Fineco AM European Corporate Bond Fund

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS I ACC - EUR ACCUMULATING ISIN: IE00BFXY1Y49

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

Objectives and Investment Policy

The investment objective of the Sub-Fund is to maximise total returns through a combination of income and capital appreciation. The Sub-Fund seeks to achieve this objective by investing predominantly in Investment Grade corporate bonds denominated in any European currency. The corporate bonds that the Sub-Fund may acquire are fixed or floating rate instruments issued by corporates located in any part of the world and operating in any economic sector. A dynamic investment approach is followed, allowing the Manager to change the blend of duration and credit exposure. The Sub-Fund is diversified by investing in a range of individual issuers, sectors and geographies. An in-house team of credit analysts assists the Manager in individual credit selection along with the monitoring of issuers held by the Sub-Fund. The Sub-Fund may also invest materially in high-yield fixed or floating rate corporate bonds that are rated below Investment Grade or in bonds that are issued by European governments, which may be denominated in any European currency. The Sub-Fund may use derivatives for investment purposes, to reduce various risks or for efficient portfolio management. The Sub-fund is actively managed. The Manager has selected the iBoxx Euro Corporate Overall Total Return Index for performance comparison purposes only. The Manager does not intend to replicate the composition of such index and may at all times exercise total freedom by investing in securities which are not included in the referenced index, or which are present in different proportions. There can be no guarantee that the investment objective will actually be attained and investors are explicitly warned that this Sub-Fund is not a capital guaranteed product. Investors can redeem their Shares on any business day in Luxembourg. Investors can ask for full or partial redemption of the Shares held. **SFDR Classification:** The Sub-Fund is classified as an Art. 8 financial product under SFDR. For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the supplement and to the ICAV prospectus.

Recommended for retail investors

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds
- Who understand the risk of losing some or all of the capital invested
- Seeking to increase the value of their investment and provide income and who are willing to accept a medium level of volatility
- This fund may not be appropriate for investors who plan to withdraw their money within 3 years

This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
