy performance. In December, the fund matched its benchmark amidst positive market returns as the Fed hinted at potential cuts in 2024, while the factor overlay strategy performance was mixed with positive contributions from some factors offset by others. Throughout each quarter, fluctuations in market conditions and central bank policies influenced the fund's performance and factor overlay strategy.

FAM Series UCITS ICAV

Investment Manager's Report (continued)

Fineco AM Smart Factors World Fund (the "Sub-Fund")

The FAM Smart Factors World showed positive absolute performance, recording 19.2% in 2023.

In the first quarter of the year, the fund achieved positive absolute returns, driven by increased investor risk appetite following China's re-opening and encouraging global inflation readings. However, the factor strategy faced challenges in January as momentum and minimum volatility factors experienced significant drops amidst market volatility. February was flat, but in March, the fund rebounded with positive absolute returns despite fluctuations in European equities and varying inflation trends in both the Eurozone and the US.

Moving into the second quarter, in April, the fund was flat with performance influenced by debates over future rate hikes and concerns about the banking sector. However, in May, the fund's absolute returns were positive but underperformed compared to previous periods, as global equities faced challenges and the European Central Bank moderated its pace of rate hikes in response to economic growth concerns. In June, the fund's absolute returns were in line with historical performance despite a global stock market recovery.

In the third quarter, the fund's performance remained mixed. In July, the fund mirrored its benchmark amidst positive market returns, with the European Central Bank and the US Federal Reserve both hiking rates during the month. The fund's absolute returns slightly lagged its benchmark in August amidst positive market returns, with the European Central Bank hinting at a potential pause in rate hikes while the US Federal Reserve discussed the necessity of additional rate hikes. In September, the fund slightly lagged its benchmark amidst negative market returns, impacted by rate hikes by both central banks and rising inflation.

Moving into the last quarter of the year, in October, the fund slightly lagged its benchmark amid negative market returns, with the European macro backdrop remaining bleak and US PMI data indicating ongoing fragility. In November, the fund aligned with its benchmark amidst positive market returns, while in December, it also aligned with its benchmark amid positive market returns despite challenges in both the Eurozone and the US.

Throughout the year, the fund's performance was influenced by fluctuations in central bank policies, varying inflation trends, and global economic uncertainties. Despite facing challenges and fluctuations in the factor strategy, the fund delivered strong absolute returns.

Target China Coupon 2026 FAM Fund (the "Sub-Fund")

Target China 2026 FAM fund returned a total performance of -11.45% net of fees since inception.

Note that the fund distributed a coupon equal to 2.20% at the end of June 2022 and 1.90% in June 2023 for a total of 4.10% coupon paid since inception. These coupons are incorporated into Nav's performance.

The index strategy of the fund has lost 12.98% considering that the exposure of the Chinese equity was 49.58% by the end of December 2023. The Index strategy performance of the fund is explained on how the underlying indices have been performing since inception.

The negative impact of the Index strategy has been balanced from the choice of investing in the on shore indices which have been performing better compared to their off - shore peers.

Here below a screenshot comparing the difference in performance between the off shore version and the indices within the Strategy on the same period.

CDS movement has been positive since inception with an impact equal to 0.34%.

Bluestar Global Logistics Index FAM Fund (the "Sub-Fund")

BlueStar Global Logistics FAM fund returned +11.5% net of fees in 2023.

The BlueStar Global Logistics Index (BLOGRNTR) finished 2023 with a gain of 12.78%. The index underperformed the S&P 500 by roughly 9.5% over the duration of the year. The 3rd Party Logistics, Express Couriers, Logistic REITs, Logistic Software, and Logistics Automation Equipment segments all experienced positive gains of 9.19%, 13.44%, 11.4%, 36.6%, and 25.6% respectively. Contributing the most to the index's yearly gain was the Logistic REIT segment; about 3.8% of the index's gain over 2023 was attributable. At the component level, Fedex Corp was the leading contributor to the index's year-over-year positive performance, with Kuehne Nagel International closely following- both companies contributed approximately 0.95% each.

Investment Manager's Report (continued)

Fineco AM Euro Inflation Linked Government Bond Fund (the "Sub-Fund")

In 2023, the FAM Euro inflation linked government bond fund produced a positive return of 4.81%. While inflation actually fell in 2023 from the very high levels of 2022, the asset class was able to perform in this environment. This is mainly due to the characteristics of inflation linked bonds, which have dual componentry. While the inflation component of the instruments partly detracted from performance, the compensatory benefit from falling interest rate expectations in 2023 benefitted the bonds through their primary duration component. Additionally scarcity is always also a positive driver for inflation linked bonds as investors seek protection from an increasingly volatile inflation environment and issuance of these instruments remains sporadic and makes up on average only around 4% of total sovereign issuance. While some of the inflationary drivers of the previous years had receded in 2023, the corresponding fall in inflation was no greater than what was already "priced" by the asset class. The outcome was one of positive returns, buoyed by falling rate expectations and by spread compression in Spain and Italy, (both inflation linked sovereign issuers). While overly defensive positioning around the credit events of March (SVB and Credit Suisse) hampered performance, the fund was able to add back some additional value through overlay strategies, such as Italy overweights vs German counterparts.

FAM Series UCITS ICAV

Investment Manager's Report (continued)

Ultra Short Term Bond SRI FAM Fund (the "Sub-Fund")

The rate normalization initiated in 2022 was further implemented by central banks: The ECB hiked 6 times in 2023, leading the deposit facility rate from 2% to 4%. The hike pace was of 50 bp for the 2 first moves, and then eased to 25 bp for the 4 following. The FED hiked 4 times by 25 bp, leading the Fed funds to [5.25; 5.5%]. At year end however, inflation figures started nearing the central banks objectives, though remaining higher: core inflation reached 3.4% in the Eurozone and 3.2% in the US. Jerome Powell explicitly stated that the Fed should start cutting rates ""well before"" inflation reached its 2% target, and added that failure to do so could lead to too great a slowdown in activity.

Against this backdrop of central banks leaning to calming down prospects of further monetary tightening, sovereign yields fell sharply over the year: the German 2-year fell from 2.76% to 2.4%, while over the same period the German 10-year fell from 2.57% to 2.02%. The yield curve remained strongly inverted all along the year.

However it is worth noticing that the volatility was strong throughout 2023, with the 2-year yield shortly reaching more than 3.3% in March and July, and the 10-year yield nearing 3% in October. Volatility spikes were fueled by:

- Concerns over American regional banks in March, and the collapse of Credit Suisse
- In July, sticky inflation figures in Europe and hawkish central banks

Euro IG credit spreads were severely hit in March in the wake of US regional banks failure and Credit Suisse takeover by UBS. The spread vs. Germany of the ICE Bofa 1-3 year Corp € index, which is a good proxy for the fund's investment universe, rose from 110 bp in early March to a high of 168 bp the 20th March. Those 2 points were the more extremes reached in 2023 by the index. After March, credit spreads tightened with some volatility spikes until year end. By the end of December 2023 they were at 116 bp, a lower level than the one prevailing at the end of 2022 (140).

The credit modified duration slightly increased over the year, from 0.81 to 0.91, as credit spreads levels were more attractive after the March turmoil. We also favored the financial sector for the same reason: spreads remain higher than those of industrial sector, while displaying higher ratings. The share of financial issuers reached 50% by year end, a level significantly higher than in December 2022 (45%). The modified duration also increased over 2023 from levels close to 0.05 to 0.18 at the end of the 4th quarter. The bulk of the duration was concentrated on the shortest maturities as it became clear after the summer that the ECB was close to the terminal rate. However we keep a cautious stance on maturities above 15 months, as the curve is strongly inverted and its normalization could hit the long end of the curve.

Against this backdrop the portfolio posted a performance of 3.82% thanks to its carry, diminishing yields and some credit spreads tightening.

Outlook for 2024: Looking ahead, we maintain our cautious stance on interest rate exposure, particularly for the longest maturities: even if central banks are done with rate hikes, the currently inverted yield curve could normalize and hit the long end of the curve. We remain positive on credit, as current spread level look attractive on historical standards.

The rate normalization initiated in 2022 was further implemented by central banks:

The ECB hiked 6 times in 2023, leading the deposit facility rate from 2% to 4%. The hike pace was 50bp for the 2 first meetings and 25bp for the 4 following. The FED hiked 4 times by 25bp, leading the Fed funds to [5.25 - 5.5%]. At year-end however, inflation figures started nearing the central banks objectives, though remaining higher: core inflation reached 3.4% in the Eurozone and 3.2% in the US. Jerome Powell explicitly stated that the Fed should start cutting rates ""well before"" inflation reached its 2% target, and added that failure to do so could lead to too great a slowdown in activity.

Against this backdrop of central banks leaning to calming down prospects of further monetary tightening, sovereign yields fell sharply over the year: the German 2-year government bond fell from 2.76% to 2.4%, while over the same period the German 10-year government bond fell from 2.57% to 2.02%. The yield curve remained strongly inverted all along the year.

However, it is worth noticing that the volatility was strong throughout 2023, with the 2-year yield shortly reaching more than 3.3% in March and July, and the 10-year yield nearing 3% in October. Volatility spikes were fueled by:

- Concerns over US regional banks in March and the collapse of Credit Suisse
- In July, sticky inflation figures in Europe and hawkish central banks

Euro IG credit spreads were severely hit in March in the wake of US regional banks failure and Credit Suisse takeover by UBS. The spread vs. Germany of the ICE Bofa 1-3 year Corp € index, which is a good proxy for the fund's investment universe, rose from 110bp in early March to a high of 168bp March 20th. Those 2 points were the more extremes reached in 2022 by the index. After March, credit spreads tightened, with some volatility spikes until year-end, to reach 116bp, a lower level than the one prevailing at the end of 2022 (140).

The credit modified duration slightly increased over the year, from 1.4 to 1.5, as credit spreads levels were more attractive after the March turmoil. We also favored the financial sector for the same reason: spreads remain higher than those of industrial sector, while displaying higher ratings. The share of financial issuers was closed to 60% by year-end, a level significantly higher than in December 2022 (41%). The modified duration also increased over 2023 from 0.01 to 0.2 at the end of the 4th quarter. The bulk of the duration was concentrated on the shortest maturities as it became clear after the summer that the ECB was close to the terminal rate. However, we keep a cautious stance on maturities above 15 months, as the curve is strongly inverted and its normalization could hit the long end of the curve.

Against this backdrop, the portfolio posted a performance of 4.19% thanks to its carry, diminishing yields and our active participation on new issuances on the credit market.

FAM Series UCITS ICAV

Investment Manager's Report (continued)

Emerging Markets Equity FAM Fund (the "Sub-Fund")

Global emerging equity markets finished the year on a positive note although gains lagged developed market returns. Investor confidence was boosted by the prospect of lower US borrowing costs after the Federal Reserve signalled 75bps of interest rates cuts in 2024. In terms of regional performance, Latin America led the rally, followed by CEEMEA and Asia. While Korea, Taiwan and India advanced strongly, weakness in China held back gains from Asia. The fund delivered a positive return in the year 2023 but underperformed the benchmark. Exposure to Chinese consumer-related stocks detracted, hampered by a disappointing post-Covid recovery and lingering macro uncertainty. Consumer confidence remains weak with the big overhang for markets being concerns over whether the downturn in residential property can be stabilised. Noodle producer Tingyi was the biggest detractor, with the likes of JD.com, Minth Group and NetEase also having a notable impact along with Jardine Matheson and Ping An Insurance. By contrast, an overweight position in the outperforming Brazilian market boosted relative returns while the better macroeconomic backdrop helped Banco do Brasil. Telefonica Brasil also outperformed, drawing support from solid earnings results with cash generation remaining strong. Outside of Latin America, China's Tencent Music Entertainment, underpinned by subscriber growth, delivered healthy returns. Growing evidence that a nascent recovery in global technology sector demand may be gaining momentum - South Korea chip production and shipments surged in November - boosted the performance of Samsung Electronics. The Portfolio returned 1.37% (net return) over the period from August to the end of December 2023. Positioning: As bottom-up investors, we are committed to finding situations where we can invest in companies whose share prices trade meaningfully below their intrinsic value. In volatile times, our approach is to move gradually, preferring to make incremental moves in the portfolio, favouring companies with conservative management teams and strong balance sheets. The portfolio's largest overweight position is in Brazil with holdings spread across energy, financial, consumer and material stocks. Broadly speaking, we believe that valuations here are attractive, below historic averages and with high dividend yields on offer. In Asia, the portfolio is tilted towards South Korea on valuation grounds and that improvements in corporate governance and dividend pay-outs are being underappreciated by the market. The portfolio has a more modest overweight to China on the basis that valuations are low relative to history. By contrast, the portfolio is underweight India and Taiwan given that equity valuations in those countries are high compared with elsewhere in emerging markets. Strategy and outlook: Emerging equity markets have rebounded from their recent lows with consumer demand showing signs of recovery. However, uncertainty over the strength of cyclical recovery in China lingers, as do US/China tensions, and China's equity market continues to trade at a discount, even as fundamental improvement in the outlook for corporate earnings mean there is scope for positive surprises that would validate a re-rating. We believe that companies operating in emerging economies may see less earnings vulnerability from the global slowdown relative to expectations and what is being implied in valuations. In our view, the continued divergence in performance and valuations between different countries and sectors within the emerging world is providing interesting investment opportunities.

DEPOSITARY'S REPORT TO THE SHAREHOLDERS OF FAM SERIES UCITS ICAV

We, BNP Paribas S.A., Dublin Branch, appointed Depositary to the ICAV provide this report solely in favour of the investors of the Fund as a body for the year ended 31 December 2023 ("the Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011) as amended, ("the UCITS Regulations"). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the UCITS Regulations, we have enquired into the conduct of the ICAV for the Accounting Period and we hereby report thereon to the investors of the Fund as follows;

We are of the opinion that the Fund has been managed during the Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Sub-Fund by the constitutional documents, the Regulations and by the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ("the Central Bank UCITS Regulations"); and
- (ii) otherwise in accordance with the provisions of the constitutional documents, the Regulations and the Central Bank UCITS Regulations.

FAM Series UCITS ICAV

Directors' Report

For the financial year ended 31 December 2023

The Directors of FAM Series UCITS ICAV (the “ICAV”) submit their report together with the audited financial statements for the financial year ended 31 December 2023.

Principal Activities

The ICAV has been authorised by the Central Bank of Ireland (the “Central Bank”) as an Irish Collective Asset-Management Vehicle pursuant to the Irish Collective Asset-Management Vehicles Act 2015 (the “ICAV Act”). The ICAV has been authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended).

The ICAV is structured as an umbrella entity composed of different Sub-Funds. Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

Statement of Directors' Responsibilities in Respect of the Financial Statements

The Directors are responsible for preparing the financial statements in accordance with applicable Irish law and International Financial Reporting Standards (“IFRS”) as adopted by the European Union (“EU”).

Irish company law requires the Directors to prepare financial statements for each financial year, which give a true and fair view of the state of affairs of the ICAV and of the profit or loss of the ICAV for that year. In preparing those financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the ICAV will not continue in business; and
- state whether the financial statements have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and reasons for any material departure from those standards.

The Directors confirm that they have complied with the above requirements in preparing the financial statements for the year ended 31 December 2023 (the “Financial Statements”). In carrying out these requirements, the Directors have appointed BNP Paribas Fund Administration Services (Ireland) Limited (the “Administrator”) to act as Administrator to the ICAV.

Review of the Business and Future Developments

A comprehensive overview of the ICAV's and its Sub-Funds' activities and its future developments are set out in the Investment Manager's reports. Investment objectives may change from time to time, these will be reflected in the prospectus of the ICAV and the relevant Sub-Fund supplement.

Risks and Uncertainties

The principal risks and uncertainties which the ICAV faces relate to the use of financial instruments and are listed in Note 14 “Financial Instruments and Associated Risks”.

Results and Dividends

The results for the financial year are shown in the Statement of Comprehensive Income on pages 99 to 113.

Corporate Governance

The Directors have voluntarily adopted the 'Corporate Governance Code for Collective Investment Schemes and Management Companies', as published by Irish Funds in December 2011 (the “IF Code”), as the ICAV's corporate governance code. In respect of the financial year ended 31 December 2023, the Directors confirm compliance with the provisions of the IF Code.

Secretary

The Secretary that served during the financial year is listed on page 3.

FAM Series UCITS ICAV

Directors' Report (continued) For the financial year ended 31 December 2023

Directors

The Directors of the ICAV at 31 December 2023 were:

Jim Finn (Irish resident)*
Fabio Melisso (Irish resident)**
Ciaran Brady (Irish resident)**
Lorenzo Di Pietrantonio (Irish resident)**

* Independent non- executive Director

** Non- executive Director

Transactions Involving Directors

Other than as disclosed in Note 13 to the Financial Statements, there are no contracts or arrangements of any significance in relation to the business of the ICAV in which the Directors or Secretary had any interest as defined in the ICAV Act at any time during the financial year.

Connected Persons

In accordance with the requirements of the UCITS Regulations, all transactions carried out with the ICAV by the promoter, manager, trustee, investment adviser and associates/group companies ("connected persons") must be conducted at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in the UCITS Regulations are applied to all transactions with connected persons and that transactions with connected persons entered into during the year complied with the obligations set out in the UCITS Regulations.

Accounting Records

The measures taken by the Directors to secure compliance with the ICAV's obligation to keep adequate accounting records are the use of appropriate accounting systems and procedures and employment of competent persons through the appointment of the Administrator. The accounting records are kept at the registered address of the Administrator at Termini, 3 Arkle Road, Sandyford, Dublin 18, D18 C9C5, Ireland.

Statement of Relevant Audit Information

The Directors acknowledge that they are responsible for providing all relevant audit information to the ICAV's statutory auditors in connection with preparing their report in accordance with section 330 of the Companies Act 2014 (as amended). The Directors confirm that:

- so far as the Directors are aware, there is no relevant audit information of which the ICAV's statutory auditors are not aware; and
- each of the Directors has taken all the steps that ought to have been taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the ICAV's statutory auditors are aware of that information.

Going Concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern.

Independent Auditors

Deloitte Ireland LLP, Chartered Accountants and Statutory Audit Firm were appointed auditors for the financial year.

FAM Series UCITS ICAV

Directors' Report (continued)

For the financial year ended 31 December 2023

Events During the Financial Year

Geopolitical Conflicts

The recent outbreak of geopolitical conflicts all over the world can have an impact on the global economies. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

Silicon Valley Bank Collapse and Credit Suisse forced merger

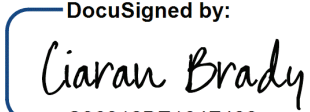

In March, the landscape was shaken by the collapse of Silicon Valley Bank and the forced merger of UBS and Credit Suisse, raising concerns of potential contagion throughout the global banking system. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

All disclosures relating to events during the year ended 31 December 2023 are disclosed in Note 20 of the Financial Statements.

Events Post Financial Year End

All disclosures relating to events after the year ended 31 December 2023 are disclosed in Note 21 of the Financial Statements.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

Report on the audit of the financial statements

Opinion on the financial statements of FAM Series UCITS ICAV (the 'ICAV')

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 December 2023 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the applicable regulations.

The financial statements we have audited comprise:

- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 24, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in the preparation of the financial statements is the Irish Collective Asset-Management Vehicles Acts 2015-2020 ("the ICAV Act") and International Financial Reporting Standards (IFRS) as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Summary of our approach

Scoping	Our audit is a risk-based approach taking into account the structure of the ICAV, types of investments, the involvement of the third-party service providers, the accounting processes and controls in place and the industry in which the ICAV operates.
Significant changes in our approach	There have been no significant changes in our approach from our prior year audit.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the ICAV's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls in place regarding going concern as part of our audit risk assessment procedures.
- Holding discussions with management on the directors' going concern assessment, the future plans for the ICAV and the feasibility of those plans.
- Challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- Reviewing all board meeting minutes during the period up to the date of approval of the financial statements, for evidence of any discussions and/or decisions that could impact the ICAV's ability to continue as a going concern.
- Reviewing the capital activity and NAV movements, subsequent to the financial year end.
- Assessing the adequacy of the relevant going concern disclosures made in the financial statements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ICAV's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

Valuation of financial assets and liabilities at fair value through profit or loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

The valuation of financial assets and liabilities at fair value through profit or loss is considered a key audit matter as it is the most significant number on the Statement of Financial Position, is a key driver of performance and due to the potential for management judgement and estimation in the valuation.

As financial assets and liabilities at fair value through profit or loss are a key driver of performance and due to their significance to the net asset value, there is a risk that these investments might not be correctly valued, in accordance with IFRS.

Refer also to note 14 and notes 15 in the financial statements.

How the scope of our audit responded to the key audit matter

- We considered the valuation basis used in light of the valuation policy as stipulated in the ICAV's Prospectus documents and the requirements of IFRS.
- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") ISAE 3402 Report and identified the key controls in place over the valuation process and reviewed those key controls for any exceptions.
- We independently valued exchange traded securities using our own market feeds.
- We reviewed the adequacy of the fair value levelling disclosures in the financial statements.
- We revalued swap positions on a sample basis.
- We reviewed the fair value levelling disclosures in the financial statements to ensure they were appropriate.

Existence of financial assets and liabilities at fair value through profit or loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

There is a risk that financial assets and liabilities at fair value through profit or loss recorded might not exist or might not be owned by the ICAV. Financial assets and liabilities at fair value through profit or loss are considered to be a key driver for the ICAV's performance.

Therefore, due to the significance of investments to the ICAV's financial statements, we have determined this as a key audit matter.

Refer also to note 14 in the financial statements.

How the scope of our audit responded to the key audit matter

- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") ISAE 3402 Report and identified the key controls in place over the reconciliation process and reviewed those key controls for any exceptions.
- We obtained direct confirmation of the investments of the ICAV from the Depositary and brokers at year-end. Any reconciling items between the confirmations and the ICAV's investment portfolios were investigated to ensure that trades were recorded in the correct reporting period.
- We completed alternative procedures in relation to a number of positions for which

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

confirmations were not available at the issuance of this report.

Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the financial statements is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

Our application of materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

Basis for determining materiality	<p>The materiality that we used in the current year was 1% of average net assets determined in respect of each sub-fund and 0.50% of average net assets for the following sub-funds:</p> <ol style="list-style-type: none"> 1. Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF 2. Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF 3. Fineco AM MSCI World Metals and Mining UCITS ETF 4. Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF 5. Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF 6. Fineco AM MSCI World Financials ESG Leaders UCITS ETF 7. Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF 8. Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF 9. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF 10. Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF 11. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF 12. Fineco AM MarketVector Artificial Intelligence ESG UCITS ETF 13. Fineco AM MarketVector Japan Quality Tilt ESG UCITS ETF 14. Fineco AM MarketVector Bioproduction Tech and Tools ESG UCITS ETF 15. Fineco AM MarketVector Global Clean Energy Transition ESG UCITS ETF 16. Fineco AM MarketVector Global Metaverse and e-Games ESG UCITS ETF
Rationale for the benchmark applied	<p>The Net Asset Value of the ICAV is the primary indicator of the size and performance of the ICAV and is considered the key area of interest for the shareholders, who are the primary users of the financial statements. The use of the average Net Asset Value is considered the industry practice benchmark for Investment Funds.</p>

The materiality used by the former auditor in the audit of the prior year financial statements was 1% of average net assets of the ICAV for all sub-funds.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole.

Performance materiality was set at 50% of materiality for the 2023 audit (2022: 50%). In determining performance materiality, we considered the following factors:

- our understanding of the ICAV;
- the quality of the control environment;

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

- the nature and extent of misstatements identified in previous audits; and
- our expectations in relation to misstatements in the current period.

We agreed with the Board of Directors that we would report to them all audit differences in excess of 5% of materiality (2022 : 5% of materiality) as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

An overview of the scope of our audit

Our audit is a risk based approach taking into account the structure of the ICAV, types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the ICAV operates. The ICAV is incorporated as an Irish collective asset management vehicle with variable capital and segregated liability between sub-funds. The ICAV is authorised by the Central Bank of Ireland (the "Central Bank") as a qualifying investor alternative investment fund.

The ICAV is organised as an umbrella fund with segregated liability between sub-funds. We assess the risks of each sub-fund separately. We have conducted our audit based on the books and records maintained by the administrator of FAM Series ICAV at Termini, 3 Arkle Road, Sandyford, Dublin 18, D18 C9C5, Ireland.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the ICAV's documentation of their policies and procedures relating to:
 - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
- the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including IT and valuations regarding how and where fraud might occur in the financial statements and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas: Valuation of financial assets and liabilities at fair value through profit or loss and Revenue Recognition. In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the ICAV operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the The key laws and regulations we considered in this context included the ICAV Act, Listing Rules and the applicable regulations..

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the ICAV's ability to operate or to avoid a material penalty. These included matters regulated by the Central Bank of Ireland.

Audit response to risks identified

As a result of performing the above, we identified 'Valuation of financial assets at fair value through profit or loss as a key audit matter related to the potential risk of fraud. The key audit matters section of our report explains the matter in more detail and also describes the specific procedures we performed in response to that key audit matter.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

Our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management and the Board of Directors concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance and reviewing correspondence with the Central Bank of Ireland; and
- In addressing the risk of fraud in Revenue Recognition, independently valuing all exchange traded securities using our own market feeds and completing an unrealised gain/loss reconciliation.
- In addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Report on other legal and regulatory requirements

Matters on which we are required to report by the ICAV Act and the applicable regulations

In our opinion, the information given in the directors' report is consistent with the financial statements. The directors' report has been prepared in accordance with the ICAV Act.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Opinion on other matters prescribed by the applicable regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

Other matters which we are required to address

We were appointed by the Board of Directors on 3 January 2024 to audit the financial statements for the year ending 31 December 2023. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 6 years, covering the year ending 31 December 2023.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the ICAV in conducting the audit.

Our audit opinion is consistent with the additional report to the Board of Directors we are required to provide in accordance with ISA (Ireland) 260.

Use of our report

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act . Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Brian Forrester
For and on behalf of Deloitte Ireland LLP
Chartered Accountants and Statutory Audit Firm
Deloitte & Touche House, 29 Earlsfort Terrace, Dublin 2

29 April 2024

An audit does not provide assurance on the maintenance and integrity of the website, including controls used to achieve this, and in particular on whether any changes may have occurred to the financial statements since first published. These matters are the responsibility of the directors but no control procedures can provide absolute assurance in this area.

Legislation in Ireland governing the preparation and dissemination of financial statements differs from legislation in other jurisdictions.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023

1. General Information

FAM Series UCITS ICAV (the “ICAV”) is an umbrella Irish Collective Asset-management Vehicle with segregated liability between its Sub-Funds and authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended). The ICAV was incorporated on 8 March 2018. On 7 October 2022, FAM Series UCITS ICAV listed on the Italian Stock Exchange (Borsa Italiana).

The ICAV is structured as an umbrella entity composed of different sub-funds (the “Sub-Funds”). Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

In 2023, the following Sub-Funds have updated the supplements as the Sub-Fund investment manager's intention is to pursue a new investment objective with the aim to provide dividends at certain dates, while protecting the NAV of EUR 100 at the new defined maturity intended to be 3 years from the expiration of the previous term. As a result, the following Sub-Funds have updated the supplement with new maturity date and has been renamed to the following:

Previous Name	New Fund Name post maturity	New Maturity Date
Global Defence FAM Fund 2023	Global Defence FAM Fund 2026	30 November 2026
Smart Global Defence FAM Fund 2023	Smart Global Defence FAM Fund 2026	30 December 2026
Smart Global Defence FAM Fund 2023 II	Smart Global Defence FAM Fund 2026 II	30 December 2026

Effective 6 January 2023, the Fineco Asset Management Designated Activity Company (the “Manager”) appointed Allianz Global Investors GmbH as investment advisor of Fineco AM Euro Credit Bond Fund, replacing HSBC Global Asset Management (France).

Effective 13 February 2023, the Manager appointed M&G Investment Management Limited to act as Investment Manager to the Jupiter Flexible Income FAM Fund, replacing Jupiter Asset Management Limited, and the Sub-Fund was also re-named as Flexible Income FAM Fund on this date.

Effective 28 November 2023, the Manager appointed CPR Asset Management to act as Investment Manager to Medtech FAM Fund and Global Disruptive Opportunities FAM Fund, replacing Amundi Ireland Limited.

The investment objective of the below Sub-Funds is to achieve long-term capital growth:

- FAM MSCI AC Asia Pacific Ex Japan Index Fund
- FAM MSCI Emerging Markets Index Fund
- FAM MSCI World Index Fund
- S&P 500 Index FAM Fund
- STOXX Europe 600 Index FAM Fund
- Fineco AM Smart Factors Europe Fund
- Fineco AM Smart Factors US Fund
- Fineco AM Smart Factors World Fund
- Bluestar Global Logistics Index FAM Fund
- Emerging Markets Equity FAM Fund

The investment objective of Global Defence FAM Fund is to provide a positive return at the Maturity Date linked to the performance of the Basket, to protect the Sub-Fund’s Net Asset Value per Share at 85% of the Initial Offer Price at the Maturity Date and to provide Shareholders with a Dividend on each Dividend Payment Date.

The investment objective of the below Sub-Funds is to provide Shareholders with a Dividend on each Dividend Payment Date and to protect the Sub-Fund’s Net Asset Value per Share at 100% of the Initial Offer Price at the Maturity Date:

- Global Defence FAM Fund 2026
- Smart Global Defence FAM Fund 2026
- Smart Global Defence FAM Fund 2026 II
- Smart Global Defence FAM Fund 2024

FAM Series UCITS ICAV

- ESG Target Global Coupon 2026 FAM Fund II
- ESG Target Global Coupon 2026 FAM Fund III
- ESG Target Global Coupon 2026 Fineco AM Fund IV
- ESG Target Global Coupon 2026 Fineco AM Fund V
- ESG Target Global Infrastructure Coupon 2026 Fineco AM Fund

The investment objective of Fineco AM Euro Inflation Linked Government Bond Fund is to achieve capital growth over the medium to long term.

The investment objective of the below Sub-Funds is to provide a total return (income and capital growth) over a minimum six-month investment period in excess of its benchmark (composed of 80% Euro Short-Term Rate (€STR) and 20% ICE BofA 1-3 Year Euro Corporate Index).

- Ultra Short Term Bond SRI FAM Fund
- Enhanced Ultra Short Term Bond SRI FAM Fund

The investment objective of the below Sub-Funds is to achieve total returns:

- Fineco AM Bloomberg Euro Aggregate Treasury 1-3 Year Index Fund
- Fineco AM Bloomberg Euro Aggregate Treasury 3-5 Year Index Fund
- Fineco AM Bloomberg Euro Aggregate Treasury 5-7 Year Index Fund
- Fineco AM Bloomberg Euro Aggregate Treasury 7-10 Year Index Fund
- Fineco AM Bloomberg Euro Aggregate Treasury 10+ Year Index Fund
- Fineco AM Bloomberg Euro Government Inflation Linked Bond All Maturities Index Fund

The investment objective of the below Sub-Funds is to provide Shareholders with a Dividend on each Dividend Payment Date, to protect the Sub-Fund's Net Asset Value per Share at 100% of the Initial Offer Price at the Maturity Date and provide a positive return at the Maturity Date linked to the performance of the Index.

- Smart Defence Equity 2028 Fineco AM Fund
- Smart Defence Equity 2028 Fineco AM Fund II

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. General Information (continued)

The investment objective of Smart Global Defence 2028 Fineco AM Fund is to provide Shareholders with a Dividend on each Dividend Payment Date, to protect the Sub-Fund's Net Asset Value per Share at 100% of the Initial Offer Price at the Maturity Date and provide a positive return at the Maturity Date linked to the performance of the Index.

The investment objective of Fineco AM US Dollar Bond Fund is to maximise total returns.

The investment objective of the below Sub-Funds is to provide the Limited Index Return at the Maturity Date; aim to provide Shareholders with a Dividend on each Dividend Payment Date and to protect the Sub-Fund's Net Asset Value per Share at 100% of the Initial Offer Price at the Maturity Date:

- Smart Defence Multi-Strategy 2029 Fineco AM Fund
- Smart Defence Multi-Strategy 2030 Fineco AM Fund

The investment objective of the below funds is to aim to provide Shareholders with the Coupon at the Maturity Date and to protect the Sub-Fund's Net Asset Value per Share at 100% of the Initial Offer Price:

- Smart Defence Progression 2025 Fineco AM Fund
- Smart Defence Progression 2025 Fineco AM Fund III

The investment objective of the below Sub-Funds is to protect the Sub-Fund's Net Asset Value per Share at 100% of the Initial Offer Price at the Maturity Date and to provide the Limited Basket Return at the Maturity Date.

- Smart Defence Single Strategy Fineco AM Fund I
- Smart Defence Single Strategy Fineco AM Fund

The assets of a Sub-Fund will be invested separately in accordance with the investment objectives and policies of the Sub-Fund as set out in the Prospectus.

In respect of each Sub-Fund, Fineco Asset Management Designated Activity Company, as the appointed Investment Manager and Manager, manages the assets and investments of the Sub-Fund in conformity with the Sub-Fund's investment objectives and policies. The Investment Manager shall be entitled to receive annual management fees (see Note 13).

The following table provides the date of commencement of trading and the Investment Manager for the various Sub-Funds established by the ICAV:

Sub-Fund	Date of Commencement
STOXX Europe 600 Index FAM Fund	1 March 2019

(a) Basis of Preparation

These Financial Statements have been prepared in accordance with International Financial Reporting Standards ('IFRS') issued by the International Accounting Standards Board ("IASB") and have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period.

Going Concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern. Therefore, the Financial Statements are prepared on the going concern basis.

New standards and interpretations effective 1 January 2023

Definition of Accounting Estimates - Amendments to IAS 8

In February 2021, the International Accounting Standards Board issued amendments to IAS 8, in which it introduces a new definition of 'accounting estimates'.

In particular, the amendments which became effective 1 January 2023 clarify:

- the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors.
- how entities use measurement techniques and inputs to develop accounting estimates.

This amendment did not have a material impact on the ICAV.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. General Information (continued)

New standards and interpretations effective 1 January 2023 (continued)

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

In February 2021, the International Accounting Standards Board issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements (the PS), in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures.

In particular, the amendments which became effective 1 January 2023 clarify:

- that replacing the requirement for entities to disclose their ‘significant’ accounting policies with a requirement to disclose their ‘material’ accounting policies.
- that adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosure.

The ICAV considered the amendments and noted that there is no impact on the measurement, recognition or presentation of any items in the ICAV’s financial statements.

There are no other standards, interpretations or amendments to existing standards that are effective that would be expected to have a significant impact on the ICAV.

(b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2023 and not early adopted

Classification of Liabilities as Current or Non-current - Amendments to IAS 1

In January 2020, the International Accounting Standards Board issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

In particular, the amendments which become effective 1 January 2024 clarify:

- What is meant by a right to defer settlement.
- That a right to defer must exist at the end of the reporting period.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification.

This amendment is not expected to have a material impact on the ICAV.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the ICAV.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies

The material accounting policies applied in preparation of these Financial Statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

2.1 Accounting Policies

(a) Financial Assets and Liabilities

(i) Classification

The ICAV classifies financial assets and financial liabilities into the following categories:

Financial assets at Fair Value through Profit or Loss ("FVTPL"):

Designated at FVTPL:

- *Transferable Securities*
 - Bonds
 - Equities
 - Investment funds
 - Exchange traded commodities
- *Derivative Instruments*
 - Futures contracts
 - Forward currency contracts
 - Interest rate swaps
 - Total return swaps
 - Credit default swaps
 - Option contracts
 - Rights and Warrants
 - Contracts for difference
- *Money Market Instruments*
 - Commercial papers
 - Treasury bills

Financial assets at amortised cost:

- *Loans and receivables: cash and cash equivalents and interest and other assets.*

Financial liabilities at FVTPL:

Designated at FVTPL:

- *Derivative Instruments*
 - Futures contracts
 - Forward currency contracts
 - Interest rate swaps
 - Total return swaps
 - Option contracts
 - Rights and Warrants
 - Contracts for difference

Financial liabilities at amortised cost:

- *Other liabilities: accrued expenses.*

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

2.1 Accounting Policies (continued)

(a) Financial Assets and Liabilities

(i) Classification (continued)

The ICAV designates all equity securities, bonds, funds, treasury bills, exchange traded commodities, futures contracts, forward currency contracts, interest rate swaps, option contracts, contract for differences and rights and warrants at FVTPL on initial recognition because it manages these securities on a fair value basis in accordance with its documented investment strategy. Internal reporting and performance measurement of these securities are on a fair value basis.

