Fineco AM Global Equities Income Fund

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS J DIST - EUR DISTRIBUTING ISIN: IE000IYWNUG3

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

Objectives and Investment Policy

The investment objective of the Sub-Fund is to generate high levels of income, with the potential for long-term capital growth. The Sub-Fund invests primarily in global equities, in any market sector, and in both developed and emerging markets. The Manager selects investments and creates the portfolio by focusing on equities with attractive dividends and the potential for price appreciation. The Manager identifies potential investments by analysing individual companies' financial performance and assessing the general and industry specific economic trends. The Sub-Fund may also invest in bonds rated investment grade by at least one of the credit rating agencies and in money market instruments. The Sub-Fund may use derivatives for investment purposes, to reduce various risks or for efficient portfolio management. **Benchmark Information:** The Sub-fund is actively managed. The Manager, considering the degree of representativeness of the underlying markets and their liquidity, strategically selects a benchmark (the "Benchmark") appropriate to the Sub-Fund's investment policies, which is used as performance comparison. The selected Benchmark is MSCI ACWI Index. The Sub-fund does not aim to track or replicate the performance of the Benchmark and therefore investors should be aware that the Sub-fund may underperform the Benchmark. There can be no guarantee that the investment objective will actually be attained and investors are explicitly warned that this Sub-Fund is not a capital guaranteed product. Investors can redeem their Shares on any business day in Luxembourg. Investors can ask for full or partial redemption of the Shares held. **SFDR Classification:** The Sub-Fund is classified as an Art. 8 financial product under SFDR. For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the supplement and to the ICAV prospectus.

Recommended for retail investors

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds
- Who understand the risk of losing some or all of the capital invested
- Seeking to increase the value of their investment and provide income, and who are willing to accept a medium to high level of volatility
- This fund may not be appropriate for investors who plan to withdraw their money within 5 years

This is a distributing unit class. Investment income is distributed. Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.
- **Emerging market risk:** Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
