**Exclusionary Approach:** *The Fund’s sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.*

**Positive ESG Tilt:**

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
<b>As at 31 December 2022</b>			
Portfolio weighted average ESG score	6.3	97.04%	97.04%
Investment Universe weighted average ESG score	6.7	-	-
ESG score corresponding to the lowest numerical value of the MSCI A rating	5.7	-	-

*The Fund maintained a Weighted Average ESG score that was greater than the lower of the benchmark and the lowest numerical value of the MSCI A rating throughout the reporting period. The Fund’s calculation methodology does not include those securities that do not have an ESG rating, or cash, near cash, some derivatives and some collective investments schemes.*

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● **...and compared to previous periods?**

*The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.*

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

*The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.*

*The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.*

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

*Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:*

- 1. Whether they represent significant exposure to businesses the Investment Manager considers harmful*
- 2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)*
- 3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment*

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

*The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.*

*The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.*

*Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.*

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

*All investments purchased by the Fund must pass the Investment Manager’s good governance tests, and in addition, sustainable investments must also pass tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

*For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager’s research process includes consideration of Principal Adverse Impact indicators for all investments where data is available, which allows the Investment Manager to make informed investment decisions, as explained above.*

*Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager’s website disclosures for the Fund.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1<sup>st</sup> December 2022 to 31 December 2022

Largest Investments	Sector	% Assets	Country
JOHNSON & JOHNSON	MANUFACTURING	3.37%	US
CHEVRON CORP	MANUFACTURING	2.88%	US
JP MORGAN CHASE	FINANCIAL AND INSURANCE ACTIVITIES	2.87%	US
META PLATFORMS INC CLASS A	INFORMATION AND COMMUNICATION	2.69%	US
MONDELEZ INTERNATIONAL INC CLASS A	MANUFACTURING	2.67%	US
ALPHABET INC CLASS A	INFORMATION AND COMMUNICATION	2.49%	US
PFIZER INC	MANUFACTURING	2.37%	US
CISCO SYSTEMS INC	MANUFACTURING	2.20%	US
MERCK & CO INC	MANUFACTURING	2.17%	US
ELEVANCE HEALTH INC	FINANCIAL AND INSURANCE ACTIVITIES	2.09%	US
KLA CORP	MANUFACTURING	2.04%	US
AES CORP	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	2.03%	US
COCA COLA EUROPACIFIC PARTNERS PLC	MANUFACTURING	1.98%	US
DEVON ENERGY CORP	MINING AND QUARRYING	1.95%	US
EXELON CORP	ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY	1.91%	US

### What was the proportion of sustainability-related investments?

*In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 70% of the Fund's assets to be aligned to the environmental or social characteristics promoted. This includes a minimum 20% of the assets that are qualified as sustainable investments. A minimum of 0% of the Fund's assets are other investments not aligned to the environmental or social characteristics.*

*Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.*

*Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were aligned to the environmental or social characteristic promoted was 96.97% of NAV as at 31 December 2022, which is above the 70% minimum commitment. This comprised 74.42% NAV relating to sustainable investments which was above the 20% minimum threshold, and the remaining 22.55% NAV related to investments with other environmental and or social characteristics.*

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

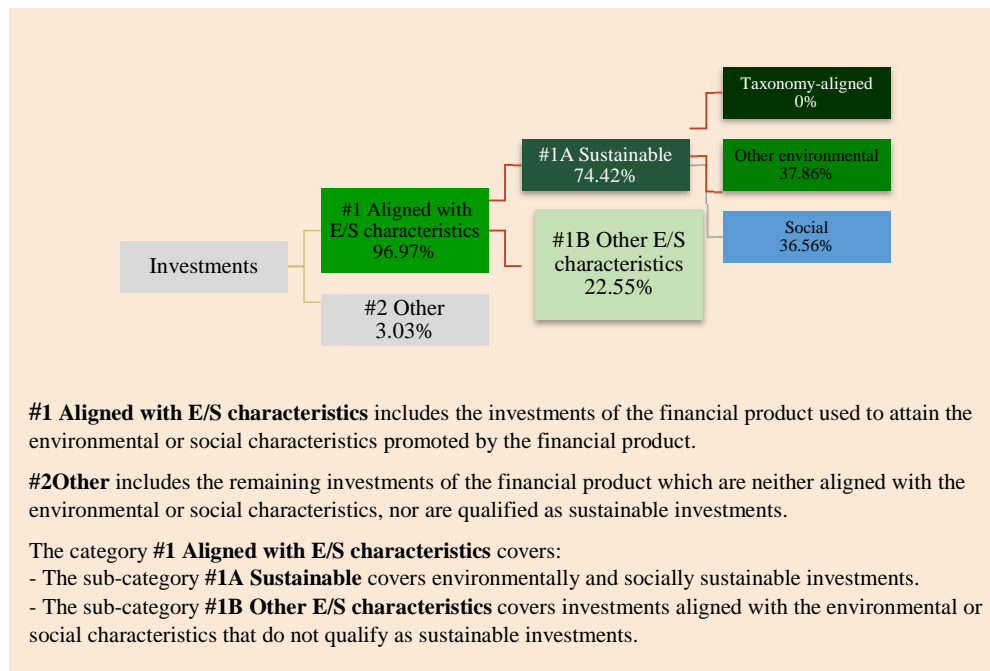

**Asset Allocation** describes the share of investments in specific assets.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the asset allocation?**

The graphic below provides an overview of the asset allocation versus the established minimum thresholds.

● **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	47.07%
Information and communication	15.32%
Financial and insurance activities	14.73%
Electricity, gas, steam and air conditioning supply	5.51%
Mining and quarrying	5.07%
Transportation and storage	3.50%
Cash/Other	3.02%
Wholesale and retail trade; repair of motor vehicles and mot	2.90%
Real estate activities	1.76%
Human health and social work activities	0.56%
Administrative and support service activities	0.55%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

*Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.*

*The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomy-aligned assets as part of its investment policy and recorded that 0% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.*

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

Zeros across all 6 bars

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

*The Fund is not yet able to report these measures as there is currently insufficient coverage of data. A minimum percentage commitment of 0% is stated in the Fund's precontractual disclosure.*

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

*The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.*

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

*The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 37.86%. This compares to the commitment of 5% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.*

**What was the share of socially sustainable investments?**

*The share of sustainable investments in the Fund with a social objective over the period was 36.56%. This compares to the commitment of 5% overall of socially sustainable investments made in the precontractual disclosure.*

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

*During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex.*

*The Fund may hold cash, near cash and money market funds and derivatives as “Other” investments, for any purpose permitted by the Fund’s investment policy. No minimum environmental or social safeguards are applied, other than as set out below.*

*Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund’s investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.*

*The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments’ alignment with the promoted characteristics.*

*It is also possible that the Fund may hold investments that are not in line with the promoted characteristics,*

*e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.*

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

*M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio’s assets.*

*Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.*

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

*No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.*

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

*No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.*

- ***How did this financial product perform compared with the reference benchmark?***

*No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.*

- ***How did this financial product perform compared with the broad market index?***

*No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.*

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi Strategic Bond FAM Fund  
**Legal entity identifier:** 635400UJOIMZRUEVQL70

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.19% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate. For more detail, please refer to the Sustainable Investment section of the Prospectus. At the end of the period:

- The weighted average ESG rating of the portfolio is C-

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *... and compared to previous periods?*

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● *What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned invest should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial pr that take into account the EU criteria for environmentally sustainable economic activities. The invest underlying the remaining portion of this financial product do not take into account the EU criteri environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social obje*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at [www.amundi.com](http://www.amundi.com).

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**-operational expenditure (OpEx)** reflecting green operational activities of investee companies

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

Reliable data regarding the EU Taxonomy (including fossil gas and nuclear energy related activities) was not available during the period.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas                       In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereignbonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Data not yet available

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● *What was the share of investments in transitional and enabling activities ?*

Reliable data regarding transitional and enabling activities was not available during the period.

● *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

In previous periods the regulation was not yet in force.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **20.17%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments ?**

This product did not commit to have social sustainable investments over the period.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI’s control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI’s Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

**How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- *How does the reference benchmark differ from a broad market index ?*

This product does not have an ESG Benchmark

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the reference benchmark ?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the broad market index ?*

This product does not have an ESG Benchmark.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi European Equity Value FAM Fund

Legal entity identifier: 635400JAVYGPNH7F996

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: \_\_\_\_\_ %**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective: \_\_\_\_\_ %**

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.08% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period :

- The weighted average ESG rating of the portfolio is C+
- The weighted average ESG rating of the reference index is C

● *... and compared to previous periods?*

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● *What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.

- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at [www.amundi.com](http://www.amundi.com).