A non-derivative financial asset with fixed or determinable payments may be classified as a loan and receivable unless it is quoted in an active market or is an asset for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

(ii) Recognition

Financial assets and financial liabilities at FVTPL are initially recognised at fair value on the trade date, which is the date on which the ICAV becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised on the date on which they are originated.

Purchases and sales of financial instruments are accounted for on the trade date. Realised gains and losses on disposals of financial instruments are calculated using the First In, First Out ("FIFO") method.

(iii) Initial Measurement

Financial instruments categorised at FVTPL are measured initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income. Financial assets and financial liabilities are recognised on the Statement of Financial Position when the ICAV becomes party to the contractual provisions of the instrument. A regular purchase of financial assets is recognised using trade date accounting. From this date any gains or losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

(iv) Fair Value Measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the ICAV has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the ICAV measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an on-going basis.

If there is no quoted price in an active market, then the ICAV uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

Investments in open-ended investment funds are valued at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the daily net asset value of these shares are recognised as movement in unrealised gains/(losses) on financial assets and liabilities held at FVTPL in the Statement of Comprehensive Income.

The ICAV recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

2.1 Accounting Policies (continued)

(v) Amortised Cost Measurement

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

(vi) Impairment

IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' ("ECL") model. The new impairment model applies to financial assets measured at amortised cost and debt investments at FVOCI, but not to investments in equity instruments. Under IFRS 9, credit losses are recognised earlier than under IAS 39.

A financial asset or liability not classified at FVTPL is assessed at each reporting date to determine whether there is objective evidence of impairment. A financial asset or a group of financial assets is 'impaired' if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset(s) and that loss event(s) had an impact on the estimated future cash flows of that asset(s) that can be estimated reliably.

Objective evidence that financial assets are impaired includes significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of the amount due on terms that the ICAV would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, or adverse changes in the payment status of the borrower.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against receivables. Interest on the impaired asset continues to be recognised, if an event occurring after the impairment was recognised causes the amount of impairment loss to decrease, then the decrease in impairment loss is reversed through profit or loss.

(vii) Derecognition

The ICAV derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the ICAV neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest in such transferred financial assets that is created or retained by the ICAV is recognised as a separate asset or liability.

The ICAV enters into transactions whereby it transfers assets recognised on its Statement of Financial Position, but retains either all or substantially all of the risks and rewards of the transferred assets. If all or substantially all of the risks and rewards of the transferred assets are retained, then transferred assets are not derecognised. Transfer of assets usually includes sale and repurchase agreements where all or substantially all of the risks and rewards are retained.

The ICAV derecognises a financial liability when its contractual obligations are discharged, cancelled, or expired.

(b) Transferable Securities

Investment Funds

The Sub-Funds invest in a diversified portfolio of collective investment schemes, whether open or closed ended, regulated or unregulated, including investment companies, investment trusts and/or investment limited partnerships, which the Investment Manager considers will give consistent returns to investors in line with the target returns of the Sub-Funds and which may include investment in other Sub-Funds of the ICAV ("Underlying Funds").

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

2.1 Accounting Policies (continued)

(c) Derivative Instruments

The Sub-Funds may enter into derivatives instruments for the purposes of efficient portfolio management.

Forward currency contracts

When entering into a forward foreign currency exchange contract, the Sub-Fund agrees to receive or deliver a fixed quantity of foreign currency for an agreed price upon an agreed future date. These contracts are valued daily at the forward rate and the Sub-Fund's equity therein, representing unrealised gains or losses on the contracts, is included in the Statement of Comprehensive Income. The unrealised gain/(loss) on open forward currency contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. Realised and movement in unrealised gains or losses are included in the Statement of Comprehensive Income.

Futures contracts

Futures contracts are valued at the last traded price on the Sub-Fund's valuation date or if no price at the valuation date, the recent last traded price. Any gain or loss in fair value is recorded as unrealised gains or losses in the Statement of Comprehensive Income. Upon settlement a realised gain or loss is recognised in the Statement of Comprehensive Income.

Interest rate swaps

Interest rate swaps involve the exchange by the Sub-Fund with another party for their respective commitment to pay or receive interest on the notional amount of principal. The changes in contract values are recorded as unrealised gains or losses and the Sub-Funds recognise a realised gain or loss when the contract is closed. Movement of unrealised gains and losses on interest rate swaps are recognised in the Statement of Comprehensive Income.

Total return swaps

A total return swap is a derivative contract between two parties where they agree to exchange the investment return and income on an underlying asset or a basket of assets for the investment return and income on a different underlying asset or a basket of assets which is agreed between the parties. Realised and movement of unrealised gains and losses are recognized in the Statement of Comprehensive Income.

Credit default swaps

Credit default swap contracts involve an arrangement between two parties, which allows one party to protect against losses incurred as a result of default by a specified reference entity. Realised and movement of unrealised gains and losses are recognized in the Statement of Comprehensive Income.

Rights and warrants

Rights and warrants are recorded as an asset or liability at their fair value on the Statement of Financial Position. Fair value as determined by the Administrator is the quoted market price as provided by electronic feed from one or more reputable price vendors. The change in fair value, if any, is recorded as an unrealised gain or loss in the Statement of Comprehensive Income. Realised gains or losses on warrants are shown in the Statement of Comprehensive Income. On the expiry of a warrant the amount previously recognised in the Statement of Financial Position is recognised in the Statement of Comprehensive Income as a realised gain or loss.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

2.1 Accounting Policies (continued)

(c) Derivative contracts (continued)

Option contracts

Option contracts give the right, but not the obligation, to buy or sell within a limited time, a specific financial instrument at a contracted price that may also be settled in cash, based on differentials between specified indices or prices. Options written create an obligation to buy or sell within a limited time, the specific financial instrument at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

There were open forward currency contracts, interest rate swaps, option contracts, futures contracts and rights and warrants at 31 December 2023, and these are disclosed on the relevant Condensed Schedule of Investments of each Sub-Fund.

Contracts for differences

Contracts for differences are over-the-counter derivatives which take advantage of economic benefits which are not afforded through investing directly in certain securities markets. The Sub-Fund may purchase an equity contract for differences as a means of gaining exposure to the economic performance and cash flows of an equity security without the need for taking or making physical delivery of the security. A contract for differences is a financial instrument linked to an underlying share price. Consequently, no rights are acquired or obligations incurred relating to the underlying share and the Sub-Fund may buy or sell depending on the Investment Manager's view of a ICAV's share price. Contracts for differences are highly leveraged instruments and for a small deposit it is possible for the Sub-Fund to hold a position much greater than would be possible with a traditional investment. These are valued daily based on quoted market prices at the Statement of Financial Position dates. The fair value of contracts for differences is the difference between the contracted price and the volume weighted average price of the financial instrument multiplied by the number of shares specified within the contract.

(d) Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported on the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

(e) Redeemable Participating Shares

The issued redeemable participating Shares ("Shares") is at all times equal to the net asset value of the ICAV. The Shares are redeemable at the shareholders option and are classified as financial liabilities. The Shares can be put back to the ICAV at any time for cash equal to a proportionate share of the ICAV's net asset value. The Shares are carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the share back to the ICAV. Each Sub-Fund's Net Asset Value ("NAV") per Share is calculated by dividing the NAV of that Sub-Fund, being the value of its assets less its liabilities, by the numbers of shares of that Sub-Fund then in issue.

(f) Use of Judgements and Estimates

The preparation of Financial Statements in conformity with IFRS as adopted by the EU requires management to make judgements, estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the Financial Statements. Estimates also affect the reported amounts of income and expenses for the reporting period in the Statement of Comprehensive Income. Actual results could differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised and in any future accounting periods affected. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year, as well as critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the Financial Statements are included in Note 14 and Note 15.

The ICAV has adopted the functional currency of each Sub-Fund as the presentation currency for these Financial Statements. Assets and liabilities expressed in currencies other than the functional currency are converted into the functional currency using the exchange rates prevailing as at the Statement of Financial Position date. Transactions in foreign currencies are translated into the Sub-Fund's functional currency at the transaction dates. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the results for the financial year.

(h) Income

Interest income is recognised in the Statement of Comprehensive Income at the effective interest rate method.

Dividends are recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

(i) Expenses

All expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

(j) Cash and Cash Equivalents

Cash comprises cash at banks and bank overdrafts. Cash equivalents are short term (up to three months), highly liquid investments, that are readily convertible to known amounts of cash and which are subject to insignificant changes in value. For the financial years ended 31 December 2023 and 31 December 2022, cash equivalents held by the ICAV includes, commercial papers and treasury bills. They are held for the purpose of meeting short-term cash commitments rather than for investments or other purposes. The carrying amount of these assets is approximately equal to their fair value.

(k) Payable for Securities Purchased/Receivable for Securities Sold

Payable for securities purchased and receivable for securities sold include trades pending settlement.

(l) Redemptions Payable

Redemptions are recognized as liabilities when the amount requested by the unitholder in the irrevocable redemption notice becomes fixed.

(m) Subscriptions Receivable

Subscriptions receivable includes the amounts still to be collected from investor before the ICAV will issue the shares.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

2.1 Accounting Policies (continued)

(n) Due from/to Brokers

Due from/to brokers represent margin accounts and cash collateral for borrowed securities. Margin accounts represent cash deposits with brokers, transferred as collateral against open derivative contracts.

(o) Organisational Costs

Costs incurred in organising the ICAV were amortised over the first five accounting periods of the ICAV as disclosed in the prospectus. This is not in accordance with IFRS but Management assessed the costs to be immaterial to the ICAV, please refer to Note 4 for details.

(p) Management fee rebate

The ICAV has rebate agreements with certain investment managers of the Underlying Funds. These rebates are recorded on an accruals basis in the Statement of Comprehensive income.

(q) Anti-Dilution Levy

The Directors reserve the right to impose “an anti-dilution levy” representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought or sold), duties and charges and other dealing costs relating to the acquisition or disposal of assets and to preserve the value of the underlying assets of a Sub-Fund, in the event of receipt for processing of net subscriptions or net redemptions exceeding such percentage of the NAV of the Sub-Funds as determined by the Directors from time to time (including subscriptions and/or redemptions which would be effected as a result of requests for conversion from one Class into another Class). Any such provision will be deducted from the subscription proceeds in the case of net subscription requests exceeding the threshold of a Sub-Fund and deducted from the redemption proceeds in the case of net redemption requests exceeding the threshold of a Sub-Fund including the price of shares issued or redeemed as a result of requests for conversion. Any such sum will be paid into the account of the relevant Sub-Fund.

(q) Anti-Dilution Levy (continued)

The ICAV started applying the policy on 1 January 2021. The table below shows the Anti-Dilution Levy amounts per Sub-Fund included in the Other income balance in the Statement of Comprehensive Income for the year ended 31 December 2023 and 2022.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

8. Share Capital

The actual value of paid up share capital of the ICAV shall at all times equal to the NAV of the ICAV after deduction of liabilities. The share capital of the ICAV shall be divided into share capital of 5,000,000,000,000 Shares of no par value and 2 Subscriber Shares of €1.00 each and shall at all times be equal to the value for the time being of the issued share capital of the ICAV.

Each of the Shares (with the exception of the Subscriber Shares) entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of the relevant Sub-Fund attributable to the relevant class in respect of which they are issued save in the case of dividends declared prior to becoming a Shareholder.

The proceeds from the issue of Shares shall be applied in the books of the ICAV to the relevant Sub-Fund and shall be used on behalf of such Sub-Fund for the acquisition of assets in which a Sub-Fund may invest. The records and accounts of each Sub-Fund shall be maintained separately.

The Directors reserve the right to re-designate any class of Shares from time to time, provided that Shareholders in that class shall first have been notified by the ICAV that the Shares will be re-designated and shall have been given the opportunity to have their Shares redeemed by the ICAV, except that this requirement shall not apply where the Directors re-designate Shares in issue in order to facilitate the creation of an additional class.

Each of the Shares entitles the holder to attend and vote at meetings of the ICAV and of the relevant Sub-Fund represented by those Shares. No class of Shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other class of Shares or any voting rights in relation to matters relating solely to any other class of Shares.

Any resolution to alter the class rights of the Shares requires the approval of three quarters of the holders of the Shares of the relevant class represented or present and voting at a general meeting duly convened in accordance with the instrument of incorporation of the ICAV (the "Instrument").

The Instrument empowers the Directors to issue fractional shares in the ICAV. Fractional shares will be issued where any part of the subscription monies for Shares represents less than the subscription price for one Share, provided however, that fractions shall not be less than 0.01 of a Share and shall not carry any voting rights at general meetings of the ICAV or a Sub-Fund and the NAV of any fractional share shall be the NAV per Share adjusted in proportion to the fraction.

The movement in the number of Shares is as follows for the financial year ended 31 December 2023:

10. Directors' Fees

The Directors are entitled to a fee by way of remuneration for their services at a rate to be determined from time to time by the Directors. The aggregate amount of Directors' remuneration in any one year shall not exceed €30,000 (excluding Value Added Tax, ("VAT"), if any).

All Directors will be entitled to reimbursement by the ICAV of expenses properly incurred in connection with the business of the ICAV or the discharge of their duties. Fees related to the ICAV are charged to the trading Sub-Funds. Mr. Jim Finn is the only Director of the ICAV in receipt of a director's fee. All other Directors of the ICAV have each waived their entitlement to receive a director's fee.

The directors' fees charged for the year amounted to €12,514 (31 December 2022: €6,816) in respect of the Sub-Funds presented. The directors' fees payable as at 31 December 2023 was €15,058 (31 December 2022: €7,221) in respect of the Sub-Funds presented.

11. Administration Fees and Depositary Fees

The Manager and the Administrator entered into an administration agreement which is applicable for a three year period, effective 1 October 2020. The annual fee, payable out of the assets of the relevant Sub-Fund, is at a maximum rate of 0.05% (plus VAT, if any) and is a combined fee which includes both the Administrator and the fee of the Depositary. The fee is presented on the Statement of Comprehensive Income as Administration fees and Depositary fees.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

11. Administration Fees and Depositary Fees (continued)

The Administrator is also entitled to be reimbursed for all agreed registration and transaction fees and out of pocket expenses (plus VAT thereon, if any) properly incurred by it in the performance of its duties and responsibilities under the Administration Agreement.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

12. Auditors Remuneration

The remuneration to the statutory audit firm in respect of the services rendered to the ICAV in respect of the Sub-Funds presented for the financial year is as follows:

	31 December 2023	31 December 2022
	EUR	EUR
Audit fee*	248,873	154,504

* Audit fee amount shown is excluding VAT of 23%. There were no other fees paid to the statutory audit firm for tax or other assurance or non-audit work during the year.

13. Related and Connected Persons Transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The Directors of the ICAV are considered related parties. Details of Directors' fees charged during the year are disclosed in Note 10.

Mr. Fabio Melisso and Mr. Jim Firm (Independent director) are directors of the Manager and Mr. Ciaran Brady and Lorenzo Di Pietrantonio are employees of the Manager and will be considered to be interested in any agreement entered into by the ICAV with the Manager.

Sub-Funds of Core Series and FAM Evolution ICAV, which are also managed by the Manager, have made investments in the ICAV during the year. There were no other agreements entered into by the ICAV with either Core Series or FAM Evolution ICAV during the year.

Connected Persons

In accordance with the requirements of the UCITS Regulations, all transactions carried out with the ICAV by the promoter, manager, trustee, investment adviser and associates/group companies ("connected persons") must be carried out as if negotiated at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in the UCITS Regulations are applied to all transactions with connected parties and transactions with connected parties entered into during the period complied with the obligations set out in the UCITS Regulations.

Management Fee

The Manager is entitled to receive out of the assets of the ICAV a management fee in respect of each class, accrued daily and payable monthly in arrears at such annual percentage rate of the NAV of each class as set out in the relevant Sub-Fund supplement. Any out of pocket expenses incurred by the Manager in carrying out its role on behalf of the ICAV and its Sub-Funds shall be for its own account. These disclosed fees are the maximum charges capped as per the prospectus and actual fees charged may be lower.

14. Financial Instruments and Associated Risks

Each Sub-Fund's investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the prospectus for a more detailed discussion of the risks inherent in investing in each Sub-Fund. The Sub-Funds have exposure to the following risks from financial instruments:

- Market risk;
- Liquidity risk;
- Credit risk; and
- Operational risk.

Risk Management framework

The Directors review quarterly risk and investment performance reports and presentations from the Manager, or where applicable the Manager's delegate Investment Managers (together "the Manager" only for the purpose of Note 14), covering the Sub-Funds' performance and risk profile during the financial year.

The Manager is responsible for ensuring that each Sub-Fund is managed within the terms of their investment guidelines and limits set out in the prospectus. The Directors review the Manager's reporting on the investment performance, product risk monitoring and oversight activities and the monitoring and oversight of regulatory and operational risk for the Sub-Funds.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

14. Financial Instruments and Associated Risks (continued)

The Manager has been given discretionary authority to manage the assets in line with the investment objectives of each Sub-Fund. Compliance with the target asset allocations and the composition of the portfolio are monitored by the Directors on a quarterly basis. In instances where the portfolio has diverged from target asset allocations, the Manager is obliged to take actions to rebalance the portfolio in line with the established targets, within prescribed time limits.

(a) Market Risk

Market risk arises mainly from uncertainty about future values of financial instruments influenced by price, interest rate and currency movements. It represents the potential loss each Sub-Fund may suffer through holding market positions in the face of market movements. The Manager's strategy for the management of market risk is driven by the Sub-Funds' investment objective as set out in Note 1. The ICAV's market risk is managed on a daily basis by the Manager. The Manager moderates this risk through a careful selection of securities and other financial instruments within specified limits. Details of the nature of the ICAV's investment portfolio at the Statement of Financial Position date are disclosed in the Schedule of Investments.

Value at Risk

The Manager uses three approaches to measure the Sub-Funds' global risk exposures. These are the commitment approach, Absolute Value at Risk ("VaR") and Relative VaR. These approaches are described in the prospectus and the approach each Sub-Fund uses is outlined in the table below.

Sub-Fund	Base Currency	Risk Approach	Risk Basis
STOXX Europe 600 Index FAM Fund	EUR	VAR	Relative

Using the absolute VaR, the Manager estimates the potential loss in the Sub-Fund's portfolio over a set period at a certain confidence level, and is based on statistical analysis of historical price trends and volatilities. The VaR of the Sub-Funds shall be calculated daily and shall not exceed 13-20% per cent of the NAV of the Sub Fund, based on a 1 month holding period and a "one-tailed" 99 per cent confidence interval using a historical observation period of at least 1 year.

Using the relative VaR, the Manager estimates the potential loss in the Sub-Fund's portfolio over a set period at a certain confidence level, and based on statistical analysis of historical price trends and volatilities. The VaR of the Sub-Fund's portfolio is measured relative to the benchmark index which the Manager consider a comparable benchmark to the Sub-Fund's portfolio. In compliance with the UCITS Regulations, the relative VaR of the Sub Fund's portfolio shall not exceed twice the VaR of the index, as determined daily using a one-tailed confidence interval of 99%, a holding period of one month and a historical observation period of at least 1 year.

The 1 day VaR as of 31 December 2023 and 31 December 2022 based on a 99% confidence level is outlined in the table below:

Absolute VaR	31 December 2023	31 December 2022

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

14. Financial Instruments and Associated Risks (continued)

(a) Market Risk (continued)

Value at Risk (continued)

Some limitations of VaR analysis are:

- The models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns. As a consequence, VaR can be highly variable and a single date point analysis can be of limited value. VaR can fluctuate significantly over time;
- The composition of the ICAV can change significantly over a short period of time and, as such, the ICAV's risk profile including VaR may also change materially over a short time frame;
- The market price risk information is a relative estimate of risk rather than a precise and accurate number;
- The market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen);
- FX hedging for the benefit of a particular class are not included;
- Future market conditions could vary significantly from those experienced in the past.

(i) Price Risk

Price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Any increase or decrease in the market price of investments would alter the ICAV's net asset value to the extent that it was invested at the time. The ICAV's investment portfolio complies with the investment restrictions as disclosed in its prospectus.

Exposure to price risk

The tables below summarises the overall market exposure of financial assets and liabilities at FVTPL as at 31 December 2023 and 31 December 2022:

STOXX Europe 600 Index FAM Fund

Sensitivity

Sensitivity analysis for the Sub-Funds where the Manager do not use VAR approach is disclosed below.

Any increase or decrease in the market price of investments would alter the Sub-Fund's net asset value to the extent that it was invested at the time. The Sub-Fund's investment portfolio complies with the investment restrictions as disclosed in its prospectus. As at 31 December 2023 and 31 December 2022, if the fair value of investments to which the Sub-Funds were exposed had changed by 5% with all other variables held constant, this would have resulted in a change of net assets attributable to the shareholders by the amounts detailed below:

Sub-Fund		2023	2022
Fineco AM Euro Inflation Linked Government Bond Fund	EUR	13,557,814	12,133,930
Ultra Short Term Bond SRI FAM Fund	EUR	6,309,693	10,745,053
Enhanced Ultra Short Term Bond SRI FAM Fund	EUR	2,507,609	3,788,453
Emerging Markets Equity FAM Fund	USD	5,300,135	N/A

Management of price risk

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the price risk of the asset considered in the transaction and in reference to the risk framework and the ICAV's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed risk framework.

(ii) Interest Rate Risk

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

14. Financial Instruments and Associated Risks (continued)

(a) Market Risk (continued)

(ii) Interest Rate Risk (continued)

The ICAV's financial assets include direct interest bearing instruments. As a result the ICAV is exposed to fair value interest rate risk due to fluctuations in the prevailing levels of market interest rates. The ICAV's interest rate risk is managed on a daily basis by the Manager.

Cash and cash equivalents are not considered to be significantly exposed to fair value interest rate risk due to the short term nature of the instruments. Cash earns interest at a variable interest rate.

The interest bearing financial instruments significantly exposed to fair value interest rate risk are the bond investments. Consequently, movements in interest rates would have an inverse effect on the movement of the net asset value of the Sub-Funds.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the interest rate risk of the asset considered in the transaction and in reference to the risk framework and the ICAV's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed risk framework.

The following Sub-Funds held interest bearing instruments. Sensitivity is not presented here for the following Sub-Funds as VaR is presented for this Sub-Fund on Page 606 to 612.

(iii) Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Each Sub-Fund may invest in securities denominated in currencies other than their functional currency. Consequently, each Sub-Fund is exposed to risks that the exchange rate of their functional currency relative to other currencies may change in a manner which has an adverse effect on the value of the portion of each Sub-Fund's assets which are denominated in currencies other than their own currency.

The currency risk is in relation to the notional exposure on the forward currency contracts held by the Sub-Funds. These are detailed on the Schedule of Investments.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the currency risk of the asset considered in the transaction and in reference to the risk framework and the ICAV's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed risk framework.

(b) Liquidity Risk

Liquidity risk is the risk that the Sub-Funds' may not be able to generate sufficient cash resources to settle their obligations in full as they fall due or can do so only on terms that are materially disadvantageous.

Each Sub-Fund's principal liquidity risks arise from the ability of investors to effect redemption requests and the liquidity of the underlying investments each Fund has invested in.

Each Sub-Fund's Unitholders may redeem their units on the close of any daily dealing deadline for cash equal to a proportionate share of each Sub-Fund's NAV, excluding any duties and charges where applicable. Each Sub-Fund is therefore potentially exposed to the liquidity risk of meeting the unitholders' redemptions and may need to sell assets at prevailing market prices to meet liquidity demands.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio liquidity from the liquidity risk of the asset considered in the transaction and in reference to the risk framework and the ICAV's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed risk framework. The ICAV's overall liquidity risks are monitored on a quarterly basis by the Board of Directors.

All of the Sub-Funds assets and liabilities as of 31 December 2023 can be received or paid within or less than 1 month. While the accrued expenses can be paid within or less than 1 month not all are and some can be paid at a later date due to frequency or delay of invoicing. This delay can at times exceed 1 year. The following were the contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted.

(c) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the ICAV. The carrying amount of financial assets as per the Statement of Financial Position best represents the maximum credit risk exposure as at its date. Credit risk on transactions with brokers relates to transactions awaiting settlement. Risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the broker used. Substantially all of the assets of the ICAV are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the ICAV's rights with respect to securities or cash held by the Depositary to be delayed or limited. The ICAV manages its risk by monitoring the credit quality and financial position of the Depositary the ICAV uses. The credit rating for the Depositary as at 31 December 2023 was A+ (31 December 2022: A+) published by Standard & Poor's.

The cash and cash equivalents, balances due from brokers and balances due to brokers are held with bank and financial institution counterparties, which are rated BBB+ to AA (31 December 2022: BBB+ to AA), based on Standard & Poor's ratings. The derivatives are entered into with bank and financial institution counterparties, which are rated BBB+ to AA (31 December 2022: BBB+ to AA), based on Standard & Poor's ratings.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

14. Financial Instruments and Associated Risks (continued)

(c) Credit Risk (continued)

The Manager manages issuer risk through building diversified portfolios to limit exposure to any one issuer in accordance with the ICAV's investment objectives. The ICAV employs well known counterparties and ensures that concentration of investment in any one stock or counterparty is monitored against set limits.

Additionally, if required, the Manager will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the ICAV's investment objectives. The Manager monitors compliance with these restrictions on a daily basis.

All transactions in listed securities are settled/paid upon delivery using approved brokers. The risk of default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The credit ratings of all derivative counterparties are monitored regularly. The risk managers review counterparty credit ratings and approve the use of such counterparties.

The below table shows the breakdown by credit rating of the bonds in the Sub-Funds' portfolios:

Offsetting and amounts subject to master netting arrangements

The ICAV has not offset any financial assets and financial liabilities in the statement of financial position. The disclosures set out in the tables below include financial assets and financial liabilities that are subject to an enforceable master netting or derivative clearing agreement that covers derivatives.

The International Swaps and Derivatives Association (“ISDA”) and similar master netting agreements do not meet the criteria for offsetting in the statement of financial position. This is because the ICAV does not have any currently legally enforceable right to offset recognised amounts, because the right to offset is enforceable only on the occurrence of future events such as a default of the ICAV or the counterparties or other credit events.

The collateral provided in respect of the above transactions is subject to the standard industry terms of ISDA’s Credit Support Annex. This means that securities received/given as collateral can be pledged or sold during the term of the transaction but have to be returned on maturity of the transaction. The terms also give each counterparty the right to terminate the related transactions on the counterparty’s failure to post collateral.

The following tables disclose the derivative financial assets and liabilities subject to enforceable netting and similar arrangements, presented on an aggregate basis across multiple counterparties. Counterparties are analysed on an individual basis, offsetting assets and liabilities with individual counterparties where appropriate to do so while incorporating the collateral held by or posted by the Sub-Funds with respect to the open positions. The following tables present the total net exposure to counterparties with respect to derivative assets and liabilities on a Sub-Fund by Sub-Fund basis.

STOXX Europe 600 Index FAM Fund

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

14. Financial Instruments and Associated Risks (continued)

(d) Operational Risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the processes, technology and infrastructure supporting the Sub-Fund activities with financial instruments, either internally within the Sub-Fund or externally at the Sub-Fund's service providers, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of investment management behaviour.

The Sub-Funds' objectives are to manage operational risk so as to balance the limiting of financial losses and damage to its reputation with achieving its investment objective of generating returns to investors.

The primary responsibility for the development and implementation of controls over operational risk rests with the Directors. This responsibility is supported by the development of overall standards for the management of operational risk, which encompasses the controls and processes at the service providers and the establishment of service levels with the service providers, in the following areas:

- Documentation of controls and procedures;
- Requirements for:
 - Appropriate segregation of duties between various functions, roles and responsibilities;
 - Reconciliation and monitoring of transactions; and
 - Periodic assessment of operational risk faced.
- The adequacy of controls and procedures to address the risks identified;
- Compliance with regulatory and other legal requirements;
- Development of contingency plans;
- Training and professional development;
- Ethical and business standards; and
- Risk mitigation, including insurance if this is effective.

The Directors' assessment of the adequacy of the controls and processes in place at the service providers with respect to operational risk is carried out via regular discussions with the service providers and a review of the service providers' Service Organisation Controls reports on internal controls, if any are available.

15. Fair Value of Financial Instruments

Each Sub-Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

- Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data; and
- Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

15. Fair Value of Financial Instruments (continued)

The Administrator will, where possible, obtain asset pricing or valuation information from various sources and apply those valuations in line with agreed price sources and validation procedures to the assets held by the Sub-Funds for the purposes of calculating the Sub-Funds' NAVs. The Administrator is required to ensure that the valuation methodology applied to the Sub-Funds' assets is in compliance with Valuation Policy and the valuation rules as set out in the relevant Sub-Funds' constitutional documents and the Prospectus.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. The ICAV recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred. There were no transfers between levels for the year ended 31 December 2023 and year ended 31 December 2022.

The determination of what constitutes 'observable' requires significant judgement. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable, verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables provide an analysis of each Sub-Fund's financial assets and financial liabilities measured at fair value as at 31 December 2023.

Cash and cash equivalents, receivable for securities, subscriptions receivable, due from brokers, interest and other assets, bank overdraft, payable for securities purchased, management fees payable, redemptions payable, dividend payable, due to shareholders, due to brokers, accrued expenses and net assets attributable to holders of redeemable participating shares are not included in the tables below. Their carrying amount is a reasonable approximation of fair value.

ZAR	18.2875	N/A

17. Efficient Portfolio Management

The ICAV may employ investment techniques and instruments for efficient portfolio management of the assets of the ICAV and, in particular, the ICAV may, for the purpose of hedging (whether against currency, exchange or interest rate risks or otherwise), or for direct investment purposes, purchase or sell put options and call options, spot contracts, forward contracts, futures contracts and other derivative instruments and may also enter into sale and repurchase agreement.

Subject to the conditions and within the limits otherwise stated in the investment objective and policies of a Sub-Fund, the Manager may employ investment techniques and instruments such as futures, options, forward foreign currency contracts and other derivatives for investment purposes, hedging or efficient portfolio management.

Please refer to the Prospectus for more details regarding efficient portfolio management.

18. Cross Liability

Liabilities incurred by a Sub-Fund of the ICAV may be discharged solely out of the assets of that Sub-Fund such that creditors of Sub-Funds will not have recourse to the assets of the other Sub-Funds of the ICAV to settle any liabilities incurred.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

19. Taxation

Under current law and practice, the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. It is not chargeable to Irish tax on its income or capital gains. However, the ICAV is obliged to apply a withholding tax on any distribution payments to Irish residents or ordinarily resident shareholders on any encashment, redemption or transfer of units by an Irish resident or ordinarily resident shareholder, unless the shareholder is exempted under Section 739D of the Taxes Consolidation Act, 1997, as amended. Shareholders who complete a declaration confirming that they are not Irish residents are not liable to Irish tax on the income or gains arising from their investment in the ICAV and no withholding tax will be deducted on any payments made to them. Where the ICAV has a concession from the Revenue Commissioners it may be possible to obtain an exemption from the requirement to have a valid non-resident declaration in place.

If the ICAV fails to deduct the tax or fails to collect the appropriate signed declaration from any non-resident or exempted shareholders, the ICAV will remain liable for the tax. In these circumstances, the ICAV would seek to recover the tax paid from the relevant shareholder.

Capital gains and interest received by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its shareholders.

20. Events During the Financial Year

Effective 6 January 2023, the Manager appointed Allianz Global Investors GmbH as investment advisor of Fineco AM Euro Credit Bond Fund, replacing HSBC Global Asset Management (France).

As of 11 January 2023, the investment policies of each of Euro Bond FAM Fund and Euro Corporate Fixed Income FAM Fund were amended to reflect the addition of contingent convertible debt securities ("CoCos") within the portfolios of these Sub-Funds. Other minor amendments to the Article 6 SDR disclosures were also made, together with the removal of any direct/indirect investment in Russian securities for Euro Bond FAM Fund. Shareholders approved the addition of CoCos at extraordinary general meetings of the Sub-Funds held on 5 January 2023. Shareholders were provided with advance notice of the other changes.

Effective 13 February 2023, the Manager appointed M&G Investment Management Limited to act as Investment Manager to the Jupiter Flexible Income FAM Fund, replacing Jupiter Asset Management Limited, and the Sub-Fund was also re-named as Flexible Income FAM Fund on this date.

As of 31 May 2023, the investment policies section of the supplement for Fineco AM US Dollar Bond Fund was amended to clarify that the Sub-Fund may invest substantially or fully in fixed income securities issued by the United States government. The Supplement was also amended to provide that the Sub-Fund may be fully collateralised in different transferable securities and money market instruments issued or guaranteed by any Member State, or one of its local authorities, or a public international body to which one or more Member States belong provided that the relevant securities are from at least six different issues and no single issue shall make up more than 30% of the Sub-Fund's net asset value, as permitted by the Central Bank and in line with its requirements. Shareholders were provided with advance notice of these changes.

Effective 28 November 2023, the Manager appointed CPR Asset Management to act as Investment Manager to Medtech FAM Fund and Global Disruptive Opportunities FAM Fund, replacing Amundi Ireland Limited.

The following Sub-Funds launched during the financial year:

* These Financial Statements exclude the Sub-Funds marked above which are presented in a separate sets of Financial Statements, refer to Note 1.

In 2023, the following Sub-Funds have updated the supplements as the Sub-Fund investment manager's intention is to pursue a new investment objective with the aim to provide dividends at certain dates, while protecting the NAV of EUR 100 at the new defined maturity intended to be 3 years from the expiration of the previous term. As a result, the following Sub-Funds have updated the supplement with new maturity date and has been renamed to the following:

Previous Name	New Fund Name post maturity	New Maturity Date
Global Defence FAM Fund 2023	Global Defence FAM Fund 2026	30 November 2026
Smart Global Defence FAM Fund 2023	Smart Global Defence FAM Fund 2026	30 December 2026
Smart Global Defence FAM Fund 2023 II	Smart Global Defence FAM Fund 2026 II	30 December 2026

The Dealing Deadline of 11.59am on 22 December 2023 for each of Smart Global Defence FAM Fund 2023 and Smart Global Defence FAM Fund 2023 II was temporarily extended to 11.59 am on 27 December 2023 in light of a public holiday over the Christmas period. Shareholders were provided with advance notice of this change.

Geopolitical Conflicts

The recent outbreak of geopolitical conflicts all over the world can have an impact on the global economies. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

Silicon Valley Bank Collapse and Credit Suisse forced merger

In March, the landscape was shaken by the collapse of Silicon Valley Bank and the forced merger of UBS and Credit Suisse, raising concerns of potential contagion throughout the global banking system. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

There were no other significant events during the financial year.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

21. Events Post Financial Year End

The following Sub-Funds launched after the financial year:

Smart Defence Multi-Strategy 2030 Fineco AM Fund II	17 January 2024
Smart Global Defence 2029 Fineco AM Fund IV	17 January 2024
Smart Global Defence Zero Coupon Fineco AM Fund	14 February 2024
European Leaders Fineco AM Fund	28 February 2024
Smart Defence Multi-Strategy 2031 Fineco AM Fund	17 April 2024
European Leaders Fineco AM Fund II	24 April 2024

There are no other events after the year end that had a material effect on the Financial Statements.

