FINECO AM BLOOMBERG EURO AGGREGATE TREASURY 1-3 YEAR INDEX FUND

SUPPLEMENT DATED 1 DECEMBER 2022

This Supplement contains specific information in relation to **FINECO AM BLOOMBERG EURO AGGREGATE TREASURY 1-3 YEAR INDEX FUND** (the "**Fund**"), a sub-fund of **FAM SERIES UCITS ICAV** (the "**ICAV**"), an open-ended umbrella type Irish collective asset-management vehicle with variable capital with segregated liability between its sub-funds and authorised by the Central Bank on 1 August 2018 pursuant to the UCITS Regulations.

This Supplement forms part of and should be read in the context of and in conjunction with the prospectus of the ICAV dated 1 December 2022 and the addendum thereto (together the "Prospectus").

Shares of the Fund are not deposits or obligations of, or guaranteed or endorsed by, any bank and the amount invested in Shares may fluctuate up and/or down.

Investment Objective and Policies

The investment objective of the Fund is to achieve total returns.

The Fund seeks to achieve its investment objective by tracking the performance of the Bloomberg Euro Aggregate Treasury 1-3 Year Index (the "**Index**", as described below under the sub-heading "Description of the Index") while minimising as far as possible the tracking error between the Fund's performance and that of the Index.

The Index is published by Bloomberg (the "**Index Sponsor**") and it is described below under the sub-heading "Description of the Index".

The Fund may replicate the Index by holding all of the securities of the Index in a similar proportion to their weighting in the Index. The Fund may also invest in only a representative sample of the component securities of the Index, in order to build a representative portfolio that provides a return that is comparable to that of the Index in an efficient manner, in a way that balances various risks and costs, such as transaction costs, with the goal of tracking the Index.

Consequently, the Fund may over certain periods only hold a certain sub-set of the Index securities. Where such securities provide similar exposure (with similar risk profiles) to certain securities of the Index, the Fund may hold the securities types which are not constituents of the Index. Securities which are not constituents of the Index, are selected by virtue of the fact that they provide substantively the same exposure and characteristics in the case of liquidity considerations or corporate actions to certain securities of the Index. The securities in which the Fund invests will be primarily listed or traded on Recognised Markets and in unlisted securities in accordance with the limits set out in the Prospectus and the UCITS Regulations.

In selecting the representative sample of the component securities of the Index as described above, the Manager will use techniques such as optimisation. Optimisation seeks to minimise tracking error through proprietary quantitative portfolio analysis. This analysis may include consideration of matters such as how a securities' price changes in relation to another over time, scenario analysis (which involves estimating the change in an investment portfolio's value given a change in key risk factors) and stress testing. The optimisation process analyses portfolio holdings, benchmark weights, transaction costs and risk model data and then computes an optimal portfolio, which minimises tracking error.

Pursuant to the Management Agreement, the Manager has full discretionary authority to provide discretionary investment management services in respect of this Fund subject to the investment objective, policies and restrictions of this Fund.

For information in relation to the difficulties associated with tracking indices, please refer to "Index Tracking Risk" in the "Risk Factors" section below. It is currently anticipated that the tracking error of the Fund will be up to 1% under normal market conditions. The causes of tracking error can include but are not limited to the following: holdings/size of the Fund, cash flows, transaction costs, dividend reinvestment, differences in timings between the receipt/payment of subscription and redemption monies into the Fund, investment/divestment of Fund assets and the impact of fees.

At any time the Fund may invest up to 30% of its Net Asset Value in deposits and hold cash for ancillary purposes provided that no more than 10% of the Net Asset Value of the Fund (or up to 20% booked on account with the Depositary subject to and in accordance with Schedule II of the Prospectus) may be held by a single credit institution. The Fund may also invest up to 10% of its Net Asset Value in units or shares of Underlying Funds within the meaning of Regulation 68(1)(e) of the UCITS Regulations.