**What were the top investments of this financial product?**

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01 January 2022 to 31 December 2022**

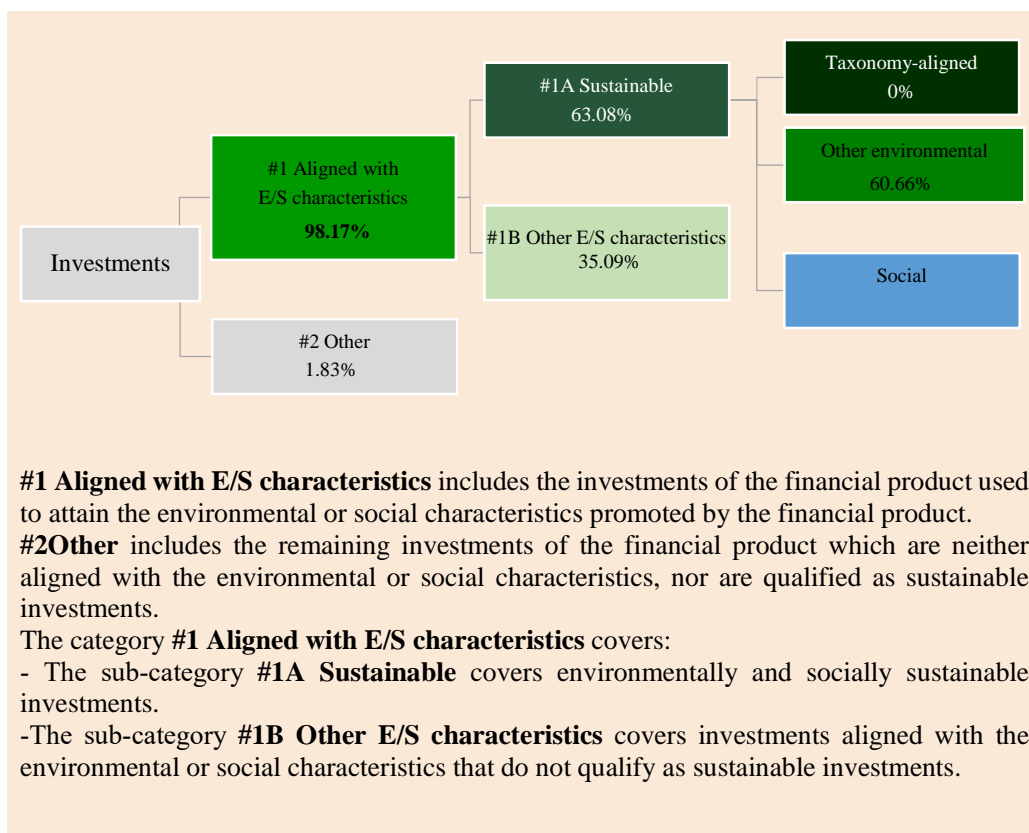

Largest Investments	Sector	% Assets	Country
TOTALENERGIES SE PARIS	Oil, Gas & Consumable Fuels	3.09%	FRA
SIEMENS AG-REG	Industrial Conglomerates	2.74%	DEU
NOVARTIS	Pharmaceuticals	2.67%	CHE

**Taxonomy-aligned activities** are expressed as a share of: **-turnover** reflecting the share of revenue from green activities of investee companies

**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy. **- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

Reliable data regarding the EU Taxonomy was not available during the period

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereignbonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Data not yet available

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- *What was the share of investments in transitional and enabling activities ?*

Reliable data regarding transitional and enabling activities was not available during the period.

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

In previous periods the regulation was not yet in force.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

#### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **60.66%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, **or for which data is not yet available to perform an EU taxonomy assessment.**

#### **What was the share of socially sustainable investments ?**

This product did not commit to have social sustainable investments over the period.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

**How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- *How does the reference benchmark differ from a broad market index ?*

This product does not have an ESG Benchmark

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the reference benchmark ?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the broad market index ?*

This product does not have an ESG Benchmark.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Euro Bond Fam Fund

**Legal entity identifier:** 635400SLFDFKXB6WMM23

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

The product has respected all material aspects of the characteristics described in the prospectus

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is C+
- The weighted average ESG rating of the reference index is C+

● *... and compared to previous periods?*

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● *What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi’s voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi’s Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Taxonomy-aligned activities** are expressed as a share of:  
 -**turnover** reflecting the share of revenue from green activities of investee companies

-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Reliable data regarding the EU Taxonomy (including fossil gas and nuclear energy related activities) was not available during the period.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas       In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Data not yet available

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- *What was the share of investments in transitional and enabling activities?*

Reliable data regarding transitional and enabling activities was not available during the period.

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

In previous periods the regulation was not yet in force.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **35.86%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments?**

This product did not commit to have social sustainable investments over the period.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- *How does the reference benchmark differ from a broad market index?*

This product does not have an ESG Benchmark

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the reference benchmark?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the broad market index?*

This product does not have an ESG Benchmark.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Corporate Fixed Income FAM Fund

Legal entity identifier: 6354005UGUWVFJFSFML27

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

Yes
   No

<p><input type="checkbox"/> - It made <b>sustainable investments with an environmental objective</b>: _____</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> - in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made a <b>sustainable investments with a social objective</b>: _____</p>	<p><input checked="" type="checkbox"/> - It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 55.84% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> - with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>
---	---

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The product has respected all material aspects of the characteristics described in the prospectus

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

  - The weighted average ESG rating of the portfolio is C
  - The weighted average ESG rating of the reference index is C
  
- ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force
  
- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

  1. follow best environmental and social practices; and
  2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at [www.amundi.com](http://www.amundi.com).

What was the proportion of sustainability-related investments?

● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● ***In which economic sectors were the investments made?***

<b>Sector</b>	<b>% Assets</b>
Banking	39.29%

Forex	0.19%
Natural Gas	0.18%
Treasuries	0.12%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies

**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Reliable data regarding the EU Taxonomy (including fossil gas and nuclear energy related activities) was not available during the period.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
- In fossil gas       In nuclear energy
- No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Data not yet available

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In previous periods the regulation was not yet in force.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **51.00%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments?**

This product did not commit to have social sustainable investments over the period.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI’s control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

**How did this financial product perform compared to the reference benchmark?**

This product does not have an ESG Benchmark.

● *How does the reference benchmark differ from a broad market index?*

This product does not have an ESG Benchmark

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This product does not have an ESG Benchmark.

● *How did this financial product perform compared with the reference benchmark?*

This product does not have an ESG Benchmark.

● *How did this financial product perform compared with the broad market index?*

This product does not have an ESG Benchmark.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

1. **Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 15.11% of sustainable investments.
2. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The percentage of the Fund portfolio made in sustainable investments which was 15.11% as at 31 December 2022;
- ii. The minimum Fund level ESG score was “A” as at 31 December 2022;
- iii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 10.86% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 10.86% as at 31 December 2022

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 15.11% of sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Principal adverse impact (“PAI”) indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - a. Made in investee companies that demonstrate good governance;
  - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

**What was the proportion of sustainability-related investments?**

**15.11%**

**Asset allocation**

describes the share of investments in specific assets.

● **What was the asset allocation?**

10.86% of the Fund’s Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 5% in sustainable investments and as at 31 December the Fund had a proportion of 15.11% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

FAM Series UCITS ICAV

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *In which economic sectors were the investments made?*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

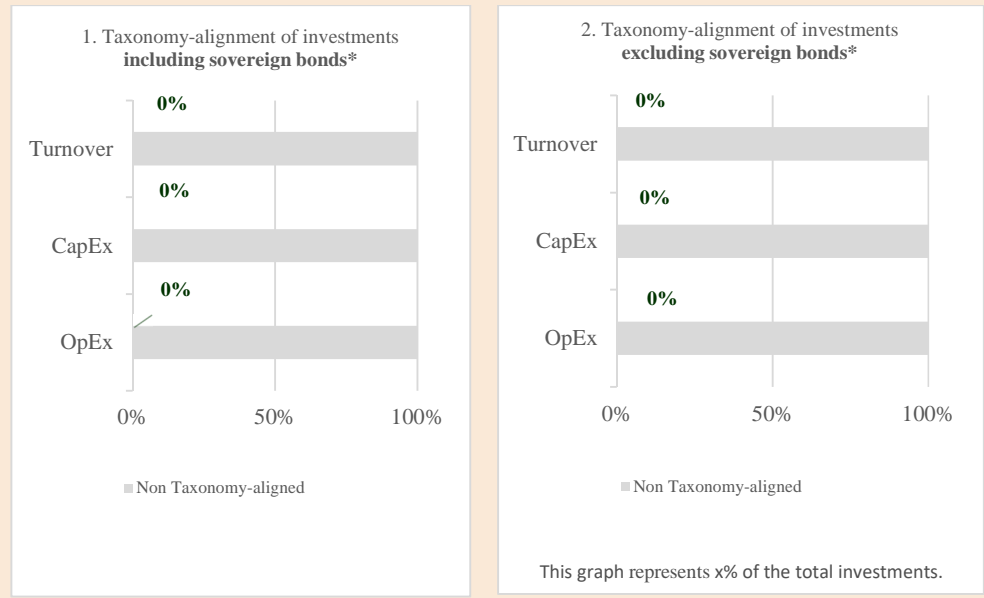

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report.

**Sustainability indicators**

measure how the environmental or social characteristics promoted by the financial product are attained.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 10.86%.

