What is this product?

Type: UCITS

Term: There is no fixed term for this Sub-Fund.

Objectives: The investment objective of The Sub-Fund is to provide a higher total return (capital growth plus income) than that of global equity markets over any five-year period and to invest in companies that contribute towards the Paris Agreement climate change goal. The Sub-Fund seeks to achieve its objective by investing at least 80% of its Net Asset Value in equity securities of sustainable companies that may operate in any sector and with any market capitalization and that may be domiciled in any country, including up to 20% of The Sub-Fund's Net Asset Value that may be invested in emerging markets. The sustainable companies that The Sub-Fund invests are companies that contribute to the long-term global warming objectives of the Paris Agreement by either having a Low Carbon Intensity and/or a Reducing Carbon Intensity. The Sub-Fund is expected to have a concentrated portfolio of usually fewer than 40 companies. The Sub-Fund may also invest in deposits, warrants, money market instruments such as T-bills, certificates of deposit, commercial paper and bankers' acceptances. Investment in warrants will not be leveraged and will be limited to 10% of The Sub-Fund's Net Asset Value. The Sub-Fund may use derivatives to reduce various risks, for hedging and investment purposes. **SFDR Classification :** The Sub-Fund is classified as an Article 9 financial product under SFDR. For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the supplement and to the ICAV prospectus. There can be no guarantee that the investment objective will actually be attained. Investors can redeem their shares on the relevant Dealing Day as set out in the prospectus. Investors can ask for full or partial redemption of the shares held. **Benchmark Information:** The recommended holding period has been selected as the link between the risk and the potential returns of the Sub-Fund and can be fully appreciated only over the recommended holding period. **Benchmark Information:** The Sub-Fund is actively managed and the Investment Manager has freedom in selecting investments. The recommended holding period has been selected as the link between the risk and the potential returns of the Sub-Fund and can be fully appreciated only over the recommended holding period. The Sub-Fund is actively managed and the Investment Manager has freedom in selecting investments. The Investment Manager has selected the MSCI World Net Return Index ("Index") to measure The Sub-Fund's performance. The Index captures large and mid-cap representation across the world developed markets equity universe. The Index is not an ESG benchmark and is not consistent with ESG criteria. The Index is also used to define the carbon profile of companies. The Investment Manager considers The Sub-Fund's weighted average carbon intensity against the Index when constructing the portfolio, however the Index does not constrain The Sub-Fund's portfolio construction. The Sub-Fund's holdings may deviate significantly from the Index's constituents and as a result The Sub-Fund's performance may deviate materially from the Index.

Intended retail investor:

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds
- Who understand the risk of losing some or all of the capital invested
- This Sub-Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 5 years.

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Sub-Fund is not able to pay you.
- We have classified this product as 4 out of 7, which is a medium risk class.
- This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact the capacity of

the Sub-Fund to pay you.

- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the ICAV is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The performances indicated in each of the proposed scenarios consider the application of any entry fees, and for the maximum amount envisaged by the prospectus, as indicated in the section below referring to costs and entitled: "Composition of Costs".

What happens if Fineco Asset Management DAC is unable to pay out?

If the Manager were to become insolvent, the assets of the Sub-Fund should not be affected because they are held by the Depositary, which is legally required to keep the assets separate from its own assets and those of the Manager. However, if the Depositary were to become insolvent, there may be a financial loss for the Sub-Fund, but this should be minimized because the assets are held separate to the Depositary's own assets. If the Sub-Fund is closed or dissolved, the assets will be sold and the investors will receive a share of the proceeds, which may be more or less than their initial investment. The ICAV is not a guaranteed UCITS and as a result there is no guarantee scheme in place which provides a guaranteed rate of return. The Sub-Fund does not provide compensation or operate a guarantee against any loss in the value of an investment, the funds or any income generated.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different investment periods. We have assumed:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario.
- 10000 EUR is invested.

	If you cash in after 1 year	If you cash in after 5 years
Total costs	€ 685	€ 1,604
Annual cost impact (*)	7.2%	3.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.10% before costs and 8.00% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
