Bluestar Global Logistics Index FAM Fund

A SUB-FUND OF FAM SERIES UCITS ICAV

CLASS I ACC - EUR ACCUMULATING ISIN: IE00BN721G28

MANAGEMENT COMPANY : FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

Objectives and Investment Policy

The investment objective is to achieve long term capital growth by tracking the performance of the BlueStar Global Logistics Index. The Sub-Fund may be exposed to up to 100% of its assets to equities and equity-related securities, such as American depositary receipts and global depositary receipts, rights and warrants of companies located worldwide, traded on the Recognised Markets (the "Invested Assets"). The portfolio of Invested Assets will be selected by the Manager based on the Manager's view of market conditions and quantitative parameters such as historical price volatility. The Sub-Fund may engage in derivatives such as Total Return Swaps and currency forwards. The return that a Shareholder may receive will be dependent on the performance of the Index, the performance of the Invested Assets and the performance of the Total Return Swaps. The Sub-Fund may also replicate the Index by holding all of the securities of the Index in a similar proportion to their weighting in the Index. However, where full replication of the Index is not reasonably possible, the Sub-Fund will invest in a portfolio of equity securities that consists of a representative sample of the component securities of the Index to build a representative portfolio that provides a return that is comparable to that of the Index. In selecting the representative sample of the component securities of the Index, the Manager will use techniques such as optimisation. There can be no guarantee that the investment objective will actually be attained, and investors are explicitly warned that this Sub-Fund is not a capital guaranteed product. Investors can redeem their Shares on any Business Day, as defined in the supplement. Investors can ask for full or partial redemption of the Shares held. **Benchmark Information:** The Sub-Fund is passively managed. The Index tracked by the Sub-Fund is BlueStar Global Logistics Index, provided by MV Index Solutions GmbH, as the Index Provider. The Index Provider is recognised under Article 34 of the Benchmark Regulation. The Index is calculated by Solactive AG as a vendor for calculation services. Please refer to the additional information under "Description of the Index" in the supplement.

Recommended for retail investors

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds.
- Who understand the risk of losing some or all of the capital invested.
- Seeking capital appreciation over the long term and who are willing to accept a high level of volatility from time-to-time.
- This Sub-Fund may not be appropriate for investors who plan to withdraw their money before 5 years.

This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any Business Day.

Risk and Reward Profile

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.
- **Index Tracking Risk:** As an index-tracking UCITS, the Fund will be subject to tracking error risks that may result in the value and performance of Shares not exactly tracking the value and performance of the Index.
- **Index Concentration Risk:** Due to the composition of the Index, the Fund's portfolio may be more concentrated geographically and/or sectorally than other investment funds with more diversified portfolios and may, consequently, be subject to greater volatility than such investment funds.

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