**What was the share of socially sustainable investments?**

Socially sustainable investments represented 7.51% of the financial product.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Manager’s exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 15.11% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**How did this financial product perform compared to the reference benchmark?**

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** M&G Optimal Income FAM Fund  
**Legal entity identifier:** 635400ZSWNWUL3K7NJ24

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Did this financial product have a sustainable investment objective?**

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.13% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund promotes the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excludes certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also includes assessing them against the Investment Manager’s proprietary scoring methodology (“Exclusionary Approach”). Accordingly, the Investment Manager is promoting environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintains a weighted average ESG rating that is higher than that of its investment universe (“Positive ESG Tilt”). In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund’s promoted environmental and/or social characteristics.

The promoted environmental and social characteristics were generally met by all investments made for the Fund other than "Other" Investments. The alignment percentage indicated in the graphic below is tested against the Exclusionary Approach described below, showing the allocation between investments complying with the Exclusionary Approach and Investments which we as deem as “Other” as we don’t consider they can be considered as aligned against the Exclusionary Approach as described in the precontractual annex, such as cash. The Positive ESG Tilt characteristic is not used as part of this alignment percentage test – instead, the Positive ESG Tilt is applied to all investments where data is available.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Exclusionary Approach: The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

Positive ESG Tilt:

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
<b>As at 31 December 2022</b>			
Portfolio weighted average ESG score	6.6	55.61%	51.62%
Investment Universe weighted average ESG score	5.8	-	-

The Fund maintained a Weighted Average ESG score that was greater than the benchmark throughout the reporting period. The Fund’s calculation methodology does not include those securities that do not have an ESG rating, or cash, near cash, some derivatives and some collective investments schemes.

● **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund’s first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— — — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund must pass the Investment Manager's good governance tests, and in addition, sustainable investments must also pass tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

### What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 70% of the Fund's assets to be aligned to the environmental or social characteristics promoted. This includes a minimum 20% of the assets that are qualified as sustainable investments. A minimum of 0% of the Fund's assets are other investments not aligned to the environmental or social characteristics.

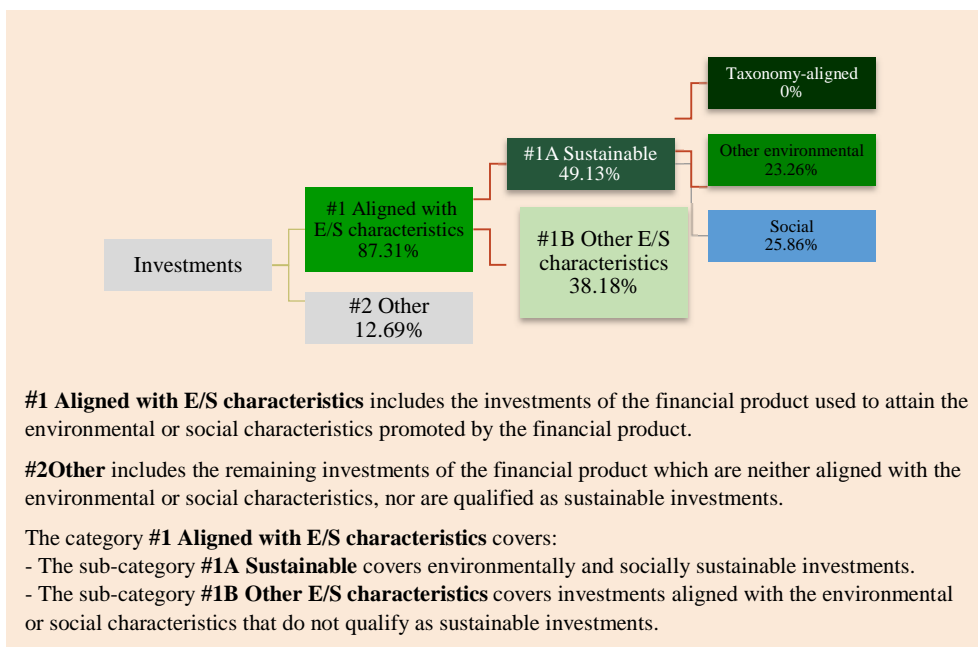

Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were aligned to the environmental or social characteristic promoted was 87.31% of NAV as at 31 December 2022, which is above the 70% minimum commitment. This comprised 49.13% NAV relating to sustainable investments which was above the 20% minimum threshold, and the remaining 38.18% NAV related to investments with other environmental and or social characteristics.

● **What was the asset allocation?**

*The graphic below provides an overview of the asset allocation versus the established minimum thresholds.*

**Asset Allocation**  
describes the share of investments in specific assets.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *In which economic sectors were the investments made?*

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

<b>Economic Sector</b>	<b>% Assets</b>
Financial and insurance activities	40.70%
Public administration and defence; compulsory social security	30.75%
Cash/other	13.56%
Information and communication	4.38%
Manufacturing	4.05%
Electricity, gas, steam and air conditioning supply	2.54%
Real estate activities	0.72%
Human health and social work activities	0.72%
Accommodation and food service activities	0.66%
Transportation and storage	0.61%
Administrative and support service activities	0.57%
Wholesale and retail trade; repair of motor vehicles and mot	0.42%
Professional, scientific and technical activities	0.17%
Mining and quarrying	0.07%
Construction	0.06%
Water supply; sewerage, waste management and remediation act	0.02%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomy-aligned assets as part of its investment policy and recorded that 0% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities was 0.04%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 23.26%. This compares to the commitment of 5% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.

**What was the share of socially sustainable investments?**

The share of sustainable investments in the Fund with a social objective over the period was 25.86%. This compares to the commitment of 5% overall of socially sustainable investments made in the precontractual disclosure.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex.

The Fund may hold cash, near cash and money market funds, FX, interest rate derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as “Other” investments, for any purpose permitted by the Fund’s investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund’s investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments’ alignment with the promoted characteristics. It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g., as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors but may not always be able to do so immediately.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio’s assets.

Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How does the reference benchmark differ from a broad market index?*

No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.

● *How did this financial product perform compared with the reference benchmark?*

No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.

● *How did this financial product perform compared with the broad market index?*

No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by the Fund were met.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January, 2022 to 31 December, 2022.

The Fund also invested at least 10% of its assets in sustainable investments from when this commitment came into effect in August 2022 to the end of the reference period.

#### • *How did the sustainability indicators perform?*

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

The Fund's sustainability score for the reference period was 3.2% and the benchmark's sustainability score for the reference period was 1.4%.

In each case the sustainability score is calculated as a notional percentage as described above.

As measured at the end of the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Connectivity
- Education
- Power Provision
- Socio-Political Stability

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg EURO Aggregate Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg EURO Aggregate Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 78% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments over the four months prior to the end of the reference period, based on month-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• *...and compared to previous periods?*

As this is our first reporting period, this question is not applicable.

• *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to increasing benefits by way of the following:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues;
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth;

The above examples of the objectives of the sustainable investments that the Fund made are based on data as at the end of the reference period. Other objectives may have applied during the reference period.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. The Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied certain exceptions to the list during the reference period.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found under "Sustainability Related Disclosures" on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied certain exceptions to the list during the reference period.

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

##### Climate Change

PAIs 1, 2, 3, 4, 5, 6 and 19 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

##### Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

##### Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

##### Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

##### Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

##### Corporate Governance

PAIs 20, 12 and 13 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

We used a list of UNGC violators as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors involved classifying the indicators into three categories:

1. Set thresholds

For certain PAIs (e.g. PAI 10 on violations of UNGC principles), we set thresholds for considering an investment to be a sustainable investment. Investments in breach of these thresholds were not eligible to be held as sustainable investments. Compliance with these thresholds was monitored on an ongoing basis via the Investment Manager's portfolio compliance framework.