22. Soft Commission Arrangements

The Manager or the relevant Investment Managers of the Sub-Funds may effect transactions that will from time to time provide or procure the Manager or the Investment Managers goods and services and other benefits such as research and advisory services provided that the nature of which is such that their provision shall assist in the provision of investment services to the ICAV as a whole and which no direct payment is made but instead the Manager undertakes to place business with that party. In any event it is agreed that the execution of transactions will be on the basis of best execution standards and brokerage rates will not be in excess of customary institutional rates. Each Investment Manager shall also comply with additional regulations governing soft commission practices including where relevant requirements under MiFID II, which governs the extent to which commissions, inducements, research reports or other non-minor monetary benefits may be paid or received from brokers.

For the year ended 31 December 2023 and the year 31 December 2022, the following Investment Managers have entered into soft commission arrangements for research purposes as permitted by applicable regulation on behalf of the Sub-Funds with broker counterparties.

Investment Manager	Sub-Fund
Invesco Advisers, Inc	US Equity Value FAM Fund
Infusive Asset Management Inc.	Infusive Consumer Alpha Global Leaders FAM Fund

The total aggregate amount of soft commissions is USD 406,803 for the Financial Statements year ended 31 December 2023 (31 December 2022: USD 237,959).

There were no other soft commission arrangements for the financial year ended 31 December 2023 and year ended 31 December 2022.

23. Reconciliation to Published NAV

As at 31 December 2023 and 31 December 2022, the NAV stated in these Financial Statements differ from the published NAV for certain Sub-Funds. The difference for 31 December 2023 was due to investor dealing booked after the NAV was finalised. This difference was not material on any Sub-Fund and therefore the NAV was not republished.

(i) Reconciliation of Net Asset Value

The following tables show the reconciliation between the NAV as per Financial Statements, Published NAV, and impact in basis points ("BPS"):

STOXX Europe 600 Index FAM Fund (continued)

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

Value at Risk Approach

Value at Risk (“VaR”) is a statistical risk measure that estimates the potential loss from adverse market movements in an ordinary market environment.

Please refer to the financial risks Note 14 to the Financial Statements for further details on the measure of VaR.

The Directors use Relative VaR to monitor and manage the global exposure of some of the Funds and Absolute VaR for others as set out below. For Relative VaR, the VaR of the respective Fund’s portfolio will not exceed twice the VaR of the reference portfolio. For Absolute VaR, the monthly VaR will not exceed 20% of the Fund’s NAV. Where a VaR calculation is performed using a horizon other than the one-month regulatory limit, this 20% limit shall be rescaled to reflect the appropriate risk horizon period as directed by the relevant regulatory guidelines. Utilisation refers to the level of risk taken in this context.

The table below details the highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the respective Absolute or Relative VaR regulatory limit.

Sub-Fund	Global Exposure Type	Risk Model	Reference Risk Portfolio	Highest utilisation of the VaR limit %	Lowest utilisation of the VaR limit %	Average utilisation of the VaR limit %

LEVERAGE

The use of FDIs may expose a Fund to a higher degree of risk. In particular, FDI contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on FDIs than on standard bonds or equities.

Leveraged FDI positions can therefore increase a Fund's volatility. Disclosed in the table below is the level of leverage employed by each relevant Fund during the financial year ended 31 December 2023.

Sub-Fund	% Average Leverage Employed
STOXX Europe 600 Index FAM Fund	99.33%
FAM MSCI World Index Fund	99.35%

UCITS V Remuneration Disclosure

Fineco Asset Management Designated Activity Company (the “Management Company”), the Management Company of FAM Series UCITS ICAV acts as the Management Company for two other umbrella UCITS.

The Management Company follows a remuneration policy which complies with the requirements of the UCITS regulation in Ireland and in particular the S.I. 143/2016.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of the talent, skills and competencies, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and the Management Company as a whole, and it is based on both financial and non-financial criteria, among other criteria.

The total remuneration paid by the Management Company to its staff for the financial year end 31 December 2023 is as follows:

Financial Year End 31 December 2023

	<u>Fixed</u>	<u>Variable</u>	<u>Total</u>
Employees	7,363,650	2,341,062	9,704,712
Executive Directors	991,983	977,314	1,969,297
Non-Executive Directors	88,900	-	88,900

The ICAV represents as at 31 December 2023 around 63% of the Total AUM of the Management Company.

The remuneration policy is reviewed at least annually.

Sustainable Finance Disclosure Regulation (SFDR)

Environmental, social and governance ("ESG") Integration describes the mechanism by which the Manager, acting through the Investment Manager as its delegate, when applicable, may integrate sustainability risks into investment decision-making, which may, where relevant, require the Investment Manager to assess the potential sustainability risks associated with the purchase of investments.

Sustainability Risk means an ESG event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of a Sub-Fund's investment. Sustainability risks can either represent a risk of their own or have an impact on other risks which they may contribute significantly to such as market risks, operational risks, liquidity risks or counterparty risks.

The ICAV reserves the right to reassess the classification of its Sub-Funds under Regulation (EU) 2019/2088 ("SFDR") at any time and shall keep this classification under review in case of issuing of new or amendments made to the applicable Regulatory Technical Standards ("RTS") to SFDR or any other relevant pieces of legislation or regulation or regulatory guidance impacting such a classification. RTS are standards for implementation of the provisions set forth in SFDR issued by the European Supervisory Authorities ("ESAs") to market operators.

If the ICAV determines at any future point that a Sub-Fund does not meet the criteria to qualify as an Art. 8 or Art. 9 SFDR fund, the relevant disclosure pertaining to such a Sub-Fund shall be updated or withdrawn as appropriate, in accordance with the revised classification of the Sub-Fund.

The following Sub-Funds are classified as Article 6 funds under the Sustainable Finance Disclosure Regulation ("SFDR"):

Sub-Fund	SFDR Classification	Investment Manager
STOXX Europe 600 Index FAM Fund	Article 6	Fineco Asset Management Designated Activity Company
FAM MSCI World Index Fund	Article 6	Fineco Asset Management Designated Activity Company

The investments underlying the above-named Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities. The classification of the abovenamed Sub-Funds as Article 6 SFDR funds means that the Sub-Funds do not promote environmental or social characteristics in a way that meet the specific criteria contained in Article 8 of SFDR or have Sustainable Investment as its objective in a way that meet the specific criteria contained in Article 9 of SFDR.

When assessing the Sustainability Risks associated with the Fund's underlying investments, the Manager (or the Investment Manager, as the case) is attempting to understand the likelihood of the risk that the value of such underlying investments could be materially negatively impacted by an environmental, social or governance event or condition. While the Manager (or the Investment Manager, as the case) integrates Sustainability Risk into the Sub-Fund's investment decision making process, the output of such Sustainability Risk integration is not the determining factor, nor potentially even among the most prominent factors, considered in the investment decisions in respect of the assets which the Sub-Fund may buy and/or hold. Accordingly, the Manager (or the Investment Manager, as the case) may buy and/or hold assets which may expose the Sub-Fund to high or low levels of Sustainability Risk. For further information on how Sustainability Risks are integrated, please refer to section "SFDR disclosure" under each Sub-Fund's supplement.

The following sub-funds are classified as financial products which promote environmental and/or social characteristics pursuant to Article 8 and Article 9 SFDR:

Sub-Fund	SFDR Classification	Investment Manager
Fineco AM Smart Factors Europe Fund	Article 8	Fineco Asset Management Designated Activity Company
Fineco AM Smart Factors US Fund	Article 8	Fineco Asset Management Designated Activity Company

SFDR and Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending SFDR (the "Taxonomy Regulation") require certain information to be disclosed in the audited financial statements where a Sub-Fund is classified under Article 8 or Article 9 of SFDR. This information is required to be presented in the form of the template set out in the annexes to Commission Delegated Regulation (EU) 2023/363 of 31 October 2022 amending and correcting the regulatory technical standards laid down in Delegated Regulation (EU) 2022/1288, which supplement SFDR. Further information on the environmental and/or social characteristics promoted by the Sub-Funds during the year can therefore be found in the annexes to these financial statements (the "SFDR Annexes").

The data used to complete the disclosures set out in the SFDR Annexes for the Sub-Funds is provided:

- For internally managed Sub-Funds other than Funds of Funds: by relevant third-party sources.
- For Sub-Funds managed by Delegate Investment Managers: by the relevant Delegate Investment Managers.
- The data used is the data available as at the year-end considered by the financial statements (December 2023) on backward-looking analysis.

The analysis is dependent on the underlying investee entities disclosing relevant data and the availability of this data can be limited. Data may also be incomplete, inaccurate and/or contain errors that may not be detected by the Manager. It has been observed that the availability and accuracy of data, from the relevant third party data providers and underlying investee entities, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in the SFDR Annexes should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and, where applicable for the relevant Sub-Fund, the Investment Manager, the Board of the ICAV continues to monitor the ongoing development and evolution of sustainability-related regulation, including SFDR and the Taxonomy Regulation, and associated guidance and the availability of relevant third party and investee entities' data in this regard.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM Smart Factors Europe Fund
Legal entity identifier: 6354005QDHWPSX4NGJ31

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ ☒ **No**

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

1. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested were issued by companies that were only listed in ESG screened indices which

promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions): The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023:

- i. The Fund level ESG score was rated MSCI “A” or above in 2023;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund’s positive ESG tilt which was 98%;
- iii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG

Manager (or another corresponding rating from a similar rating provider) which was 98%; and

- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 98%.

● ***...and compared to previous periods?***

- i. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund's positive ESG tilt which was 98% as at 31 December 2022;
- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 98% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 98% as at 31 December 2022

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the portfolio managers could improve at Fund level and where the portfolio managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas

- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

- 4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

- 9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 – 31 December 2023

Largest investments	Sector	% Assets	Country
VALERO ENERGY CORP	DISTRIBUTION WATER GAS ELECTRICITY ENERGY	6.60%	United States of America
WALT DISNEY CO/THE	AUDIOVISUAL	6.49%	United States of America
ADOBE INC	SOFTWARE	6.32%	United States of America
ULTA BEAUTY INC	DISTRIBUTION/ RETAIL TRADE	6.24%	United States of America
ALPHABET INC-CL A	INTERNET	4.73%	United States of America
NVIDIA CORP	ELECTRICS/ ELECTRONICS	4.28%	United States of America
TESLA INC	CONSTRUCTION OF MACHINERY AND VEHICLES	4.19%	United States of America
VERIZON COMMUNICATIONS INC	TELECOMMUNICATIONS	3.84%	United States of America
CATERPILLAR INC	CONSTRUCTION OF MACHINERY AND VEHICLES	3.59%	United States of America
BERKSHIRE HATHAWAY INC-CL B	INSURANCES	3.51%	United States of America
MERCK & CO. INC.	PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	3.51%	United States of America

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives.*

What was the proportion of sustainability-related investments?

Not applicable

Asset allocation describes the share of investments in specific assets.

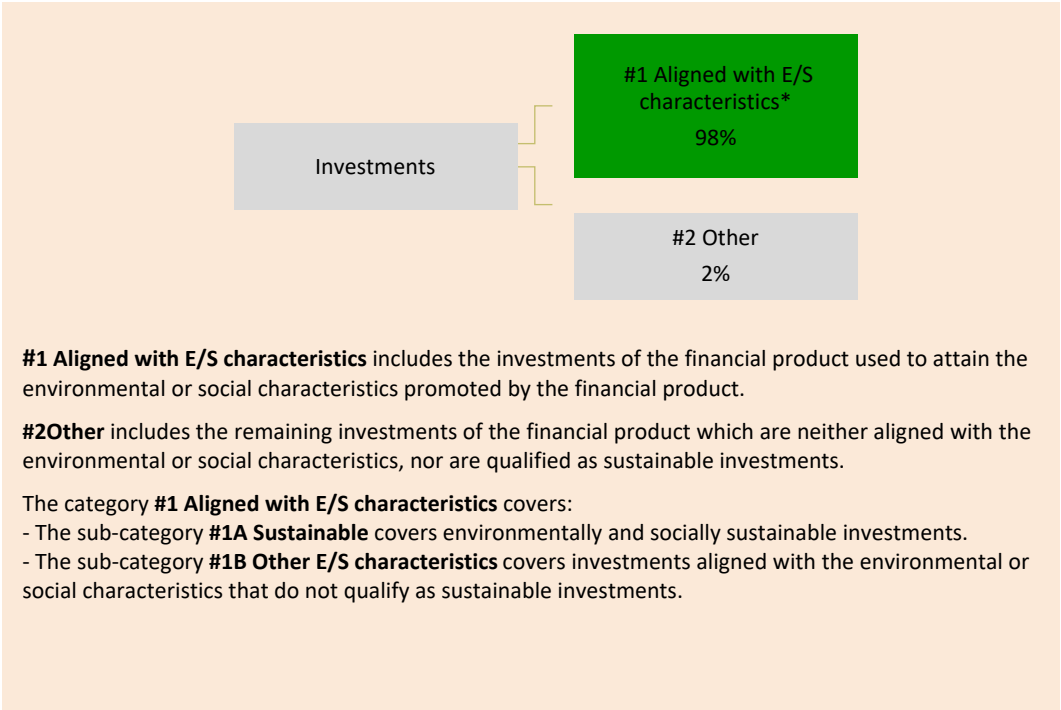

● What was the asset allocation?

98% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average’s Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

Largest investments	% Assets
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	14.32%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	11.04%
CONSTRUCTION OF MACHINERY AND VEHICLES	11.03%
INTERNET	10.93%
OTHER CREDIT INSTITUTIONS	9.88%
DISTRIBUTION/ RETAIL TRADE	8.65%
AUDIOVISUAL	6.49%
ELECTRICS/ ELECTRONICS	6.48%
SOFTWARE	6.32%
TELECOMMUNICATIONS	3.84%
INSURANCES	3.51%
OFFICE EQUIPMENT AND MATERIAL	3.25%
TEXTILES AND CLOTHING	0.48%
CONSUMPTION GOODS/ FOOD/ BREWERY	0.41%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Manager’s exclusion policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM Smart Factors US Fund
Legal entity identifier: 635400BBL1NUARC1GL46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ ☒ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

1. **Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no

significant harm. In 2023, the Fund had a proportion of 56% of sustainable investments

2. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing ESG ratings attributed to such companies by the Manager and/or third party data providers with the exclusion of ESG “laggards” from the Fund’s direct investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

reference to ESG scores means ESG score data received from third party data provider/s) in 2023:

- i. The percentage of the Fund portfolio made in sustainable investments which was 56%
- ii. The Fund level ESG score was rated MSCI “A” or;
- iii. The percentage of the Invested in ESG screened index constituents which was 97%;
- iv. The percentage of the underlying direct holdings of the Fund rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 97%; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 97%

● ***...and compared to previous periods?***

- i. The percentage of the Fund portfolio made in sustainable investments which was 28% as at 31 December 2022
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested in ESG screened index constituents which was 93% as at 31 December 2022;
- iv. The percentage of the underlying direct holdings of the Fund rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 93% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 93% as at 31 December 2022

Please be informed that the difference between the percentages of sustainable investments disclosed between 2022 and 2023 mainly relies on an update to the third party data provider’s sustainable investments calculation methodology which the Manager relies on as follows:

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the Science Based Targets initiative (“SBTi”). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed

by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR:

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

In 2023, the Fund had a proportion of 56% of sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy .

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Principal adverse impact (“PAI”) indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations were used as the basis of assessment of adverse impacts on

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways:

1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
 - a. Made in investee companies that demonstrate good governance:
 - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
 - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the portfolio managers could improve at Fund level and where the portfolio managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
EQUINIX INC	REAL ESTATE AND HOUSING	6.77%	UNITED-STATES (U.S.A.)
TESLA INC	CONSTRUCTION OF MACHINERY AND VEHICLES	5.20%	UNITED-STATES (U.S.A.)

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives.*

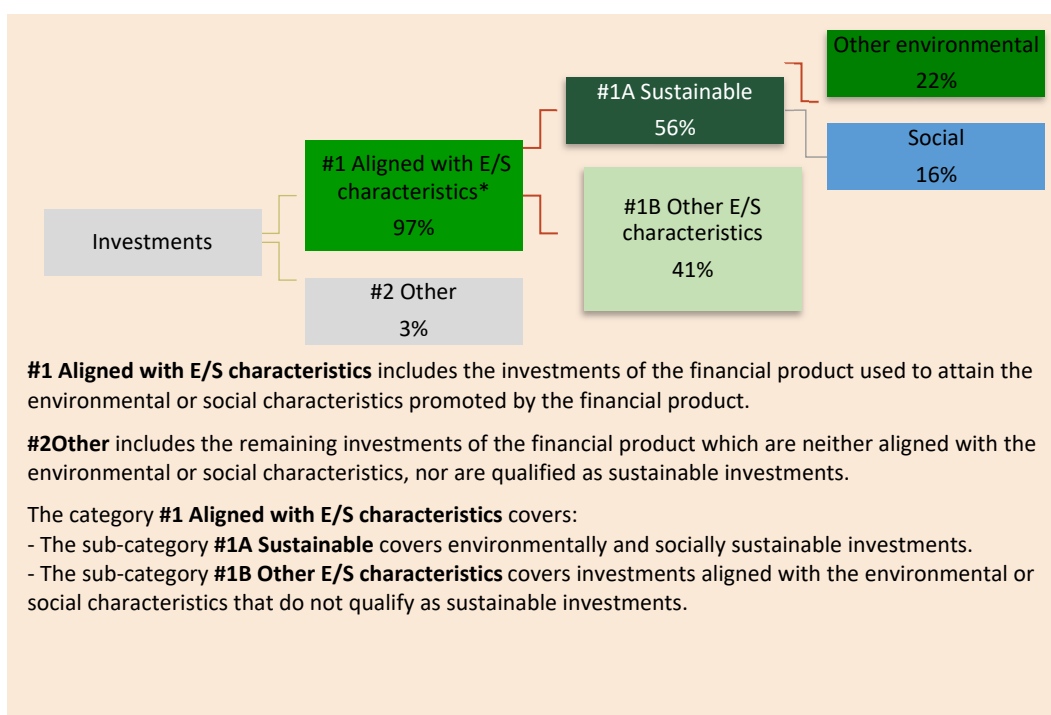

What was the proportion of sustainability-related investments?

56%

● What was the asset allocation?

1% of the Fund's investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 15% in sustainable investments and, in 2023, the Fund had a proportion of 56% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

Asset allocation describes the share of investments in specific assets.

*** Please note that the above is calculated using the quarterly average's Total Net Asset Value of the Fund.**

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 – 31 December 2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Largest investments	% Assets
INTERNET	15.38%
SOFTWARE	12.39%
DISTRIBUTION/ RETAIL TRADE	10.84%
MISCELLANEOUS SERVICES	7.92%
ELECTRICS/ ELECTRONICS	7.05%
REAL ESTATE AND HOUSING	6.77%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	6.77%
CONSTRUCTION OF MACHINERY AND VEHICLES	5.20%
AUDIOVISUAL	3.92%
CONSUMPTION GOODS/ FOOD/ BREWERY	3.65%
TELECOMMUNICATIONS	3.56%
OTHER CREDIT INSTITUTIONS	3.50%
TRANSPORTATION AND TRANSPORTATION MATERIALS	3.37%
TEXTILES AND CLOTHING	3.10%
INSURANCES	1.58%
DISTRIBUTION WATER GAZ ELECTRICITY ENERGY	0.83%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

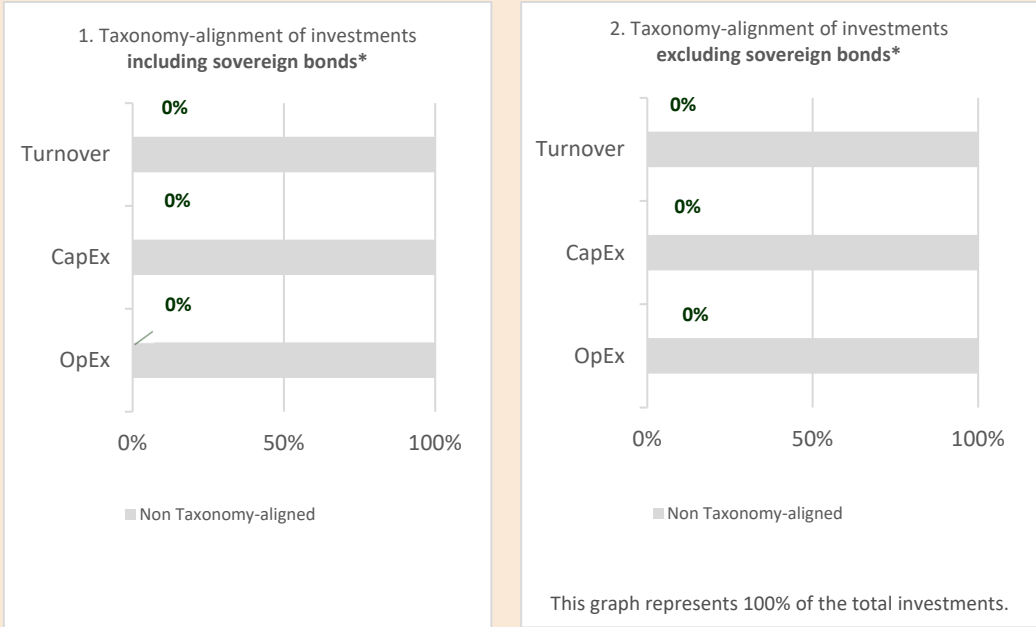

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 22%.

What was the share of socially sustainable investments?

Socially sustainable investments represented 16% of the financial product.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 56% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question *“What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?”*.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM Smart Factors World Fund
Legal entity identifier: 635400Y2K6BEEDQHY471

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ ☒ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no

significant harm. In 2023, the Fund had a proportion of 59% of sustainable investments

2. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing ESG ratings attributed to such companies by the Manager and/or third party data providers with the exclusion of ESG “laggards” from the Fund’s direct investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that

reference to ESG scores means ESG score data received from third party data provider/s) in 2023:

- i. The percentage of the Fund portfolio made in sustainable investments which was 59%
- ii. The Fund level ESG score was rated MSCI “AA” or;
- iii. The percentage of the Invested in ESG screened index constituents which was 98%;
- iv. The percentage of the underlying direct holdings of the Fund rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 98%; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 98%

● ***...and compared to previous periods?***

- i. The percentage of the Fund portfolio made in sustainable investments which was 25% as at 31 December 2022
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested in ESG screened index constituents which was 98% as at 31 December 2022;
- iv. The percentage of the underlying direct holdings of the Fund rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 98% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 98% as at 31 December 2022

Please be informed that the difference between the percentages of sustainable investments disclosed between 2022 and 2023 mainly relies on an update to the third party data provider’s sustainable investments calculation methodology which the Manager relies on as follows:

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the Science Based Targets initiative (“SBTi”). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed

by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

Link to our published sustainable investments methodology:

<https://finecoassetmanagement.com/wp-content/uploads/2023/09/FINECO-AM-Sustainable-Investment-Methodology.pdf>

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR:

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

In 2023, the Fund had a proportion of 59% of sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy .

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Principal adverse impact (“PAI”) indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations were used as the basis of assessment of adverse impacts on

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways:

1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
 - a. Made in investee companies that demonstrate good governance:
 - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
 - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the portfolio managers could improve at Fund level and where the portfolio managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
TESLA INC	CONSTRUCTION OF MACHINERY AND VEHICLES	6.41%	UNITED-STATES (U.S.A.)

MERCADOLIBRE INC	INTERNET	3.98%	UNITED-STATES (U.S.A.)

The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023) This data includes all securities, excluding derivatives.

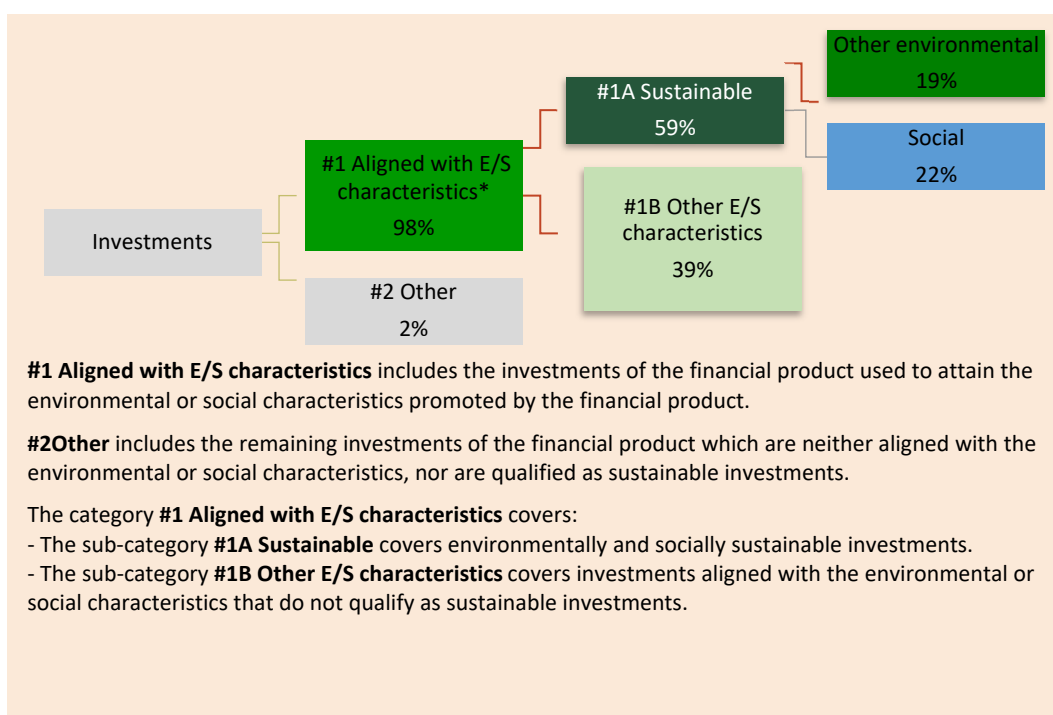

What was the proportion of sustainability-related investments?

59%

● What was the asset allocation?

0% of the Fund's investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 15% in sustainable investments and, in 2023, the Fund had a proportion of 59% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

Asset allocation describes the share of investments in specific assets.

*** Please note that the above is calculated using the quarterly average's Total Net Asset Value of the Fund.**

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 – 31 December 2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Largest investments	% Assets
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	24.03%
INTERNET	17.07%
CONSTRUCTION OF MACHINERY AND VEHICLES	10.47%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	8.32%
SOFTWARE	8.19%
DISTRIBUTION/ RETAIL TRADE	4.56%
OTHER CREDIT INSTITUTIONS	4.27%
TEXTILES AND CLOTHING	3.90%
INSURANCES	3.86%
AUDIOVISUAL	3.68%
TELECOMMUNICATIONS	3.67%
ELECTRICS/ ELECTRONICS	3.35%
OFFICE EQUIPMENT AND MATERIAL	1.27%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 19%.

What was the share of socially sustainable investments?

Socially sustainable investments represented 22% of the financial product.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 59% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question *“What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?”*.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***
Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ESG Target Global Coupon 2026 FAM Fund

Legal entity identifier: 2549005LVIVCLB15M894

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested

were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions): The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s) in 2023:

- i. The Fund level ESG score was rated MSCI “AA” or above;
- ii. The percentage of the Fund invested in ESG screened index

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

constituents which demonstrated the Fund's positive ESG tilt which was 101%;

- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 101%; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 101%.

● **...and compared to previous periods?**

- i. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund's positive ESG tilt which was 0% as at 31 December 2022;
- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 0% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 0% as at 31 December 2022

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the portfolio managers could improve at Fund level and where the portfolio managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. Greenhouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector

5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
BNP PARIBAS	BANKS	10.07%	France
TOTALENERGIES SE	DISTRIBUTION WATER GAS ELECTRICITY ENERGY	9.33%	France
ORANGE	TELECOMMUNICATIONS	9.00%	France
ENGIE SA	REAL ESTATE AND HOUSING	5.23%	France
MICHELIN (CGDE)	CONSTRUCTION OF MACHINERY AND VEHICLES	4.67%	France
CREDIT AGRICOLE SA	BANKS	4.65%	France
SOCIETE GENERALE SA	BANKS	4.52%	France
AXA SA	INSURANCES	4.52%	France

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives*

What was the proportion of sustainability-related investments?

Not applicable

What was the asset allocation?

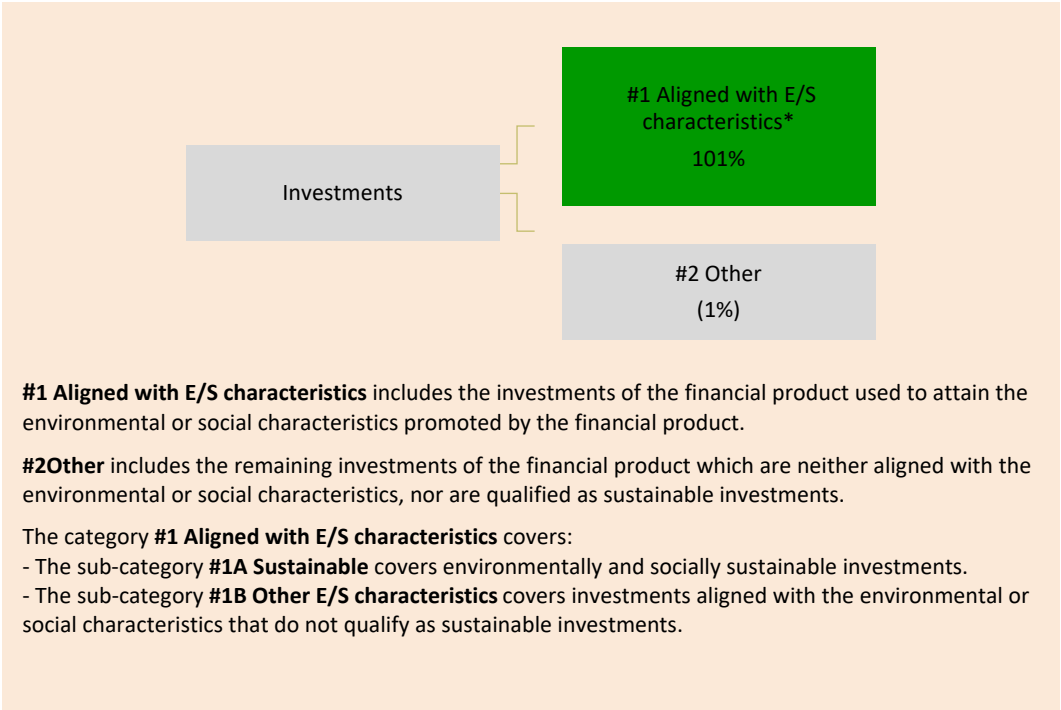

Asset allocation describes the share of investments in specific assets.

101% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average’s Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

Largest investments	% Assets
BANKS	19.25%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	18.13%
INSURANCES	11.78%
BUILDING AND BUILDING MATERIALS	11.17%
TELECOMMUNICATIONS	9.00%
CONSUMPTION GOODS/ FOOD/ BREWERY	7.07%
REAL ESTATE AND HOUSING	5.23%
CONSTRUCTION OF MACHINERY AND VEHICLES	4.67%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	4.44%
CHEMICAL PRODUCTS	3.88%
AUDIOVISUAL	3.02%
OTHER CREDIT INSTITUTIONS	2.59%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Taxonomy-aligned activities are expressed as a share

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

(OpEx) reflecting green operational activities of investee companies.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*
Not applicable
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
Not applicable
- *How did this financial product perform compared with the reference benchmark?*
Not applicable
- *How did this financial product perform compared with the broad market index?*
Not applicable

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ESG Target Global Coupon 2026 FAM Fund II

Legal entity identifier: 254900HGJG4YNK0UXQ75

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested

were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions): The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s) in 2023:

- i. The Fund level ESG score was rated MSCI “AA” or above;
- ii. The percentage of the Fund invested in ESG screened index

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

constituents which demonstrated the Fund's positive ESG tilt which was 103%;

- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 103%; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 103%.

● **...and compared to previous periods?**

- i. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund's positive ESG tilt which was 0% as at 31 December 2022;
- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 0% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 0% as at 31 December 2022

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the portfolio managers could improve at Fund level and where the portfolio managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. Greenhouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector

5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
BNP PARIBAS	BANKS	9.94%	France
TOTALENERGIES SE	DISTRIBUTION WATER GAS ELECTRICITY ENERGY	9.40%	France
ORANGE	TELECOMMUNICATIONS	9.07%	France
ENGIE SA	REAL ESTATE AND HOUSING	5.33%	France
COMPAGNIE DE SAINT GOBAIN	BUILDING AND BUILDING MATERIALS	4.87%	France
MICHELIN (CGDE)	CONSTRUCTION OF MACHINERY AND VEHICLES	4.68%	France
CREDIT AGRICOLE SA	BANKS	4.67%	France
SOCIETE GENERALE SA	BANKS	4.65%	France

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives*

What was the proportion of sustainability-related investments?

Not applicable

Asset allocation describes the share of investments in specific assets.

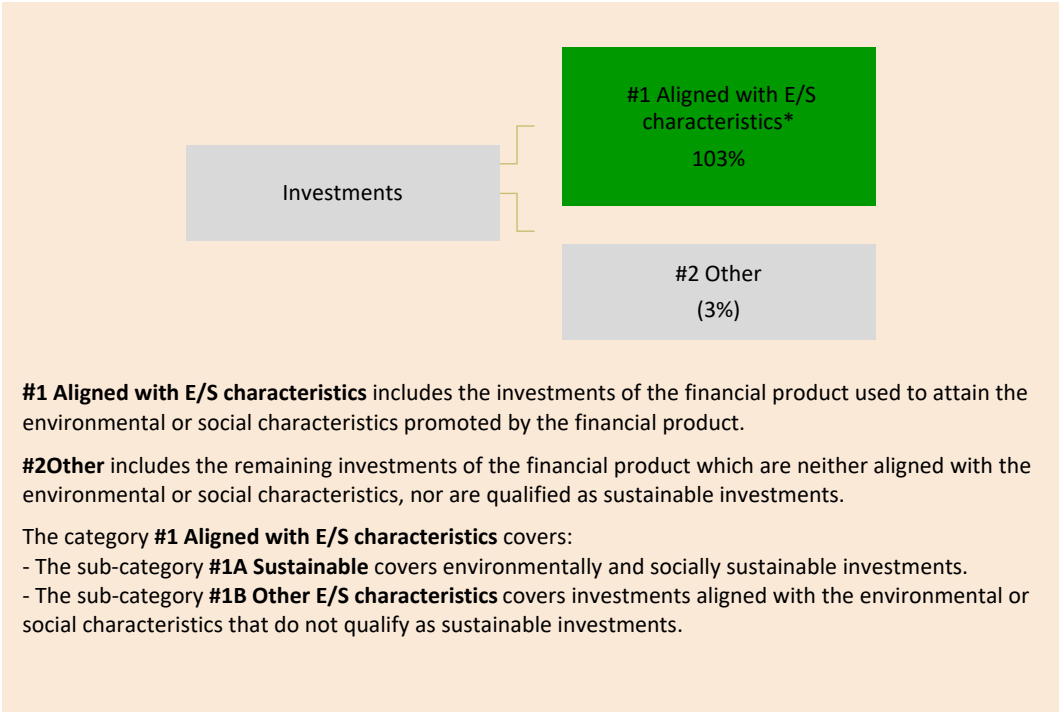

● What was the asset allocation?

103% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average’s Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

Largest investments	% Assets
BANKS	27.05%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	18.02%
INSURANCES	15.58%
BUILDING AND BUILDING MATERIALS	10.55%
TELECOMMUNICATIONS	9.07%
CONSUMPTION GOODS/ FOOD/ BREWERY	7.82%
REAL ESTATE AND HOUSING	5.33%
CONSTRUCTION OF MACHINERY AND VEHICLES	4.68%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	4.32%
OTHER CREDIT INSTITUTIONS	1.29%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

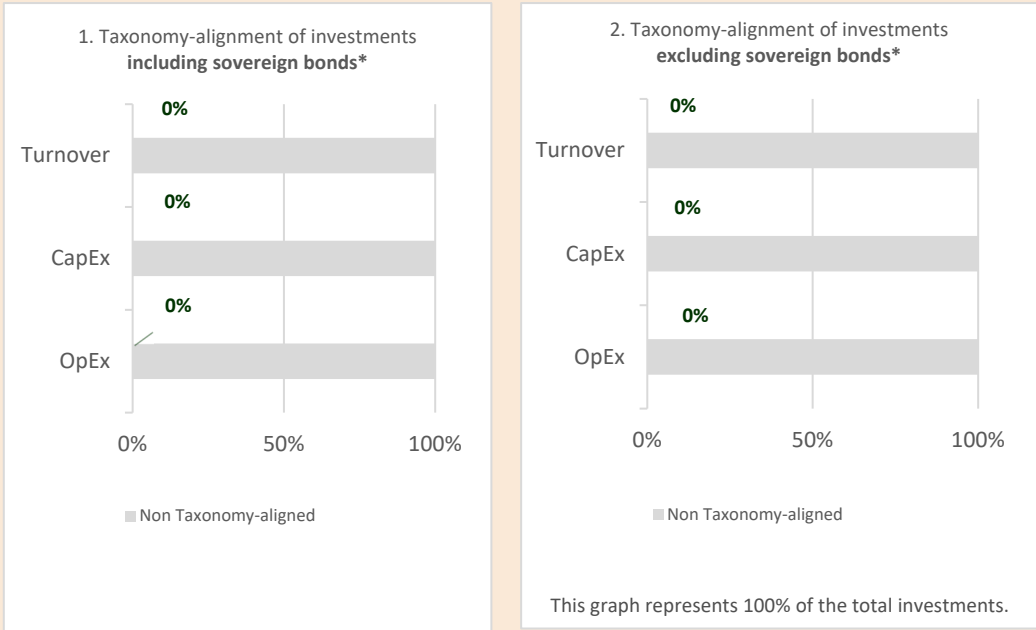

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*
Not applicable
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
Not applicable
- *How did this financial product perform compared with the reference benchmark?*
Not applicable
- *How did this financial product perform compared with the broad market index?*
Not applicable

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM Euro Inflation Linked Government Bond Fund

Legal entity identifier: 2549007CZ0H065KTQF64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

1. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
2. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
3. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The Fund level ESG score which was rated MSCI “A” or above in 2023;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 99%; and
- iii. The percentage of the Fund investment universe subject to the Manager’s

exclusion policy which was 99%.

● **...and compared to previous periods?**

- i. The Fund level ESG score which was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 83% as at 31 December 2022; and
- iii. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 83% as at 31 December 2022

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas

- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

- 4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

- 9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 – 31 December 2023

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives.*

What was the proportion of sustainability-related investments?

Not applicable

Asset allocation describes the share of investments in specific assets.

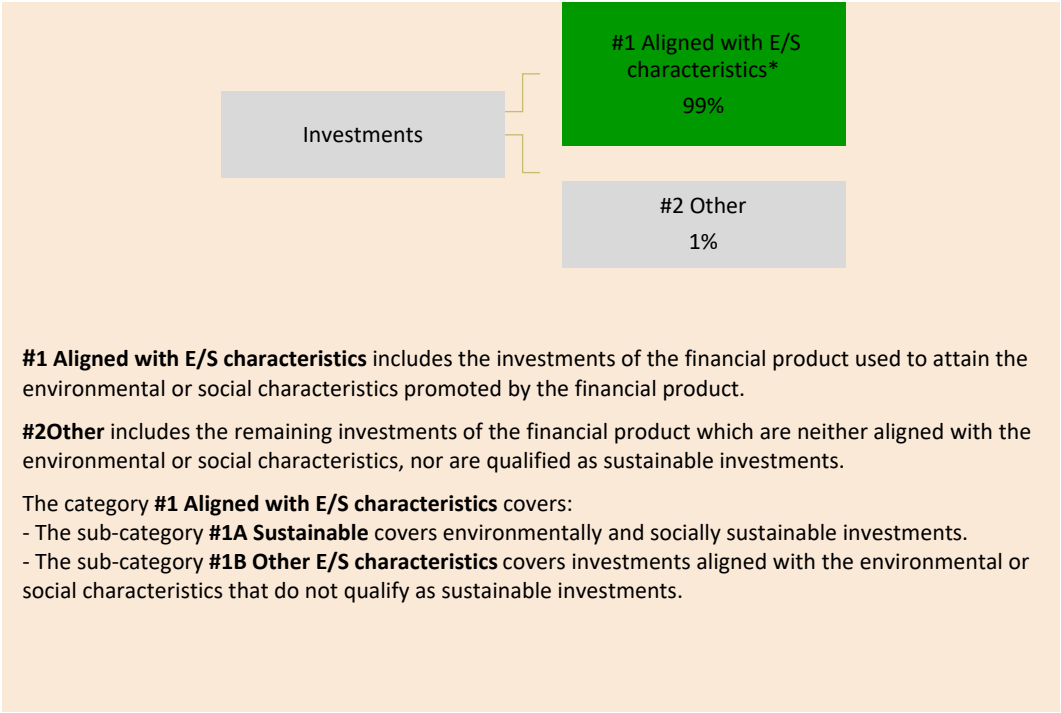

● What was the asset allocation?

99% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average’s Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

LARGEST INVESTMENTS	% ASSETS
BONDS STATES FEDERAL STATES	99.11%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Manager’s exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ESG Target Global Coupon 2026 FAM Fund III

Legal entity identifier: 2549006KWNC5TMPKQL89

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested

were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions): The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s) in 2023:

- i. The Fund level ESG score was rated MSCI “AA” or above;
- ii. The percentage of the Fund invested in ESG screened index

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

constituents which demonstrated the Fund's positive ESG tilt which was 102%;

- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 102%; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 102%.

...and compared to previous periods?

- i. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund's positive ESG tilt which was 0% as at 31 December 2022;
- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 0% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 0% as at 31 December 2022

All actual data in 2022 are calculated on the closing date of the accounting year

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the portfolio managers could improve at Fund level and where the portfolio managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. Greenhouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector

5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ULTRA SHORT TERM
BOND SRI FAM FUND

Legal entity identifier:
254900YEN8J2I3YZBQ68

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** _____

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **53.12%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.725 (C)**
- The weighted average ESG rating of the reference index is **0.464 (D)**

● ***... and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the portfolio was C and the weighted average ESG rating of the ESG investment universe was D+.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **ESG factors integration** : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/01/2023 to 31/12/2023**

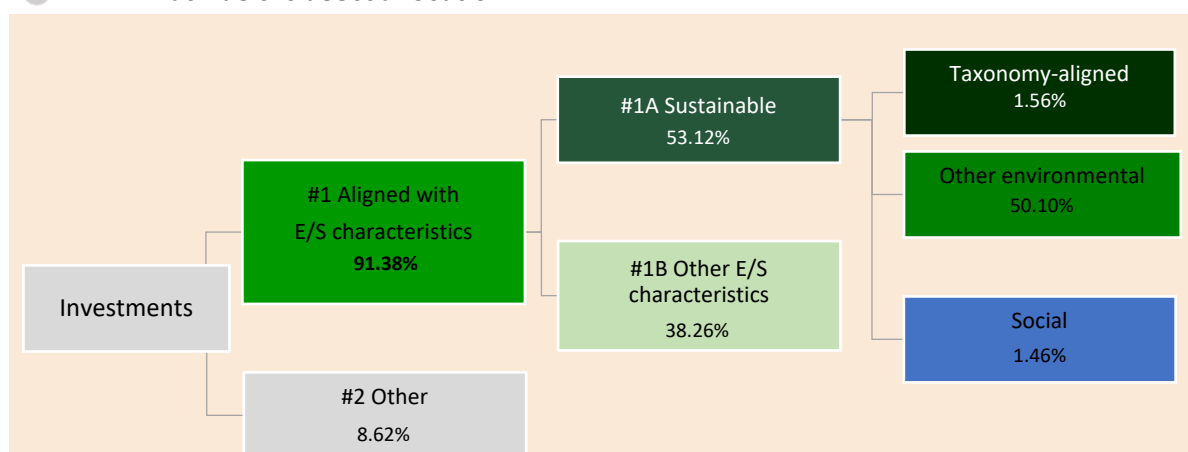

Largest Investments	Sector	Sub-Sector	Country	% Assets
BTF 04/01/24	Treasuries	Treasuries	France	2.87%
BOTS 31/01/24 184D	Treasuries	Treasuries	Italy	2.87%
ARVASL 4.25% 11/25 EMTN	Corporates	Other Financials	France	1.83%
TRAGR 4% 09/25 EMTN	Corporates	Consumer Discretionary	Luxembourg	1.61%

CB 0.3% 12/24	Corporates	Insurance	United States	1.39%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Corporates</i>	<i>Banking</i>	<i>50.60%</i>
<i>Corporates</i>	<i>Consumer Discretionary</i>	<i>7.29%</i>
<i>Treasuries</i>	<i>Treasuries</i>	<i>7.15%</i>

<i>Others</i>	<i>Others</i>	<i>-0.02%</i>
<i>Cash</i>	<i>Cash</i>	<i>8.66%</i>

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.56% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹ ?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable

What was the share of investments in transitional and enabling activities ?

As of 31/12/2023, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.81%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

In the previous period Taxonomy alignment was not reported, because at the time reliable reported data was not yet available.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **50.10%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 1.46%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI’s control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI’s Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- *How does the reference benchmark differ from a broad market index ?*
This product does not have an ESG Benchmark.
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the reference benchmark ?*
This product does not have an ESG Benchmark.
- *How did this financial product perform compared with the broad market index ?*

This product does not have an ESG Benchmark.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ENHANCED ULTRA
SHORT TERM BOND SRI FAM FUND

Legal entity identifier:
2549003V3KM7D5WO9P96

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:** _____

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** _____

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **57.28%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.683 (C)**
- The weighted average ESG rating of the reference index is **0.464 (D)**

● ***... and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the portfolio was (C) and the weighted average ESG rating of the ESG investment universe was (D+).

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example, the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **ESG factors integration:** Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote:** Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation
describes the share
of investments in
specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Corporates</i>	<i>Banking</i>	<i>55.87%</i>
<i>Corporates</i>	<i>Consumer Discretionary</i>	<i>7.82%</i>

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.94% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments in transitional and enabling activities?

As of 31/12/2023, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.55%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

In the previous period Taxonomy alignment was not reported, because at the time reliable reported data was not yet available.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities

● What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was **48.09%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

● What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 4.26%.

under the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI’s control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI’s Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- This product does not have an ESG Benchmark.
- ***How does the reference benchmark differ from a broad market index?***
This product does not have an ESG Benchmark
 - ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.
 - ***How did this financial product perform compared with the broad market index?***
This product does not have an ESG Benchmark.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ESG Target Global Coupon 2026 Fineco AM Fund IV

Legal entity identifier: 254900QWPPBSF9FC1L85

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested

were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions): The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s) in 2023:

- i. The Fund level ESG score was rated MSCI “AA” or above;
- ii. The percentage of the Fund invested in ESG screened index

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

constituents which demonstrated the Fund's positive ESG tilt which was 101%;

- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 101%; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 101%.

● **...and compared to previous periods?**

- i. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund's positive ESG tilt which was 0% as at 31 December 2022;
- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 0% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 0% as at 31 December 2022

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the portfolio managers could improve at Fund level and where the portfolio managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. Greenhouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector

5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
BNP PARIBAS	BANKS	10.07%	France
SOCIETE GENERALE SA	BANKS	9.42%	France
ORANGE	TELECOMMUNICATIONS	9.02%	France
ENGIE SA	REAL ESTATE AND HOUSING	5.90%	France
MICHELIN (CGDE)	CONSTRUCTION OF MACHINERY AND VEHICLES	4.70%	France
CREDIT AGRICOLE SA	BANKS	4.68%	France
TOTALENERGIES SE	DISTRIBUTION WATER GAS ELECTRICITY ENERGY	4.58%	France
AXA SA	INSURANCES	4.55%	France

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives*

What was the proportion of sustainability-related investments?

Not applicable

What was the asset allocation?

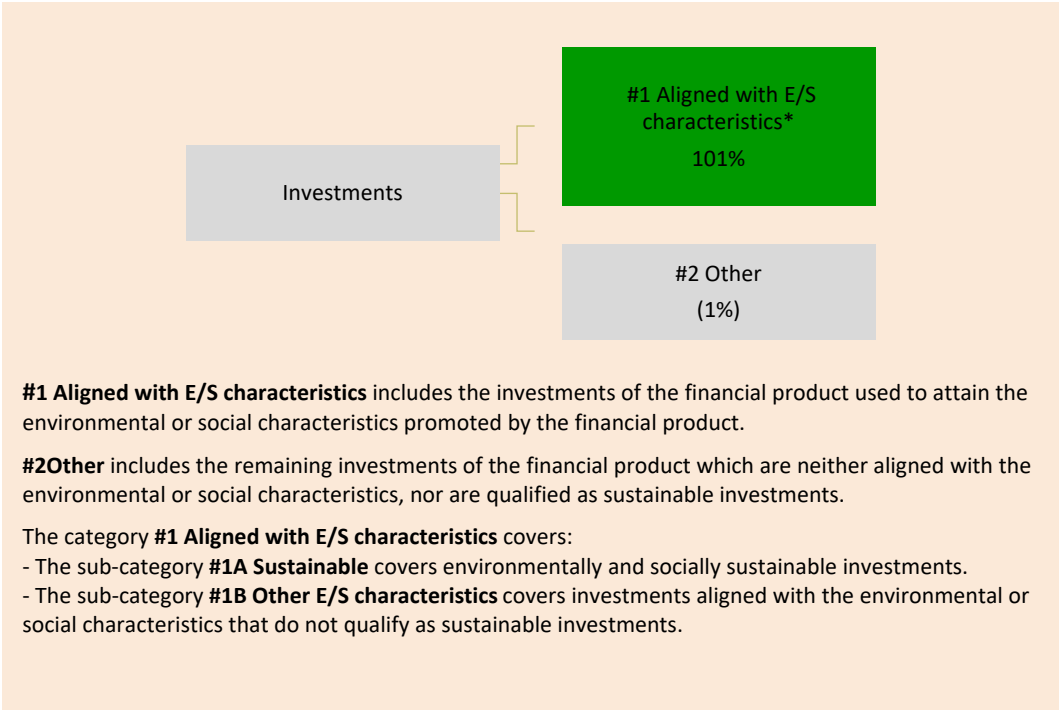

Asset allocation describes the share of investments in specific assets.

101% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average's Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

Largest investments	% Assets
BANKS	28.29%
INSURANCES	15.76%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	12.73%
TELECOMMUNICATIONS	9.02%
CONSUMPTION GOODS/ FOOD/ BREWERY	7.73%
REAL ESTATE AND HOUSING	5.90%
CONSTRUCTION OF MACHINERY AND VEHICLES	4.70%
BUILDING AND BUILDING MATERIALS	4.37%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	4.33%
OTHER CREDIT INSTITUTIONS	3.11%
ELECTRICS/ ELECTRONICS	2.27%
MISCELLANEOUS SERVICES	1.87%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did this financial product perform compared to the reference benchmark?

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ESG Target Global Coupon 2026 Fineco AM Fund V

Legal entity identifier: 2549001IL74IUJPFHF86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested

were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions): The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s) in 2023:

- i. The Fund level ESG score was rated MSCI “AAA” or above;
- ii. The percentage of the Fund invested in ESG screened index

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

constituents which demonstrated the Fund's positive ESG tilt which was 89%;

- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 89%; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 89%.

● **...and compared to previous periods?**

- i. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund's positive ESG tilt which was 0% as at 31 December 2022;
- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 0% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 0% as at 31 December 2022

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the portfolio managers could improve at Fund level and where the portfolio managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. Greenhouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector

5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
CREDIT AGRICOLE SA	BANKS	9.38%	France
BNP PARIBAS	BANKS	9.12%	France
DANONE	CONSUMPTION GOODS/ FOOD/ BREWERY	8.29%	France

ENGIE	DISTRIBUTION WATER GAS ELECTRICITY ENERGY	5.33%	France
COMPAGNIE DE SAINT GOBAIN	BUILDING AND BUILDING MATERIALS	4.99%	France
CAPGEMINI SE	OFFICE EQUIPMENT AND MATERIAL	4.42%	France
MICHELIN (CGDE)	CONSTRUCTION OF MACHINERY AND	4.37%	France

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives

What was the proportion of sustainability-related investments?

Not applicable

What was the asset allocation?

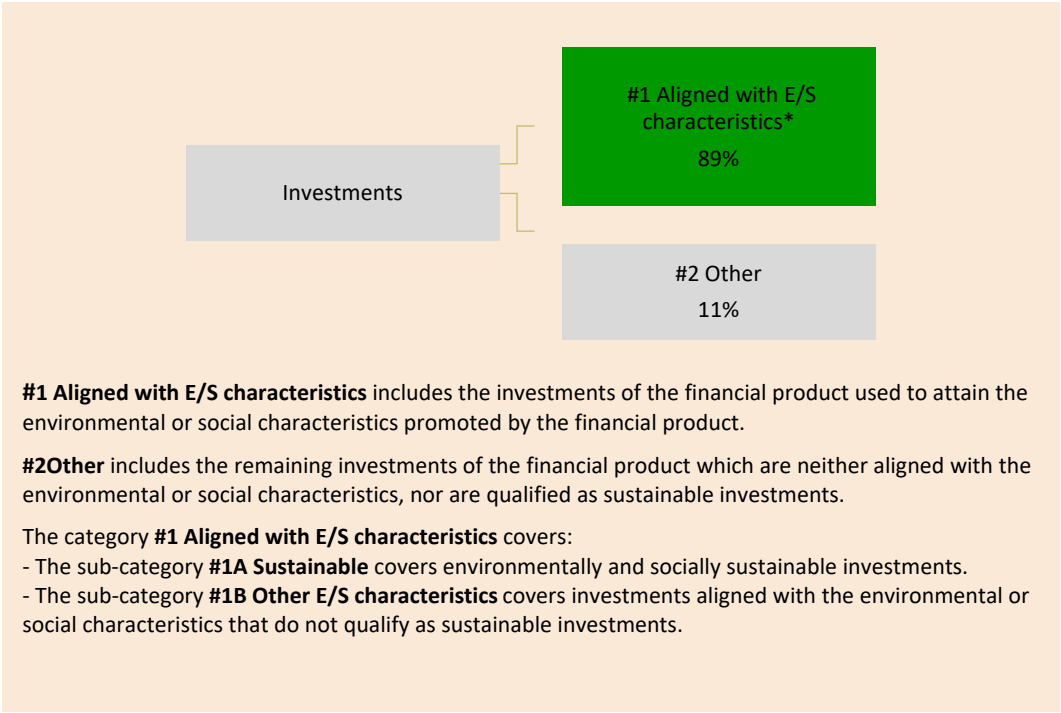

Asset allocation describes the share of investments in specific assets.

89% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average’s Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

Largest investments	% Assets
BANKS	22.72%
CONSUMPTION GOODS/ FOOD/ BREWERY	14.59%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	13.07%
BUILDING AND BUILDING MATERIALS	8.92%
CONSTRUCTION OF MACHINERY AND VEHICLES	8.16%
OFFICE EQUIPMENT AND MATERIAL	4.42%
ADVERTISING/ COMMUNICATION	4.21%
ELECTRICS/ ELECTRONICS	3.59%
TELECOMMUNICATIONS	3.33%
REAL ESTATE AND HOUSING	3.05%
TEXTILES AND CLOTHING	2.32%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: ESG Target Global Infrastructure Coupon 2026 Fineco AM Fund
Legal entity identifier: 254900XJTDLKCK038V52

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ ☒ **No**

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

1. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested

were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions): The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s) in 2023:

- i. The Fund level ESG score was rated MSCI “AA” or above;
- ii. The percentage of the Fund invested in ESG screened index

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

constituents which demonstrated the Fund's positive ESG tilt which was 100%;

- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 100%; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 100%.

● **...and compared to previous periods?**

- i. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund's positive ESG tilt which was 0% as at 31 December 2022;
- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 0% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 0% as at 31 December 2022

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the portfolio managers could improve at Fund level and where the portfolio managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators:

1. Greenhouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector

5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
BNP PARIBAS	BANKS	10.13%	France
SOCIETE GENERALE SA	BANKS	9.80%	France
ENGIE	DISTRIBUTION WATER GAS ELECTRICITY ENERG	9.61%	France
TOTALENERGIES SE	DISTRIBUTION WATER GAS ELECTRICITY ENERGY	9.54%	France
MICHELIN (CGDE)	CONSTRUCTION OF MACHINERY AND VEHICLES	4.68%	France
CREDIT AGRICOLE SA	BANKS	4.66%	France
AXA SA	INSURANCES	4.53%	France

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 - 31 December 2023

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives*

What was the proportion of sustainability-related investments?

Not applicable

What was the asset allocation?

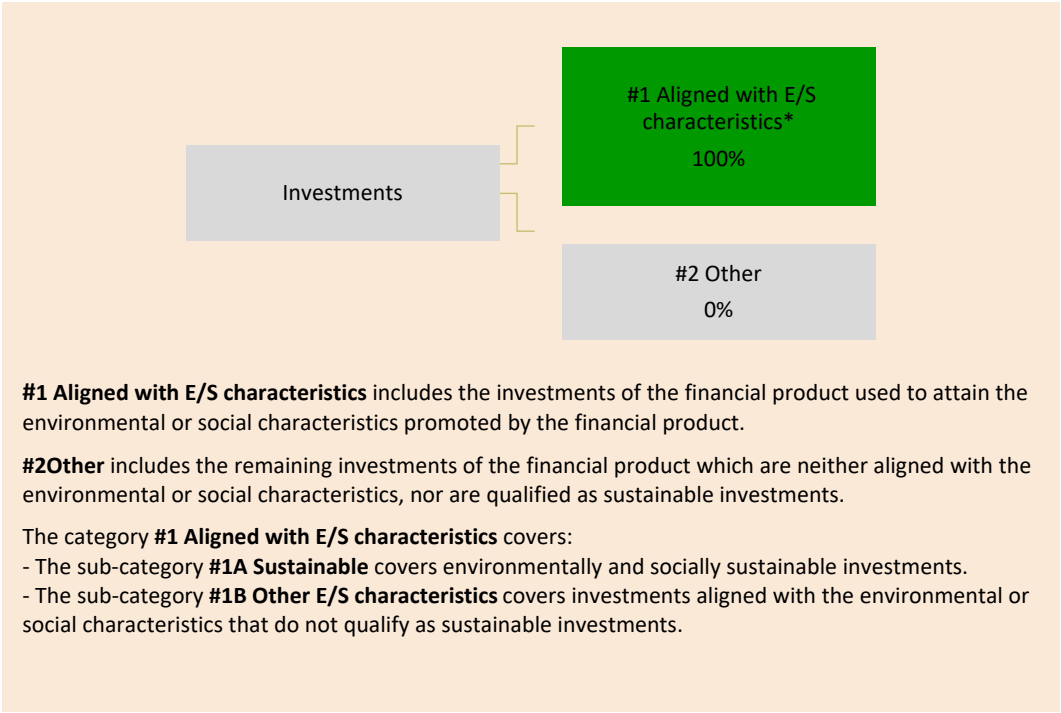

Asset allocation describes the share of investments in specific assets.

100% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average's Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

Largest investments	% Assets
BANKS	32.64%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	23.64%
INSURANCES	15.38%
CONSUMPTION GOODS/ FOOD/ BREWERY	8.66%
CONSTRUCTION OF MACHINERY AND VEHICLES	4.68%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	4.51%
TELECOMMUNICATIONS	4.37%
BUILDING AND BUILDING MATERIALS	4.05%
OTHER CREDIT INSTITUTIONS	3.68%
MISCELLANEOUS SERVICES	3.33%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM US Dollar Bond Fund
Legal entity identifier: 254900UZWPEPXU18051

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ ☒ **No**

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

1. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
2. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
3. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The Fund level ESG score which was rated MSCI “A” or above in 2023;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 95%; and
- iii. The percentage of the Fund investment universe subject to the Manager’s

exclusion policy which was 95%.

● **...and compared to previous periods?**

- i. The Fund level ESG score which was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 0% as at 31 December 2022; and
- iii. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 0% as at 31 December 2022

All actual data in 2022 are calculated on the closing date of the accounting year

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas

- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

- 4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

- 9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 – 31 December 2023

FAM Series UCITS ICAV

Investment Manager's Report

Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (the "Sub-Fund")

Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF was up 81.3% in 2023.

The fund kicked off the year with a strong performance in January, delivering a robust return of 14.7% fuelled by positive market sentiment. February continued the positive trend with a solid return of 5.3%, reflecting ongoing investor optimism. March maintained the positive momentum with a further gain of 9.1%, driven by favourable market conditions and strong sector performance.

The ETF faced challenges later, starting with a notable decline in April with a negative return of -7.2%, which may have been influenced by various market factors. However, May brought a significant rebound with an impressive return of 24.0%. The positive momentum continued in June with a return of 4.4%, reflecting ongoing stability and growth in the sector. July and August saw moderate gains of 5.1% and -0.3%, respectively. However, September and October witnessed declines of -6.3% and -5.2%, respectively, possibly due to market volatility and external factors affecting the sector. The ETF closed the year on a positive note, posting strong returns in November and December of 12.4% and 9.4%, respectively, demonstrating resilience and ending the year on a high despite intermittent challenges.

Benchmark Name	Investment Approach	Replication Strategy	Comment
MSCI Daily TR World Semiconductors & Semiconductor Equipment Net USD	Index Tracking	Synthetic	The investment management approach consists of implementing synthetic replication techniques using over the counter Total Return Swaps that swap out the performance of the assets of the fund against the performance of the reference benchmark.

Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF (the "Sub-Fund")

Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF was up 34.5% in 2023.

The fund started the year on a positive note, delivering a solid return of 5.4% in January, reflecting positive market sentiment and strong performance across various sectors. February continued the upward trend with a modest gain of 2.1%, indicating continued market stability and growth. March maintained the positive momentum with a further gain of 2.5%, driven by favourable market conditions and investor optimism.

The ETF faced challenges later, starting with a notable decline in April with a negative return of -8.4%, possibly influenced by various market factors and sector-specific challenges. However, May saw a significant rebound with an impressive return of 15.2%, indicating a strong recovery in the market and the ETF's performance. June witnessed a slight dip with a marginal return of -0.1%, suggesting some volatility and uncertainty in the market. July and August saw moderate gains of 3.4% and -1.4%, respectively, indicating mixed market performance and investor sentiment. September and October recorded marginal declines of -0.7% and -3.0%, respectively, possibly due to market volatility and external factors impacting global markets. The ETF closed the year on a positive note, posting strong returns in November and December of 12.2% and 5.1%, respectively, demonstrating resilience and ending the year on a high note despite intermittent challenges.

Fineco AM MSCI World Metals and Mining UCITS ETF (the "Sub-Fund")

Fineco AM MSCI World Metals and Mining UCITS ETF was up 4.8% in 2023.

The fund started the year on a strong note in January, delivering a notable return of 11.4% driven by increased investor confidence. However, the fund experienced significant volatility in the following months. February saw a sharp decline with a negative return of -8.0%, influenced by factors like key rate hikes and fluctuating inflation figures. The fund's performance remained relatively flat in March, posting a modest return of 0.6%.

The fund continued to face challenges later. April brought another decline with a negative return of -4.5%, followed by a further downturn in May with a return of -6.0%. However, the fund experienced a turnaround in June, delivering a solid return of 6.0% driven by a recovery in global stocks. Despite ongoing volatility, the fund managed to rebound in the latter part of the year, posting positive returns in July, September, November, and December, with varying degrees of performance.

Investment Manager's Report (continued)

Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund")

In 2023, the rockiness of the economic narrative resulted in high volatility across all asset classes. In January, investor assumptions that monetary tightening would rapidly start to ease helped global equities to a good start to the year. This didn't last long. In February, better-than-expected economic indicators stymied the notion of a central bank 'pivot'. In March, the difficulties of several US regional banks and some limited knock-on effect of this on European banks gave rise to the spectre of a financial crisis. Thanks to the authorities' rapid reaction to this banking problem, equities ended the first quarter of 2023 sharply up (+6.8% for the MSCI AC World index in US dollar terms). But monetary policy expectations remained unclear. The rise in global equities continued in the second quarter (+5.6%) fuelled by good US corporate results and enthusiasm for stocks likely to benefit from the popularity of the artificial intelligence (AI) theme. The rise extended into July before giving way to three consecutive monthly declines due to sharp rises in government (nominal and real) bond yields. After falling 3.8% in the third quarter, the fourth quarter started badly as geopolitical risk raised its head again on 7 October with the conflict in Gaza. This came as investors were facing increased upward pressure on long-term bond yields. The resilience of the US economy (4.9% annualised GDP growth in the third quarter, strong job creation, dynamic consumption) and higher-than-expected inflation explained the behaviour of the bond market.

From November on, resurging expectations of a rapid cut in key rates by the US Federal Reserve (Fed) in 2024 underpinned a rally in both bonds and equities. This theme dominated until the end of the year, fuelled by the significant slowdown in inflation in October and November and then by official comments and Fed forecasts in December. Over the weeks, convinced that the cycle of policy rate hiking was over and that a 'Fed pivot' was finally just around the corner, investors began to anticipate more, and earlier, policy rate cuts. Against this backdrop, global equities rallied sharply in November and continued to rise in December, ending the quarter up by 10.7%, posting an annual increase of 20.1%.

China's economic situation was the other major factor in 2023. The exit from the Zero Covid policy in autumn 2022 initially raised many hopes and supported emerging market equities until the end of January on a presumption of the reopening of the Chinese economy. However, as the months unfolded, disappointing economic data began to worry investors who had hoped for a more forceful response from the authorities.

After an aggressive pace of monetary policy tightening in the second half of 2022 to tackle inflation that was 'broad based and unacceptably high', in 2023 the US Federal Reserve (Fed) decided on rate rises in occasional steps of 25bp. Throughout the first half of the year, the Fed had to counter expectations that an end to the hiking cycle was anywhere close. The federal funds target rate was raised into the 5.00%-5.25% range before a status quo on 14 June. At the Federal Open Market Committee (FOMC) meeting on 25/26 July, the Fed raised its policy rate by 25bp before deciding on a status quo at the three subsequent meetings. These were well anticipated each time. The federal funds target rate is now within the 5.25% -5.50% range, up by 100bp in 2023 and by 525bp since the first hike in March 2022. Between September, when the decision not to raise policy rates was still being interpreted as just another pause in the cycle, and December, the Fed's rhetoric became much more dovish as inflation finally slowed and some FOMC members pointed out that indications of a slowdown in the economy were multiplying. The Minutes of the September meeting showed that some members considered the risk of overtightening monetary policy, and that decisions and communications should shift from how high to raise the policy rate to how long to hold it at restrictive levels.

In December, Fed Chair Powell pointed out that monetary policy was now 'well into restrictive territory'. On the other hand, projections of the level of the federal funds rate that FOMC members deemed 'appropriate' revealed that policy easing may start in the first half of 2024. In September, 10 FOMC members had thought the federal funds rate would still be above 5% by the end of 2024. In December, only three still expected that. The median estimate fell by 50bp to 4.625% (i.e., three 25bp cuts). Markets' expectations of a rapid cut in 2024, which were already strong before the meeting, then became somewhat over-enthusiastic. At the end of December, the Overnight Indexed Swap (OIS) showed the equivalent of seven 25bp cuts in policy rates in 2024, with a high probability of a first cut in March. Faced with the slowdown in inflation, the FOMC revised down its expectations for core personal consumption expenditures (PCE) inflation at the end of 2023 (to 3.2% from 3.7% forecast in September), at the end of 2024 (2.4%) and at the end of 2025 (2.2%). At the same time, the FOMC expects the unemployment rate to rise moderately (to 4.1% from 2024 to 2026), which would mean it remaining close to its equilibrium level of 4.0%. The Fed's central scenario appears to be a soft landing, whereby a return of inflation to target would not require a sharp slowdown in activity.

Investment Manager's Report (continued)

Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

In 2023, the European Central Bank (ECB) first raised its three key rates by 50bp in February and March, and then by 25bp in May, June, July and September, taking the deposit rate to 4.00%, the marginal lending facility to 4.75% and the main refinancing operations to 4.50%. Since the first hike in July 2022, rates have risen by 450bp. The ECB's communication hinted that the September hike would be the last in the current cycle and subsequent comments indicated that the choice between a status quo and a hike in September had been difficult given a particularly uncertain environment. In fact, the ECB is facing a delicate situation where the labour market remains tight but where business activity is suffering from lower demand.

At her press conference following what was presented as a 'pause' on 26 October, ECB President Christine Lagarde acknowledged that the 'very strong transmission' of monetary policy was 'directly affecting the financing of the economy' which in turn 'plays on to the reduction of inflation and the dampening of demand'. The year-on-year consumer price index fell from 8.6% in January to 2.9% in October and then 2.4% in November. Core inflation, still above 5% in August, fell to 3.6% in November, its lowest since April 2022. In addition, growth in the eurozone, and particularly in Germany, remained depressed and weak demand began to weigh on employment.

The Minutes of the ECB's 26 October meeting revealed that discussions focused on downside risks to growth. In the context, the post-meeting communication in December was seen as rather hawkish, unlike some statements that had caught investors' attention earlier. The Governing Council reiterated that it was 'too early to declare victory in the fight against inflation' as 'domestic price pressures remain elevated, primarily owing to strong growth in unit labour costs'.

The Governing Council also agreed that 'over the second half of 2024, the Pandemic Emergency Purchase Programme (PEPP) portfolio will be reduced by a monthly average of EUR 7.5 billion and that reinvestments under the scheme will be discontinued at the end of 2024'. Finally, ECB President Christine Lagarde said the Council did not discuss rate cuts. Even so, expectations of rapid rate cuts in 2024 have strengthened. At the end of December, the levels on the Overnight Indexed Swap (OIS) showed three cuts of 25bp in the first half of the year.

Throughout the year, changes in monetary policy expectations led to a sharp rise in volatility (implied and actual) all along the yield curve, and especially on the shorter maturities. These movements were exacerbated in mid-March by the bankruptcies of several US regional banks. Markets were also animated in the spring by the debate over the US debt ceiling and a hypothetical technical default of the US which led to sharp movements in the Credit Default Swap (CDS) market and on very short-term Treasury rates. Beyond this, these volatile movements also reflected investor nervousness. Quarterly changes in the 10-year T-note yield reflected this shilly-shallying: -4bp in the first quarter, +19bp in the second, +73bp in the third and -69bp in the fourth. The US 10-year yield (3.87% at the end of 2022) moved sharply from the beginning of the year. It fell below 3.40% in mid-March and, despite the rapid reaction of the authorities to guarantee all the deposits of the failed regional banks, long-term yields did not immediately rise. Investors then feared that the recession engendered by a possible banking crisis could force the Fed to aggressively lower its key interest rates. These concerns eased in May. Yields then rose as other factors came into play over the months (very hawkish comments from the central bankers at Sintra at the end of June, strong economic indicators).

The upward pressure on bond yields increased and, on 23 October, the yield on the US 10-year US T-note briefly surpassed the symbolic threshold of 5.00% for the first time since 2007. While the Treasury Secretary refuted it, such a development may have reflected concerns about the sustainability of US sovereign debt. These were also expressed by the rating agencies. We should note that the fall in long-term bond yields from their high on 23 October could be seen as an ex-post validation of Janet Yellen's analysis. In November and December, investors focused on two elements: The slowdown in inflation and the Fed's less hawkish comments, which triggered expectations of earlier and larger rate cuts. The yield on the 10-year T-note fell almost continuously to below 3.80% on 27 December, its lowest since 19 July. It ended the year at 3.88%, back to its end of 2022 level. The 2-year yield (4.43% at the end of 2022), rose above 5.00% at the beginning of March and then suddenly fell back to 3.80% during the US regional banks crisis. It hovered around this level until May before rising again. It then surged above 5.20% in October and ended the year at 4.25%.

