What is this product?

Type: UCITS

Term: There is no fixed term for this Sub-Fund.

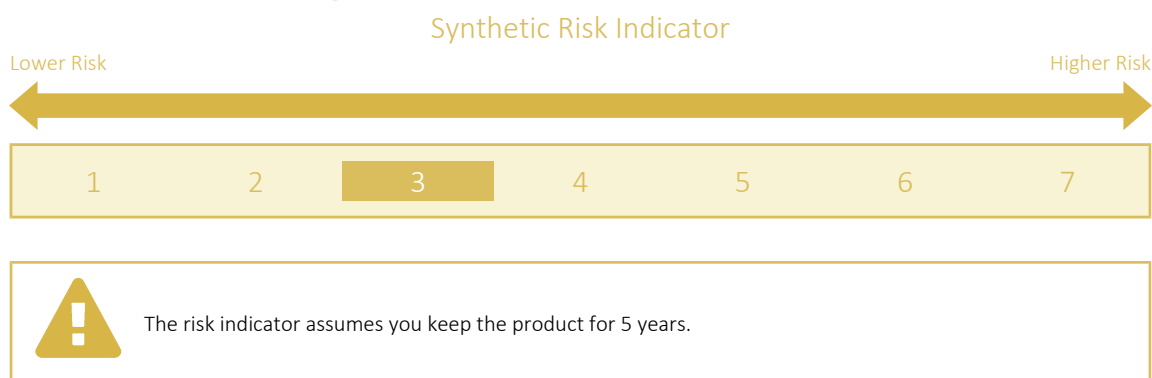

Objectives: This Sub-Fund seeks to achieve a high level of income diversifying across global bond and credit markets. The investment approach is opportunistic and combines security-specific research ideas with a global macro thematic approach (i.e. macroeconomic principles based on economic and political views of various countries). The Sub-Fund invests primarily in sub-investment grade debt securities (i.e. up to 80% of its assets) and in investment grade debt securities as corporate or government bonds with fixed or variable interest, senior and subordinated financial debt, convertible bonds and contingent convertible bonds. The Sub-Fund may also invest in equity and equity-linked instruments (up to 30%) and ETF to gain exposure on the above-mentioned instruments and in ancillary liquid assets, such as bank deposits and money market sub-funds. The Sub-Fund may also seek exposure to commodities through UCITS eligible investments and financial derivative instruments on eligible commodity indices up to 20% to increase the portfolio diversification, improve liquidity or for hedging purposes. The Sub-Fund may enter into financial derivative instruments for efficient portfolio management, hedging purposes and for investment purposes. The recommended holding period has been selected as the link between the risk and the potential returns of the Sub-Fund and can be fully appreciated only over the recommended holding period. The Sub-Fund is actively managed and is not managed in reference to a benchmark. There can be no guarantee that the investment objective will actually be attained. Investors can redeem their units on the relevant Dealing Day as set out in the prospectus. Investors can ask for full or partial redemption of the units held.

SFDR Classification: The Sub-Fund is classified as an Art. 8 financial product under SFDR. For more detailed information on the ESG components of the Sub-Fund as well as the integration of sustainability risks into the investment decision process, please refer to the prospectus.

Intended retail investor:

- With a basic knowledge of investing in sub-funds and no or limited experience of investing in the Sub-Fund or similar sub-funds
- Who understand the risk of losing some or all of the capital invested
- This Sub-Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period

What are the risks and what could I get in return?

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Sub-Fund is not able to pay you.
- We have classified this product as 3 out of 7, which is a medium-low risk class.
- This rates the potential losses from future performance at a medium-low level, and poor market conditions are very unlikely to impact the capacity of the Sub-Fund to pay you.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the ICAV is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a

suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The performances indicated in each of the proposed scenarios consider the application of any entry fees, and for the maximum amount envisaged by the prospectus, as indicated in the section below referring to costs and entitled: "Composition of Costs".

Recommended holding period: 5 years Example Investment: € 10,000			
Scenarios		If you cash in after 1 year	If you cash in after 5 years

- The figures shown include all the costs of the product itself and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.
- The stress scenario shows what you might get back in extreme market circumstances.
- The unfavorable scenario at 5 years occurred for an investment in the product/applicable benchmark between March 2021 and November 2023. The moderate scenario at 5 years occurred for an investment in the product/applicable benchmark between August 2018 and August 2023. The favorable scenario at 5 years occurred for an investment in the product/applicable benchmark between December 2014 and December 2019.

What happens if Fineco Asset Management DAC is unable to pay out?

If the Manager were to become insolvent, the assets of the Sub-Fund should not be affected because they are held by the Depositary, which is legally required to keep the assets separate from its own assets and those of the Manager. However, if the Depositary were to become insolvent, there may be a financial loss for the Sub-Fund, but this should be minimized because the assets are held separate to the Depositary's own assets. If the Sub-Fund is closed or dissolved, the assets will be sold and the investors will receive a share of the proceeds, which may be more or less than their initial investment. The ICAV is not a guaranteed UCITS and as a result there is no guarantee scheme in place which provides a guaranteed rate of return. The Sub-Fund does not provide compensation or operate a guarantee against any loss in the value of an investment, the funds or any income generated.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different investment periods. We have assumed:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario.
- 10000 EUR is invested.

	If you cash in after 1 year	If you cash in after 5 years
Total costs	€ 778	€ 2,022
Annual cost impact (*)	8.2%	4.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.20% before costs and 3.20% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.00% of the amount you pay in when entering this investment.	€ 500
Exit costs	We do not charge an exit fee for this product.	€ 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.50% of the value of your investment per year. Due to the lack of this Fund's operating history, this is an estimate only.	€ 143
Transaction costs	1.43% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€ 136
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	€ 0

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The recommended holding period of the Sub-Fund is expected to be 5 years. The recommended holding period of 5 years is based on the liquidity profile of the Sub-Fund as well as the risk profile of the underlying assets. Investors can redeem their units on the relevant Dealing Day as set out in the prospectus by placing an order with the Distributor. No fees or penalties are applied by the Manager.