Description of the Index

General Description: The Index consists of fixed-rate, investment-grade public obligations of the sovereign countries participating in the European Monetary Union. To be eligible for the Index, bonds must have between 1 and up to, but not including, 3 years remaining to maturity. The Index rebalances on a monthly basis. The Bloomberg ticker symbol for the Index is LET1TREU.

Disclaimer: "Bloomberg®" and the Index are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the Index (collectively, "Bloomberg"), and have been licensed for use for certain purposes by the ICAV.

The Fund is not sponsored, endorsed, sold or promoted by Bloomberg. Bloomberg does not make any representation or warranty, express or implied, to the owners of or counterparties to the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly. The only relationship of Bloomberg to the ICAV is the licensing of certain trademarks, trade names and service marks and of the Index, which is determined, composed and calculated by BISL without regard to the ICAV or the Fund. Bloomberg has no obligation to take the needs of the ICAV or the owners of the Fund into consideration in determining, composing or calculating the Index. Bloomberg is not responsible for and has not participated in the determination of the timing, price, or quantities of the Fund to be issued. Bloomberg shall not have any obligation or liability, including, without limitation, to customers of the Fund, in connection with the administration, marketing or trading of the Fund.

BLOOMBERG DOES NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE INDEX OR ANY DATA RELATED THERETO AND SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS THEREIN. BLOOMBERG DOES NOT MAKE ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ICAV, OWNERS OF THE FUND OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE INDEX OR ANY DATA RELATED THERETO. BLOOMBERG DOES NOT MAKE ANY EXPRESS OR IMPLIED WARRANTIES AND EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE INDEX OR ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, TO THE MAXIMUM EXTENT ALLOWED BY LAW, BLOOMBERG, ITS LICENSORS, AND ITS AND THEIR RESPECTIVE EMPLOYEES, CONTRACTORS, AGENTS, SUPPLIERS, AND VENDORS SHALL HAVE NO LIABILITY OR RESPONSIBILITY WHATSOEVER FOR ANY INJURY OR DAMAGES—WHETHER DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, PUNITIVE OR OTHERWISE—ARISING IN CONNECTION WITH THE FUND OR INDEX OR ANY DATA OR VALUES RELATING THERETO—WHETHER ARISING FROM THEIR NEGLIGENCE OR OTHERWISE, EVEN IF NOTIFIED OF THE POSSIBILITY THEREOF.

Benchmark Administrator: BISL was authorised by the United Kingdom's Financial Conduct Authority (**FCA**) as a regulated UK benchmark administrator under Article 34 of the Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds in 2019 and can be found listed on the FCA Register.

Publication: The Index is calculated and published by Bloomberg.

Further Information and Website: The methodology, composition, revision rules and additional information concerning the underlying components of the Index are available on https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/#/ucits.

Types and Use of Financial Derivative Instruments ("FDI")

The Fund may use interest rate and bond futures contracts to reduce duration risk versus the Index.The underlying assets of FDIs will be limited to those investments that the Fund may acquire in accordance with its investment policy. Transactions in FDIs will be used for the purpose of meeting the Fund's investment objective. The expected effect of the use of FDI will be to reduce inherent risks affecting the Fund's investments. For information in relation to the risks associated with the use of FDIs, please refer to the "Risk

Factors" section of the Prospectus.

Long/Short Exposure

The expected maximum level of long derivative positions which the Fund may hold is 200% of its Net Asset Value, measured on a gross basis using the sum of notionals of the derivatives held by the Fund. The expected maximum level of short derivative positions which the Fund may hold is 200% of its Net Asset Value, measured on a gross basis using the sum of notionals of the derivatives held by the Fund.

Securities Lending Agreements: Securities lending is the temporary transfer of securities by a lender to a borrower, with agreement by the borrower to return equivalent securities to the lender at pre-agreed time. These agreements will only be used for efficient portfolio management to enhance overall returns to the Fund through the receipt of finance charges for the lending of its securities and are subject to the conditions and limits set out on the Central Bank UCITS Regulations. The Fund's exposure to securities lending transactions is expected to be 5% of the Fund's Net Asset Value, subject to a maximum exposure of 30% of the Fund's Net Asset Value.

