ULTRA SHORT TERM BOND SRI FAM FUND

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS J DIST - EUR DISTRIBUTING ISIN: IE000ECREZOO

INVESTMENT MANAGER : AMUNDI ASSET MANAGEMENT (SAS)

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

Objectives and Investment Policy

The investment objective is to provide a total return (income and capital growth) over a minimum six-month investment period in excess of its benchmark (see below for Benchmark composition). The Fund will primarily be exposed to Euro denominated Investment Grade Debt Instruments and Money Market Instruments issued by governments and their agencies and corporations. Under normal market conditions, the Investment Manager will seek to invest up to 100% of the Fund's assets in a diversified portfolio of Euro denominated Debt Instruments of varying maturities. Up to a maximum of 50% of the Fund's Net Asset Value may be invested in Debt Instruments and Money Market Instruments denominated in non-OECD country currencies. The Fund's exposure to emerging markets will be limited to 10% of the Fund's Net Asset Value. Any time, at least 20% of the Net Asset Value consists of securities with maturities of over 2 years. No more than 10% of the Fund's Net Asset Value may be invested in units or shares of other collective investment schemes. Other than permitted investment in unlisted securities and OTC FDIs, as listed in the supplement (for the purpose of investment, efficient portfolio management and hedging), the Fund's investments will be limited to securities that are traded on the markets listed in Schedule I of the Prospectus. The Fund may also engage in Securities Lending and enter Repurchase/Reverse Repurchase Agreements. The Investment Manager uses a combination of top-down allocation and bottom-up selection and it also takes environmental, social and corporate governance ("ESG") aspects into account. There can be no guarantee that the investment objective will actually be attained. Investors can redeem their Shares fully or partially on any Business Day in Luxembourg. **SFDR Classification:** The Fund is classified as an Article 8 financial product under SFDR. For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the supplement and to the prospectus. **Benchmark Information:** The Fund is actively managed. The Investment Manager has selected a benchmark composed of 80% Euro Short-Term Rate (€STR) and 20% ICE BofA 1-3 Year Euro Corporate Index that will be used as a comparison for investment performance only. The Investment Manager does not intend to replicate the composition of the benchmark and may at all times exercise total freedom by investing in securities which are not included in the referenced benchmark or which are present in different proportions.

Recommended for retail investors

- With a basic knowledge in investing in funds and no or limited experience in investing in similar funds
- Who understand the risk of losing some or all of the capital invested
- Seeking a return over the short term via exposure to debt securities and money market instruments, and who are willing to accept a low level of volatility
- This fund may not be appropriate for investors who plan to withdraw their money within 1 year

This is a distributing unit class.

Risk and Reward Profile

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.
- **Credit risk:** The protection level offered by the Sub-Fund is not guaranteed and it is at all times subject to the risk of the default of the issuer of the funding investments which the Sub-Fund has purchased.
- **Concentration risk:** Due to the composition of the Sub-Fund's investments, the Sub-Fund's portfolio may be more concentrated geographically and/or sectorally than other investment funds with more diversified portfolios.

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