Investment Manager's Report (continued)

Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

Eurozone bond markets' movements were driven by expectations of the ECB's and the Fed's monetary policy and, of course, by the banking turmoil that arose in March, first in the US and then in Europe. It should be noted that the interbank market was not affected at any time, which reflected the confidence that eurozone banks have in each other. In the first quarter, the yield on the 10-year German Bund moved erratically between 2.00% and 2.75%. Market movements were several times heightened by the reaction of some investors who felt forced to abruptly stop-loss their positions. This was the case for the fall that followed the 50bp rise in the ECB's key rates on 16 March and briefly led to the yield on the German 10-year Bund to move below 2.00% intraday on 24 March amid rising concerns about European banks. Once the risk of a systemic financial crisis was removed, the German 10-year Bund yield moved trendless between 2.20% and 2.50% in the second quarter, surpassing 2.50% only very briefly, driven by a global trend on bond yields (US debt ceiling negotiations, UK inflation data). It was only from July, in the wake of US long-term bond yields, that it crossed this 2.50% threshold, which had previously appeared to be a strong resistance point, for longer. After a bumpy ride during the summer, it reached 2.97% at the beginning of October. Following US yields, and despite still-hawkish ECB rhetoric, the German 10-year yield then fell sharply, accentuated by worsening eurozone economic conditions and the slowdown in inflation. The 10-year Bund yield eased to 1.90% on 27 December, its lowest in more than a year, with bond market activity very light in the last week of the year. It ended 2023 at 2.02% (-55bp compared to the end of 2022).

The Governing Council's conclusions of 14 December did not appear particularly dovish, but subsequent statements by several governors confirming that it was too early to envisage rate cuts failed to change investor expectations. The German 2-year yield (2.76% at the end of 2022), fluctuated sharply between 2.35% and 3.25% to end 2023 at 2.40%, close to its lowest since the mini crisis triggered by the bankruptcies of several US regional banks in March.

No substantial changes have been performed in the optimization since inception (13/09/2022). The rebalancing is mostly removing the bonds taken out from the benchmark to buy new ones.

Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF (the "Sub-Fund")

Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF was down 2.7% in 2023.

The fund experienced mixed performance in the first half of the year. January started with a decline of -2.6%, possibly influenced by market volatility and uncertainties. February saw a slight recovery with a modest gain of 0.7%, indicating some stabilization in the market. March witnessed improved performance with a solid return of 3.5%, reflecting positive market sentiment and favourable economic conditions.

The ETF faced some challenges later, beginning with a slight gain of 3.2% in April, possibly driven by improving market conditions and investor confidence. May experienced a decline of -4.1%, possibly influenced by external factors impacting global markets and market volatility. June saw a marginal gain of 0.7%, indicating some stability in the market. July and August posted modest gains of 0.4% and -1.9%, respectively, possibly due to market corrections and uncertainties affecting investor sentiment. September and October witnessed declines of -3.0% and -0.8%, respectively, indicating continued market challenges and volatility. November and December ended the year on a relatively positive note with gains of 1.4% and -0.1%, respectively, demonstrating resilience despite intermittent challenges throughout the year.

Fineco AM MSCI World Financials ESG Leaders UCITS ETF (the "Sub-Fund")

Fineco AM MSCI World Financials ESG Leaders UCITS ETF was up 11.4% in 2023.

The fund had a mixed performance in the first half of the year. January started positively with a gain of 7.8%, indicating a strong start to the year driven by positive market sentiment and investor confidence. However, February saw a slight decline of 0.1%, possibly influenced by market corrections and uncertainties. March experienced a significant downturn with a decline of -7.9%, possibly due to external factors impacting global markets and increased volatility.

The ETF showed signs of recovery later. April witnessed a modest gain of 1.6%, indicating some stabilization in the market and improved investor sentiment. May saw a slight decline of -1.9%, possibly influenced by ongoing market challenges and uncertainties. June posted a positive return of 3.8%, demonstrating resilience and improved market conditions. July and August continued the positive trend with gains of 3.1% and -2.3%, respectively, indicating some volatility but overall stability in the market. September and October experienced modest gains of 0.3% and -4.7%, respectively, possibly influenced by market fluctuations and economic uncertainties. November and December ended the year on a positive note with gains of 7.0% and 5.0%, respectively, reflecting improved market sentiment and investor optimism.

In 2023, the rockiness of the economic narrative resulted in high volatility across all asset classes. In January, investor assumptions that monetary tightening would rapidly start to ease helped global equities to a good start to the year. This didn't last long. In February, better-than-expected economic indicators stymied the notion of a central bank 'pivot'. In March, the difficulties of several US regional banks and some limited knock-on effect of this on European banks gave rise to the spectre of a financial crisis. Thanks to the authorities' rapid reaction to this banking problem, equities ended the first quarter of 2023 sharply up (+6.8% for the MSCI AC World index in US dollar terms). But monetary policy expectations remained unclear. The rise in global equities continued in the second quarter (+5.6%) fuelled by good US corporate results and enthusiasm for stocks likely to benefit from the popularity of the artificial intelligence (AI) theme. The rise extended into July before giving way to three consecutive monthly declines due to sharp rises in government (nominal and real) bond yields. After falling 3.8% in the third quarter, the fourth quarter started badly as geopolitical risk raised its head again on 7 October with the conflict in Gaza. This came as investors were facing increased upward pressure on long-term bond yields. The resilience of the US economy (4.9% annualised GDP growth in the third quarter, strong job creation, dynamic consumption) and higher-than-expected inflation explained the behaviour of the bond market.

From November on, resurging expectations of a rapid cut in key rates by the US Federal Reserve (Fed) in 2024 underpinned a rally in both bonds and equities. This theme dominated until the end of the year, fuelled by the significant slowdown in inflation in October and November and then by official comments and Fed forecasts in December. Over the weeks, convinced that the cycle of policy rate hiking was over and that a 'Fed pivot' was finally just around the corner, investors began to anticipate more, and earlier, policy rate cuts. Against this backdrop, global equities rallied sharply in November and continued to rise in December, ending the quarter up by 10.7%, posting an annual increase of 20.1%.

China's economic situation was the other major factor in 2023. The exit from the Zero Covid policy in autumn 2022 initially raised many hopes and supported emerging market equities until the end of January on a presumption of the reopening of the Chinese economy. However, as the months unfolded, disappointing economic data began to worry investors who had hoped for a more forceful response from the authorities.

After an aggressive pace of monetary policy tightening in the second half of 2022 to tackle inflation that was 'broad based and unacceptably high', in 2023 the US Federal Reserve (Fed) decided on rate rises in occasional steps of 25bp. Throughout the first half of the year, the Fed had to counter expectations that an end to the hiking cycle was anywhere close. The federal funds target rate was raised into the 5.00%-5.25% range before a status quo on 14 June. At the Federal Open Market Committee (FOMC) meeting on 25/26 July, the Fed raised its policy rate by 25bp before deciding on a status quo at the three subsequent meetings. These were well anticipated each time. The federal funds target rate is now within the 5.25% -5.50% range, up by 100bp in 2023 and by 525bp since the first hike in March 2022. Between September, when the decision not to raise policy rates was still being interpreted as just another pause in the cycle, and December, the Fed's rhetoric became much more dovish as inflation finally slowed and some FOMC members pointed out that indications of a slowdown in the economy were multiplying. The Minutes of the September meeting showed that some members considered the risk of overtightening monetary policy, and that decisions and communications should shift from how high to raise the policy rate to how long to hold it at restrictive levels.

In December, Fed Chair Powell pointed out that monetary policy was now 'well into restrictive territory'. On the other hand, projections of the level of the federal funds rate that FOMC members deemed 'appropriate' revealed that policy easing may start in the first half of 2024. In September, 10 FOMC members had thought the federal funds rate would still be above 5% by the end of 2024. In December, only three still expected that. The median estimate fell by 50bp to 4.625% (i.e., three 25bp cuts). Markets' expectations of a rapid cut in 2024, which were already strong before the meeting, then became somewhat over-enthusiastic. At the end of December, the Overnight Indexed Swap (OIS) showed the equivalent of seven 25bp cuts in policy rates in 2024, with a high probability of a first cut in March. Faced with the slowdown in inflation, the FOMC revised down its expectations for core personal consumption expenditures (PCE) inflation at the end of 2023 (to 3.2% from 3.7% forecast in September), at the end of 2024 (2.4%) and at the end of 2025 (2.2%). At the same time, the FOMC expects the unemployment rate to rise moderately (to 4.1% from 2024 to 2026), which would mean it remaining close to its equilibrium level of 4.0%. The Fed's central scenario appears to be a soft landing, whereby a return of inflation to target would not require a sharp slowdown in activity.

Investment Manager's Report (continued)

Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

In 2023, the European Central Bank (ECB) first raised its three key rates by 50bp in February and March, and then by 25bp in May, June, July and September, taking the deposit rate to 4.00%, the marginal lending facility to 4.75% and the main refinancing operations to 4.50%. Since the first hike in July 2022, rates have risen by 450bp. The ECB's communication hinted that the September hike would be the last in the current cycle and subsequent comments indicated that the choice between a status quo and a hike in September had been difficult given a particularly uncertain environment. In fact, the ECB is facing a delicate situation where the labour market remains tight but where business activity is suffering from lower demand.

At her press conference following what was presented as a 'pause' on 26 October, ECB President Christine Lagarde acknowledged that the 'very strong transmission' of monetary policy was 'directly affecting the financing of the economy' which in turn 'plays on to the reduction of inflation and the dampening of demand'. The year-on-year consumer price index fell from 8.6% in January to 2.9% in October and then 2.4% in November. Core inflation, still above 5% in August, fell to 3.6% in November, its lowest since April 2022. In addition, growth in the eurozone, and particularly in Germany, remained depressed and weak demand began to weigh on employment.

The Minutes of the ECB's 26 October meeting revealed that discussions focused on downside risks to growth. In the context, the post-meeting communication in December was seen as rather hawkish, unlike some statements that had caught investors' attention earlier. The Governing Council reiterated that it was 'too early to declare victory in the fight against inflation' as 'domestic price pressures remain elevated, primarily owing to strong growth in unit labour costs'.

The Governing Council also agreed that 'over the second half of 2024, the Pandemic Emergency Purchase Programme (PEPP) portfolio will be reduced by a monthly average of EUR 7.5 billion and that reinvestments under the scheme will be discontinued at the end of 2024'. Finally, ECB President Christine Lagarde said the Council did not discuss rate cuts. Even so, expectations of rapid rate cuts in 2024 have strengthened. At the end of December, the levels on the Overnight Indexed Swap (OIS) showed three cuts of 25bp in the first half of the year.

Throughout the year, changes in monetary policy expectations led to a sharp rise in volatility (implied and actual) all along the yield curve, and especially on the shorter maturities. These movements were exacerbated in mid-March by the bankruptcies of several US regional banks. Markets were also animated in the spring by the debate over the US debt ceiling and a hypothetical technical default of the US which led to sharp movements in the Credit Default Swap (CDS) market and on very short-term Treasury rates. Beyond this, these volatile movements also reflected investor nervousness. Quarterly changes in the 10-year T-note yield reflected this shilly-shallying: -4bp in the first quarter, +19bp in the second, +73bp in the third and -69bp in the fourth. The US 10-year yield (3.87% at the end of 2022) moved sharply from the beginning of the year. It fell below 3.40% in mid-March and, despite the rapid reaction of the authorities to guarantee all the deposits of the failed regional banks, long-term yields did not immediately rise. Investors then feared that the recession engendered by a possible banking crisis could force the Fed to aggressively lower its key interest rates. These concerns eased in May. Yields then rose as other factors came into play over the months (very hawkish comments from the central bankers at Sintra at the end of June, strong economic indicators).

The upward pressure on bond yields increased and, on 23 October, the yield on the US 10-year US T-note briefly surpassed the symbolic threshold of 5.00% for the first time since 2007. While the Treasury Secretary refuted it, such a development may have reflected concerns about the sustainability of US sovereign debt. These were also expressed by the rating agencies. We should note that the fall in long-term bond yields from their high on 23 October could be seen as an ex-post validation of Janet Yellen's analysis. In November and December, investors focused on two elements: The slowdown in inflation and the Fed's less hawkish comments, which triggered expectations of earlier and larger rate cuts. The yield on the 10-year T-note fell almost continuously to below 3.80% on 27 December, its lowest since 19 July. It ended the year at 3.88%, back to its end of 2022 level. The 2-year yield (4.43% at the end of 2022), rose above 5.00% at the beginning of March and then suddenly fell back to 3.80% during the US regional banks crisis. It hovered around this level until May before rising again. It then surged above 5.20% in October and ended the year at 4.25%.

Eurozone bond markets' movements were driven by expectations of the ECB's and the Fed's monetary policy and, of course, by the banking turmoil that arose in March, first in the US and then in Europe. It should be noted that the interbank market was not affected at any time, which reflected the confidence that eurozone banks have in each other. In the first quarter, the yield on the 10-year German Bund moved erratically between 2.00% and 2.75%. Market movements were several times heightened by the reaction of some investors who felt forced to abruptly stop-loss their positions. This was the case for the fall that followed the 50bp rise in the ECB's key rates on 16 March and briefly led to the yield on the German 10-year Bund to move below 2.00% intraday on 24 March amid rising concerns about European banks. Once the risk of a systemic financial crisis was removed, the German 10-year Bund yield moved trendless between 2.20% and 2.50% in the second quarter, surpassing 2.50% only very briefly, driven by a global trend on bond yields (US debt ceiling negotiations, UK inflation data). It was only from July, in the wake of US long-term bond yields, that it crossed this 2.50% threshold, which had previously appeared to be a strong resistance point, for longer. After a bumpy ride during the summer, it reached 2.97% at the beginning of October. Following US yields, and despite still-hawkish ECB rhetoric, the German 10-year yield then fell sharply, accentuated by worsening eurozone economic conditions and the slowdown in inflation. The 10-year Bund yield eased to 1.90% on 27 December, its lowest in more than a year, with bond market activity very light in the last week of the year. It ended 2023 at 2.02% (-55bp compared to the end of 2022).

The Governing Council's conclusions of 14 December did not appear particularly dovish, but subsequent statements by several governors confirming that it was too early to envisage rate cuts failed to change investor expectations. The German 2-year yield (2.76% at the end of 2022), fluctuated sharply between 2.35% and 3.25% to end 2023 at 2.40%, close to its lowest since the mini crisis triggered by the bankruptcies of several US regional banks in March.

No substantial changes have been performed in the optimization since inception (15/09/2022). The rebalancing is mostly removing the bonds taken out from the benchmark to buy new ones.

Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF (the "Sub-Fund")

In 2023, the rockiness of the economic narrative resulted in high volatility across all asset classes. In January, investor assumptions that monetary tightening would rapidly start to ease helped global equities to a good start to the year. This didn't last long. In February, better-than-expected economic indicators stymied the notion of a central bank 'pivot'. In March, the difficulties of several US regional banks and some limited knock-on effect of this on European banks gave rise to the spectre of a financial crisis. Thanks to the authorities' rapid reaction to this banking problem, equities ended the first quarter of 2023 sharply up (+6.8% for the MSCI AC World index in US dollar terms). But monetary policy expectations remained unclear. The rise in global equities continued in the second quarter (+5.6%) fuelled by good US corporate results and enthusiasm for stocks likely to benefit from the popularity of the artificial intelligence (AI) theme. The rise extended into July before giving way to three consecutive monthly declines due to sharp rises in government (nominal and real) bond yields. After falling 3.8% in the third quarter, the fourth quarter started badly as geopolitical risk raised its head again on 7 October with the conflict in Gaza. This came as investors were facing increased upward pressure on long-term bond yields. The resilience of the US economy (4.9% annualised GDP growth in the third quarter, strong job creation, dynamic consumption) and higher-than-expected inflation explained the behaviour of the bond market.

From November on, resurging expectations of a rapid cut in key rates by the US Federal Reserve (Fed) in 2024 underpinned a rally in both bonds and equities. This theme dominated until the end of the year, fuelled by the significant slowdown in inflation in October and November and then by official comments and Fed forecasts in December. Over the weeks, convinced that the cycle of policy rate hiking was over and that a 'Fed pivot' was finally just around the corner, investors began to anticipate more, and earlier, policy rate cuts. Against this backdrop, global equities rallied sharply in November and continued to rise in December, ending the quarter up by 10.7%, posting an annual increase of 20.1%.

China's economic situation was the other major factor in 2023. The exit from the Zero Covid policy in autumn 2022 initially raised many hopes and supported emerging market equities until the end of January on a presumption of the reopening of the Chinese economy. However, as the months unfolded, disappointing economic data began to worry investors who had hoped for a more forceful response from the authorities.

After an aggressive pace of monetary policy tightening in the second half of 2022 to tackle inflation that was 'broad based and unacceptably high', in 2023 the US Federal Reserve (Fed) decided on rate rises in occasional steps of 25bp. Throughout the first half of the year, the Fed had to counter expectations that an end to the hiking cycle was anywhere close. The federal funds target rate was raised into the 5.00%-5.25% range before a status quo on 14 June. At the Federal Open Market Committee (FOMC) meeting on 25/26 July, the Fed raised its policy rate by 25bp before deciding on a status quo at the three subsequent meetings. These were well anticipated each time. The federal funds target rate is now within the 5.25% -5.50% range, up by 100bp in 2023 and by 525bp since the first hike in March 2022. Between September, when the decision not to raise policy rates was still being interpreted as just another pause in the cycle, and December, the Fed's rhetoric became much more dovish as inflation finally slowed and some FOMC members pointed out that indications of a slowdown in the economy were multiplying. The Minutes of the September meeting showed that some members considered the risk of overtightening monetary policy, and that decisions and communications should shift from how high to raise the policy rate to how long to hold it at restrictive levels.

In December, Fed Chair Powell pointed out that monetary policy was now 'well into restrictive territory'. On the other hand, projections of the level of the federal funds rate that FOMC members deemed 'appropriate' revealed that policy easing may start in the first half of 2024. In September, 10 FOMC members had thought the federal funds rate would still be above 5% by the end of 2024. In December, only three still expected that. The median estimate fell by 50bp to 4.625% (i.e., three 25bp cuts). Markets' expectations of a rapid cut in 2024, which were already strong before the meeting, then became somewhat over-enthusiastic. At the end of December, the Overnight Indexed Swap (OIS) showed the equivalent of seven 25bp cuts in policy rates in 2024, with a high probability of a first cut in March. Faced with the slowdown in inflation, the FOMC revised down its expectations for core personal consumption expenditures (PCE) inflation at the end of 2023 (to 3.2% from 3.7% forecast in September), at the end of 2024 (2.4%) and at the end of 2025 (2.2%). At the same time, the FOMC expects the unemployment rate to rise moderately (to 4.1% from 2024 to 2026), which would mean it remaining close to its equilibrium level of 4.0%. The Fed's central scenario appears to be a soft landing, whereby a return of inflation to target would not require a sharp slowdown in activity.

Investment Manager's Report (continued)

Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

In 2023, the European Central Bank (ECB) first raised its three key rates by 50bp in February and March, and then by 25bp in May, June, July and September, taking the deposit rate to 4.00%, the marginal lending facility to 4.75% and the main refinancing operations to 4.50%. Since the first hike in July 2022, rates have risen by 450bp. The ECB's communication hinted that the September hike would be the last in the current cycle and subsequent comments indicated that the choice between a status quo and a hike in September had been difficult given a particularly uncertain environment. In fact, the ECB is facing a delicate situation where the labour market remains tight but where business activity is suffering from lower demand.

At her press conference following what was presented as a 'pause' on 26 October, ECB President Christine Lagarde acknowledged that the 'very strong transmission' of monetary policy was 'directly affecting the financing of the economy' which in turn 'plays on to the reduction of inflation and the dampening of demand'. The year-on-year consumer price index fell from 8.6% in January to 2.9% in October and then 2.4% in November. Core inflation, still above 5% in August, fell to 3.6% in November, its lowest since April 2022. In addition, growth in the eurozone, and particularly in Germany, remained depressed and weak demand began to weigh on employment.

The Minutes of the ECB's 26 October meeting revealed that discussions focused on downside risks to growth. In the context, the post-meeting communication in December was seen as rather hawkish, unlike some statements that had caught investors' attention earlier. The Governing Council reiterated that it was 'too early to declare victory in the fight against inflation' as 'domestic price pressures remain elevated, primarily owing to strong growth in unit labour costs'.

The Governing Council also agreed that 'over the second half of 2024, the Pandemic Emergency Purchase Programme (PEPP) portfolio will be reduced by a monthly average of EUR 7.5 billion and that reinvestments under the scheme will be discontinued at the end of 2024'. Finally, ECB President Christine Lagarde said the Council did not discuss rate cuts. Even so, expectations of rapid rate cuts in 2024 have strengthened. At the end of December, the levels on the Overnight Indexed Swap (OIS) showed three cuts of 25bp in the first half of the year.

Throughout the year, changes in monetary policy expectations led to a sharp rise in volatility (implied and actual) all along the yield curve, and especially on the shorter maturities. These movements were exacerbated in mid-March by the bankruptcies of several US regional banks. Markets were also animated in the spring by the debate over the US debt ceiling and a hypothetical technical default of the US which led to sharp movements in the Credit Default Swap (CDS) market and on very short-term Treasury rates. Beyond this, these volatile movements also reflected investor nervousness. Quarterly changes in the 10-year T-note yield reflected this shilly-shallying: -4bp in the first quarter, +19bp in the second, +73bp in the third and -69bp in the fourth. The US 10-year yield (3.87% at the end of 2022) moved sharply from the beginning of the year. It fell below 3.40% in mid-March and, despite the rapid reaction of the authorities to guarantee all the deposits of the failed regional banks, long-term yields did not immediately rise. Investors then feared that the recession engendered by a possible banking crisis could force the Fed to aggressively lower its key interest rates. These concerns eased in May. Yields then rose as other factors came into play over the months (very hawkish comments from the central bankers at Sintra at the end of June, strong economic indicators).

The upward pressure on bond yields increased and, on 23 October, the yield on the US 10-year US T-note briefly surpassed the symbolic threshold of 5.00% for the first time since 2007. While the Treasury Secretary refuted it, such a development may have reflected concerns about the sustainability of US sovereign debt. These were also expressed by the rating agencies. We should note that the fall in long-term bond yields from their high on 23 October could be seen as an ex-post validation of Janet Yellen's analysis. In November and December, investors focused on two elements: The slowdown in inflation and the Fed's less hawkish comments, which triggered expectations of earlier and larger rate cuts. The yield on the 10-year T-note fell almost continuously to below 3.80% on 27 December, its lowest since 19 July. It ended the year at 3.88%, back to its end of 2022 level. The 2-year yield (4.43% at the end of 2022), rose above 5.00% at the beginning of March and then suddenly fell back to 3.80% during the US regional banks crisis. It hovered around this level until May before rising again. It then surged above 5.20% in October and ended the year at 4.25%.

At the Federal Open Market Committee (FOMC) meeting on 25/26 July, the Fed raised its policy rate by 25bp before deciding on a status quo at the three subsequent meetings. These were well anticipated each time. The federal funds target rate is now within the 5.25% -5.50% range, up by 100bp in 2023 and by 525bp since the first hike in March 2022. Between September, when the decision not to raise policy rates was still being interpreted as just another pause in the cycle, and December, the Fed's rhetoric became much more dovish as inflation finally slowed and some FOMC members pointed out that indications of a slowdown in the economy were multiplying. The Minutes of the September meeting showed that some members considered the risk of overtightening monetary policy, and that decisions and communications should shift from how high to raise the policy rate to how long to hold it at restrictive levels.

In December, Fed Chair Powell pointed out that monetary policy was now 'well into restrictive territory'. On the other hand, projections of the level of the federal funds rate that FOMC members deemed 'appropriate' revealed that policy easing may start in the first half of 2024. In September, 10 FOMC members had thought the federal funds rate would still be above 5% by the end of 2024. In December, only three still expected that. The median estimate fell by 50bp to 4.625% (i.e., three 25bp cuts). Markets' expectations of a rapid cut in 2024, which were already strong before the meeting, then became somewhat over-enthusiastic. At the end of December, the Overnight Indexed Swap (OIS) showed the equivalent of seven 25bp cuts in policy rates in 2024, with a high probability of a first cut in March. Faced with the slowdown in inflation, the FOMC revised down its expectations for core personal consumption expenditures (PCE) inflation at the end of 2023 (to 3.2% from 3.7% forecast in September), at the end of 2024 (2.4%) and at the end of 2025 (2.2%). At the same time, the FOMC expects the unemployment rate to rise moderately (to 4.1% from 2024 to 2026), which would mean it remaining close to its equilibrium level of 4.0%. The Fed's central scenario appears to be a soft landing, whereby a return of inflation to target would not require a sharp slowdown in activity.

Investment Manager's Report (continued)

Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

In 2023, the European Central Bank (ECB) first raised its three key rates by 50bp in February and March, and then by 25bp in May, June, July and September, taking the deposit rate to 4.00%, the marginal lending facility to 4.75% and the main refinancing operations to 4.50%. Since the first hike in July 2022, rates have risen by 450bp. The ECB's communication hinted that the September hike would be the last in the current cycle and subsequent comments indicated that the choice between a status quo and a hike in September had been difficult given a particularly uncertain environment. In fact, the ECB is facing a delicate situation where the labour market remains tight but where business activity is suffering from lower demand.

At her press conference following what was presented as a 'pause' on 26 October, ECB President Christine Lagarde acknowledged that the 'very strong transmission' of monetary policy was 'directly affecting the financing of the economy' which in turn 'plays on to the reduction of inflation and the dampening of demand'. The year-on-year consumer price index fell from 8.6% in January to 2.9% in October and then 2.4% in November. Core inflation, still above 5% in August, fell to 3.6% in November, its lowest since April 2022. In addition, growth in the eurozone, and particularly in Germany, remained depressed and weak demand began to weigh on employment.

The Minutes of the ECB's 26 October meeting revealed that discussions focused on downside risks to growth. In the context, the post-meeting communication in December was seen as rather hawkish, unlike some statements that had caught investors' attention earlier. The Governing Council reiterated that it was 'too early to declare victory in the fight against inflation' as 'domestic price pressures remain elevated, primarily owing to strong growth in unit labour costs'.

The Governing Council also agreed that 'over the second half of 2024, the Pandemic Emergency Purchase Programme (PEPP) portfolio will be reduced by a monthly average of EUR 7.5 billion and that reinvestments under the scheme will be discontinued at the end of 2024'. Finally, ECB President Christine Lagarde said the Council did not discuss rate cuts. Even so, expectations of rapid rate cuts in 2024 have strengthened. At the end of December, the levels on the Overnight Indexed Swap (OIS) showed three cuts of 25bp in the first half of the year.

Throughout the year, changes in monetary policy expectations led to a sharp rise in volatility (implied and actual) all along the yield curve, and especially on the shorter maturities. These movements were exacerbated in mid-March by the bankruptcies of several US regional banks. Markets were also animated in the spring by the debate over the US debt ceiling and a hypothetical technical default of the US which led to sharp movements in the Credit Default Swap (CDS) market and on very short-term Treasury rates. Beyond this, these volatile movements also reflected investor nervousness. Quarterly changes in the 10-year T-note yield reflected this shilly-shallying: -4bp in the first quarter, +19bp in the second, +73bp in the third and -69bp in the fourth. The US 10-year yield (3.87% at the end of 2022) moved sharply from the beginning of the year. It fell below 3.40% in mid-March and, despite the rapid reaction of the authorities to guarantee all the deposits of the failed regional banks, long-term yields did not immediately rise. Investors then feared that the recession engendered by a possible banking crisis could force the Fed to aggressively lower its key interest rates. These concerns eased in May. Yields then rose as other factors came into play over the months (very hawkish comments from the central bankers at Sintra at the end of June, strong economic indicators).

The upward pressure on bond yields increased and, on 23 October, the yield on the US 10-year US T-note briefly surpassed the symbolic threshold of 5.00% for the first time since 2007. While the Treasury Secretary refuted it, such a development may have reflected concerns about the sustainability of US sovereign debt. These were also expressed by the rating agencies. We should note that the fall in long-term bond yields from their high on 23 October could be seen as an ex-post validation of Janet Yellen's analysis. In November and December, investors focused on two elements: The slowdown in inflation and the Fed's less hawkish comments, which triggered expectations of earlier and larger rate cuts. The yield on the 10-year T-note fell almost continuously to below 3.80% on 27 December, its lowest since 19 July. It ended the year at 3.88%, back to its end of 2022 level. The 2-year yield (4.43% at the end of 2022), rose above 5.00% at the beginning of March and then suddenly fell back to 3.80% during the US regional banks crisis. It hovered around this level until May before rising again. It then surged above 5.20% in October and ended the year at 4.25%.

FAM Series UCITS ICAV

Investment Manager's Report (continued)

Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

Eurozone bond markets' movements were driven by expectations of the ECB's and the Fed's monetary policy and, of course, by the banking turmoil that arose in March, first in the US and then in Europe. It should be noted that the interbank market was not affected at any time, which reflected the confidence that eurozone banks have in each other. In the first quarter, the yield on the 10-year German Bund moved erratically between 2.00% and 2.75%. Market movements were several times heightened by the reaction of some investors who felt forced to abruptly stop-loss their positions. This was the case for the fall that followed the 50bp rise in the ECB's key rates on 16 March and briefly led to the yield on the German 10-year Bund to move below 2.00% intraday on 24 March amid rising concerns about European banks. Once the risk of a systemic financial crisis was removed, the German 10-year Bund yield moved trendless between 2.20% and 2.50% in the second quarter, surpassing 2.50% only very briefly, driven by a global trend on bond yields (US debt ceiling negotiations, UK inflation data). It was only from July, in the wake of US long-term bond yields, that it crossed this 2.50% threshold, which had previously appeared to be a strong resistance point, for longer. After a bumpy ride during the summer, it reached 2.97% at the beginning of October. Following US yields, and despite still-hawkish ECB rhetoric, the German 10-year yield then fell sharply, accentuated by worsening eurozone economic conditions and the slowdown in inflation. The 10-year Bund yield eased to 1.90% on 27 December, its lowest in more than a year, with bond market activity very light in the last week of the year. It ended 2023 at 2.02% (-55bp compared to the end of 2022).

The Governing Council's conclusions of 14 December did not appear particularly dovish, but subsequent statements by several governors confirming that it was too early to envisage rate cuts failed to change investor expectations. The German 2-year yield (2.76% at the end of 2022), fluctuated sharply between 2.35% and 3.25% to end 2023 at 2.40%, close to its lowest since the mini crisis triggered by the bankruptcies of several US regional banks in March.

No substantial changes have been performed in the optimization since inception (21/09/2022). The rebalancing is mostly removing the bonds taken out from the benchmark to buy new ones.

DEPOSITARY'S REPORT TO THE SHAREHOLDERS OF FAM SERIES UCITS ICAV

We, BNP Paribas S.A., Dublin Branch, appointed Depositary to the ICAV provide this report solely in favour of the investors of the Fund as a body for the year ended 31 December 2023 ("the Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011) as amended, ("the UCITS Regulations"). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the UCITS Regulations, we have enquired into the conduct of the ICAV for the Accounting Period and we hereby report thereon to the investors of the Fund as follows;

We are of the opinion that the Fund has been managed during the Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Sub-Fund by the constitutional documents, the Regulations and by the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ("the Central Bank UCITS Regulations"); and
- (ii) otherwise in accordance with the provisions of the constitutional documents, the Regulations and the Central Bank UCITS Regulations.

FAM Series UCITS ICAV

Directors' Report

For the financial year ended 31 December 2023

The Directors of FAM Series UCITS ICAV (the “ICAV”) submit their report together with the audited financial statements for the financial year ended 31 December 2023.

Principal Activities

The ICAV has been authorised by the Central Bank of Ireland (the “Central Bank”) as an Irish Collective Asset-Management Vehicle pursuant to the Irish Collective Asset-Management Vehicles Act 2015 (the “ICAV Act”). The ICAV has been authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended).

The ICAV is structured as an umbrella entity composed of different Sub-Funds. Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

These financial statements relate only to the Exchange Traded Funds (“ETFs”). On 7 October 2022, FAM Series UCITS ICAV listed on the Italian Stock Exchange (Borsa Italiana).

Statement of Directors’ Responsibilities in Respect of the Financial Statements

The Directors are responsible for preparing the financial statements in accordance with applicable Irish law and International Financial Reporting Standards (“IFRS”) as adopted by the European Union (“EU”).

Irish company law requires the Directors to prepare financial statements for each financial year, which give a true and fair view of the state of affairs of the ICAV and of the profit or loss of the ICAV for that year. In preparing those financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the ICAV will not continue in business; and
- state whether the financial statements have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and reasons for any material departure from those standards.

The Directors confirm that they have complied with the above requirements in preparing the financial statements for the year ended 31 December 2023 (the “Financial Statements”). In carrying out these requirements, the Directors have appointed BNP Paribas Fund Administration Services (Ireland) Limited (the “Administrator”) to act as Administrator to the ICAV.

Review of the Business and Future Developments

A comprehensive overview of the ICAV's and its Sub-Funds' activities and its future developments are set out in the Investment Manager's reports. Investment objectives may change from time to time, these will be reflected in the prospectus of the ICAV and the relevant Sub-Fund supplement.

Risks and Uncertainties

The principal risks and uncertainties which the ICAV faces relate to the use of financial instruments and are listed in Note 14 “Financial Instruments and Associated Risks”.

Results and Dividends

The results for the financial year are shown in the Statement of Comprehensive Income on pages 52 to 56.

Corporate Governance

The Directors have voluntarily adopted the 'Corporate Governance Code for Collective Investment Schemes and Management Companies', as published by Irish Funds in December 2011 (the “IF Code”), as the ICAV's corporate governance code. In respect of the financial year ended 31 December 2023, the Directors confirm compliance with the provisions of the IF Code.

Secretary

The Secretary that served during the financial year is listed on page 3.

FAM Series UCITS ICAV

Directors' Report (continued) For the financial year ended 31 December 2023

Directors

The Directors of the ICAV at 31 December 2023 were:

Jim Finn (Irish resident)*
Fabio Melisso (Irish resident)**
Ciaran Brady (Irish resident)**
Lorenzo Di Pietrantonio (Irish resident)**

* Independent non- executive Director

** Non- executive Director

Transactions Involving Directors

Other than as disclosed in Note 13 to the Financial Statements, there are no contracts or arrangements of any significance in relation to the business of the ICAV in which the Directors or Secretary had any interest as defined in the ICAV Act at any time during the financial year.

Connected Persons

In accordance with the requirements of the UCITS Regulations, all transactions carried out with the ICAV by the promoter, manager, trustee, investment adviser and associates/group companies ("connected persons") must be conducted at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in the UCITS Regulations are applied to all transactions with connected persons and that transactions with connected persons entered into during the year complied with the obligations set out in the UCITS Regulations.

Accounting Records

The measures taken by the Directors to secure compliance with the ICAV's obligation to keep adequate accounting records are the use of appropriate accounting systems and procedures and employment of competent persons through the appointment of the Administrator. The accounting records are kept at the registered address of the Administrator at Termini, 3 Arkle Road, Sandyford, Dublin 18, D18 C9C5, Ireland.

Statement of Relevant Audit Information

The Directors acknowledge that they are responsible for providing all relevant audit information to the ICAV's statutory auditors in connection with preparing their report in accordance with section 330 of the Companies Act 2014 (as amended). The Directors confirm that:

- so far as the Directors are aware, there is no relevant audit information of which the ICAV's statutory auditors are not aware; and
- each of the Directors has taken all the steps that ought to have been taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the ICAV's statutory auditors are aware of that information.

Going Concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern.

Independent Auditors

Deloitte Ireland LLP, Chartered Accountants and Statutory Audit Firm were appointed auditors for the financial year.

FAM Series UCITS ICAV

Directors' Report (continued)

For the financial year ended 31 December 2023

Events During the Financial Year

Geopolitical Conflicts

The recent outbreak of geopolitical conflicts all over the world can have an impact on the global economies. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

Silicon Valley Bank Collapse and Credit Suisse forced merger

In March, the landscape was shaken by the collapse of Silicon Valley Bank and the forced merger of UBS and Credit Suisse, raising concerns of potential contagion throughout the global banking system. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

All disclosures relating to events during the year ended 31 December 2023 are disclosed in Note 20 of the Financial Statements.

