## Global Sustain Paris Aligned FAM Fund

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS J ACC - EUR ACCUMULATING ISIN: IE000MOZM5U8

INVESTMENT MANAGER : M&G INVESTMENT MANAGEMENT LIMITED

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

### Objectives and Investment Policy

The investment objective of the Sub-Fund is to provide a higher total return (capital growth plus income) than that of global equity markets over any five-year period and to invest in companies that contribute towards the Paris Agreement climate change goal. The Sub-Fund seeks to achieve its objective by investing at least 80% of its Net Asset Value in equity securities of sustainable companies that may operate in any sector and with any market capitalization and that may be domiciled in any country, including up to 20% of the Sub-Fund's Net Asset Value that may be invested in emerging markets. The sustainable companies that the Sub-Fund invests are companies that contribute to the long-term global warming objectives of the Paris Agreement by either having a Low Carbon Intensity and/or a Reducing Carbon Intensity. The Sub-Fund is expected to have a concentrated portfolio of usually fewer than 40 companies. The Sub-Fund may also invest in deposits, warrants, money market instruments such as T-bills, certificates of deposit, commercial paper and bankers' acceptances. Investment in warrants will not be leveraged and will be limited to 10% of the Sub-Fund's Net Asset Value. The Sub-Fund may use derivatives to reduce various risks, for hedging and investment purposes. **SFDR Classification** : The Sub-Fund is classified as an Article 9 financial product under SFDR. For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the supplement and to the ICAV prospectus. There can be no guarantee that the investment objective will actually be attained. Investors can redeem their Shares on any Business Day, as defined in the supplement. Investors can ask for full or partial redemption of the Shares held. **Benchmark Information** : The Sub-Fund is actively managed and the Investment Manager has freedom in selecting investments. The Sub-Fund is actively managed and the Investment Manager has freedom in selecting investments. The Investment Manager has selected the MSCI World Net Return Index ("Index") to measure the Sub-Fund's performance. The Index captures large and mid-cap representation across the world developed markets equity universe. The Index is not an ESG benchmark and is not consistent with ESG criteria. The Index is also used to define the carbon profile of companies. The Investment Manager considers the Sub-Fund's weighted average carbon intensity against the Index when constructing the portfolio, however the Index does not constrain the Sub-Fund's portfolio construction. The Sub-Fund's holdings may deviate significantly from the Index's constituents and as a result the Sub-Fund's performance may deviate materially from the Index.

#### Recommended for retail investors

*This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.*

### Risk and Reward Profile

#### Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.
- **Liquidity Risk:** Losses may occur if adverse market conditions affect the ability to sell assets at a certain time and for a reasonable price.
- **Emerging Markets Risk:** Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

#### What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