2. Active ownership

During the reference period, the Investment Manager engaged in line with the approach and expectations set out in our Engagement Blueprint (Link <https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf>) and as further described above. A summary of Schroders firm-wide engagement activity, during the reference period, including the relevant engagement theme, is shown below:

<b>Engagement Theme</b>	<b># Issuers</b>
Climate Change	738
Diversity and Inclusion	72
Governance and Oversight	3,096
Human Capital Management	130
Human Rights	121
Natural Capital and Biodiversity	95

3. Improve coverage

Some of the engagements identified in the table above involved discussions where the primary focus was to increase reporting on sustainability data. The purpose is to improve coverage of the PAIs, for example PAI 9 on hazardous waste ratio.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**What was the proportion of sustainability-related investments?**

• *What was the asset allocation?*

**Asset allocation**  
describes the share of  
investments in specific  
assets.

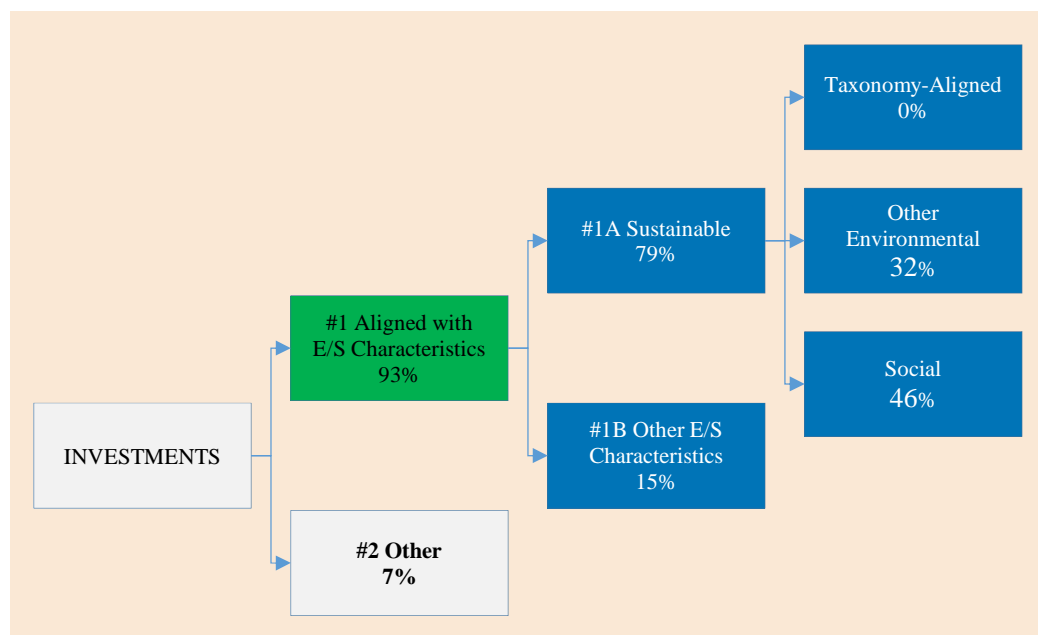

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average of the last four months of the reference period, based on month-end data. Also included within #1 is the proportion of assets that were invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 78% of its assets in sustainable investments. This percentage represents the average of the last four months of the reference period, based on month-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 46% was invested in sustainable investments with a social objective. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. [#2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.]

*#1 Aligned with E/S Characteristics* includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product  
*#2 Other* includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

*The category #1 Aligned with E/S Characteristics covers:*

- *The sub-category #1A Sustainable covers environmentally and socially sustainable investments*
- *The sub-category #1B Other E/S Characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments*

## FAM Series UCITS ICAV

### Unaudited Section (continued)

### Sustainable Finance Disclosure Regulation (SFDR) (continued)

• *In which economic sectors were the investments made?*

During the reference period investments were made in the following economic sectors:

Sector	% Assets
SOVEREIGN (DEVELOPED)	36.46
FINANCIAL	19.27
INDUSTRIAL	15.02
SUPRANATIONAL	7.27
COLLECTIVE INVESTMENTS	5.47
GOVERNMENT GUARANTEED	4.41
AGENCY	3.44
UTILITY	3.18
CASH	2.88
FOREIGN SOVEREIGN	1.33
LOCAL-AUTHORITY	1.28
EMD SOVEREIGN	0.10
PFD-UTILITY	0.03
SECURITIZED	0.01
DERIVATIVES	-0.16

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

• *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?*

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

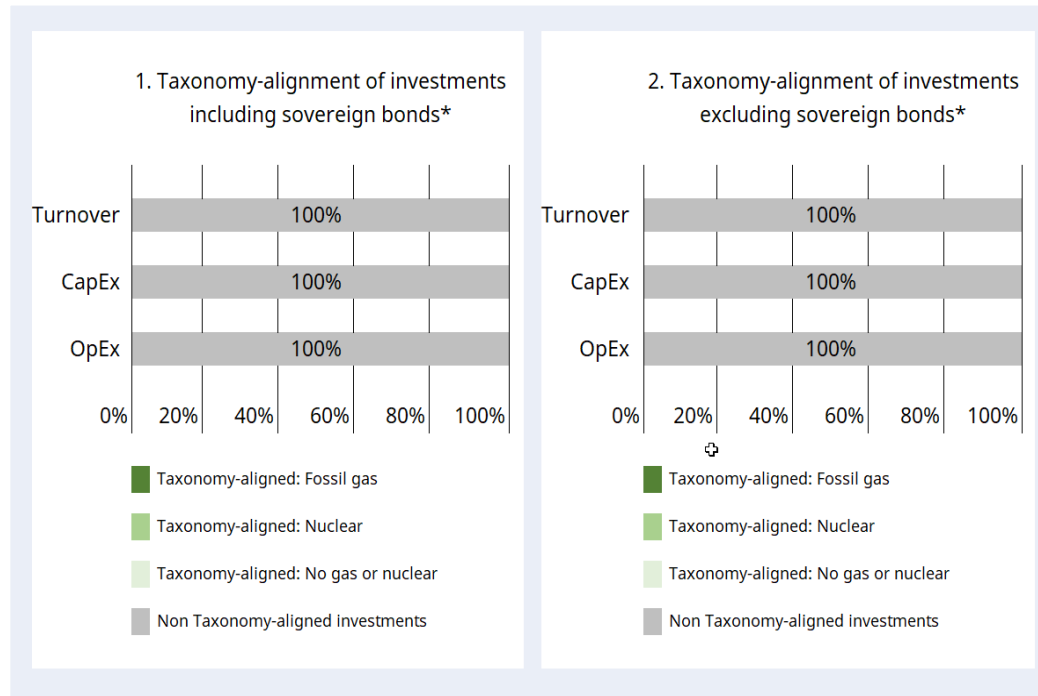

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- *What was the share of investments made in transitional and enabling activities?*

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?***

As this is our first reporting period, this question is not applicable.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Fund invested 32% of its assets in sustainable investments with an environmental objective that are not aligned with the Taxonomy. This percentage is a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of socially sustainable investments?**

The Fund invested 46% of its assets in sustainable investments with a social objective. This percentage is a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. [#2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.]

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period a number of counterparties were removed from the approved list for all funds in line with our policy and compliance requirements. This meant that such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

#### What actions have been taken to attain the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund [and of individual investments] when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf>). A summary of Schroders engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies. We aim to drive change that protects and enhances the value of our investments.

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**• How did the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/85

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:** European Equity FAM Fund  
**Legal entity identifier:** 635400NG22RCW3MTW11

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?** *[tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments]*

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 67.2% of sustainable investments <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

**Sustainability indicators**

measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- i) 97% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii) 67.2% of the mandate was invested in sustainable investments;
- iv) 5.2% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 30.3% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- vi) 32.7% of the mandate invested in sustainable investments with a social objective.

● ***...and compared to previous periods?***

Not applicable as this is the first reporting period

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The mandate determined a sustainable investment as follows:

- (a) issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity’s existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a ‘Very Severe’ controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

—● ***How were the indicators for adverse impacts on sustainability factors taken into account?***

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be ‘sustainable investments’ Fidelity’s fundamental research determined that the company was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

— — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

**How did this financial product consider principal adverse impacts on sustainability factors?**

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

In respect of its direct investments in corporate issuers, the Fund was subject to:

- 1. a firm-wide exclusions list, which included cluster munitions and anti-personnel landmines, and
- 2. a norms-based screening of issuers which the investment manager considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC.
- 3. Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the website for further information on the Sustainable investing framework ([fidelityinternational.com](http://fidelityinternational.com)) and further details on the Exclusion Policy can be found on the Management Company’s website at the following link [FAM - Sustainability | Fineco FAM - Fineco FAM \(\[finecoassetmanagement.com\]\(http://finecoassetmanagement.com\)\)](#)

The investment manager also had discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- (i) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (ii) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (iii) Quarterly reviews - monitoring of principal adverse impacts through The Fund’s quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

### What was the proportion of sustainability-related investments?

The Fund invested 67% in sustainable investments for the period in review

● **What was the asset allocation?**

(#1 aligned with E/S characteristics) The Fund will invest:

1. 97% of its assets in securities of issuers with favourable ESG characteristics;
2. 67.2% in sustainable investments (#1A sustainable)\* of which 5.2%

have an environmental objective (which is aligned with the EU Taxonomy), 30.3% have an environmental objective (which is not aligned with the EU Taxonomy) 32.7% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

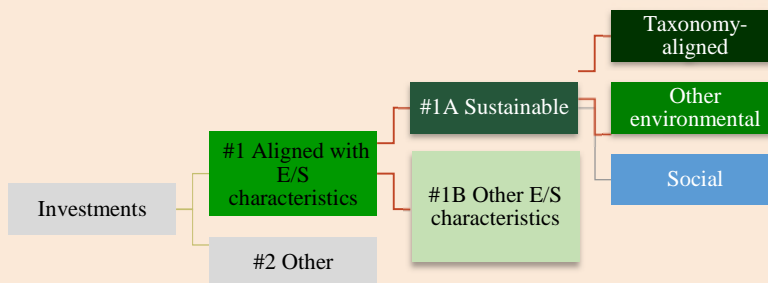

**Asset allocation** describes the share of investments in specific assets.

*[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

*[Include only relevant boxes, remove irrelevant ones for the financial product]*

