Fineco AM Short Term Fixed Income Opportunities Fund

A SUB-FUND OF FAM SERIES UCITS ICAV

Class J Acc - EUR Accumulating ISIN: IE000KGR2840

MANAGEMENT COMPANY: FINECO ASSET MANAGEMENT DAC, WHICH IS PART OF FINECOBANK GROUP

Objectives and Investment Policy

The investment objective of the Fund is to provide a total return (income and capital growth) in excess of that generated by the Bloomberg Euro Aggregate 0-1 Year Index (the "Index"). The Fund will aim to achieve its investment objective by investing principally in Debt Instruments and/or Money Market/Short Term Instruments. In respect of the selection of Debt Instruments, the Manager will give preference to investments in Investment Grade/non-Investment Grade Debt Instruments issued by governments globally and/or (i) mid-cap and (ii) large-cap global companies (i.e. companies with a market capitalization generally over (i) 1 billion euro and (ii) 10 billion euro or the equivalent in US Dollar or any other relevant currency) that the Manager believes are leaders within the industry in which they operate. The Manager will select Money Market/Short Term Instruments based on their liquidity, credit quality, and yield potential. The selection criteria will also include an assessment of maturity durations and market conditions. When selecting Money Market/Short Term Instruments, the Manager will give preference to instruments with maturities typically not exceeding one year to maintain flexibility and reduce exposure to interest rate fluctuations. At any time the Fund may invest up to 30% of its Net Asset Value in deposits and hold cash for ancillary purposes. The Fund may also invest up to 10% of its Net Asset Value in units or shares of other collective investment schemes. The Fund may engage in securities lending for efficient portfolio management purposes and in Financial Derivatives Instruments ("FDI") for investment purposes to generate returns, for the purposes of hedging and risk reduction. The recommended holding period has been selected as the link between the risk and the potential returns of the Sub-Fund and can be fully appreciated only over the recommended holding period. This UCITS KIID should be read in conjunction with the section entitled "Definitions" in the Prospectus and in the Sub-Fund Supplement. Portfolio composition is determined based on active investment decisions and hence the Fund is actively managed. There can be no guarantee that the investment objective will actually be attained and investors are explicitly warned that the Fund is not a capital guaranteed product. Investors can redeem their Shares on the relevant Dealing Day as set out in the Prospectus. Investors can ask for full or partial repayment of the Shares held. **Benchmark Information:** The Sub-Fund is actively managed. The Manager has selected the Index that will be used as a comparison for investment performance only. The Manager does not intend to replicate the composition of the Index and may at all times exercise total freedom by investing in securities which are not included in the referenced Index or which are present in different proportions.

Recommended for retail investors

Recommended for retail investors (English)

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds
- Who understand the risk of losing some or all of the capital invested
- Who are seeking a return over the short-term via exposure to Debt Instruments and Money Market/Short Term Instruments from issuers located worldwide and who are willing to accept a low level of volatility and the risks of the capital markets in pursuit of the short-term investment goals

This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

- **Operational risk:** Losses may occur due to human error or omission, process errors, system disruptions or external events.
- **Derivatives risk:** Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
- **Counterparty Risk:** Losses may occur due to the failure of derivative counterparties to the Sub-Fund and where collateral arrangements are insufficient to cover the risk.
- **Liquidity Risk:** Losses may occur if adverse market conditions affect the ability to sell assets at a certain time and for a reasonable price.
- **Emerging market risk:** Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.
