FIDELITY EURO SHORT TERM BOND FAM FUND

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS I ACC - EUR ACCUMULATING ISIN: IE00BFXY6507

INVESTMENT MANAGER : FIL PENSIONS MANAGEMENT

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

Objectives and Investment Policy

The investment objective of the Sub-Fund is to achieve income and capital growth. The Sub-Fund invests predominantly in fixed or floating rate investment grade bonds denominated in Euro with less than five years to maturity. The Investment Manager will select the bonds to be acquired by focusing on fundamental research and bottom-up security selection analysis. The Investment Manager's sovereign and corporate analysts provide a fundamental assessment of a country or company's financial health, with focus on credit assessments to appraise the probability of default and estimate losses. Following such credit assessment, the Investment Manager appraises investments in reference to other investment opportunities by focusing on relative price, liquidity and risk premium with the purpose of determining which investments to acquire on behalf of the Sub-Fund. The Sub-Fund may invest materially in non-Euro denominated debt securities which may or not be hedged back to Euro. The Sub-Fund may also invest in collateralized debt obligations (CDOs) or collateralized loan obligations (CLOs). The Sub-Fund may use derivatives for investment purposes, to reduce various risks or for efficient portfolio management. The Sub-Fund is actively managed. The Manager has selected the ICE BofA 1-3 Year Euro Broad Market Index for performance comparison purposes only. The Manager does not intend to replicate the composition of such index and may at all times exercise total freedom by investing in securities which are not included in the referenced index, or which are present in different proportions. There can be no guarantee that the investment objective will actually be attained and investors are explicitly warned that this Sub-Fund is not a capital guaranteed product. Investors can redeem their Shares on any business day in Luxembourg. Investors can ask for full or partial redemption of the Shares held. **SFDR Classification:** The Sub-Fund is classified as an Art. 8 financial product under SFDR. This means that, by pursuing its objective, this Sub-Fund promotes, among other characteristics, environmental and/or social characteristics, including the investment in companies that follow good governance practices ("ESG"). For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the supplement and to the ICAV prospectus.

Recommended for retail investors

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds
- Who understand the risk of losing some or all of the capital invested
- This fund may not be appropriate for investors who plan to withdraw their money within 1 year
- Seeking to increase the value of their investment and are seeking income and who are willing to accept a low level of volatility

This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
