AMUNDI EUROPEAN EQUITY VALUE FAM FUND

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS K ACC GBP - GBP ACCUMULATING ISIN: IE00BHNMX688

INVESTMENT MANAGER : AMUNDI IRELAND LTD

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

Objectives and Investment Policy

The investment objective of the Sub-Fund is capital appreciation over the medium to long term through investment in a diversified portfolio of European equity securities. The Sub-Fund will invest predominantly in equity securities issued by companies with their principal offices in, or are headquartered in, Europe. The Investment Manager will apply a value investment approach and will seek to acquire equities at prices that are below their intrinsic value. Stock selection will be based on fundamental analysis and bottom-up evaluation of companies that will focus on valuation levels, earnings performance and appraisal of an issuer's management and industry sector. When the Investment Manager considers it is appropriate, the Sub-Fund may invest in aggregate up to 25% of its net assets in collective investment schemes, exchange traded Sub-Funds ("ETFs") and ancillary liquid assets such as money market instruments. The Sub-Fund may use derivatives to reduce various risks or for efficient portfolio management. **Benchmark Information:** The Sub-fund is actively managed. The Investment Manager, considering the degree of representativeness of the underlying markets and their liquidity, strategically selects a benchmark (the "Benchmark") appropriate to the Sub-Fund's investment policies, which is used as i) performance comparison and ii) basis for the value-at risk ("VaR") calculations. The selected Benchmark is MSCI Europe Value Index. The Sub-fund does not aim to track or replicate the performance of the Benchmark and therefore investors should be aware that the Sub-fund may underperform the Benchmark. There can be no guarantee that the investment objective will actually be attained, and investors are explicitly warned that this Sub-Fund is not a capital guaranteed product. Investors can redeem their Shares on any business day in Luxembourg. Investors can ask for full or partial redemption of the Shares held. **SFDR Classification:** The Sub-Fund is classified as an Art. 8 financial product under SFDR. This means that, by pursuing its objective, this Sub-Fund promotes, among other characteristics, environmental and/or social characteristics, including the investment in companies that follow good governance practices ("ESG"). For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the supplement and to the ICAV prospectus.

Recommended for retail investors

- Who understand the risk of losing some or all of the capital invested
- Who are seeking capital growth and who are willing to accept a high level of volatility
- This fund may not be appropriate for investors who plan to withdraw their money within 5 years

This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
