## Fidelity Focus Equity FAM Fund

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS K ACC - EUR ACCUMULATING ISIN: IE00BKLR601

INVESTMENT MANAGER : FIL PENSIONS MANAGEMENT

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

### Objectives and Investment Policy

The investment objective of the Sub-Fund is to achieve long-term capital growth from a portfolio primarily made up of the equity securities of companies around the world. The Investment Manager uses a valuation-focused approach to identify companies with the potential for meaningful share price appreciation. The Investment Manager applies fundamental analysis to seek companies whose intrinsic value is greater than the current price of their securities. This approach includes fundamental analysis of a company's financial statements, profitability, management structure, operations, business strategy, product development, and its position within its industry, among other things. The Investment Manager evaluates investment opportunities on a company-by-company basis. The Investment Manager looks primarily for companies using a "bottom up" strategy, that is, by analyzing individual stocks before considering the impact of general or industry economic trends. The Sub-Fund may hold money market instruments or money market Sub-Funds. The Sub-Fund may use derivatives for investment purposes, to reduce various risks or for efficient portfolio management. The Fund is actively Managed. The Fund does not aim to track the performance of a benchmark. Portfolio composition is determined based on active and discretionary investment decisions and choices. There can be no guarantee that the investment objective will actually be attained and investors are explicitly warned that this Sub-Fund is not a capital guaranteed product. Investors can redeem their Shares on any business day in Luxembourg. Investors can ask for full or partial redemption of the Shares held. **SFDR Classification:** The Sub-Fund is classified as an Art. 8 financial product under SFDR. This means that, by pursuing its objective, this Sub-Fund promotes, among other characteristics, environmental and/or social characteristics, including the investment in companies that follow good governance practices ("ESG"). For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the supplement and to the ICAV prospectus.

#### Recommended for retail investors

*This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.*

### Risk and Reward Profile

#### Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.
- **Emerging market risk:** Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

#### What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
