BANOR CLUB FINECO AM FUND

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS J ACC - EUR ACCUMULATING ISIN: IE0006K765Z8

INVESTMENT MANAGER : BANOR CAPITAL LIMITED

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

Objectives and Investment Policy

The investment objective of the Sub-Fund is to achieve capital appreciation over the long term through investment in a diversified portfolio of assets. The Sub-Fund seeks to achieve its investment objective by primarily investing in equity and debt securities denominated in Euro or US Dollar issued by companies considered undervalued by the Investment Manager and which are domiciled or conduct most of their business in mature economies. The Sub-Fund may invest up to 10% of its Net Asset Value in securities issued by companies considered undervalued by the Investment Manager and which are domiciled or conduct most of their business in emerging markets. The Sub-Fund will invest in such equity stocks directly or through a strategy in options, as well as in bonds. The Investment Manager will actively manage the allocation between equity and debt securities, with the targeted allocation being 40% in bonds and 60% in equities and equity-related securities. The focus of equity securities investment will be on European mid- and large capitalisation companies in the United States. The debt securities that the Sub-Fund may hold will primarily be government or corporate bonds (which may be fixed or floating rate and of Investment Grade). The Sub-Fund may use derivatives for investment purposes, to reduce various risks or for efficient portfolio management. Benchmark Information: The Sub-Fund is actively managed. The Investment Manager has selected a composite index made up of the following indices, in the below proportions, to be used for performance comparison purposes only: • 30% of the MSCI World Euro Net Total Return Index • 30% of the MSCI Europe Net Total Return EUR Index • 40% Bloomberg Global Aggregate Total Return EUR Unhedged Index The Investment Manager does not intend to replicate the composition of such indices and may at all times exercise total freedom by investing in securities which are not included in the referenced indices, or which are present in different proportions. There can be no guarantee that the investment objective will actually be attained and investors are explicitly warned that this Sub-Fund is not a capital guaranteed product. Investors can redeem their shares on the relevant Dealing Day as set out in the prospectus. Investors can ask for full or partial redemption of the shares held.

Recommended for retail investors

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds
- Who understand the risk of losing some or all of the capital invested
- This Sub-Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period

This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.
- **Emerging market risk:** Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
