What is this product?

Type: UCITS

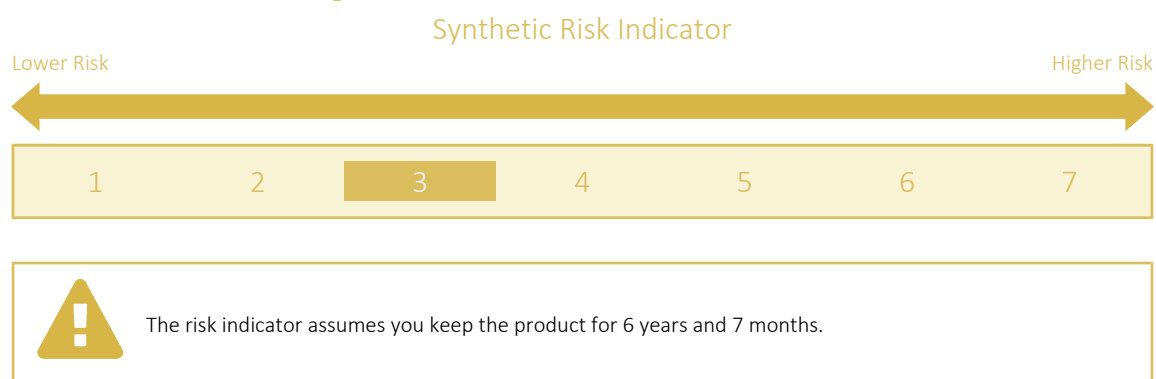

Term: Notwithstanding that a Maturity Date of 28/12/2029 applies to the Sub-Fund, there is no fixed term for this Sub-Fund.

Objectives: The Investment Objective of the Sub-Fund aims to (i) provide Shareholders with a Dividend on each Dividend Payment Date and (ii) to protect the Fund's Net Asset Value per Share at 100% of the Initial Offer Price at the Maturity Date. In order to achieve its Investment Objective, the Sub-Fund will invest in government and/or corporate bonds with a preference for Investment Grade government bonds issued by issuers located in any country and/or Investment Grade/non-Investment Grade Debt Instruments (including subordinated and non-subordinated debt securities) issued by credit institutions and/or insurance companies authorised to operate in the European Union and/or the European Economic Area, the United Kingdom, and/or the United States of America. The Fund will enter into certain Financial Derivative Instruments ("FDI") which may include Inflation Linked Swaps in which it will swap out an amount equal to the coupon it receives on the Debt Instruments it has purchased in return for payments received from an OTC counterparty. The Fund may also engage in the use of forwards and Credit Default Swaps. The Fund may also invest principally in Debt Instruments and/or Money Market/Short Term Instruments during the Subscription Period, approaching the Maturity Date and after the Maturity Date. The Fund may engage in securities lending for efficient portfolio management purposes and may use additional FDI to those described in the investment policy section of the Fund for investment purposes, hedging and risk reduction. The recommended holding period has been selected as the link between the risk and the potential returns of the Sub-Fund and can be fully appreciated only over the recommended holding period. This PRIIPs KID should be read in conjunction with the section entitled "Definitions" in the Prospectus and in the Sub-Fund Supplement. The Fund is not managed in reference to a benchmark. Portfolio composition is determined based on active investment decisions and hence the Fund is actively managed. There can be no guarantee that the investment objective will actually be attained and investors are explicitly warned that the Fund is not a capital guaranteed product. Investors can redeem their Shares on the relevant Dealing Day as set out in the Prospectus. Investors can ask for full or partial repayment of the Shares held.

Intended retail investor:

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds
- Who understand the risk of losing some or all of the capital invested
- This fund may not be appropriate for investors who plan to withdraw their money before the Recommended holding period

What are the risks and what could I get in return?

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Sub-Fund is not able to pay you.
- We have classified this product as 3 out of 7, which is a medium-low risk class.
- This rates the potential losses from future performance at a very low level, and poor market conditions are unlikely to impact the capacity of the Sub-Fund to pay you.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the ICAV is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately

predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

The performances indicated in each of the proposed scenarios consider the application of any entry fees, and for the maximum amount envisaged by the prospectus, as indicated in the section below referring to costs and entitled: "Composition of Costs".

Recommended holding period: 6 years and 7 months Example Investment: € 10,000			
Scenarios		If you cash in after 1 year	If you cash in after 6 years and 7 months
Minimum Stress	There is no minimum guaranteed return What you might get back after costs Average return each year	€ 8,000 -20.02%	€ 12,490 3.75%
Unfavourable	What you might get back after costs Average return each year	€ 8,150 -18.45%	€ 12,490 3.75%
Moderate	What you might get back after costs Average return each year	€ 9,800 -2.04%	€ 12,490 3.75%
Favourable	What you might get back after costs Average return each year	€ 10,890 8.90%	€ 12,490 3.75%

- The figures shown include all the costs of the product itself and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.
- The stress scenario shows what you might get back in extreme market circumstances.

What happens if Fineco Asset Management DAC is unable to pay out?

If the Manager were to become insolvent, the assets of the Sub-Fund should not be affected because they are held by the Depositary, which is legally required to keep the assets separate from its own assets and those of the Manager. However, if the Depositary were to become insolvent, there may be a financial loss for the Sub-Fund, but this should be minimized because the assets are held separate to the Depositary's own assets. If the Sub-Fund is closed or dissolved, the assets will be sold and the investors will receive a share of the proceeds, which may be more or less than their initial investment. The ICAV is not a guaranteed UCITS and as a result there is no guarantee scheme in place which provides a guaranteed rate of return. The Sub-Fund does not provide compensation or operate a guarantee against any loss in the value of an investment, the funds or any income generated.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different investment periods. We have assumed:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario.
- 10000 EUR is invested.

	If you cash in after 1 year	If you cash in after 6 years and 7 months
Total costs	€ 107	€ 660
Annual cost impact (*)	1.1%	1.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.80% before costs and 3.80% after costs.

How long should I hold it and can I take money out early?

Recommended holding period: 6 years and 7 months

The recommended holding period of the Sub-Fund is expected to be 6 years and 7 months. The recommended holding period of 6 years and 7 months is based on the liquidity profile of the Sub-Fund as well as the risk profile of the underlying assets. Investors can redeem their units on the relevant Dealing Day as set out in the prospectus by placing an order with the Distributor. No fees or penalties are applied by the Manager.