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

*[include the note below where the financial product made sustainable investments]*

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Economic sectors of the investments made during the period in review were

Sector	Fund - % TNA
Information Technology	20.58
Industrials	12.33
Health Care	12.25
Consumer Staples	10.41
Financials	10.16
Energy	7.85
Consumer Discretionary	7.02
Materials	6.60
Communication Services	5.60
Utilities	3.34
Cash	2.18
Real Estate	1.68

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **01 January 2022 to 31 December 2022**

*[include note only for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]*

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?** *[include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]*

The fund invested 5.2% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the Mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the Mandate is measured by turnover.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover - 5.2%  
 Capex - 5.9%  
 Opex - 5.8%

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

Due to data constraints, we aim to report the share of investments in transitional and enabling activities in our next periodic disclosure.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The fund invested 30.3% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

The fund invested 32.7% in sustainable investments with a social objective.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of The Fund was invested in assets aligned with the financial objective of The Fund, cash and cash equivalents for liquidity purposes and derivatives which was used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, The Fund adhered to the Exclusions.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment managers proprietary ESG ratings framework as well as their access to external ESG data providers and ratings agencies have allowed them to assess the ESG characteristics of fund holdings over the period, and maintain a consideration of Principle Adverse Impacts. Included in the assessment is to what extent the issuers of these securities deliver on our expectations for best practices. Additionally, the Investment manager have instated a Quarterly Sustainability Review for their Article 8 funds, which has created a specific forum for discussion of the funds qualitative and quantitative ESG characteristics, and whether they are consistent with requirements and client expectations. This is an extension of their pre-existing risk and compliance processes. Where appropriate they have utilised their spheres of influence on companies via active engagement and stewardship activities.

**How did this financial product perform compared to the reference benchmark?**

An index was not designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promoted.

- ***How does the reference benchmark differ from a broad market index?***  
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***  
Not applicable
- ***How did this financial product perform compared with the broad market index?***  
Not applicable

*[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]*

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Product name:** Fineco AM Global Premium Equities Fund  
**Legal entity identifier:** 635400DO3AOIRW2P2Q44

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 11.58% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

1. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
  
2. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
  
3. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 97.41% as at 31 December 2022; and
- iii. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 97.41% as at 31 December 2022

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

#### Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives  
Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

### What were the top investments of this financial product?

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

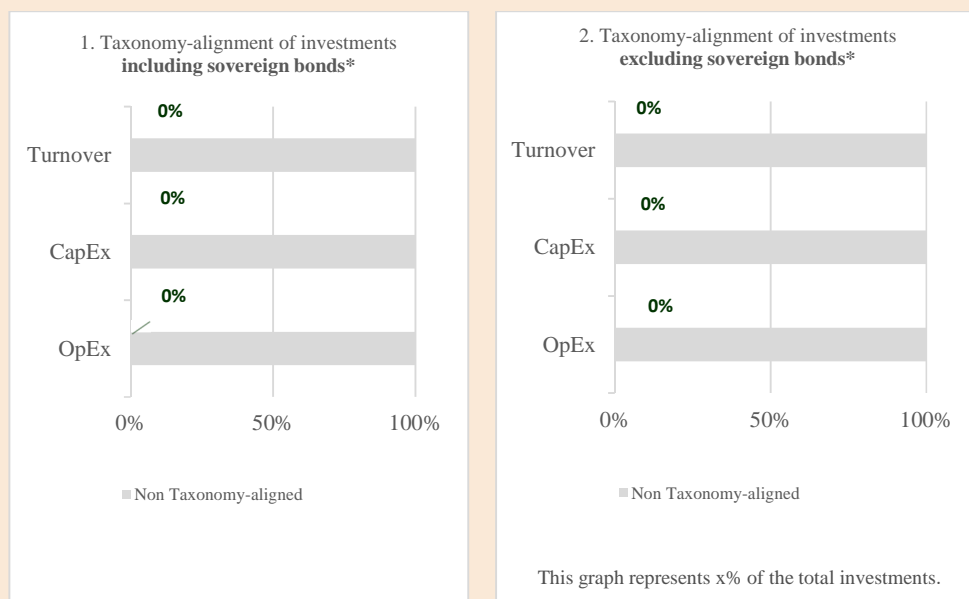

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

- 1. Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 23.70% of sustainable investments
- 2. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 3. Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- 4. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

**Sustainability indicators**

measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

1. The percentage of the Fund portfolio made in sustainable investments was 23.70% as at 31 December 2022
2. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
3. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 23.7% as at 31 December 2022; and
4. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 23.7% as at 31 December 2022

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments inline with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 23.70% of sustainable investments

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Principal adverse impact (“PAI”) indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives
- Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - a. Made in investee companies that demonstrate good governance:
  - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

#### What was the proportion of sustainability-related investments?

**23.70%**

##### *What was the asset allocation?*

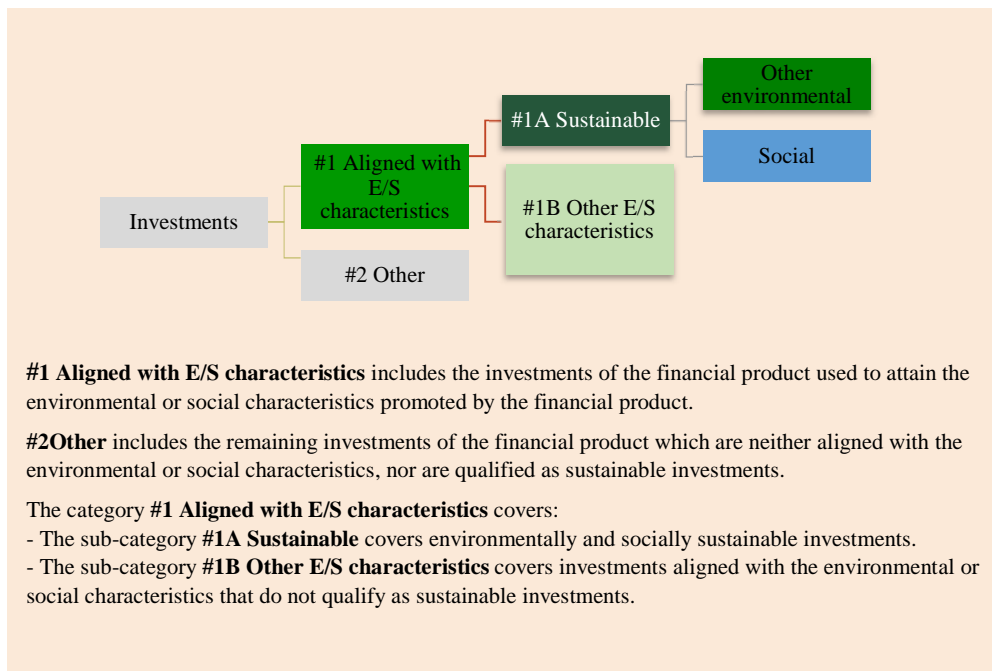

97.68% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 10% in sustainable investments and as at 31 December the Fund had a proportion of 23.70% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Category	Fund - % TNA
BANKS	3.96%
BUILDING AND BUILDING MATERIALS	3.59%
CHEMICAL PRODUCTS	6.98%
CONSTRUCTION OF MACHINERY AND VEHICLES	1.77%
CONSUMPTION GOODS/ FOOD/ BREWERY	11.18%
DISTRIBUTION WATER GAZ ELECTRICITY ENERGY	9.31%
DISTRIBUTION/ RETAIL TRADE	2.26%
ELECTRICS/ ELECTRONICS	4.39%
INTERNET	4.91%
MINING OF MINERALS AND METALS	2.20%
MISCELLANEOUS SERVICES	5.92%
OFFICE EQUIPMENT AND MATERIAL	2.55%
OTHER CREDIT INSTITUTIONS	11.98%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	20.37%
SOFTWARE	7.13%
TELECOMMUNICATIONS	1.48%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation is not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

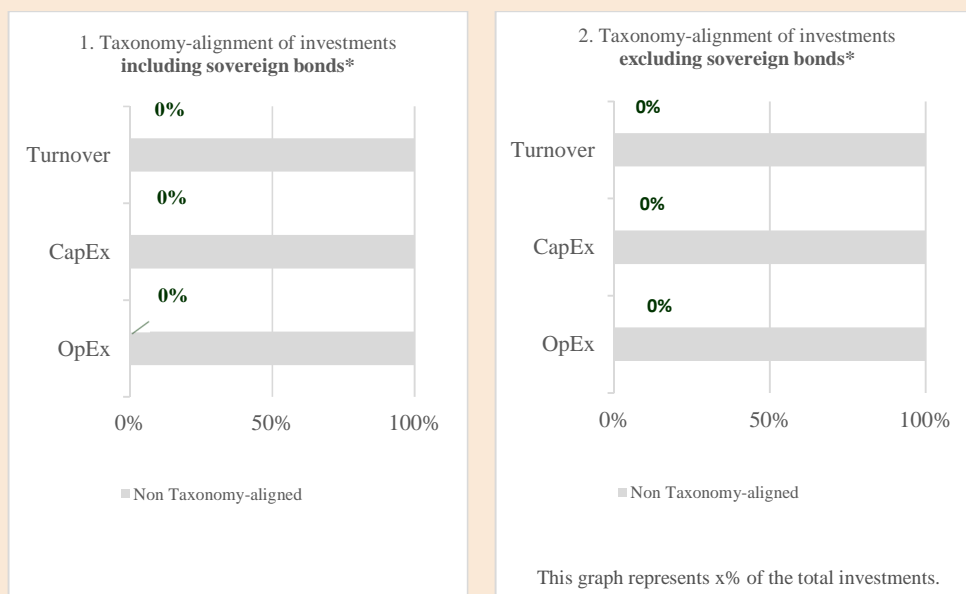

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 11.77%.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**What was the share of socially sustainable investments?**