Events Post Financial Year End

All disclosures relating to events after the year ended 31 December 2023 are disclosed in Note 21 of the Financial Statements.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

Report on the audit of the financial statements

Opinion on the financial statements of FAM Series UCITS ICAV (the 'ICAV')

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 December 2023 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the applicable regulations.

The financial statements we have audited comprise:

- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 24, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in the preparation of the financial statements is the Irish Collective Asset-Management Vehicles Acts 2015-2020 ("the ICAV Act") and International Financial Reporting Standards (IFRS) as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Summary of our approach

Scoping	Our audit is a risk-based approach taking into account the structure of the ICAV, types of investments, the involvement of the third-party service providers, the accounting processes and controls in place and the industry in which the ICAV operates.
Significant changes in our approach	There have been no significant changes in our approach from our prior year audit.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the ICAV's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls in place regarding going concern as part of our audit risk assessment procedures.
- Holding discussions with management on the directors' going concern assessment, the future plans for the ICAV and the feasibility of those plans.
- Challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- Reviewing all board meeting minutes during the period up to the date of approval of the financial statements, for evidence of any discussions and/or decisions that could impact the ICAV's ability to continue as a going concern.
- Reviewing the capital activity and NAV movements, subsequent to the financial year end.
- Assessing the adequacy of the relevant going concern disclosures made in the financial statements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ICAV's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

Valuation of financial assets and liabilities at fair value through profit or loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

The valuation of financial assets and liabilities at fair value through profit or loss is considered a key audit matter as it is the most significant number on the Statement of Financial Position, is a key driver of performance and due to the potential for management judgement and estimation in the valuation.

As financial assets and liabilities at fair value through profit or loss are a key driver of performance and due to their significance to the net asset value, there is a risk that these investments might not be correctly valued, in accordance with IFRS.

Refer also to note 14 and notes 15 in the financial statements.

How the scope of our audit responded to the key audit matter

- We considered the valuation basis used in light of the valuation policy as stipulated in the ICAV's Prospectus documents and the requirements of IFRS.
- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") ISAE 3402 Report and identified the key controls in place over the valuation process and reviewed those key controls for any exceptions.
- We independently valued exchange traded securities using our own market feeds.
- We reviewed the adequacy of the fair value levelling disclosures in the financial statements.
- We revalued swap positions on a sample basis.
- We reviewed the fair value levelling disclosures in the financial statements to ensure they were appropriate.

Existence of financial assets and liabilities at fair value through profit or loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

There is a risk that financial assets and liabilities at fair value through profit or loss recorded might not exist or might not be owned by the ICAV. Financial assets and liabilities at fair value through profit or loss are considered to be a key driver for the ICAV's performance.

Therefore, due to the significance of investments to the ICAV's financial statements, we have determined this as a key audit matter.

Refer also to note 14 in the financial statements.

How the scope of our audit responded to the key audit matter

- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") ISAE 3402 Report and identified the key controls in place over the reconciliation process and reviewed those key controls for any exceptions.
- We obtained direct confirmation of the investments of the ICAV from the Depositary and brokers at year-end. Any reconciling items between the confirmations and the ICAV's investment portfolios were investigated to ensure that trades were recorded in the correct reporting period.
- We completed alternative procedures in relation to a number of positions for which

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

confirmations were not available at the issuance of this report.

Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the financial statements is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

Our application of materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

Basis for determining materiality	<p>The materiality that we used in the current year was 1% of average net assets determined in respect of each sub-fund and 0.50% of average net assets for the following sub-funds:</p> <ol style="list-style-type: none"> 1. Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF 2. Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF 3. Fineco AM MSCI World Metals and Mining UCITS ETF 4. Fineco AM MarketVector Global Clean Energy Transition ESG UCITS ETF 16. Fineco AM MarketVector Global Metaverse and e-Games ESG UCITS ETF
Rationale for the benchmark applied	<p>The Net Asset Value of the ICAV is the primary indicator of the size and performance of the ICAV and is considered the key area of interest for the shareholders, who are the primary users of the financial statements. The use of the average Net Asset Value is considered the industry practice benchmark for Investment Funds.</p>

The materiality used by the former auditor in the audit of the prior year financial statements was 1% of average net assets of the ICAV for all sub-funds.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole.

Performance materiality was set at 50% of materiality for the 2023 audit (2022: 50%). In determining performance materiality, we considered the following factors:

- our understanding of the ICAV;
- the quality of the control environment;

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

- the nature and extent of misstatements identified in previous audits; and
- our expectations in relation to misstatements in the current period.

We agreed with the Board of Directors that we would report to them all audit differences in excess of 5% of materiality (2022 : 5% of materiality) as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

An overview of the scope of our audit

Our audit is a risk based approach taking into account the structure of the ICAV, types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the ICAV operates. The ICAV is incorporated as an Irish collective asset management vehicle with variable capital and segregated liability between sub-funds. The ICAV is authorised by the Central Bank of Ireland (the "Central Bank") as a qualifying investor alternative investment fund.

The ICAV is organised as an umbrella fund with segregated liability between sub-funds. We assess the risks of each sub-fund separately. We have conducted our audit based on the books and records maintained by the administrator of FAM Series ICAV at Termini, 3 Arkle Road, Sandyford, Dublin 18, D18 C9C5, Ireland.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the ICAV's documentation of their policies and procedures relating to:
 - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
- the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including IT and valuations regarding how and where fraud might occur in the financial statements and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas: Valuation of financial assets and liabilities at fair value through profit or loss and Revenue Recognition. In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the ICAV operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the The key laws and regulations we considered in this context included the ICAV Act, Listing Rules and the applicable regulations..

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the ICAV's ability to operate or to avoid a material penalty. These included matters regulated by the Central Bank of Ireland.

Audit response to risks identified

As a result of performing the above, we identified 'Valuation of financial assets at fair value through profit or loss as a key audit matter related to the potential risk of fraud. The key audit matters section of our report explains the matter in more detail and also describes the specific procedures we performed in response to that key audit matter.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

Our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management and the Board of Directors concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance and reviewing correspondence with the Central Bank of Ireland; and
- In addressing the risk of fraud in Revenue Recognition, independently valuing all exchange traded securities using our own market feeds and completing an unrealised gain/loss reconciliation.
- In addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Report on other legal and regulatory requirements

Matters on which we are required to report by the ICAV Act and the applicable regulations

In our opinion, the information given in the directors' report is consistent with the financial statements. The directors' report has been prepared in accordance with the ICAV Act.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Opinion on other matters prescribed by the applicable regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF FAM SERIES UCITS ICAV

Other matters which we are required to address

We were appointed by the Board of Directors on 3 January 2024 to audit the financial statements for the year ending 31 December 2023. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 6 years, covering the year ending 31 December 2023.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the ICAV in conducting the audit.

Our audit opinion is consistent with the additional report to the Board of Directors we are required to provide in accordance with ISA (Ireland) 260.

Use of our report

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act . Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Brian Forrester
For and on behalf of Deloitte Ireland LLP
Chartered Accountants and Statutory Audit Firm
Deloitte & Touche House, 29 Earlsfort Terrace, Dublin 2

29 April 2024

An audit does not provide assurance on the maintenance and integrity of the website, including controls used to achieve this, and in particular on whether any changes may have occurred to the financial statements since first published. These matters are the responsibility of the directors but no control procedures can provide absolute assurance in this area.

Legislation in Ireland governing the preparation and dissemination of financial statements differs from legislation in other jurisdictions.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023

1. General Information

FAM Series UCITS ICAV (the “ICAV”) is an umbrella Irish Collective Asset-management Vehicle with segregated liability between its Sub-Funds and authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended). The ICAV was incorporated on 8 March 2018. On 7 October 2022, FAM Series UCITS ICAV listed on the Italian Stock Exchange (Borsa Italiana).

The ICAV is structured as an umbrella entity composed of different sub-funds (the “Sub-Funds”). Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

In 2023, the following Sub-Funds have updated the supplements as the Sub-Fund investment manager's intention is to pursue a new investment objective with the aim to provide dividends at certain dates, while protecting the NAV of EUR 100 at the new defined maturity intended to be 3 years from the expiration of the previous term. As a result, the following Sub-Funds have updated the supplement with new maturity date and has been renamed to the following:

Previous Name	New Fund Name post maturity	New Maturity Date
Global Defence FAM Fund 2023	Global Defence FAM Fund 2026	30 November 2026
Smart Global Defence FAM Fund 2023	Smart Global Defence FAM Fund 2026	30 December 2026
Smart Global Defence FAM Fund 2023 II	Smart Global Defence FAM Fund 2026 II	30 December 2026

The investment objective of the below Sub-Funds is to achieve long term capital appreciation:

- Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF
- Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF
- Fineco AM MSCI World Metals and Mining UCITS ETF
- Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF

The investment objective of Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF is to achieve total returns.

The assets of a Sub-Fund will be invested separately in accordance with the investment objectives and policies of the Sub-Fund as set out in the Prospectus.

In respect of each Sub-Fund, Fineco Asset Management Designated Activity Company (the “Manager”) has appointed an Investment Manager to manage the assets and investments of the Sub-Fund in conformity with the Sub-Fund’s investment objectives and policies. The Manager shall be entitled to receive annual management fees (see Note 13). The Investment Managers shall be entitled to receive an annual investment management fee which shall be paid out of the fees of the Manager and not out of the assets of the Sub-Funds.

(a) Basis of Preparation

These Financial Statements have been prepared in accordance with International Financial Reporting Standards ('IFRS') issued by the International Accounting Standards Board ("IASB") and have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. General Information (continued)

Going Concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern. Therefore, the Financial Statements are prepared on the going concern basis.

New standards and interpretations effective 1 January 2023

Definition of Accounting Estimates - Amendments to IAS 8

In February 2021, the International Accounting Standards Board issued amendments to IAS 8, in which it introduces a new definition of 'accounting estimates'.

In particular, the amendments which became effective 1 January 2023 clarify:

- the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors.
- how entities use measurement techniques and inputs to develop accounting estimates.

This amendment did not have a material impact on the ICAV.

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

In February 2021, the International Accounting Standards Board issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements (the PS), in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures.

In particular, the amendments which became effective 1 January 2023 clarify:

- that replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies.
- that adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosure.

The ICAV considered the amendments and noted that there is no impact on the measurement, recognition or presentation of any items in the ICAV's Financial Statements.

There are no other standards, interpretations or amendments to existing standards that are effective that would be expected to have a significant impact on the ICAV.

(b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2023 and not early adopted

Classification of Liabilities as Current or Non-current - Amendments to IAS 1

In January 2020, the International Accounting Standards Board issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

In particular, the amendments which become effective 1 January 2024 clarify:

- What is meant by a right to defer settlement.
- That a right to defer must exist at the end of the reporting period.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

1. General Information (continued)

(b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2023 and not early adopted (continued)

This amendment is not expected to have a material impact on the ICAV.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the ICAV.

2. Material Accounting Policies

The material accounting policies applied in preparation of these Financial Statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

2.1 Accounting Policies

(a) Financial Assets and Liabilities

(i) Classification

The ICAV classifies financial assets and financial liabilities into the following categories:

Financial assets at Fair Value through Profit or Loss ("FVTPL"):

Designated at FVTPL:

- *Transferable Securities*
 - Bonds
 - Equities
- *Derivative Instruments*
 - Total return swaps

Financial assets at amortised cost:

- *Loans and receivables: cash and cash equivalents and interest and other assets.*

Financial liabilities at amortised cost:

- *Other liabilities: accrued expenses.*

The ICAV designates exchange traded funds at FVTPL on initial recognition because it manages these securities on a fair value basis in accordance with its documented investment strategy. Internal reporting and performance measurement of these securities are on a fair value basis.

A non-derivative financial asset with fixed or determinable payments may be classified as a loan and receivable unless it is quoted in an active market or is an asset for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

(ii) Recognition

Financial assets and financial liabilities at FVTPL are initially recognised at fair value on the trade date, which is the date on which the ICAV becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised on the date on which they are originated.

Purchases and sales of financial instruments are accounted for on the trade date. Realised gains and losses on disposals of financial instruments are calculated using the First In, First Out ("FIFO") method.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

2.1 Accounting Policies (continued)

(iii) Initial Measurement

Financial instruments categorised at FVTPL are measured initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income. Financial assets and financial liabilities are recognised on the Statement of Financial Position when the ICAV becomes party to the contractual provisions of the instrument. A regular purchase of financial assets is recognised using trade date accounting. From this date any gains or losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

(iv) Fair Value Measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the ICAV has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the ICAV measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an on-going basis.

If there is no quoted price in an active market, then the ICAV uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

Investments in open-ended investment funds are valued at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the daily net asset value of these shares are recognised as movement in unrealised gains/(losses) on financial assets and liabilities held at FVTPL in the Statement of Comprehensive Income.

The ICAV recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

(v) Amortised Cost Measurement

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

(vi) Impairment

IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' ("ECL") model. The new impairment model applies to financial assets measured at amortised cost and debt investments at FVOCI, but not to investments in equity instruments. Under IFRS 9, credit losses are recognised earlier than under IAS 39.

A financial asset or liability not classified at FVTPL is assessed at each reporting date to determine whether there is objective evidence of impairment. A financial asset or a group of financial assets is 'impaired' if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset(s) and that loss event(s) had an impact on the estimated future cash flows of that asset(s) that can be estimated reliably.

Objective evidence that financial assets are impaired includes significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of the amount due on terms that the ICAV would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, or adverse changes in the payment status of the borrower.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

2.1 Accounting Policies (continued)

(a) Financial Assets and Liabilities (continued)

(vi) Impairment (continued)

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against receivables. Interest on the impaired asset continues to be recognised, if an event occurring after the impairment was recognised causes the amount of impairment loss to decrease, then the decrease in impairment loss is reversed through profit or loss.

(vii) Derecognition

The ICAV derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the ICAV neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest in such transferred financial assets that is created or retained by the ICAV is recognised as a separate asset or liability.

The ICAV enters into transactions whereby it transfers assets recognised on its Statement of Financial Position, but retains either all or substantially all of the risks and rewards of the transferred assets. If all or substantially all of the risks and rewards of the transferred assets are retained, then transferred assets are not derecognised. Transfer of assets usually includes sale and repurchase agreements where all or substantially all of the risks and rewards are retained.

The ICAV derecognises a financial liability when its contractual obligations are discharged, cancelled, or expired.

(b) Derivative Instruments

The Sub-Funds may enter into derivatives instruments for the purposes of efficient portfolio management.

Total return swaps

A total return swap is a derivative contract between two parties where they agree to exchange the investment return and income on an underlying asset or a basket of assets for the investment return and income on a different underlying asset or a basket of assets which is agreed between the parties. Realised and movement of unrealised gains and losses are recognized in the Statement of Comprehensive Income.

(c) Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported on the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

(d) Redeemable Participating Shares

The issued redeemable participating Shares ("Shares") is at all times equal to the net asset value of the ICAV. The Shares are redeemable at the shareholders option and are classified as financial liabilities. The Shares can be put back to the ICAV at any time for cash equal to a proportionate share of the ICAV's net asset value. The Shares are carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the share back to the ICAV. Each Sub-Fund's Net Asset Value ("NAV") per Share is calculated by dividing the NAV of that Sub-Fund, being the value of its assets less its liabilities, by the numbers of shares of that Sub-Fund then in issue.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

2.1 Accounting Policies (continued)

(e) Use of Judgements and Estimates

The preparation of Financial Statements in conformity with IFRS as adopted by the EU requires management to make judgements, estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the Financial Statements. Estimates also affect the reported amounts of income and expenses for the reporting period in the Statement of Comprehensive Income. Actual results could differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised and in any future accounting periods affected. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year, as well as critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the Financial Statements are included in Note 14 and Note 15.

(f) Foreign Exchange

Items included in the ICAV's Financial Statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). The functional currency for this ICAV is Euro ("EUR" or "€") and each Sub-Fund's base currency is disclosed below:

Sub-Fund	Base Currency
Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF	USD
Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF	USD
Fineco AM MSCI World Metals and Mining UCITS ETF	USD
Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF	USD
Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF	USD
Fineco AM MSCI World Financials ESG Leaders UCITS ETF	USD
Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF	USD
Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF	USD
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF	EUR
Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF	EUR
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF	EUR
Fineco AM MarketVector Artificial Intelligence ESG UCITS ETF	USD
Fineco AM MarketVector Japan Quality Tilt ESG UCITS ETF	USD
Fineco AM MarketVector Bioproduction Tech and Tools ESG UCITS ETF	USD
Fineco AM MarketVector Global Clean Energy Transition ESG UCITS ETF	USD
Fineco AM MarketVector Global Metaverse and e-Games ESG UCITS ETF	USD

The ICAV has adopted the functional currency of each Sub-Fund as the presentation currency for these Financial Statements. Assets and liabilities expressed in currencies other than the functional currency are converted into the functional currency using the exchange rates prevailing as at the Statement of Financial Position date. Transactions in foreign currencies are translated into the Sub-Fund's functional currency at the transaction dates. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the results for the financial year.

(g) Income

Interest income is recognised in the Statement of Comprehensive Income at the effective interest rate method.

Dividends are recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

2. Material Accounting Policies (continued)

2.1 Accounting Policies (continued)

(h) Expenses

All expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

(i) Cash and Cash Equivalents

Cash comprises cash at banks and bank overdrafts. Cash equivalents are short term (up to three months), highly liquid investments, that are readily convertible to known amounts of cash and which are subject to insignificant changes in value. For the financial years ended 31 December 2023 and 31 December 2022, cash equivalents held by the ICAV includes, commercial papers and treasury bills. They are held for the purpose of meeting short-term cash commitments rather than for investments or other purposes. The carrying amount of these assets is approximately equal to their fair value.

(j) Payable for Securities Purchased/Receivable for Securities Sold

Payable for securities purchased and receivable for securities sold include trades pending settlement.

(k) Redemptions Payable

Redemptions are recognized as liabilities when the amount requested by the unitholder in the irrevocable redemption notice becomes fixed.

(l) Subscriptions Receivable

Subscriptions receivable includes the amounts still to be collected from investor before the ICAV will issue the shares.

(m) Due from/to Brokers

Due from/to brokers represent margin accounts and cash collateral for borrowed securities. Margin accounts represent cash deposits with brokers, transferred as collateral against open derivative contracts.

(n) Organisational Costs

Costs incurred in organising the ICAV were amortised over the first five accounting periods of the ICAV as disclosed in the prospectus. This is not in accordance with IFRS but Management assessed the costs to be immaterial to the ICAV, please refer to Note 4 for details.

(o) Management Fee Rebate

The ICAV has rebate agreements with certain investment managers of the Underlying Funds. These rebates are recorded on an accruals basis in the Statement of Comprehensive income.

(p) Anti-Dilution Levy

The Directors reserve the right to impose “an anti-dilution levy” representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought or sold), duties and charges and other dealing costs relating to the acquisition or disposal of assets and to preserve the value of the underlying assets of a Sub-Fund, in the event of receipt for processing of net subscriptions or net redemptions exceeding such percentage of the NAV of the Sub-Funds as determined by the Directors from time to time (including subscriptions and/or redemptions which would be effected as a result of requests for conversion from one Class into another Class). Any such provision will be deducted from the subscription proceeds in the case of net subscription requests exceeding the threshold of a Sub-Fund and deducted from the redemption proceeds in the case of net redemption requests exceeding the threshold of a Sub-Fund including the price of shares issued or redeemed as a result of requests for conversion. Any such sum will be paid into the account of the relevant Sub-Fund.

8. Share Capital

The actual value of paid up share capital of the ICAV shall at all times equal to the NAV of the ICAV after deduction of liabilities. The share capital of the ICAV shall be divided into share capital of 5,000,000,000,000 Shares of no par value and 2 Subscriber Shares of €1.00 each and shall at all times be equal to the value for the time being of the issued share capital of the ICAV.

Each of the Shares (with the exception of the Subscriber Shares) entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of the relevant Sub-Fund attributable to the relevant class in respect of which they are issued save in the case of dividends declared prior to becoming a Shareholder.

The proceeds from the issue of Shares shall be applied in the books of the ICAV to the relevant Sub-Fund and shall be used on behalf of such Sub-Fund for the acquisition of assets in which a Sub-Fund may invest. The records and accounts of each Sub-Fund shall be maintained separately.

The Directors reserve the right to re-designate any class of Shares from time to time, provided that Shareholders in that class shall first have been notified by the ICAV that the Shares will be re-designated and shall have been given the opportunity to have their Shares redeemed by the ICAV, except that this requirement shall not apply where the Directors re-designate Shares in issue in order to facilitate the creation of an additional class.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

8. Share Capital (continued)

Each of the Shares entitles the holder to attend and vote at meetings of the ICAV and of the relevant Sub-Fund represented by those Shares. No class of Shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other class of Shares or any voting rights in relation to matters relating solely to any other class of Shares.

Any resolution to alter the class rights of the Shares requires the approval of three quarters of the holders of the Shares of the relevant class represented or present and voting at a general meeting duly convened in accordance with the instrument of incorporation of the ICAV (the "Instrument").

The Instrument empowers the Directors to issue fractional shares in the ICAV. Fractional shares will be issued where any part of the subscription monies for Shares represents less than the subscription price for one Share, provided however, that fractions shall not be less than 0.01 of a Share and shall not carry any voting rights at general meetings of the ICAV or a Sub-Fund and the NAV of any fractional share shall be the NAV per Share adjusted in proportion to the fraction.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

10. Directors' Fees

The Directors are entitled to a fee by way of remuneration for their services at a rate to be determined from time to time by the Directors. The aggregate amount of Directors' remuneration in any one year shall not exceed €30,000 (excluding Value Added Tax, ("VAT"), if any).

All Directors will be entitled to reimbursement by the ICAV of expenses properly incurred in connection with the business of the ICAV or the discharge of their duties. Fees related to the ICAV are charged to the trading Sub-Funds. Mr. Jim Finn is the only Director of the ICAV in receipt of a director's fee. All other Directors of the ICAV have each waived their entitlement to receive a director's fee.

The directors' fees charged for the year amounted to €429 (31 December 2022: €138) in respect of the Sub-Funds presented. The directors' fees payable as at 31 December 2023 was €458 (31 December 2022: €138) in respect of the Sub-Funds presented.

11. Administration Fees and Depositary Fees

The Manager and the Administrator entered into an administration agreement which is applicable for a three year period, effective 1 October 2020. The annual fee, payable out of the assets of the relevant Sub-Fund, is at a maximum rate of 0.05% (plus VAT, if any) and is a combined fee which includes both the Administrator and the fee of the Depositary. The fee is presented on the Statement of Comprehensive Income as Administration fees and Depositary fees.

The Administrator is also entitled to be reimbursed for all agreed registration and transaction fees and out of pocket expenses (plus VAT thereon, if any) properly incurred by it in the performance of its duties and responsibilities under the Administration Agreement.

12. Auditors Remuneration

The remuneration to the statutory audit firm in respect of the services rendered to the ICAV in respect of the Sub-Funds presented for the financial year is as follows:

	31 December 2023	31 December 2022
	EUR	EUR
Audit fee*	53,966	33,060

* Audit fee amount shown is excluding VAT of 23%. There were no other fees paid to the statutory audit firm for tax or other assurance or non-audit work during the year.

13. Related and Connected Persons Transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The Directors of the ICAV are considered related parties. Details of Directors' fees charged during the year are disclosed in Note 10.

Mr. Fabio Melisso and Mr. Jim Firm (Independent director) are directors of the Manager and Mr. Ciaran Brady and Lorenzo Di Pietrantonio are employees of the Manager and will be considered to be interested in any agreement entered into by the ICAV with the Manager.

Sub-Funds of Core Series and FAM Evolution ICAV, which are also managed by the Manager, have made investments in the ICAV during the year. There were no other agreements entered into by the ICAV with either Core Series or FAM Evolution ICAV during the year.

Connected Persons

In accordance with the requirements of the UCITS Regulations, all transactions carried out with the ICAV by the promoter, manager, trustee, investment adviser and associates/group companies ("connected persons") must be carried out as if negotiated at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in the UCITS Regulations are applied to all transactions with connected parties and transactions with connected parties entered into during the period complied with the obligations set out in the UCITS Regulations.

Management Fee

The Manager is entitled to receive out of the assets of the ICAV a management fee in respect of each class, accrued daily and payable monthly in arrears at such annual percentage rate of the NAV of each class as set out in the relevant Sub-Fund supplement. Any out of pocket expenses incurred by the Manager in carrying out its role on behalf of the ICAV and its Sub-Funds shall be for its own account. These disclosed fees are the maximum charges capped as per the prospectus and actual fees charged may be lower.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

14. Financial Instruments and Associated Risks

Each Sub-Fund's investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the prospectus for a more detailed discussion of the risks inherent in investing in each Sub-Fund. The Sub-Funds have exposure to the following risks from financial instruments:

- a) Market risk;
- b) Liquidity risk;
- c) Credit risk; and
- d) Operational risk.

Risk Management framework

The Directors review quarterly risk and investment performance reports and presentations from the Manager, or where applicable the Manager's delegate Investment Managers (together "the Manager" only for the purpose of Note 14), covering the Sub-Funds' performance and risk profile during the financial year.

The Manager is responsible for ensuring that each Sub-Fund is managed within the terms of their investment guidelines and limits set out in the prospectus. The Directors review the Manager's reporting on the investment performance, product risk monitoring and oversight activities and the monitoring and oversight of regulatory and operational risk for the Sub-Funds.

The Manager has been given discretionary authority to manage the assets in line with the investment objectives of each Sub-Fund. Compliance with the target asset allocations and the composition of the portfolio are monitored by the Directors on a quarterly basis. In instances where the portfolio has diverged from target asset allocations, the Manager is obliged to take actions to rebalance the portfolio in line with the established targets, within prescribed time limits.

(a) Market Risk

Market risk arises mainly from uncertainty about future values of financial instruments influenced by price, interest rate and currency movements. It represents the potential loss each Sub-Fund may suffer through holding market positions in the face of market movements. The Manager's strategy for the management of market risk is driven by the Sub-Funds' investment objective as set out in Note 1. The ICAV's market risk is managed on a daily basis by the Manager. The Manager moderates this risk through a careful selection of securities and other financial instruments within specified limits. Details of the nature of the ICAV's investment portfolio at the Statement of Financial Position date are disclosed in the Schedule of Investments.

Value at Risk

The Manager uses three approaches to measure the Sub-Funds' global risk exposures. These are the commitment approach, Absolute Value at Risk ("VaR") and Relative VaR. These approaches are described in the prospectus and the approach each Sub-Fund uses is outlined in the table below.

(a) Market Risk (continued)

Value at Risk (continued)

Using the relative VaR, the Manager estimates the potential loss in the Sub-Fund's portfolio over a set period at a certain confidence level, and based on statistical analysis of historical price trends and volatilities. The VaR of the Sub-Fund's portfolio is measured relative to the benchmark index which the Manager consider a comparable benchmark to the Sub-Fund's portfolio. In compliance with the UCITS Regulations, the relative VaR of the Sub Fund's portfolio shall not exceed twice the VaR of the index, as determined daily using a one-tailed confidence interval of 99%, a holding period of one month and a historical observation period of at least 1 year.

The 1 day VaR as of 31 December 2023 and 31 December 2022 based on a 99% confidence level is outlined in the table below:

Relative VaR	31 December 2023	31 December 2022
Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF	5.73%	4.00%

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

14. Financial Instruments and Associated Risks (continued)

(a) Market Risk (continued)

Value at Risk (continued)

Some limitations of VaR analysis are:

- The models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns. As a consequence, VaR can be highly variable and a single date point analysis can be of limited value. VaR can fluctuate significantly over time;
- The composition of the ICAV can change significantly over a short period of time and, as such, the ICAV's risk profile including VaR may also change materially over a short time frame;
- The market price risk information is a relative estimate of risk rather than a precise and accurate number;
- The market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen);
- FX hedging for the benefit of a particular class are not included;
- Future market conditions could vary significantly from those experienced in the past.

(i) Price Risk

Price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Any increase or decrease in the market price of investments would alter the ICAV's net asset value to the extent that it was invested at the time. The ICAV's investment portfolio complies with the investment restrictions as disclosed in its prospectus.

Exposure to price risk

Sensitivity

Sensitivity analysis for the Sub-Funds where the Manager do not use VAR approach is disclosed below.

Any increase or decrease in the market price of investments would alter the Sub-Fund's net asset value to the extent that it was invested at the time. The Sub-Fund's investment portfolio complies with the investment restrictions as disclosed in its prospectus. As at 31 December 2023 and 31 December 2022, if the fair value of investments to which the Sub-Funds were exposed had changed by 5% with all other variables held constant, this would have resulted in a change of net assets attributable to the shareholders by the amounts detailed below:

Sub-Fund		2023	2022
Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF	USD	1,725,586	1,491,372
Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF	USD	3,272,366	1,967,776
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF	EUR	3,316,595	1,674,800
Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF	EUR	1,866,118	1,595,692
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF	EUR	2,547,596	1,712,621

Management of price risk

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the price risk of the asset considered in the transaction and in reference to the risk framework and the ICAV's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed risk framework.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

13. Financial Instruments and Associated risks (continued)

(a) Market Risk (continued)

(ii) Interest Rate Risk

The ICAV's financial assets include direct interest bearing instruments. As a result the ICAV is exposed to fair value interest rate risk due to fluctuations in the prevailing levels of market interest rates. The ICAV's interest rate risk is managed on a daily basis by the Manager.

Cash and cash equivalents are not considered to be significantly exposed to fair value interest rate risk due to the short term nature of the instruments. Cash earns interest at a variable interest rate.

The interest bearing financial instruments significantly exposed to fair value interest rate risk are the bond investments. Consequently, movements in interest rates would have an inverse effect on the movement of the net asset value of the Sub-Funds.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the interest rate risk of the asset considered in the transaction and in reference to the risk framework and the ICAV's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed risk framework.

The following Sub-Funds held interest bearing instruments. Sensitivity is not presented here for the following Sub-Funds as VaR is presented for this Sub-Fund on Page 251 to 254.

(iii) Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Each Sub-Fund may invest in securities denominated in currencies other than their functional currency. Consequently, each Sub-Fund is exposed to risks that the exchange rate of their functional currency relative to other currencies may change in a manner which has an adverse effect on the value of the portion of each Sub-Fund's assets which are denominated in currencies other than their own currency.

The currency risk is in relation to the notional exposure on the forward currency contracts held by the Sub-Funds. These are detailed on the Schedule of Investments.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

14. Financial Instruments and Associated Risks (continued)

(a) Market Risk (continued)

(iii) Currency Risk (continued)

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the currency risk of the asset considered in the transaction and in reference to the risk framework and the ICAV's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed risk framework.

As at 31 December 2023 the Sub-Funds had the following net currency exposures:

(b) Liquidity Risk

Liquidity risk is the risk that the Sub-Funds' may not be able to generate sufficient cash resources to settle their obligations in full as they fall due or can do so only on terms that are materially disadvantageous.

Each Sub-Fund's principal liquidity risks arise from the ability of investors to effect redemption requests and the liquidity of the underlying investments each Fund has invested in.

Each Sub-Fund's Unitholders may redeem their units on the close of any daily dealing deadline for cash equal to a proportionate share of each Sub-Fund's NAV, excluding any duties and charges where applicable. Each Sub-Fund is therefore potentially exposed to the liquidity risk of meeting the unitholders' redemptions and may need to sell assets at prevailing market prices to meet liquidity demands.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio liquidity from the liquidity risk of the asset considered in the transaction and in reference to the risk framework and the ICAV's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed risk framework. The ICAV's overall liquidity risks are monitored on a quarterly basis by the Board of Directors.

All of the Sub-Funds assets and liabilities as of 31 December 2023 can be received or paid within or less than 1 month. While the accrued expenses can be paid within or less than 1 month not all are and some can be paid at a later date due to frequency or delay of invoicing. This delay can at times exceed 1 year. The following were the contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted.

(c) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the ICAV. The carrying amount of financial assets as per the Statement of Financial Position best represents the maximum credit risk exposure as at its date. Credit risk on transactions with brokers relates to transactions awaiting settlement. Risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the broker used. Substantially all of the assets of the ICAV are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the ICAV's rights with respect to securities or cash held by the Depositary to be delayed or limited. The ICAV manages its risk by monitoring the credit quality and financial position of the Depositary the ICAV uses. The credit rating for the Depositary as at 31 December 2023 was A+ (31 December 2022: A+) published by Standard & Poor's.

The cash and cash equivalents, balances due from brokers and balances due to brokers are held with bank and financial institution counterparties, which are rated BBB+ to AA (31 December 2022: BBB+ to AA), based on Standard & Poor's ratings. The derivatives are entered into with bank and financial institution counterparties, which are rated BBB+ to AA (31 December 2022: BBB+ to AA), based on Standard & Poor's ratings.

The Manager manages issuer risk through building diversified portfolios to limit exposure to any one issuer in accordance with the ICAV's investment objectives. The ICAV employs well known counterparties and ensures that concentration of investment in any one stock or counterparty is monitored against set limits.

Additionally, if required, the Manager will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the ICAV's investment objectives. The Manager monitors compliance with these restrictions on a daily basis.

All transactions in listed securities are settled/paid upon delivery using approved brokers. The risk of default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The credit ratings of all derivative counterparties are monitored regularly. The risk managers review counterparty credit ratings and approve the use of such counterparties.

14. Financial Instruments and Associated Risks (continued)

(c) Credit Risk (continued)

Offsetting and amounts subject to master netting arrangements

The ICAV has not offset any financial assets and financial liabilities in the statement of financial position. The disclosures set out in the tables below include financial assets and financial liabilities that are subject to an enforceable master netting or derivative clearing agreement that covers derivatives.

The International Swaps and Derivatives Association (“ISDA”) and similar master netting agreements do not meet the criteria for offsetting in the statement of financial position. This is because the ICAV does not have any currently legally enforceable right to offset recognised amounts, because the right to offset is enforceable only on the occurrence of future events such as a default of the ICAV or the counterparties or other credit events.

The collateral provided in respect of the above transactions is subject to the standard industry terms of ISDA’s Credit Support Annex. This means that securities received/given as collateral can be pledged or sold during the term of the transaction but have to be returned on maturity of the transaction. The terms also give each counterparty the right to terminate the related transactions on the counterparty’s failure to post collateral.

The following tables disclose the derivative financial assets and liabilities subject to enforceable netting and similar arrangements, presented on an aggregate basis across multiple counterparties. Counterparties are analysed on an individual basis, offsetting assets and liabilities with individual counterparties where appropriate to do so while incorporating the collateral held by or posted by the Sub-Funds with respect to the open positions. The following tables present the total net exposure to counterparties with respect to derivative assets and liabilities on a Sub-Fund by Sub-Fund basis.

14. Financial Instruments and Associated Risks (continued)

(d) Operational Risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the processes, technology and infrastructure supporting the Sub-Fund activities with financial instruments, either internally within the Sub-Fund or externally at the Sub-Fund's service providers, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of investment management behaviour.

The Sub-Funds' objectives are to manage operational risk so as to balance the limiting of financial losses and damage to its reputation with achieving its investment objective of generating returns to investors.

The primary responsibility for the development and implementation of controls over operational risk rests with the Directors. This responsibility is supported by the development of overall standards for the management of operational risk, which encompasses the controls and processes at the service providers and the establishment of service levels with the service providers, in the following areas:

- Documentation of controls and procedures;
- Requirements for:
 - Appropriate segregation of duties between various functions, roles and responsibilities;
 - Reconciliation and monitoring of transactions; and
 - Periodic assessment of operational risk faced.
- The adequacy of controls and procedures to address the risks identified;
- Compliance with regulatory and other legal requirements;
- Development of contingency plans;
- Training and professional development;
- Ethical and business standards; and
- Risk mitigation, including insurance if this is effective.

