## FINECO AM US DOLLAR BOND FUND

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS J ACC - EUR ACCUMULATING ISIN: IE0004MGL3U2

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

### Objectives and Investment Policy

The Sub-Fund invests predominantly in investment grade bonds denominated in USD. The Sub-Fund may invest substantially or fully in fixed income securities issued by the United States government. The Manager selects the investments by focusing on fundamental credit analysis of issuers on both an absolute and a relative basis. Quantitative and qualitative methods are used to analyse the credit standing of issuers and the Manager uses the output of this analysis to identify investment opportunities, taking into consideration factors such as the level of credit spreads, market supply and demand imbalances of credits, and liquidity. The Sub-Fund may invest in asset-backed securities, non-investment grade securities and convertible securities, such as convertible bonds. The Sub-Fund may use derivatives for investment purposes, to reduce various risks or for efficient portfolio management. The recommended holding period has been selected as the link between the risk and the potential returns of the Sub-Fund and can be fully appreciated only over the recommended holding period. **Benchmark Information:** The Sub-Fund is actively managed. The Manager has selected the Bloomberg US Treasury Index (the "Index") which is used as i) a performance comparison and ii) the basis for the value-at risk ("VaR") calculations. The Index ticker is LUATTRUU. The Index is not an ESG benchmark and is not consistent with ESG or sustainability criteria. The Manager does not intend to replicate the composition of such Index and may at all times exercise total freedom by investing in securities which are not included in the referenced Index, or which are present in different proportions. There can be no guarantee that the investment objective will actually be attained and investors are explicitly warned that this Sub-Fund is not a capital guaranteed product. Investors can redeem their Shares on the relevant Dealing Day as set out in the prospectus. Investors can ask for full or partial redemption of the Shares held. **SFDR Classification:** The Sub-Fund is classified as an Art. 8 financial product under SFDR. For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the supplement and to the ICAV prospectus.

#### Recommended for retail investors

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds
- Who understand the risk of losing some or all of the capital invested
- This Sub-Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period

*This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.*

### Risk and Reward Profile

#### Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.
- **Liquidity Risk:** Losses may occur if adverse market conditions affect the ability to sell assets at a certain time and for a reasonable price.
- **Credit risk:** The protection level offered by the Sub-Fund is not guaranteed and is at all times subject to the risk of the default of the issuer of the Funding Investments which the Sub-Fund has purchased.
- **Concentration Risk:** Due to the composition of the Sub-Fund's investments, the Sub-Fund's portfolio may be more concentrated geographically and/or sectorally than other investment funds with more diversified portfolios.

#### What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