Socially sustainable investments represented 11.93% of the financial product.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 23.70% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM Euro Corp Bonds Fund

**Legal entity identifier:** 549300JHYC8E0CZ4L556

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<span style="color: green;">● ●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: green;">● ●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 11.61% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ___%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

1. **Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 11.61% of sustainable investments.
2. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i The percentage of the Fund portfolio made in sustainable investments which was 11.61% as at 31 December 2022
- ii The minimum Fund level ESG score was “A” as at 31 December 2022;
- iii The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 6.84% as at 31 December 2022; and
- iv The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 6.84% as at 31 December 2022

● *...and compared to previous periods?*

Not applicable for the first periodic report.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The objective of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 11.61% of sustainable investments.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Principal adverse impact (“PAI”) indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives  
Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - a. Made in investee companies that demonstrate good governance;
  - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

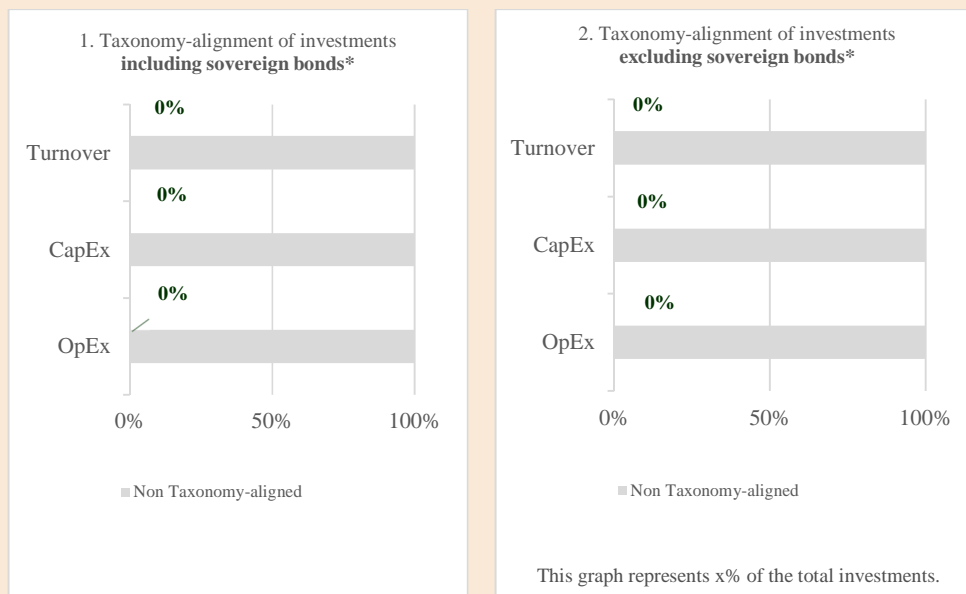

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 6.84%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of socially sustainable investments?**

Socially sustainable investments represented 7.16% of the financial product.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Manager’s exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 12% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM Investment Grade Euro Aggregate Bond Fund

**Legal entity identifier:** 635400DX4FYP7WIXXR06

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ____%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b></p> <p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 1.17% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

- 1 Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
  
- 2 Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
  
- 3 Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability**

**indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● *How did the sustainability indicators perform?*

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 96.51% as at 31 December 2022; and
- iii. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 96.51% as at 31 December 2022

● *...and compared to previous periods?*

Not applicable for the first periodic report.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives*

Not applicable

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

#### Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

#### Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

#### Corporate voluntary indicators: Social

9. Lack of a human rights policy

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager’s SFDR disclosure statement; “Statement on principal adverse impacts of investment decisions on sustainability factors”.

**What were the top investments of this financial product?**

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2022

<b>Largest investments</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>

**What was the proportion of sustainability-related investments?**

Not applicable

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

96.51% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

1. **Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 11.34% of sustainable investments.
2. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *How did the sustainability indicators perform?*

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i The percentage of the Fund portfolio made in sustainable investments which was 11.34% as at 31 December 2022
- ii The minimum Fund level ESG score was “A” as at 31 December 2022;
- iii The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 7.58% as at 31 December 2022; and
- iv The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 7.58% as at 31 December 2022

● *...and compared to previous periods?*

Not applicable for the first periodic report.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The objective of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 11.34% of sustainable investments.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Principal adverse impact (“PAI”) indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives  
Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - d. Made in investee companies that demonstrate good governance:
  - e. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - f. Made in investee companies that make a positive contribution towards an environmental or social objective.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

#### Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

#### Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives

#### Corporate voluntary indicators: Social

9. Lack of a human rights policy

#### Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

## What was the proportion of sustainability-related investments?

11.34%

### What was the asset allocation?

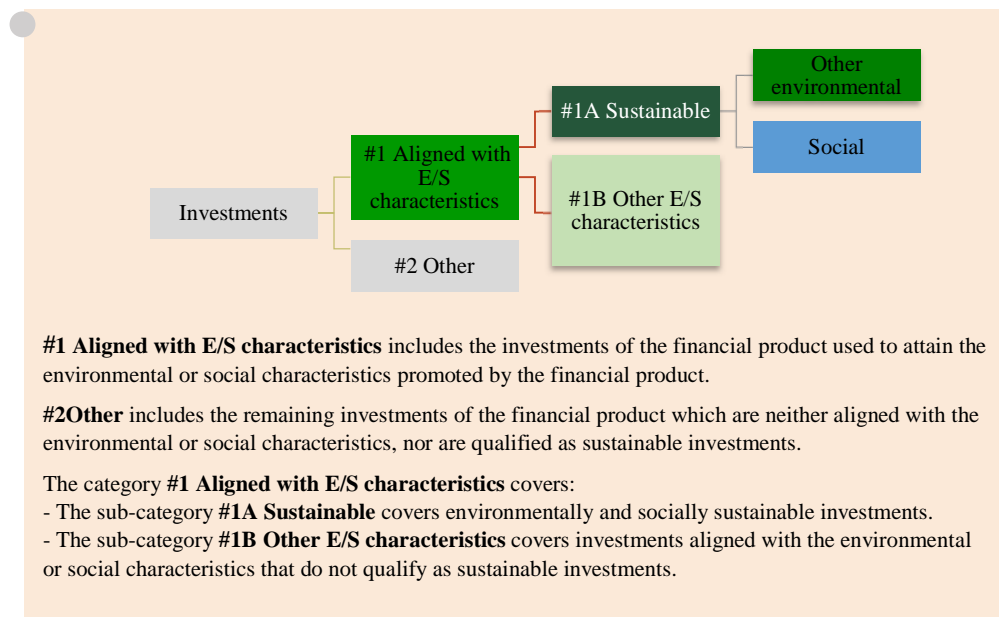

**Asset allocation** describes the share of investments in specific assets.

7.58% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 5% in sustainable investments and as at 31 December the Fund had a proportion of 11.34% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### In which economic sectors were the investments made?

Category	Fund - % TNA
AUDIOVISUAL	1.36%
BANKS	36.55%

TEXTILES AND CLOTHING	0.46%
TRANSPORTATION AND TRANSPORTATION MATERIALS	1.69%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

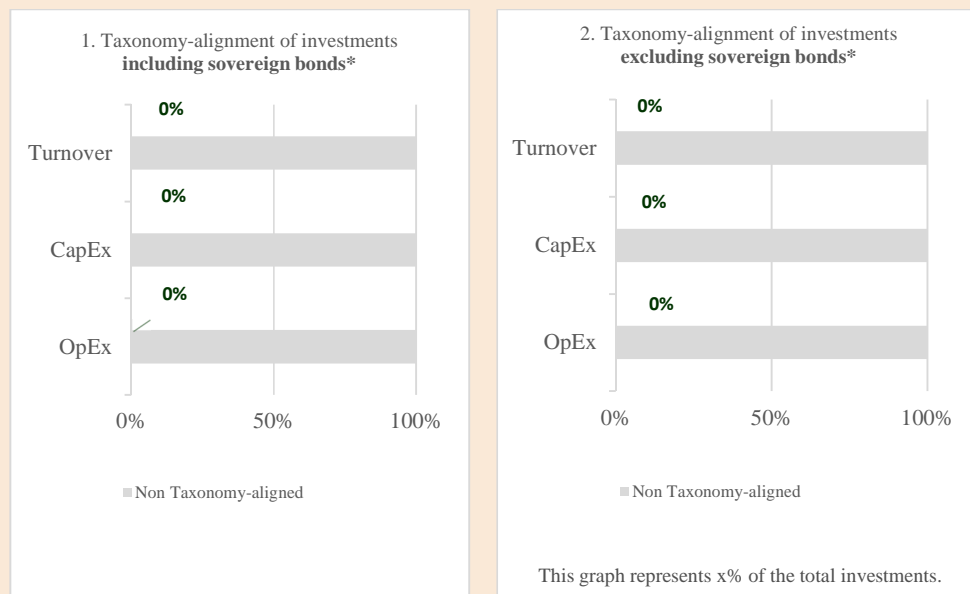

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 7.58%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of socially sustainable investments?**