The Directors' assessment of the adequacy of the controls and processes in place at the service providers with respect to operational risk is carried out via regular discussions with the service providers and a review of the service providers' Service Organisation Controls reports on internal controls, if any are available.

15. Fair Value of Financial Instruments

Each Sub-Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

- Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data; and
- Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

15. Fair Value of Financial Instruments (continued)

The Administrator will, where possible, obtain asset pricing or valuation information from various sources and apply those valuations in line with agreed price sources and validation procedures to the assets held by the Sub-Funds for the purposes of calculating the Sub-Funds' NAVs. The Administrator is required to ensure that the valuation methodology applied to the Sub-Funds' assets is in compliance with Valuation Policy and the valuation rules as set out in the relevant Sub-Funds' constitutional documents and the Prospectus.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. The ICAV recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred. There were no transfers between levels for the year ended 31 December 2023 and year ended 31 December 2022.

The determination of what constitutes 'observable' requires significant judgement. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable, verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables provide an analysis of each Sub-Fund's financial assets and financial liabilities measured at fair value as at 31 December 2023.

Cash and cash equivalents, subscriptions receivable, due from brokers, interest and other assets, bank overdraft, management fees payable, due to brokers, accrued expenses and net assets attributable to holders of redeemable participating shares are not included in the tables below. Their carrying amount is a reasonable approximation of fair value.

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

16. Exchange Rates

The following exchange rates against the EUR were used at the financial year end to translate foreign currency denominated assets and liabilities:

	31 December 2023	31 December 2022
CHF	0.9297	0.9875
USD	1.1047	1.0673

The following exchange rates against the USD were used at the financial year end to translate foreign currency denominated assets and liabilities:

	31 December 2023	31 December 2022
CHF	0.8416	0.9252
EUR	0.9053	0.9370

17. Efficient Portfolio Management

The ICAV may employ investment techniques and instruments for efficient portfolio management of the assets of the ICAV and, in particular, the ICAV may, for the purpose of hedging (whether against currency, exchange or interest rate risks or otherwise), or for direct investment purposes, purchase or sell put options and call options, spot contracts, forward contracts, futures contracts and other derivative instruments and may also enter into sale and repurchase agreement.

Subject to the conditions and within the limits otherwise stated in the investment objective and policies of a Sub-Fund, the Manager may employ investment techniques and instruments such as futures, options, forward foreign currency contracts and other derivatives for investment purposes, hedging or efficient portfolio management.

Please refer to the Prospectus for more details regarding efficient portfolio management.

18. Cross Liability

Liabilities incurred by a Sub-Fund of the ICAV may be discharged solely out of the assets of that Sub-Fund such that creditors of Sub-Funds will not have recourse to the assets of the other Sub-Funds of the ICAV to settle any liabilities incurred.

19. Taxation

Under current law and practice, the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. It is not chargeable to Irish tax on its income or capital gains. However, the ICAV is obliged to apply a withholding tax on any distribution payments to Irish residents or ordinarily resident shareholders on any encashment, redemption or transfer of units by an Irish resident or ordinarily resident shareholder, unless the shareholder is exempted under Section 739D of the Taxes Consolidation Act, 1997, as amended. Shareholders who complete a declaration confirming that they are not Irish residents are not liable to Irish tax on the income or gains arising from their investment in the ICAV and no withholding tax will be deducted on any payments made to them. Where the ICAV has a concession from the Revenue Commissioners it may be possible to obtain an exemption from the requirement to have a valid non-resident declaration in place.

If the ICAV fails to deduct the tax or fails to collect the appropriate signed declaration from any non-resident or exempted shareholders, the ICAV will remain liable for the tax. In these circumstances, the ICAV would seek to recover the tax paid from the relevant shareholder.

Capital gains and interest received by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its shareholders.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

20. Events During the Financial Year

Effective 6 January 2023, the Manager appointed Allianz Global Investors GmbH as investment advisor of Fineco AM Euro Credit Bond Fund, replacing HSBC Global Asset Management (France).

As of 11 January 2023, the investment policies of each of Euro Bond FAM Fund and Euro Corporate Fixed Income FAM Fund were amended to reflect the addition of contingent convertible debt securities ("CoCos") within the portfolios of these Sub-Funds. Other minor amendments to the Article 6 SDR disclosures were also made, together with the removal of any direct/indirect investment in Russian securities for Euro Bond FAM Fund. Shareholders approved the addition of CoCos at extraordinary general meetings of the Sub-Funds held on 5 January 2023. Shareholders were provided with advance notice of the other changes.

Effective 13 February 2023, the Manager appointed M&G Investment Management Limited to act as Investment Manager to the Jupiter Flexible Income FAM Fund, replacing Jupiter Asset Management Limited, and the Sub-Fund was also re-named as Flexible Income FAM Fund on this date.

As of 31 May 2023, the investment policies section of the supplement for Fineco AM US Dollar Bond Fund was amended to clarify that the Sub-Fund may invest substantially or fully in fixed income securities issued by the United States government. The Supplement was also amended to provide that the Sub-Fund may be fully collateralised in different transferable securities and money market instruments issued or guaranteed by any Member State, or one of its local authorities, or a public international body to which one or more Member States belong provided that the relevant securities are from at least six different issues and no single issue shall make up more than 30% of the Sub-Fund's net asset value, as permitted by the Central Bank and in line with its requirements. Shareholders were provided with advance notice of these changes.

Effective 28 November 2023, the Manager appointed CPR Asset Management to act as Investment Manager to Medtech FAM Fund and Global Disruptive Opportunities FAM Fund, replacing Amundi Ireland Limited.

The following Sub-Funds launched during the financial year:

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

20. Events During the Financial Year (continued)

In 2023, the following Sub-Funds have updated the supplements as the Sub-Fund investment manager's intention is to pursue a new investment objective with the aim to provide dividends at certain dates, while protecting the NAV of EUR 100 at the new defined maturity intended to be 3 years from the expiration of the previous term. As a result, the following Sub-Funds have updated the supplement with new maturity date and has been renamed to the following:

Previous Name	New Fund Name post maturity	New Maturity Date
Global Defence FAM Fund 2023	Global Defence FAM Fund 2026*	30 November 2026
Smart Global Defence FAM Fund 2023	Smart Global Defence FAM Fund 2026*	30 December 2026
Smart Global Defence FAM Fund 2023 II	Smart Global Defence FAM Fund 2026 II*	30 December 2026

* These Financial Statements exclude the Funds marked above which are presented in a separate sets of Financial Statements, refer to Note 1.

The Dealing Deadline of 11.59am on 22 December 2023 for each of Smart Global Defence FAM Fund 2023 and Smart Global Defence FAM Fund 2023 II was temporarily extended to 11.59 am on 27 December 2023 in light of a public holiday over the Christmas period. Shareholders were provided with advance notice of this change.

Geopolitical Conflicts

The recent outbreak of geopolitical conflicts all over the world can have an impact on the global economies. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

Silicon Valley Bank Collapse and Credit Suisse forced merger

In March, the landscape was shaken by the collapse of Silicon Valley Bank and the forced merger of UBS and Credit Suisse, raising concerns of potential contagion throughout the global banking system. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

There were no other significant events during the financial year.

21. Events Post Financial Year End

The following Sub-Funds launched after the financial year:

Smart Defence Multi-Strategy 2030 Fineco AM Fund II	17 January 2024
Smart Global Defence 2029 Fineco AM Fund IV	17 January 2024
Smart Global Defence Zero Coupon Fineco AM Fund	14 February 2024
European Leaders Fineco AM Fund	28 February 2024
Smart Defence Multi-Strategy 2031 Fineco AM Fund	17 April 2024
European Leaders Fineco AM Fund II	24 April 2024

There are no other events after the year end that had a material effect on the Financial Statements.

22. Soft Commission Arrangements

The Manager or the relevant Investment Managers of the Sub-Funds may effect transactions that will from time to time provide or procure the Manager or the Investment Managers goods and services and other benefits such as research and advisory services provided that the nature of which is such that their provision shall assist in the provision of investment services to the ICAV as a whole and which no direct payment is made but instead the Manager undertakes to place business with that party. In any event it is agreed that the execution of transactions will be on the basis of best execution standards and brokerage rates will not be in excess of customary institutional rates. Each Investment Manager shall also comply with additional regulations governing soft commission practices including where relevant requirements under MiFID II, which governs the extent to which commissions, inducements, research reports or other non-minor monetary benefits may be paid or received from brokers.

FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2023 (continued)

22. Soft Commission Arrangements (continued)

For the year ended 31 December 2023 and the year 31 December 2022, the following Investment Managers have entered into soft commission arrangements for research purposes as permitted by applicable regulation on behalf of the Sub-Funds with broker counterparties.

Investment Manager	Sub-Fund
Invesco Advisers, Inc	US Equity Value FAM Fund
Infusive Asset Management Inc.	Infusive Consumer Alpha Global Leaders FAM Fund

The total aggregate amount of soft commissions is USD 406,803 for the Financial Statements year ended 31 December 2023 (31 December 2022: USD 237,959).

There were no other soft commission arrangements for the financial year ended 31 December 2023 and year ended 31 December 2022.

23. Reconciliation to Published NAV

As at 31 December 2023, the NAV stated in these Financial Statements differ from the published NAV for certain Sub-Funds. The differences are due to late trades and Investor dealing booked after the nav was finalised. This difference was not material on any Sub-Fund and therefore the NAV was not republished.

(i) Reconciliation of Net Asset Value

The following tables show the reconciliation between the NAV as per Financial Statements, Published NAV, and impact in basis points ("BPS"):

31 December 2023

Sub-Fund	Published NAV	NAV per Financial Statements	Adjustment	Adjustments BPS
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF	66,142,492	67,205,142	1,062,650	158
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF	50,795,798	51,420,722	624,924	122

(ii) Reconciliation of Net Asset Value Per Share

The following tables show the reconciliation between the NAV per share as per Financial Statements and the Published NAV per share:

Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF	
31 December 2023	Class 'A' Accumulation Shares
	EUR
Published NAV per share	106.0240
Investor Trade Adjustment and Late Trade Adjustment	0.0040
NAV per share as per Financial Statements	106.0280

Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF	
31 December 2023	Class 'A' Accumulation Shares
	EUR
Published NAV per share	104.0910
Investor Trade Adjustment and Late Trade Adjustment	0.0008
NAV per share as per Financial Statements	104.0918

24. Approval of the Financial Statements

The Financial Statements were approved and authorised for issue by the Board of Directors on 24 April 2024.

Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (continued)

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

Value at Risk Approach

Value at Risk (“VaR”) is a statistical risk measure that estimates the potential loss from adverse market movements in an ordinary market environment.

Please refer to the financial risks Note 14 to the Financial Statements for further details on the measure of VaR.

The Directors use Relative VaR to monitor and manage the global exposure of some of the Funds and Absolute VaR for others as set out below. For Relative VaR, the VaR of the respective Fund’s portfolio will not exceed twice the VaR of the reference portfolio. For Absolute VaR, the monthly VaR will not exceed 20% of the Fund’s NAV. Where a VaR calculation is performed using a horizon other than the one-month regulatory limit, this 20% limit shall be rescaled to reflect the appropriate risk horizon period as directed by the relevant regulatory guidelines. Utilisation refers to the level of risk taken in this context.

The table below details the highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the respective Absolute or Relative VaR regulatory limit.

Sub-Fund	Global Exposure Type	Risk Model	Reference Risk Portfolio	Highest utilisation of the VaR limit %	Lowest utilisation of the VaR limit %	Average utilisation of the VaR limit %

LEVERAGE

The use of FDIs may expose a Fund to a higher degree of risk. In particular, FDI contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on FDIs than on standard bonds or equities.

Leveraged FDI positions can therefore increase a Fund's volatility. Disclosed in the table below is the level of leverage employed by each relevant Fund during the financial year ended 31 December 2023.

Sub-Fund	% Average Leverage Employed
Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF	97.25%

UCITS V Remuneration Disclosure

Fineco Asset Management Designated Activity Company (the “Management Company”), the Management Company of FAM Series UCITS ICAV acts as the Management Company for two other umbrella UCITS.

The Management Company follows a remuneration policy which complies with the requirements of the UCITS regulation in Ireland and in particular the S.I. 143/2016.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of the talent, skills and competencies, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and the Management Company as a whole, and it is based on both financial and non-financial criteria, among other criteria.

The total remuneration paid by the Management Company to its staff for the financial year end 31 December 2023 is as follows:

Financial Year End 31 December 2023

	<u>Fixed</u>	<u>Variable</u>	<u>Total</u>
Employees	7,363,650	2,341,062	9,704,712
Executive Directors	991,983	977,314	1,969,297
Non-Executive Directors	88,900	-	88,900

The ICAV represents as at 31 December 2023 around 63% of the Total AUM of the Management Company.

The remuneration policy is reviewed at least annually.

Sustainable Finance Disclosure Regulation (SFDR)

Environmental, social and governance ("ESG") Integration describes the mechanism by which the Manager, acting through the Investment Manager as its delegate, when applicable, may integrate sustainability risks into investment decision-making, which may, where relevant, require the Investment Manager to assess the potential sustainability risks associated with the purchase of investments.

Sustainability Risk means an ESG event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of a Sub-Fund's investment. Sustainability risks can either represent a risk of their own or have an impact on other risks which they may contribute significantly to such as market risks, operational risks, liquidity risks or counterparty risks.

The ICAV reserves the right to reassess the classification of its Sub-Funds under Regulation (EU) 2019/2088 ("SFDR") at any time and shall keep this classification under review in case of issuing of new or amendments made to the applicable Regulatory Technical Standards ("RTS") to SFDR or any other relevant pieces of legislation or regulation or regulatory guidance impacting such a classification. RTS are standards for implementation of the provisions set forth in SFDR issued by the European Supervisory Authorities ("ESAs") to market operators.

If the ICAV determines at any future point that a Sub-Fund does not meet the criteria to qualify as an Art. 8 or Art. 9 SFDR fund, the relevant disclosure pertaining to such a Sub-Fund shall be updated or withdrawn as appropriate, in accordance with the revised classification of the Sub-Fund.

The following Sub-Funds are classified as Article 6 funds under the Sustainable Finance Disclosure Regulation ("SFDR"):

Sub-Fund	SFDR Classification	Investment Manager
Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF	Article 6	Fineco Asset Management Designated Activity Company
Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF	Article 6	Fineco Asset Management Designated Activity Company
Fineco AM MSCI World Metals and Mining UCITS ETF	Article 6	Fineco Asset Management Designated Activity Company

The investments underlying the above-named Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities. The classification of the abovenamed Sub-Funds as Article 6 SFDR funds means that the Sub-Funds do not promote environmental or social characteristics in a way that meet the specific criteria contained in Article 8 of SFDR or have Sustainable Investment as its objective in a way that meet the specific criteria contained in Article 9 of SFDR.

When assessing the Sustainability Risks associated with the Fund's underlying investments, the Manager (or the Investment Manager, as the case) is attempting to understand the likelihood of the risk that the value of such underlying investments could be materially negatively impacted by an environmental, social or governance event or condition. While the Manager (or the Investment Manager, as the case) integrates Sustainability Risk into the Sub-Fund's investment decision making process, the output of such Sustainability Risk integration is not the determining factor, nor potentially even among the most prominent factors, considered in the investment decisions in respect of the assets which the Sub-Fund may buy and/or hold. Accordingly, the Manager (or the Investment Manager, as the case) may buy and/or hold assets which may expose the Sub-Fund to high or low levels of Sustainability Risk. For further information on how Sustainability Risks are integrated, please refer to section "SFDR disclosure" under each Sub-Fund's supplement.

The following sub-funds are classified as financial products which promote environmental and/or social characteristics pursuant to Article 8 and Article 9 SFDR:

Sub-Fund	SFDR Classification	Investment Manager

SFDR and Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending SFDR (the "Taxonomy Regulation") require certain information to be disclosed in the audited financial statements where a Sub-Fund is classified under Article 8 or Article 9 of SFDR. This information is required to be presented in the form of the template set out in the annexes to Commission Delegated Regulation (EU) 2023/363 of 31 October 2022 amending and correcting the regulatory technical standards laid down in Delegated Regulation (EU) 2022/1288, which supplement SFDR. Further information on the environmental and/or social characteristics promoted by the Sub-Funds during the year can therefore be found in the annexes to these financial statements (the "SFDR Annexes").

The data used to complete the disclosures set out in the SFDR Annexes for the Sub-Funds is provided:

- For internally managed Sub-Funds other than Funds of Funds: by relevant third-party sources.
- For Sub-Funds managed by Delegate Investment Managers: by the relevant Delegate Investment Managers.
- The data used is the data available as at the year-end considered by the financial statements (December 2023) on backward-looking analysis.

The analysis is dependent on the underlying investee entities disclosing relevant data and the availability of this data can be limited. Data may also be incomplete, inaccurate and/or contain errors that may not be detected by the Manager. It has been observed that the availability and accuracy of data, from the relevant third party data providers and underlying investee entities, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in the SFDR Annexes should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and, where applicable for the relevant Sub-Fund, the Investment Manager, the Board of the ICAV continues to monitor the ongoing development and evolution of sustainability-related regulation, including SFDR and the Taxonomy Regulation, and associated guidance and the availability of relevant third party and investee entities' data in this regard.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: FINECO AM MSCI USD IG LIQUID SRI SUSTAINABLE CORPORATE BOND UCITS ETF

Legal entity identifier: 254900ZYS0PG3V8ECA96

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **39.9%** of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within

The Fund aims to improve its ESG profile compared to its investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI USD IG Liquid SRI Sustainable Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the fund have contributed are indicated in the question "What were the objectives of the sustainable investments that the fund partially made and how did the sustainable investment contribute to such objectives?".

● **How did the sustainability indicators perform?**

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: **100%**
- The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology: **100%**
- The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR: **39.9%**

● **...and compared to previous periods?**

Indicator	2022*	2023**	Comparison
The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria	100%	100%	In line with the fund's commitment
The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology	100.0%	100%	In line with the fund's commitment
The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR	45.3%	39.9%	In line with the fund's commitment

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments made by the Fund are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;
3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation "POSITIVE" or "NEUTRAL" from the Investment Manager's ESG research and analysis department, i.e. the "Sustainability Centre", following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm "DNSH" principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology and/or relies on information provided by the reference benchmark administrator to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://bnpparibas-am.com/sustainability-documents).

The share of fund's investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://bnpparibas-am.com).

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the Investment Manager's Sustainability

Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

- 1- Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment;
- 2- How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of funds managed can be found in the Investment Manager’s SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#)

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

* Any percentage differences with the financial statement portfolios result from a rounding difference.

** Any difference with the portfolio statements above are coming from the use of different data's sources.

What was the proportion of sustainability-related investments?

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the fund is **91.2%**.

The proportion of sustainable investments of the fund is **39.9%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

Asset allocation describes the share of investments in specific assets.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From 01.01.2023 to 29.12.2023

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● *In which economic sectors were the investments made?*

Sectors	% Asset
Financials	43.53%
Technology	13.56%
Health Care	13.43%

Energy	1.74%
Midstream - Oil & Gas	1.74%
Materials	1.13%
Cash	0.75%
Utilities	0.25%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.
The largest investments are based on official accounting data and are based on the transaction date.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** Real taxonomy aligned

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Revenue	
2022*	0.3%
2023**	1.1%

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quaterly weighted average.

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed given the current level of data at the disposal of the management company related to such information.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **22.1%**.

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent **21.3%** of the fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include :

- the proportion of assets that are not used to meet the environmental or social characteristics promoted by the fund. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each fund it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And

the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund should invest at least 30% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “What were the objectives of the sustainable investments that the fund partially made and how did the sustainable investment contribute to such objectives?”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

In addition, the investment manager has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: <https://www.bnpparibas-am.com/en/sustainability-documents/>

How did this financial product perform compared to the reference benchmark?

The MSCI USD IG Liquid SRI Sustainable Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The methodology used for the calculation of the reference benchmark can be found at: www.msci.com

● *How does the reference benchmark differ from a broad market index?*

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question "How did the sustainability indicators perform?"

● *How did this financial product perform compared with the reference benchmark?*

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

● *How did this financial product perform compared with the broad market index?*

	Carbon footprint (tCO ₂ eq/EV) ^{1,2}	ESG score ²
Financial product	13.9	57.0
Broad market index ³	78.8	50.3

(1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company's scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company's energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO₂ equivalent per million euros of enterprise value.

(2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.

(3) MSCI USD IG Corporate Bond Index

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF

Legal entity identifier: 2549001FCUZW31EBKR77

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no

significant harm. In 2023, the Fund had a proportion of 64% of sustainable investments

2. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the

Science Based Targets initiative (“SBTi”). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The percentage of the Fund portfolio made in sustainable investments which was 64%
- ii. The Fund level ESG score was rated MSCI “AA” or above;
- iii. The percentage of the Invested Assets selected from ESG screened indices which was 99%;
- iv. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 99%; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 99%.

● ***...and compared to previous periods?***

- i. The percentage of the Fund portfolio made in sustainable investments which was 41% as at 31 December 2022
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested Assets selected from ESG screened indices which was 97% as at 31 December 2022;
- iv. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 97% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 97% as at 31 December 2022

Please be informed that the difference between the percentages of sustainable investments disclosed between 2022 and 2023 mainly relies on an update to the third party data provider’s sustainable investments calculation methodology which the Manager relies on as follow:

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the Science Based Targets initiative (“SBTi”). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

Link to our published sustainable investments methodology:
<https://finecoassetmanagement.com/wp-content/uploads/2023/09/FINECO-AM-Sustainable-Investment-Methodology.pdf>

All actual data in 2022 are calculated on the closing date of the accounting year.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR:

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

In 2023, the Fund had a proportion of 64% of sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy .

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

When replicating the Reference Index via a Total Return Swap through the Invested Assets, principal adverse impact (“PAI”) indicators were calculated at Invested Assets level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
 - a. Made in investee companies that demonstrate good governance:
 - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and

- c. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector

7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 – 31 December 2023

Largest investments	Sector	% Assets	Country
INTEL CORP	ELECTRICS/ ELECTRONICS	8.76%	UNITED-STATES (U.S.A.)
MICROSOFT CORP	SOFTWARE	8.52%	UNITED-STATES (U.S.A.)
LOWES COS INC	DISTRIBUTION/ RETAIL TRADE	7.78%	UNITED-STATES (U.S.A.)
CINTAS CORP	MISCELLANEOUS SERVICES	5.30%	UNITED-STATES (U.S.A.)
TARGET CORP	DISTRIBUTION/ RETAIL TRADE	4.39%	UNITED-STATES (U.S.A.)
APPLIED MATERIALS INC	ELECTRICS/ ELECTRONICS	4.38%	UNITED-STATES (U.S.A.)
CSX CORP	TRANSPORTATION AND TRANSPORTATION MATERIALS	4.28%	UNITED-STATES (U.S.A.)
CHURCH & DWIGHT CO INC	DISTRIBUTION/ RETAIL TRADE	4.07%	UNITED-STATES (U.S.A.)
AFLAC INC	INSURANCES	4.05%	UNITED-STATES (U.S.A.)

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives*

What was the proportion of sustainability-related investments?

64%

● What was the asset allocation?

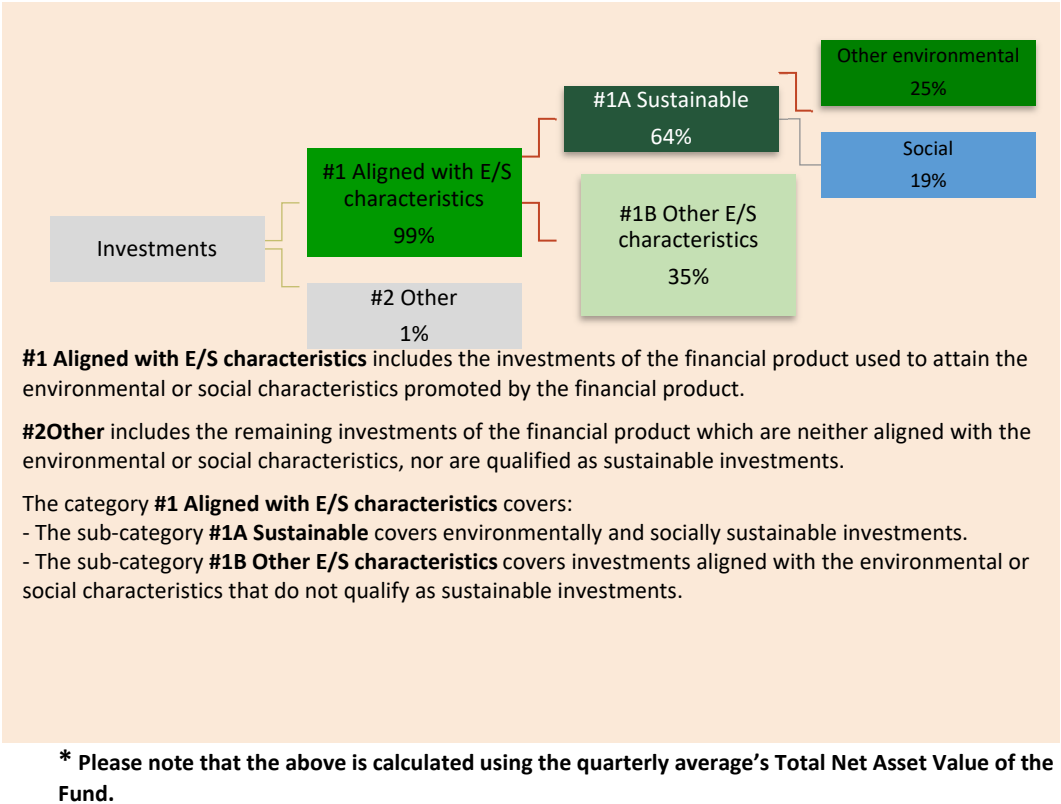

Asset allocation describes the share of investments in specific assets.

2% of the Fund's investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 20% in sustainable investments and as at 31 December 2023 the Fund had a proportion of 64% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Largest Investments	% Assets
DISTRIBUTION/ RETAIL TRADE	18.40%
ELECTRICS/ ELECTRONICS	16.30%
SOFTWARE	14.80%
MISCELLANEOUS SERVICES	14.59%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	9.66%
INSURANCES	7.13%
TRANSPORTATION AND TRANSPORTATION MATERIALS	4.28%
INTERNET	3.98%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	3.90%
TEXTILES AND CLOTHING	3.62%
CONSUMPTION GOODS/ FOOD/ BREWERY	1.03%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas
☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 25%.

What was the share of socially sustainable investments?

Socially sustainable investments represented 19% of the financial product.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Manager’s Exclusion Policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 64% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “What were the objectives of the sustainable investments

that the financial product partially intends to make and does the sustainable investments contribute to such objectives?”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MSCI World Financials ESG Leaders UCITS ETF
Legal entity identifier: 25490006VYE7JXYA7J49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ ☒ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 70% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no

significant harm. In 2023, the Fund had a proportion of 70% of sustainable investments

2. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the

Science Based Targets initiative (“SBTi”). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The percentage of the Fund portfolio made in sustainable investments which was 70%
- ii. The Fund level ESG score was rated MSCI “AA” or above;
- iii. The percentage of the Invested Assets selected from ESG screened indices which was 98%;
- iv. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 98%; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 98%.

● ***...and compared to previous periods?***

- i. The percentage of the Fund portfolio made in sustainable investments which was 35% as at 31 December 2022
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested Assets selected from ESG screened indices which was 97% as at 31 December 2022;
- iv. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 97% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 97% as at 31 December 2022

Please be informed that the difference between the percentages of sustainable investments disclosed between 2022 and 2023 mainly relies on an update to the third party data provider’s sustainable investments calculation methodology which the Manager relies on as follow:

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the Science Based Targets initiative (“SBTi”). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

Link to our published sustainable investments methodology:
<https://finecoassetmanagement.com/wp-content/uploads/2023/09/FINECO-AM-Sustainable-Investment-Methodology.pdf>

All actual data in 2022 are calculated on the closing date of the accounting year.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR:

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

In 2023, the Fund had a proportion of 70% of sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy .

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

When replicating the Reference Index via a Total Return Swap through the Invested Assets, principal adverse impact (“PAI”) indicators were calculated at Invested Assets level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
 - a. Made in investee companies that demonstrate good governance:
 - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and

- c. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector

7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 – 31 December 2023

LARGEST INVESTMENTS	SECTOR	% ASSETS	COUNTRY
TARGET CORP	DISTRIBUTION/ RETAIL TRADE	8.41%	UNITED-STATES (U.S.A.)

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives*

What was the proportion of sustainability-related investments?

70%

Asset allocation describes the share of investments in specific assets.

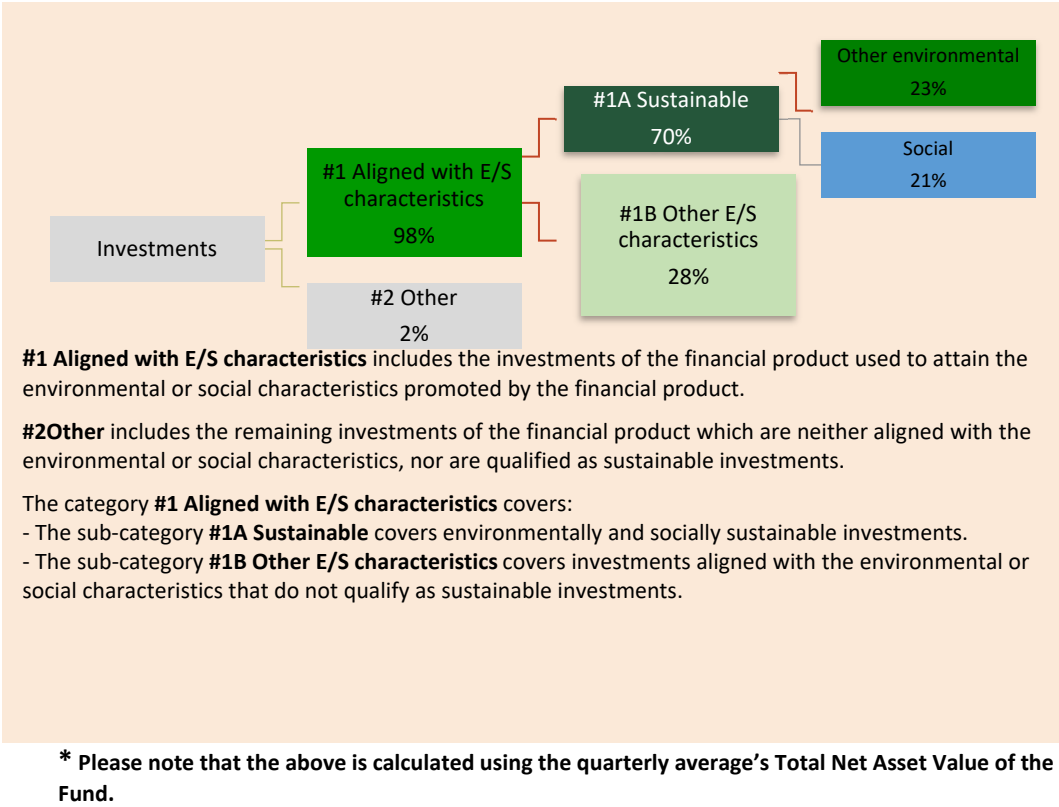

● What was the asset allocation?

3% of the Fund's investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 20% in sustainable investments and as at 31 December 2023 the Fund had a proportion of 70% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

INSURANCES	3.73%
TEXTILES AND CLOTHING	3.48%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund's portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

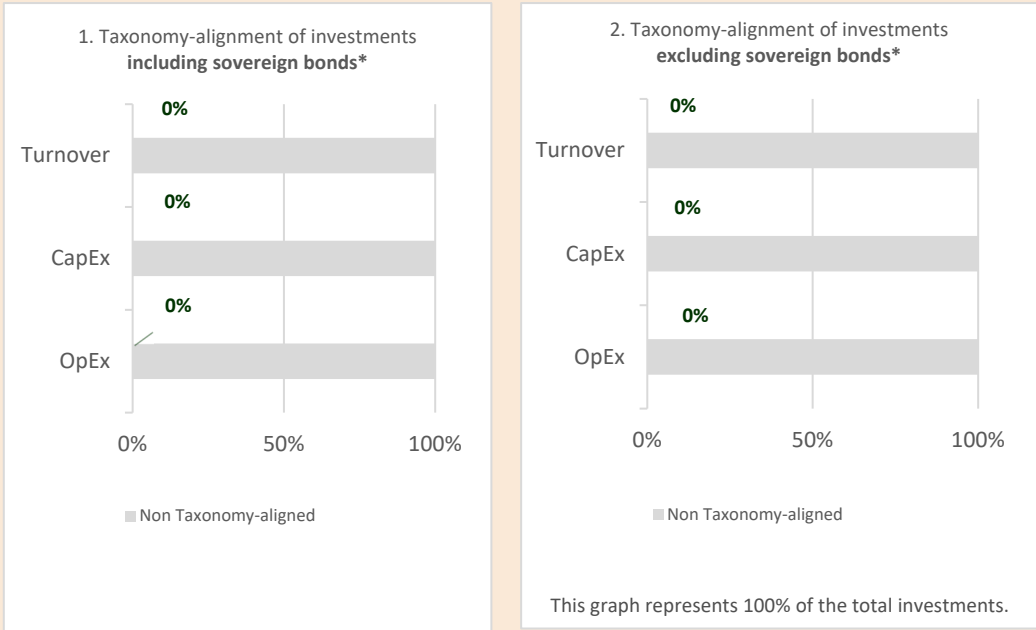

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas
☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 23%.

What was the share of socially sustainable investments?

Socially sustainable investments represented 21% of the financial product.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Manager’s Exclusion Policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 70% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF
Legal entity identifier: 2549006XCJK1TDGX308

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ ☒ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

1. **Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no

significant harm. In 2023, the Fund had a proportion of 69% of sustainable investments

2. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the

Science Based Targets initiative (“SBTi”). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The percentage of the Fund portfolio made in sustainable investments which was 69%
- ii. The Fund level ESG score was rated MSCI “AA” or above;
- iii. The percentage of the Invested Assets selected from ESG screened indices which was 97%;
- iv. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 97%; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 97%.

● ***...and compared to previous periods?***

- i. The percentage of the Fund portfolio made in sustainable investments which was 43% as at 31 December 2022
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested Assets selected from ESG screened indices which was 95% as at 31 December 2022;
- iv. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 95% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 95% as at 31 December 2022

Please be informed that the difference between the percentages of sustainable investments disclosed between 2022 and 2023 mainly relies on an update to the third party data provider’s sustainable investments calculation methodology which the Manager relies on as follow:

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the Science Based Targets initiative (“SBTi”). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

Link to our published sustainable investments methodology:
<https://finecoassetmanagement.com/wp-content/uploads/2023/09/FINECO-AM-Sustainable-Investment-Methodology.pdf>

All actual data in 2022 are calculated on the closing date of the accounting year.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR:

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

In 2023, the Fund had a proportion of 69% of sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy .

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

When replicating the Reference Index via a Total Return Swap through the Invested Assets, principal adverse impact (“PAI”) indicators were calculated at Invested Assets level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
 - a. Made in investee companies that demonstrate good governance:
 - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and

- c. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector

- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

- 4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

- 9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2023 – 31 December 2023

Largest investments	Sector	% Assets	Country
INTEL CORP	ELECTRICS/ ELECTRONICS	8.34%	UNITED-STATES (U.S.A.)
MICROSOFT CORP	SOFTWARE	8.23%	UNITED-STATES (U.S.A.)
MERCADOLIBRE INC	INTERNET	7.72%	UNITED-STATES (U.S.A.)
ELI LILLY & CO	PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	7.48%	UNITED-STATES (U.S.A.)
XYLEM INC	CONSTRUCTION OF MACHINERY AND VEHICLES	4.10%	UNITED-STATES (U.S.A.)
CINTAS CORP	MISCELLANEOUS SERVICES	4.00%	UNITED-STATES (U.S.A.)
AMGEN INC	PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	3.96%	UNITED-STATES (U.S.A.)
CSX CORP	TRANSPORTATION AND TRANSPORTATION MATERIALS	3.88%	UNITED-STATES (U.S.A.)
APPLIED MATERIALS INC	ELECTRICS/ ELECTRONICS	3.86%	UNITED-STATES (U.S.A.)