Risk Measurement - Global Exposure and Leverage

Market risk created through the use of derivatives will be measured daily using the relative value-at-risk (VaR) approach. VaR is a risk measurement technique designed to estimate the potential loss in the Fund's portfolio over a set period at a certain confidence level, and is based on statistical analysis of historical price trends and volatilities. The VaR of the Fund's portfolio is calculated daily and is measured relative to the VaR of the Index. In compliance with the UCITS Regulations, the relative VaR of the Fund's portfolio shall not exceed twice the Index, as determined at least daily using a one-tailed confidence interval of 99%, a holding period of one month (20 Business Days) and an historical observation period of at least one year (250 Business Days) unless a shorter observation period is justified by a significant increase in price volatility, such as in extreme market conditions.

The level of gross leverage, calculated based on the sum of the absolute value of notionals of the derivatives used, in accordance with the requirements of the Central Bank, is expected to be 200% of the Fund's Net Asset Value. There is a possibility of higher leverage levels than this expected level. The expected level of leverage is calculated based on the sum of the absolute value of notionals of the derivatives used, does not take into account any netting and hedging arrangements and therefore is not a risk-adjusted method of measuring leverage.

Investor Profile

The Fund is suitable for both institutional and retail investors seeking capital appreciation over the short term and who are willing to accept a low level of volatility from time to time.

SFDR Classification: Article 6 Fund.

SFDR Disclosure

The investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities. The classification of the Fund as an Article 6 Fund means that the Fund does not promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR or have Sustainable Investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR.

The Manager integrates Sustainability Risk into its due diligence assessment of the investments of the Fund. However, such due diligence is not a determining factor with regard to investment decisions on the basis that the Fund is an index tracking sub-fund which physically replicates the Index and such output is accordingly deemed not relevant.When assessing the Sustainability Risk associated with the Fund's underlying investments, the Manager is attempting to understand the likelihood of the risk that the value of such underlying investments could be materially negatively impacted by an environmental, social or governance event or condition (see definition of Sustainability Risk in the main body of the Prospectus).

The Manager has determined that the Fund may have a higher prospect of being impacted by Sustainability Risk given that the Fund is not an Article 8 Fund and does not promote environmental or social characteristics nor is it an Article 9 Fund which has Sustainable Investment as its investment objective. To the extent that

Sustainability Risk occurs, there may be a sudden, material negative impact on the value of an investment, and hence there may be a material negative impact on the Net Asset Value of the Fund. Such negative impact may result in an entire loss of value of the relevant investment(s). The Manager acknowledges that the Fund's exposure to Sustainability Risks is changeable and shall keep the Fund's exposure to these risks under periodic review. Where the Manager considers, as a result of such a review, that the Fund's approach to the management of sustainability risks is to materially change, these disclosures will be updated accordingly.

Please refer to the section of the Prospectus entitled "Sustainable Finance Disclosures" for further information.

Base Currency: Euro.

Offer of Shares

The following Classes of Shares are available for subscription:

Share Class	Initial Offer Price	Initial Offer Period	Currency Denomination and Hedged Class		Sales Charge	Minimum Initial Subscription and Minimum Subsequent Subscription	Distribution Type
Class L Acc	€100	2 December 2022 - 1 June 2023	Euro	No	No	€1,000/€100	Accumulating
Class L Dist	€100	2 December 2022 - 1 June 2023	Euro	No	No	€1,000/€100	Distributing
Class A Acc	€100	2 December 2022 - 1 June 2023	Euro	No	No	€1,000/€100	Accumulating
Class I Acc	€100	Closed	Euro	No	No	€1,000,000/€100	Accumulating
Class J Acc	€10,000	Closed	Euro	No	No	€1,000,000/€100	Accumulating
Class J Dist	€10,000	2 December 2022 - 1 June 2023	Euro	No	No	€1,000,000/€100	Distributing

During the initial offer period Shares are available for subscription at the initial offer price as indicated in the table above. Where the initial offer period has closed, Shares will be available at the prevailing Net Asset Value of each Class of Shares.