Socially sustainable investments represented 7.21% of the financial product.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Manager’s exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 11% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**How did this financial product perform compared to the reference benchmark?**

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM Global Equities Income Fund

**Legal entity identifier:** 54930082QJGJ9MRIP760

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<b>Did this financial product have a sustainable investment objective?</b>	
<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: green;">●</span> <span style="color: white;">●</span> <input checked="" type="checkbox"/> <b>No</b>

<input type="checkbox"/> <b>It made sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> <b>It promoted E/S characteristics, but did not make any sustainable investments</b>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

1. **Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 22.38% of sustainable investments.
2. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i The percentage of the Fund portfolio made in sustainable investments was 22.38% as at 31 December 2022.
- ii The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 22.38% as at 31 December 2022; and
- iv The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 22.38% as at 31 December 2022.

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments inline with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 22.38% of sustainable investments

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Principal adverse impact (“PAI”) indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - a. Made in investee companies that demonstrate good governance:
  - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

#### Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

#### Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

#### Corporate voluntary indicators: Social

9. Lack of a human rights policy

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation is not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

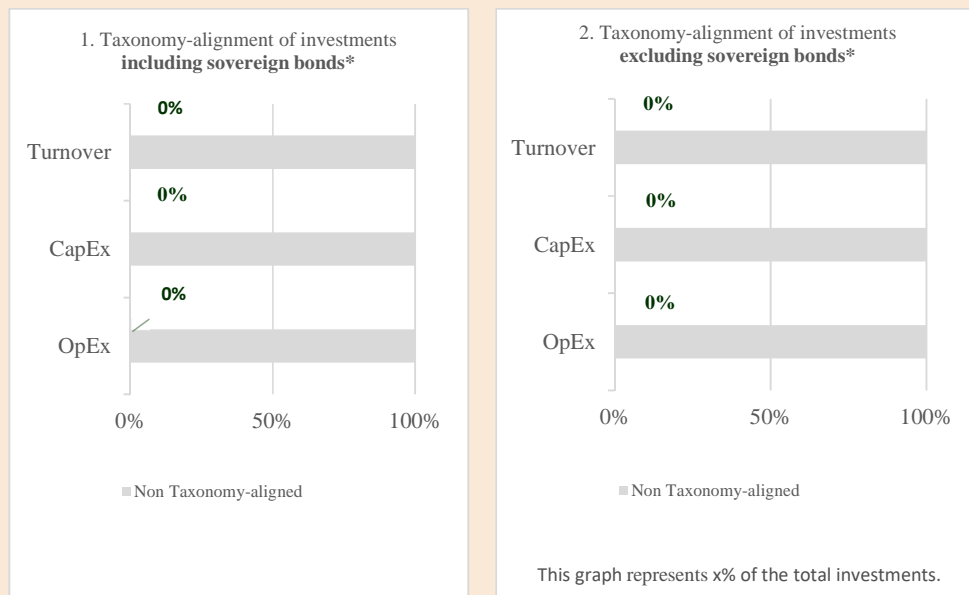

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 6.25%.

**What was the share of socially sustainable investments?**

Socially sustainable investments represented 17.50% of the financial product.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 22.38% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*  
Not applicable
  
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*  
Not applicable
  
- *How did this financial product perform compared with the reference benchmark?*  
Not applicable
  
- *How did this financial product perform compared with the broad market index?*  
Not applicable

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco Global Total Return Bond FAM Fund

**Legal entity identifier:** 54930089ACPJC67DI343

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Did this financial product have a sustainable investment objective?** *[tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments]*

**Yes**

**No**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund applied, in addition to the regulatory mandated exclusions with regards to controversial weapons and sovereign debt sanctions, additional exclusions based on the following factors:

- Level of involvement in Coal extraction and production.
- Level of involvement in Unconventional Oil and Gas such as arctic oil and gas exploration extraction, oil sands extraction and Shale Energy extraction.
- Level of involvement in Tobacco production and tobacco related products.
- Level of involvement with recreational cannabis.
- Companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty.

In addition, companies were excluded if they were assessed as being in violation of any of the UN Global Compact’s principles, based on third parties’ data and the Investment Manager’s proprietary analysis and research.

● ***How did the sustainability indicators perform?***

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. This included:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator performance
Exclusions with regards to controversial weapons	Companies that generate any of their revenue from controversial weapons were excluded
Exclusions with regards to sovereign debt sanctions	Countries that had “severe violations” were excluded
Level of involvement in Coal extraction and production.	Companies that generate $\geq 5\%$ of revenue from thermal coal extraction or $\geq 10\%$ of revenue from Thermal Coal Power Generation were excluded
Level of involvement in Unconventional Oil and Gas such as arctic oil and gas exploration extraction, oil sands extraction and Shale Energy extraction;	Companies that generate $\geq 5\%$ of revenue from unconventional Oil and Gas were excluded (i.e. arctic oil & gas exploration, oil sands extraction, or shale energy extraction)
Level of involvement in Tobacco production and tobacco related products;	Companies that generate $\geq 5\%$ of revenue from Tobacco products production or Tobacco related products and services were excluded  Companies that generate $\geq 15\%$ of revenue from Tobacco Products Overall were excluded
Level of involvement with recreational cannabis;	Companies that generate $\geq 5\%$ of their revenue from recreational cannabis were excluded
Companies excluded as being in violation of any UN Global Compact’s principles	All non-compliant companies were excluded

- *...and compared to previous periods?*  
NA
- *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*  
NA
- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*
  - *How were the indicators for adverse impacts on sustainability factors taken into account?*  
NA
  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*  
NA

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impacts on sustainability factors by carrying out a qualitative and quantitative review of key metrics (being the mandatory indicators defined in Table 1 of the Annex I of the regulatory technical standards for SFDR and any applicable additional indicators). The Fund identified priority investee entities using thresholds on each principal adverse impacts indicator and engaged through methods such as letters, meetings, proxy voting. If no improvement was established through such corporate engagement, then the Fund proceeded to divest and/or exclude investments.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The below table shows the fund level PAI scores.

Adverse sustainability indicator	PAI	Data	Metric	
Greenhouse gas emissions	1. GHG Emissions	10,372.97	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)	
		1,675.95	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)	
		64,261.46	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)	
		76,310.39	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)	
		594.80	Fund Level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Million EUR Invested)	
	2. Carbon footprint			
	3. GHG Intensity of investee companies	712.31	Fund Level Total Emission Intensity-Scope 1+2+3 (Million EUR Invested)	
	4. Exposure to companies active in the fossil fuel sector	0.01	% of the fund exposed to any fossil fuels revenue	
	5. Share of non-renewable energy	33.19	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)	
	5. Share of non-renewable energy production	55.7		
	6. Energy consumption intensity per high impact climate sector	Agriculture, Forestry & Fishing		Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
		Construction		
		Electricity, Gas, Steam & Air Conditioning	3.57	
		Manufacturing	0.33	
Mining & Quarrying		6.66		
Real Estate Activities		0.43		
Transportation & Storage		3.73		
Water Supply, Sewerage, Waste Management & Remediation Activities				
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles		0.07		
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	0.03	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	
Water	8. Emissions to water	82.02	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)	
Waste	9. Hazardous waste and radioactive waste ratio	1.23	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average	
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.25	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	
	12. Unadjusted gender pay gap	29.12	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies	
	13. Board gender diversity	37.71	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members	
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Data as at 31<sup>st</sup> Dec 2022

#### What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

##### ● *What was the asset allocation?*

100% of the Fund's portfolio (except for cash – 6.96% as at 31<sup>st</sup> Dec 2022) was aligned with the environmental and or social characteristics.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **In which economic sectors were the investments made?**

The below table shows the sectors that the fund holdings are invested in:

Sector (GICS)	Weight %
Energy	0.99
Materials	0.86
Health Care	1.61
Communication Services	5.32
Consumer Discretionary	3.13
Consumer Staples	2.32
Financials	27.73
Industrials	1.68
Information Technology	1.69
Real Estate	0.50
Utilities	2.34
Government Bonds	51.83
<b>Total</b>	<b>100.00</b>

Data as at 31<sup>st</sup> Dec 2022

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The following tables show the EU Taxonomy alignment of the fund based on three different metrics (Turnover, CapEx and OpEx). The first table includes sovereign bonds the second table excludes them.