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives*

What was the proportion of sustainability-related investments?

69%

● What was the asset allocation?

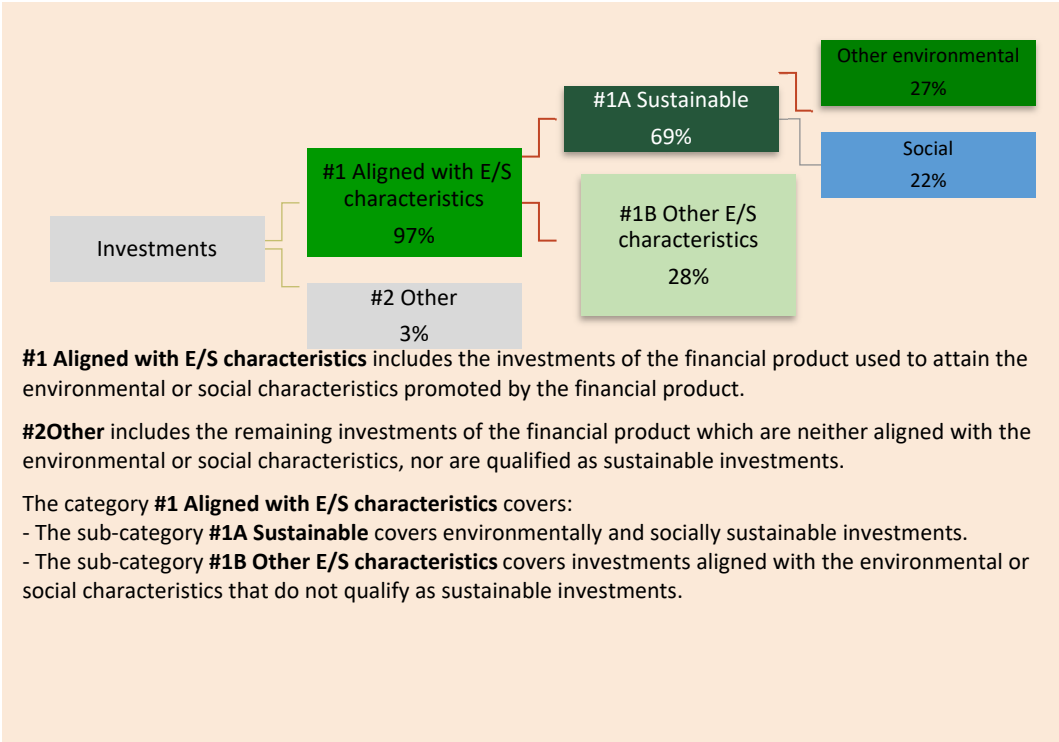

Asset allocation describes the share of investments in specific assets.

3% of the Fund's investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 20% in sustainable investments and as at 31 December 2023 the Fund had a proportion of 69% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average’s Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

Largest Investments	% Assets
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	15.44%
ELECTRICS/ ELECTRONICS	12.20%
SOFTWARE	11.11%
DISTRIBUTION/ RETAIL TRADE	10.97%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	10.94%
INTERNET	7.72%
MISCELLANEOUS SERVICES	7.56%
CONSUMPTION GOODS/ FOOD/ BREWERY	4.11%
CONSTRUCTION OF MACHINERY AND VEHICLES	4.10%
TRANSPORTATION AND TRANSPORTATION MATERIALS	3.88%
CHEMICAL PRODUCTS	3.82%
OFFICE EQUIPMENT AND MATERIAL	2.91%
INSURANCES	2.46%
TEXTILES AND CLOTHING	0.95%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In 2022, the share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 27%.

What was the share of socially sustainable investments?

Socially sustainable investments represented 22% of the financial product.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Manager’s Exclusion Policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 69% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “What were the objectives of the sustainable investments

that the financial product partially intends to make and does the sustainable investments contribute to such objectives?”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF

Legal entity identifier: 2549001UELK8FPXCN712

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **23.8%** of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund (the "Fund") promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within

The Fund aims to improve its ESG profile compared to its investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI USD HY SRI Sustainable Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the fund have contributed are indicated in the question "What were the objectives of the sustainable investments that the fund partially made and how did the sustainable investment contribute to such objectives?".

● ***How did the sustainability indicators perform?***

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: **100%**
- The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology: **100%**
- The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR: **23.8%**

● ***...and compared to previous periods?***

Indicator	2022*	2023**	Comparison
The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria	100%	100%	In line with the fund's commitment
The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology	100.0%	100%	In line with the fund's commitment
The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR	23.4%	23.8%	In line with the fund's commitment

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments made by the Fund are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;
3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation "POSITIVE" or "NEUTRAL" from the Investment Manager's ESG research and analysis department, i.e. the "Sustainability Centre", following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm "DNSH" principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology and/or relies on information provided by the reference benchmark administrator to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://bnpparibas-am.com/sustainability-documents).

The share of fund investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://bnpparibas-am.com).

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of

Human Rights. This assessment is conducted within the Investment Manager's Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

- 1- Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment;
- 2- How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of funds managed can be found in the Investment Manager's SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

* Any percentage differences with the financial statement portfolios result from a rounding difference.

** Any difference with the portfolio statements above are coming from the use of different data's sources.

What was the proportion of sustainability-related investments?

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the fund is **81.9%**.

The proportion of sustainable investments of the fund is **23.8%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From 01.01.2023 to 29.12.2023

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● *In which economic sectors were the investments made?*

Cash	1,43%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.
The largest investments are based on official accounting data and are based on the transaction date.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** Real taxonomy aligned

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Revenue	
2022*	0.4%
2023**	0.9%

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed given the current level of data at the disposal of the management company related to such information.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **13.2%**

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent **14.6%** of the fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include :

- the proportion of assets that are not used to meet the environmental or social characteristics promoted by the fund . These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each fund it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And

the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund should invest at least 30% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above

question “What were the objectives of the sustainable investments that the fund partially made and how did the sustainable investment contribute to such objectives?”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

In addition, the has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: <https://www.bnpparibas-am.com/en/sustainability-documents/>

How did this financial product perform compared to the reference benchmark?

The MSCI USD HY SRI Sustainable Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The methodology used for the calculation of the reference benchmark can be found at: <https://www.msci.com/>

● How does the reference benchmark differ from a broad market index?

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question “How did the sustainability indicators perform?”

● How did this financial product perform compared with the reference benchmark?

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

● How did this financial product perform compared with the broad market index?

	Carbon footprint (tCO ₂ eq/EV) ^{1,2}	ESG score ²
Financial product	103.5	50.3
Broad market index ³	148.5	43.9

- (1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company's scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company's energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO₂ equivalent per million euros of enterprise value.
- (2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.
- (3) MSCI USD HY Corporate Bond Index

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: FINECO AM MSCI EUR IG SRI SUSTAINABLE EX FOSSIL FUEL CORPORATE

Legal entity identifier: 254900GLVO3BT65M5Z79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ ☒ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **46.7%** of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund (the "Fund") promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within

The Fund aims to improve its ESG profile compared to its investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the fund have contributed are indicated in the question "What were the objectives of the sustainable investments that the fund partially made and how did the sustainable investment contribute to such objectives?".

● ***How did the sustainability indicators perform?***

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: **100%**
- The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology: **100%**
- The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR: **46.7%**

● ***...and compared to previous periods?***

Indicator	2022*	2023**	Comparison
The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria	100%	100%	In line with the fund's commitment
The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology	100.0%	100%	In line with the fund's commitment
The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR	47.6%	46.7%	In line with the fund's commitment

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments made by the Fund are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;
3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation "POSITIVE" or "NEUTRAL" from the Investment Manager's ESG research and analysis department, i.e. the "Sustainability Centre", following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm "DNSH" principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology and/or relies on information provided by the reference benchmark administrator to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://bnpparibas-am.com).

The share of fund investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://bnpparibas-am.com).

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of

Human Rights. This assessment is conducted within the Investment Manager's Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

- 1- Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment;
- 2- How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of funds managed can be found in the Investment Manager's SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

● *In which economic sectors were the investments made?*

Sectors	% Asset
Financials	52,09%
Industrials	8,63%
Health Care	7,15%
Communications	7,10%
Consumer Discretionary	5,68%
Consumer Staples	5,57%
Real Estate	4,50%
Technology	4,13%
Materials	3,60%
Utilities	0,93%
Cash	0,55%
Energy	0,07%
Renewable energy equipment	0,07%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.
The largest investments are based on official accounting data and are based on the transaction date.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** Real taxonomy aligned

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Revenue	
2022*	0.6%
2023**	2.1%

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quaterly weighted average.

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed given the current level of data at the disposal of the management company related to such information.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **31.7%**

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent **19.5%** of the fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include :

- the proportion of assets that are not used to meet the environmental or social characteristics promoted by the fund . These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each fund it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And

the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund should invest at least 30% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above

question “What were the objectives of the sustainable investments that the fund partially made and how did the sustainable investment contribute to such objectives?”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

In addition, the has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: <https://www.bnpparibas-am.com/en/sustainability-documents/>

How did this financial product perform compared to the reference benchmark?

The MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The methodology used for the calculation of the reference benchmark can be found at: <https://www.msci.com/>

● How does the reference benchmark differ from a broad market index?

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question “How did the sustainability indicators perform?”

● How did this financial product perform compared with the reference benchmark?

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

● How did this financial product perform compared with the broad market index?

	Carbon footprint (tCO ₂ eq/EV) ^{1,2}	ESG score ²
Financial product	32.9	60.6
Broad market index ³	69.4	58.6

(1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company's scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company's energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO₂ equivalent per million euros of enterprise value.

(2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.

(3) MSCI EUR IG Corporate Bond Index

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MSCI EUR HY SRI SUSTAINABLE CORPORATE BOND UCITS ETF

Legal entity identifier: 2549007BLK93E2ZFCZ30

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **39.8%** of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product (the "Fund") promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within

The Fund aims to improve its ESG profile compared to its investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI EUR HY SRI Sustainable Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the fund have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

● ***How did the sustainability indicators perform?***

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: **100%**
- The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology: **100%**
- The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR: **39.8%**

● ***...and compared to previous periods?***

Indicator	2022*	2023**	Comparison
The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria	100%	100%	In line with the fund's commitment
The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology	100.0%	100%	In line with the fund's commitment
The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR	39.7%	39.8%	In line with the fund's commitment

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments made by the Fund are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;
3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation "POSITIVE" or "NEUTRAL" from the Investment Manager's ESG research and analysis department, i.e. the "Sustainability Centre", following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm "DNSH" principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology and/or relies on information provided by the reference benchmark administrator to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://bnpparibas-am.com).

The share of fund's investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://bnpparibas-am.com).

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Human Rights. This assessment is conducted within the Investment Manager's Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

- 1- Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment;
- 2- How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

What were the top investments of this financial product?

Asset allocation describes the share of investments in specific assets.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 01.01.2023 to 29.12.2023

Largest investments**	Sector	% Assets*	Country**

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

* Any percentage differences with the financial statement portfolios result from a rounding difference.

** Any difference with the portfolio statements above are coming from the use of different data's sources.

What was the proportion of sustainability-related investments?

What was the asset allocation?

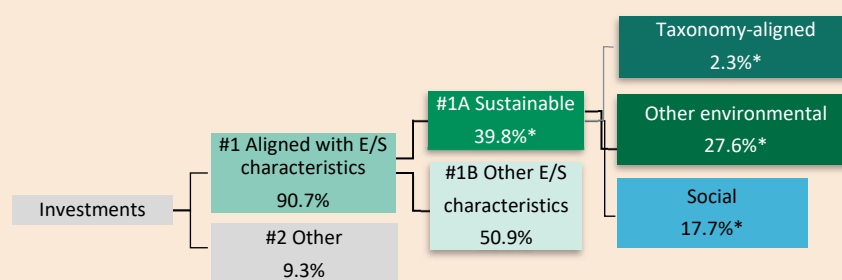

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the fund is **90.7%**.

The proportion of sustainable investments of the fund is **39.8%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (**#1A Sustainable**).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Cash	1,38%
Utilities	1,29%
Energy	1,08%
Oilfield Services & Equipment	1,08%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.
The largest investments are based on official accounting data and are based on the transaction date.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** Real taxonomy aligned

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Revenue	
2022*	1.9%
2023**	2.3%

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quaterly weighted average.

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed given the current level of data at the disposal of the management company related to such information.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **27.6%**.

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent **17.7%** of the fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include :

- the proportion of assets that are not used to meet the environmental or social characteristics promoted by the fund . These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each fund it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And

the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund should invest at least 20% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above

question “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

In addition, the investment manager has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: <https://www.bnpparibas-am.com/en/sustainability-documents/>

How did this financial product perform compared to the reference benchmark?

The MSCI EUR HY SRI Sustainable Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The methodology used for the calculation of the reference benchmark can be found at: <https://www.msci.com/>

● How does the reference benchmark differ from a broad market index?

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question “How did the sustainability indicators perform?”

● How did this financial product perform compared with the reference benchmark?

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

● How did this financial product perform compared with the broad market index?

	Carbon footprint (tCO ₂ eq/EV) ^{1,2}	ESG score ²
Financial product	104.6	59.5
Broad market index ³	91.6	55.0

- (1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company's scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company's energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO₂ equivalent per million euros of enterprise value.
- (2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.
- (3) MSCI EUR HY Corporate Bond Index

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF

Legal entity identifier: 254900ZYS0PG3V8ECA96

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **42.5%** of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within

The Fund aims to improve its ESG profile compared to its investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the fund have contributed are indicated in the question "What were the objectives of the sustainable investments that the fund partially made and how did the sustainable investment contribute to such objectives?".

● ***How did the sustainability indicators perform?***

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: **100%**
- The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology: **100%**
- The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR: **42.5%**

● ***...and compared to previous periods?***

Indicator	2022*	2023**	Comparison
The percentage of the Fund's portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria	100%	100%	In line with the fund's commitment
The percentage of the Fund's assets covered by the ESG analysis based on the index provider ESG methodology	100.0%	100%	In line with the fund's commitment
The percentage of the Fund's portfolio invested in "sustainable investments" as defined in Article 2 (17) of SFDR	45.0%	42.5%	In line with the fund's commitment

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments made by the Fund are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;
3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation "POSITIVE" or "NEUTRAL" from the Investment Manager's ESG research and analysis department, i.e. the "Sustainability Centre", following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm "DNSH" principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology and/or relies on information provided by the reference benchmark administrator to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://bnpparibas-am.com).

The share of fund investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://www.bnpparibas-am.com).

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the Investment Manager's Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

- 1- Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment;
- 2- How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of funds managed can be found in the Investment Manager’s SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

* Any percentage differences with the financial statement portfolios result from a rounding difference.

** Any difference with the portfolio statements above are coming from the use of different data's sources.

What was the proportion of sustainability-related investments?

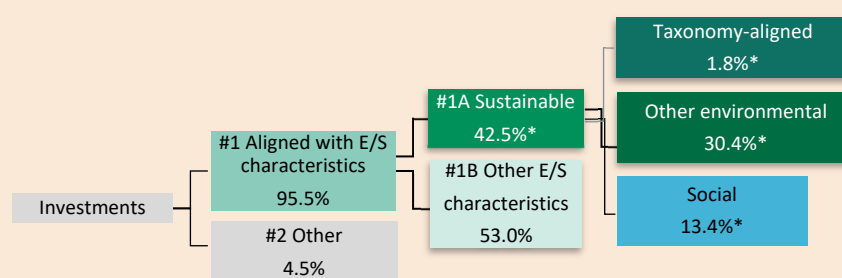

What was the asset allocation?

The proportion of the investments of the fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the fund is **95.5%**.

The proportion of sustainable investments of the fund is **42.5%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● *In which economic sectors were the investments made?*

Sectors	% Asset
Financials	57,59%
Consumer Discretionary	8,80%
Industrials	8,63%
Health Care	6,34%
Communications	4,46%
Consumer Staples	4,40%
Technology	3,20%
Real Estate	2,78%
Materials	2,71%
Utilities	0,75%
Cash	0,22%
Energy	0,11%
Renewable energy equipment	0,11%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.
The largest investments are based on official accounting data and are based on the transaction date.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** Real taxonomy aligned

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Revenue	
2022*	0.5%
2023**	1.8%

*Figures reported in 2022 were calculated on the closing date of the accounting year

** Figures reported in 2023 are expressed as a quarterly weighted average.

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed given the current level of data at the disposal of the management company related to such information.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **30.4%**.

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent **13.4%** of the fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include :

- the proportion of assets that are not used to meet the environmental or social characteristics promoted by the fund . These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each fund it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And

the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

What actions have been taken to meet the environmental and/or social characteristics during the reference period

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund should invest at least 20% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above

question “What were the objectives of the sustainable investments that the fund partially made and how did the sustainable investment contribute to such objectives?”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

In addition, the investment manager has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: <https://www.bnpparibas-am.com/en/sustainability-documents/>

How did this financial product perform compared to the reference benchmark?

The MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The methodology used for the calculation of the reference benchmark can be found at: www.msci.com

● How does the reference benchmark differ from a broad market index?

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question “How did the sustainability indicators perform?”

● How did this financial product perform compared with the reference benchmark?

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

● How did this financial product perform compared with the broad market index?

	Carbon footprint (tCO ₂ eq/EV) ^{1,2}	ESG score ²
Financial product	34.6	59.8
Broad market index ³	69.4	58.6

- (1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company's scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company's energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO₂ equivalent per million euros of enterprise value.
- (2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.
- (3) MSCI EUR IG Corporate Bond Index

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MarketVector Artificial Intelligence ESG UCITS ETF
Legal entity identifier: 254900P608PAKI94X886

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe

ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring:

A minimum ESG scoring threshold is applied at Fund level to ensure that the Fund portfolio does not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and social characteristics. This threshold is currently A+ using MSCI ESG Manager or another corresponding rating from a similar rating provider with a lower score at Fund level permitted only where it is demonstrated to the satisfaction of the Manager that the approach to sustainability risk management and the sustainability elements of the investment strategy are compatible with the Article 8 classification of the Fund. This additional control serves to highlight a minimum Fund level ESG score and promotes engagement and challenge of portfolio managers on selecting more positive issuers demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions):

For the Invested Assets the Manager (see link to Exclusion Policy for more information) applies norms-based exclusions. The Manager wants its funds under management to avoid making any investments which the Manager or its clients might deem incompatible with minimum responsible investing principles. To align the Invested Assets with this approach, the Manager, for the Invested Assets only, considers the following categories which are outlined in more detail in the Exclusion Policy:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

The Fund pursues the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The Fund level ESG score was rated MSCI “AA” or above;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 98%; and

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

— — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector

7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 26 October 2023 - 31 December 2023

Largest investments	Sector	% Assets	Country
INTEL CORP	ELECTRICS/ ELECTRONICS	8.45%	UNITED-STATES (U.S.A.)
CINTAS CORP	MISCELLANEOUS SERVICES	8.26%	UNITED-STATES (U.S.A.)
MICROSOFT CORP	SOFTWARE	8.00%	UNITED-STATES (U.S.A.)
CHURCH & DWIGHT CO INC	DISTRIBUTION/ RETAIL TRADE	7.66%	UNITED-STATES (U.S.A.)
HORMEL FOODS CORP	CONSUMPTION GOODS/ FOOD/ BREWERY	6.49%	UNITED-STATES (U.S.A.)
DELTA AIR LINES INC	TRANSPORTATION AND TRANSPORTATION MATERIALS	4.16%	UNITED-STATES (U.S.A.)
TARGET CORP	DISTRIBUTION/ RETAIL TRADE	4.04%	UNITED-STATES (U.S.A.)
ECOLAB INC	CHEMICAL PRODUCTS	3.92%	UNITED-STATES (U.S.A.)

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives*

What was the proportion of sustainability-related investments?

Not applicable

Asset allocation describes the share of investments in specific assets.

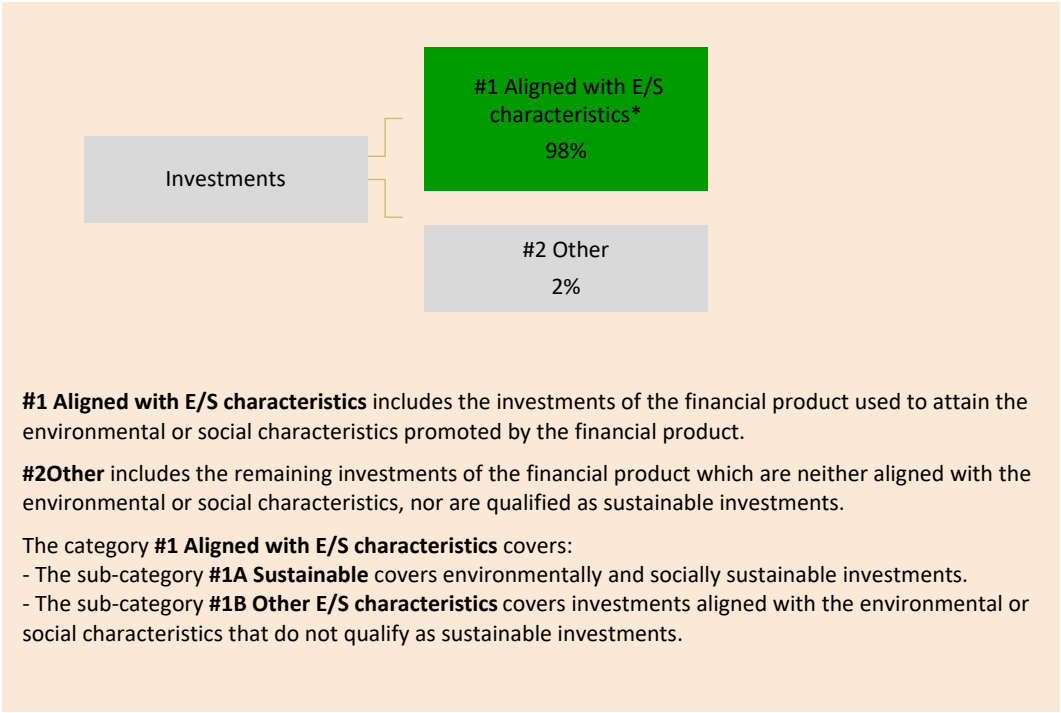

● What was the asset allocation?

7% of the Fund's investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average’s Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

Sector	% Assets
CONSUMPTION GOODS/ FOOD/ BREWERY	17.47%
MISCELLANEOUS SERVICES	14.43%
DISTRIBUTION/ RETAIL TRADE	13.29%
ELECTRICS/ ELECTRONICS	10.23%
SOFTWARE	8.00%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	7.64%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	7.24%
TRANSPORTATION AND TRANSPORTATION MATERIALS	4.16%
CHEMICAL PRODUCTS	3.92%
INSURANCES	3.68%
TEXTILES AND CLOTHING	3.55%
AUDIOVISUAL	3.18%
CONSTRUCTION OF MACHINERY AND VEHICLES	1.44%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable for the first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MarketVector Japan Quality Tilt ESG UCITS ETF
Legal entity identifier: 25490016MT0JGICV379

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe

ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring:

A minimum ESG scoring threshold is applied at Fund level to ensure that the Fund portfolio does not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and social characteristics. This threshold is currently A+ using MSCI ESG Manager or another corresponding rating from a similar rating provider with a lower score at Fund level permitted only where it is demonstrated to the satisfaction of the Manager that the approach to sustainability risk management and the sustainability elements of the investment strategy are compatible with the Article 8 classification of the Fund. This additional control serves to highlight a minimum Fund level ESG score and promotes engagement and challenge of portfolio managers on selecting more positive issuers demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions):

For the Invested Assets the Manager (see link to Exclusion Policy for more information) applies norms-based exclusions. The Manager wants its funds under management to avoid making any investments which the Manager or its clients might deem incompatible with minimum responsible investing principles. To align the Invested Assets with this approach, the Manager, for the Invested Assets only, considers the following categories which are outlined in more detail in the Exclusion Policy:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

The Fund pursues the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The Fund level ESG score was rated MSCI “AA” or above;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 94%; and

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

— — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector

- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

- 4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

- 9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 26 October 2023 - 31 December 2023

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MarketVector Bioproduction Tech and Tools ESG UCITS ETF

Legal entity identifier: 2549007KCFFGJ9DKEC77

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe

ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring:

A minimum ESG scoring threshold is applied at Fund level to ensure that the Fund portfolio does not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and social characteristics. This threshold is currently A+ using MSCI ESG Manager or another corresponding rating from a similar rating provider with a lower score at Fund level permitted only where it is demonstrated to the satisfaction of the Manager that the approach to sustainability risk management and the sustainability elements of the investment strategy are compatible with the Article 8 classification of the Fund. This additional control serves to highlight a minimum Fund level ESG score and promotes engagement and challenge of portfolio managers on selecting more positive issuers demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions):

For the Invested Assets the Manager (see link to Exclusion Policy for more information) applies norms-based exclusions. The Manager wants its funds under management to avoid making any investments which the Manager or its clients might deem incompatible with minimum responsible investing principles. To align the Invested Assets with this approach, the Manager, for the Invested Assets only, considers the following categories which are outlined in more detail in the Exclusion Policy:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

The Fund pursues the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The Fund level ESG score was rated MSCI “AA or above;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 98%; and

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector

7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 26 October 2023 - 31 December 2023

*The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023)
This data includes all securities, excluding derivatives*

What was the proportion of sustainability-related investments?

Not applicable

Asset allocation describes the share of investments in specific assets.

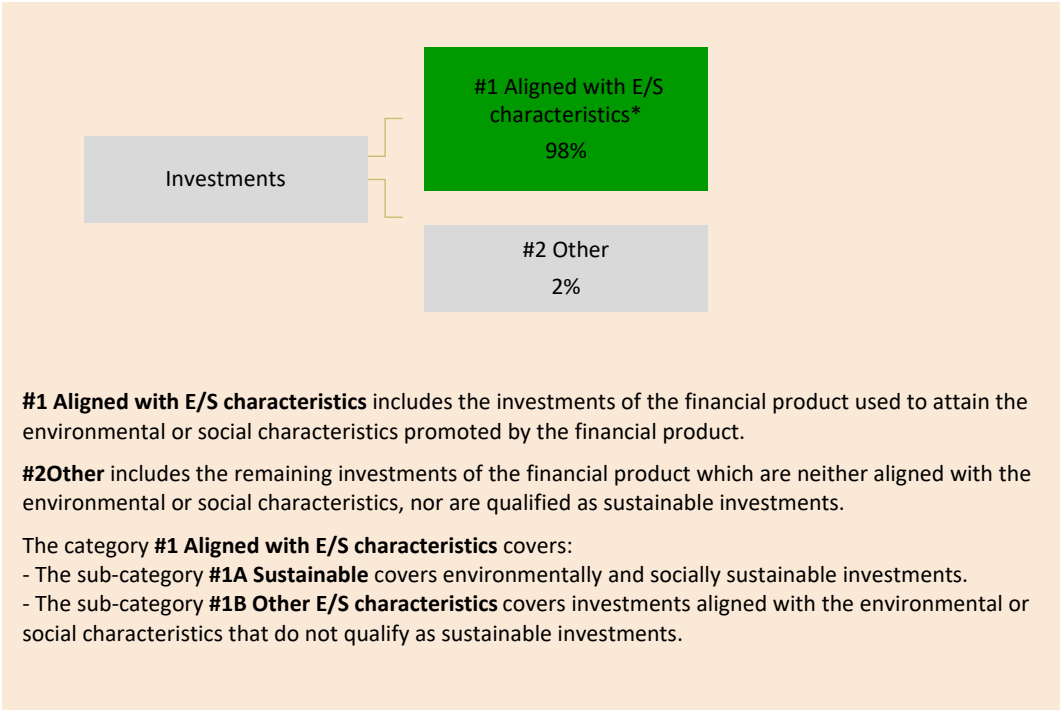

● *What was the asset allocation?*

11% of the Fund's investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*** Please note that the above is calculated using the quarterly average’s Total Net Asset Value of the Fund.**

In which economic sectors were the investments made?

Sector	% Assets
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	21.56%
DISTRIBUTION/ RETAIL TRADE	18.09%
CONSUMPTION GOODS/ FOOD/ BREWERY	10.67%
SOFTWARE	9.99%
CHEMICAL PRODUCTS	7.74%
DISTRIBUTION WATER GAS ELECTRICITY ENERGY	7.56%
MISCELLANEOUS SERVICES	4.22%
TRANSPORTATION AND TRANSPORTATION MATERIALS	3.87%
BANKS	3.69%
AUDIOVISUAL	3.66%
ELECTRICS/ ELECTRONICS	3.64%
TEXTILES AND CLOTHING	2.89%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

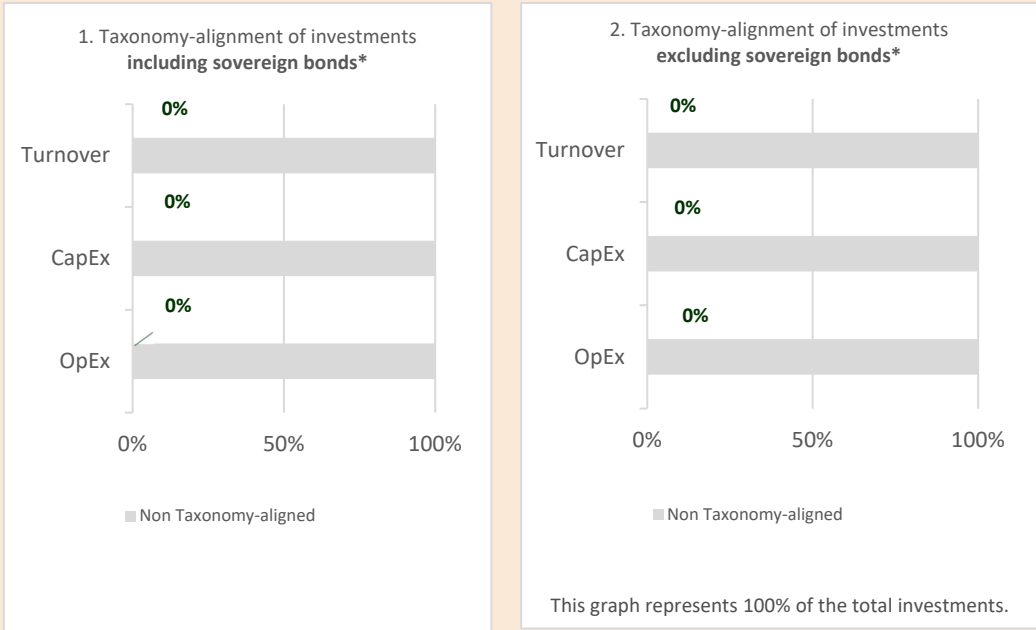

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable for the first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MarketVector Global Clean Energy Transition ESG UCITS ETF

Legal entity identifier: 2549000QIYUYECLT4F41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe

ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring:

A minimum ESG scoring threshold is applied at Fund level to ensure that the Fund portfolio does not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and social characteristics. This threshold is currently A+ using MSCI ESG Manager or another corresponding rating from a similar rating provider with a lower score at Fund level permitted only where it is demonstrated to the satisfaction of the Manager that the approach to sustainability risk management and the sustainability elements of the investment strategy are compatible with the Article 8 classification of the Fund. This additional control serves to highlight a minimum Fund level ESG score and promotes engagement and challenge of portfolio managers on selecting more positive issuers demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions):

For the Invested Assets the Manager (see link to Exclusion Policy for more information) applies norms-based exclusions. The Manager wants its funds under management to avoid making any investments which the Manager or its clients might deem incompatible with minimum responsible investing principles. To align the Invested Assets with this approach, the Manager, for the Invested Assets only, considers the following categories which are outlined in more detail in the Exclusion Policy:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

The Fund pursues the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The Fund level ESG score was rated MSCI “AA” or above;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 96%; and

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

— — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector

7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

CONSTRUCTION OF MACHINERY AND VEHICLES	3.89%
CONSUMPTION GOODS/ FOOD/ BREWERY	3.57%
TRANSPORTATION AND TRANSPORTATION MATERIALS	3.55%
REAL ESTATE AND HOUSING	3.52%
ADVERTISING/ COMMUNICATION	1.02%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

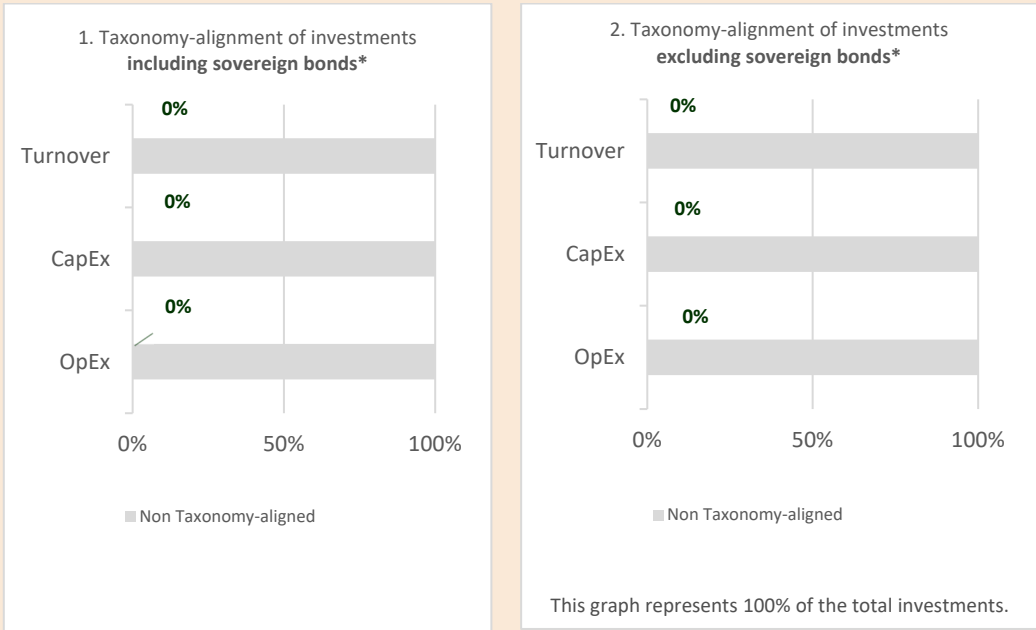

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas
☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable for the first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MarketVector Global Metaverse and e-Games ESG UCITS ETF

Legal entity identifier: 254900112F8491N4LM86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe

ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.

2. Fund Level ESG Scoring:

A minimum ESG scoring threshold is applied at Fund level to ensure that the Fund portfolio does not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and social characteristics. This threshold is currently A+ using MSCI ESG Manager or another corresponding rating from a similar rating provider with a lower score at Fund level permitted only where it is demonstrated to the satisfaction of the Manager that the approach to sustainability risk management and the sustainability elements of the investment strategy are compatible with the Article 8 classification of the Fund. This additional control serves to highlight a minimum Fund level ESG score and promotes engagement and challenge of portfolio managers on selecting more positive issuers demonstrating better environmental and/or social characteristics.

3. Negative Screening (Norm-based exclusions):

For the Invested Assets the Manager (see link to Exclusion Policy for more information) applies norms-based exclusions. The Manager wants its funds under management to avoid making any investments which the Manager or its clients might deem incompatible with minimum responsible investing principles. To align the Invested Assets with this approach, the Manager, for the Invested Assets only, considers the following categories which are outlined in more detail in the Exclusion Policy:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

The Fund pursues the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund in 2023;

- i. The Fund level ESG score was rated MSCI “AA” or above;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 98%; and

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable

— — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector

7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 26 October 2023 - 31 December 2023

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable for the first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of “Others” includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes along with other amounts contributing to the Total Net Asset Value.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