Application for Shares

Full details on how to purchase Shares are described in the Prospectus under the section titled "Application for Shares". Investors should note the following Business Day, Dealing Deadline and Valuation Point definitions that shall apply in respect of applications for Shares of the Fund:

"Business Day" means every weekday apart from 1 January, Good Friday, Easter Monday, 25 December and 26 December on which (i) the Index Sponsor publishes the Index, and (ii) retail banks in Luxembourg and the Eurex market are normally open for business;

"Dealing Deadline" means 11:59am (Irish time) on the relevant Dealing Day; and

"Valuation Point" means 4:00pm (Irish time) on the relevant Dealing Day.

Applications for Shares may be made to the Paying Agent or the Administrator (whose details are set out in the Application Form). Applications received by the Paying Agent or the Administrator prior to the Dealing Deadline for any Dealing Day will be processed on that Dealing Day. Any applications received after the Dealing Deadline for a particular Dealing Day will be processed on the following Dealing Day, unless the Directors in their absolute discretion, in exceptional circumstances, otherwise determine to accept one or more applications received after the Dealing Deadline for processing on that Dealing Day, provided that such application(s) have been received prior to the Valuation Point for the particular Dealing Day.

Fees and Expenses

The following fees and expenses are payable out of the assets of the Fund. Details of how the fees and expenses are accrued and paid as well as details of other general management and fund charges are set out in the Prospectus under the heading "Fees and Expenses".

Manager's Fee
Up to 1 % per annum (plus VAT, if any) of the Net Asset Value of each Class of Shares.

Administrator's Fee
Up to 0.3% per annum (plus VAT, if any) of the Net Asset Value of each Class of Shares.

Depositary's Fee
Up to 0.2% per annum (plus VAT, if any) of the Net Asset Value of each Class of Shares.

Establishment Costs

The costs of establishing the Fund, obtaining approval from any authority, filing fees, the preparation and printing of this Supplement, marketing costs and the fees of all professionals relating to it, which are estimated not to exceed €25,000 will be borne by the Fund and amortised over the first five years of the Fund's operation (or such other period as may be determined by the Directors in their discretion).

Risk Factors

The attention of investors is drawn to the section headed "Risk Factors" in the Prospectus.

Index Licence Risk

If in respect of the Index tracked by the Fund, the licence granted (if required) by the Index Sponsor to the ICAV or the Manager (or its affiliates) to replicate or otherwise use the Index for the purposes of the Fund, terminates, or such a licence is otherwise disputed, impaired or ceases (for any reason), the Manager may be forced to replace the Index with another index, which the Manager chooses, to track substantially the same market as the Index in question and which the Manager considers to be an appropriate index for the Fund to track and such a substitution, or any delay in such a substitution, may have an adverse impact on the Fund. If the Manager is unable to identify a suitable replacement for the relevant index, the Directors may be forced to terminate the Fund.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index it tracks may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund, pricing conditions on FDI and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of the actual securities comprising the Index. The Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices) and consequently, the performance, volatility and risk of the Fund.

There can be no assurance that the Index Sponsor will compile the Index accurately, or that the Index will be determined, composed or calculated accurately. Whilst the Index Sponsor provides descriptions of what the Index is designed to achieve, the Index Sponsor does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in respect of the Index and does not guarantee that the Index will be in line with the described index methodology. The Fund's investment policies as described in this Supplement will be to track the performance of the Index and consequently, none of the ICAV, the Directors or the Manager provides any warranty or guarantee for Index provider errors.

Rebalancing Frequency and Costs

Each investor should consider the rebalancing frequency of the Index with reference to their investment strategy. Investors should note that rebalancing allows the Index to adjust its constituent weightings to ensure it is accurately reflecting the market(s) it is aiming to represent. Such rebalancing can either occur: (i) on a scheduled basis (please see the section titled "Description of the Index"); or (ii) on an ad-hoc basis to reflect, for example, corporate activity such as mergers and acquisitions. The Index does not rebalance more frequently than monthly and such rebalancing is not expected to have a material effect on the costs incurred within the Index. The costs of rebalancing may be reflected in the level of the Index, which will thus be reflected in the Net Asset Value of the Fund. Where applicable, such costs of rebalancing will be disclosed in this Supplement. In this respect, it should be noted that such costs may be referred to by different terms, such as amongst others: replication costs, reconstitution costs, roll(ing) costs, trading costs or transaction costs.

Changes to the Index

As the Index Sponsor will retain discretion in relation to the methodology for the Index, accordingly, there can be no assurance that the Index will continue to be calculated and published on the basis described in the rules or methodology published by the Index Sponsor or that the Index will not be amended significantly. Such changes may be made by the Index Sponsor at short notice and therefore the ICAV may not always be able to inform investors and Shareholders in advance of such a change becoming effective. Notwithstanding that, such changes will be notified to investors on the website mentioned in the section titled "Description of the Index", as soon as is practicable. Any changes to the Index, such as the composition and/or weighting of its constituent securities, may require the Fund to make corresponding adjustments or rebalancings to its investment portfolio to conform to the Index. The Manager and/or any of its delegates will monitor such changes and arrange for adjustments to such portfolio as necessary over several days, if necessary.

No Investigation or Review of the Index

None of the ICAV, the Manager and/or any of their delegates or affiliates have performed or will perform any investigation or review of the Index on behalf of any prospective investor in the Shares, except to the extent that may be required from time-to-time pursuant to applicable laws. Any further investigation or review made by or on behalf of the ICAV, the Manager and/or any of their delegates or affiliates shall be for each of their own purposes only.

Index Tracking Risk

As an index-tracking UCITS, the Fund will be subject to tracking error risks that may result in the value and performance of Shares not exactly tracking the value and performance of the Index. In particular, no financial instrument enables any index-tracking UCITS to reproduce or track the returns of an index exactly. Tracking error is measured as the volatility of the difference between the return of the Fund and the return of the Index, over a given period of time. The anticipated level of tracking error, in normal market conditions, is disclosed for the Fund in the section titled "Investment Objectives and Policies". Investors' attention is drawn to the fact that the figure mentioned is only an estimate of the tracking error level in normal market conditions and should not be understood as a strict limit. In circumstances which could be considered as not normal market conditions, the tracking error may be temporarily higher than the level indicated above.

Changes in the investments of the Fund and re-weightings of the Index may give rise to various transaction costs, operating expenses or inefficiencies which may adversely impact the returns of the Fund. Furthermore, the total return on investment in the Shares of the Fund will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, the temporary suspension or interruption of trading in Index securities, or of market disruptions, may result in deviations from the return of the Index. Deviations may also occur due to many other reasons including, higher cash held by the Fund for expenses and due to quotas/limits on investments in a local market, costs of quotas/limits, if any, local trading and settlement constraints and local regulatory issues. The exposure of the Fund to any capital gains tax, due to reasons such as redemptions or Index rebalancing, could result in an increase in the Fund's tracking error. Such tracking error could further vary if the taxation charges applicable to the Fund change from time-to-time. Further, in the event that an Index provider ceases to calculate or publish an Index, the publication of an Index is delayed or disrupted, or there are errors in the calculation of the Index, the Fund may experience difficulties, including an increase in tracking error.

Index Concentration Risk

Due to the composition of the Index, the Fund's portfolio may be more concentrated geographically and/or sectorally than other investment funds with more diversified portfolios and may, consequently, be subject to greater volatility than such investment funds.