Metric (Including sovereign bonds)	Aligned Value
TURNOVER	0.85%
CapEx	1.07%
OpEx	0.86%

Metric (excluding sovereign bonds)	Aligned Value
TURNOVER	1.53%
CapEx	1.94%
OpEx	1.56%

Data as at 31<sup>st</sup> Dec 2022

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments (on a revenue basis) made in transitional and enabling activities:

	Eligible	Potentially eligible	Aligned	Potentially aligned
Enabling	4%	< 0.5 %	< 1 %	0%
Transition	1%	0%	< 0.5 %	0%

Data as at 31<sup>st</sup> Dec 2022

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

NA

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

NA

● **What was the share of socially sustainable investments?**

NA

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” investments include the remaining investments which were neither aligned with the environmental and social characteristics, nor are qualified as sustainable investments. They were investments that were treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes. They may have been excluded from the Sub-Fund’s ESG exposure calculation.

~6.96% reflects Cash (or near cash) for the whole portfolio as of 31 December 2022.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to the regulatory mandated and additional exclusions outlined in the answer to the second question of the report, Invesco researched the following issuers, to establish whether a credible strategy was in place to address the PAIs, within a reasonable timeframe.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Holding	Principal Adverse Impact	Action Taken
A North American based Glass container company	PAI 1/2 - Contribution_ISS Scope 1 + 2 Financed Emissions	<b>Research outcome</b> The company operates in a hard to decarbonise industry. Notwithstanding this, they have acknowledged the issue and have set a stretching carbon reduction target. Furthermore, their target is approved by SBTi. "As the first glass packaging company to obtain an approved Science-Based Targets initiative GHG emissions reduction goal,1 our journey to a lower-carbon future begins with working to achieve our 2030 target to reduce GHG emissions by 25%"
A North American based food company	PAI 6: SA Energy Consumption Intensity_Manufacturing-SFDR	<b>Research outcome</b> The issuer has expanded its business very rapidly in recent years and recent increases seen in Energy intensity may not be representative of future trends. The North American part of the business which has grown rapidly is more energy efficient than its South American business so as this grows, energy intensity should decline. Invesco will continue to monitor the company's strategy to decrease its energy consumption intensity.
A European based food company	PAI 6: SA Energy Consumption Intensity_Manufacturing-SFDR	<b>Research outcome</b> During 2021, renewable energy expanded significantly. Renewables now account for 29% of total power utilized. Renewable power uses expanded by 22% from 2020 to 2021. Invesco will continue to monitor the company's strategy to decrease its energy consumption intensity.

**How did this financial product perform compared to the reference benchmark?**

- *How does the reference benchmark differ from a broad market index?*  
N/A
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*  
N/A
- *How did this financial product perform compared with the reference benchmark?*  
N/A *How did this financial product perform compared with the broad market index?*  
N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Nordea Stable Performance FAM Fund**

Legal entity identifier: 549300NRHNS6GWUSXS14

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 64% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The E/S characteristics of this product included:

**Sustainable investments** Although the product has not committed to make any sustainable investments, the product partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

**Sector- and value-based exclusions** Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

**Nordea Asset Management's Paris-Aligned Fossil Fuel policy** whereby the product did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The product used a benchmark which is not aligned with the product's E/S characteristics.

### ● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	16 tCO <sub>2</sub> e / m€ invested	91.91%	91.70%
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	1.85%	1.85%
		0.00% investee countries subject to violations	1.85%	1.85%
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00% involved in violations	91.91%	91.36%
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	343,52 tCO <sub>2</sub> e / m€ of owned GDP	1.85%	1.85%

**Eligibility:** The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

**Eligibility:** The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

**Coverage:** The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments that the product partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

#### *How were the indicators for adverse impacts on sustainability factors taken into account?*

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

#### *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The specific PAI indicators that were taken into consideration for this product were:

**CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS**

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	3.429 tCO <sub>2</sub> e	91.91%	91.70%

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

 *In which economic sectors were the investments made?*

FX FORWARDS	-0.07%
<b>Sum</b>	<b>100.00%</b>

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 51%.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 52%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash may have been held as ancillary liquidity or for risk balancing purposes. The product may have used derivatives and other techniques for the purposes described in the investment guidelines. This category may also have included securities for which relevant data is not available.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product have been monitored and documented on an

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM Euro Credit Bond Fund  
**Legal entity identifier:** 635400SKB7Q3DB2CUM45

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ____% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 4.26% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

1. **Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
2. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
3. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 94.18% as at 31 December 2022; and
- iii. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 94.18% as at 31 December 2022

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- *...and compared to previous periods?*  
Not applicable for the first periodic report.
- *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives*

Not applicable

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives
- Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager’s SFDR disclosure statement; “*Statement on principal adverse impacts of investment decisions on sustainability factors*”.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

**● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*  
Not applicable
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*  
Not applicable
- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?`*  
Not applicable

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/85**

**Product name:** Fidelity Sustainable Water & Waste FAM Fund  
**Legal entity identifier:** 2549002N1GC1ZSIQ9R66

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?** *[tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments]*

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 40.1% of sustainable investments <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. The Fund invests in companies involved in the production of water and the treatment, disposal, and recycling of waste. No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

● ***How did the sustainability indicators perform?***

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- i) 84% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity’s Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii) 40.1% of the mandate was invested in sustainable investments;
- iv) 5.8% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 25.1% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- vi) 10% of the mandate invested in sustainable investments with a social objective.

**Sustainability**

**indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***...and compared to previous periods?***

Not applicable as this is the first reporting period

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While it did not have as its objective a sustainable investment, it had a proportion of 40.1% of sustainable investments

The mandate determined a sustainable investment as follows:

- (a) issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

- PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be 'sustainable investments' Fidelity's fundamental research determined that the company was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNG), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

In respect of its direct investments, the Fund was subject to:

- a) a firm-wide exclusions list, which included cluster munitions and anti-personnel landmines, and
- b) a principle-based screening policy which included:
  - i) norms-based screening of issuers which the investment manager considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
  - ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may have been applied.
- c) Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the website for further information Sustainable investing framework ([fidelityinternational.com](http://fidelityinternational.com)) and further details on the Exclusion Policy can be found on the Management Company’s website at the following link [FAM - Sustainability | Fineco FAM - Fineco FAM \(finecoassetmanagement.com\)](#)

The investment manager also had discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- (i) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (ii) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (iii) Quarterly reviews - monitoring of principal adverse impacts through The Fund’s quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

**What was the proportion of sustainability-related investments?**

The Fund invested 40.1% in sustainable investments for the period in review

● **What was the asset allocation?**

(#1 aligned with E/S characteristics) The Fund will invest:

1. 84% of its assets in securities of issuers with favourable ESG characteristics;
2. 40.1% in sustainable investments (#1A sustainable)\* of which 5.8% have an environmental objective (which is aligned with the EU Taxonomy), 25.1% have an environmental objective (which is not aligned with the EU Taxonomy) 10% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

**Asset allocation**

describes the share of investments in specific assets.

*[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

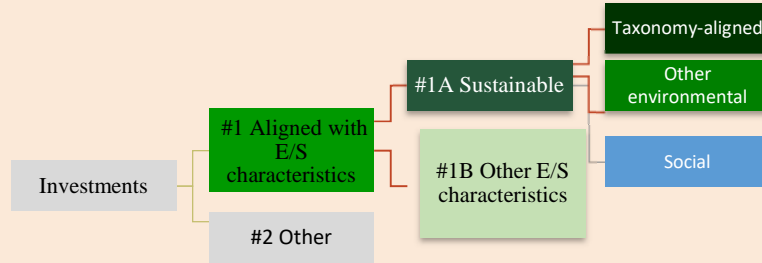

- **capital expenditure**

(CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure**

(OpEx) reflects the green operational activities of investee companies.

*[Include only relevant boxes, remove irrelevant ones for the financial product]*

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

*[include the note below where the financial product made sustainable investments]*

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?** *[include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]*

The fund invested 5.8% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the Mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the Mandate is measured by turnover.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover - 5.8%  
 Capex - 0%  
 Opex - 0%

*[include note only for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]*

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

*[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]*

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- **What was the share of investments made in transitional and enabling activities?**

Due to data constraints, we aim to report the share of investments in transitional and enabling activities in our next periodic disclosure.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The fund invested 25.1% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

The fund invested 10% in sustainable investments with a social objective.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund may be invested in securities of issuers that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Fund will adhere to the Exclusions

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment managers proprietary ESG ratings framework as well as their access to external ESG data providers and ratings agencies have allowed them to assess the ESG characteristics of fund holdings over the period, and maintain a consideration of Principle Adverse Impacts. Included in the assessment is to what extent the issuers of these securities deliver on our expectations for best practices. Additionally, the Investment manager have instated a Quarterly Sustainability Review for their Article 8 funds, which has created a specific forum for discussion of the funds qualitative and quantitative ESG characteristics, and whether they are consistent with requirements and client expectations. This is an extension of their pre-existing risk and compliance processes. Where appropriate they have utilised their spheres of influence on companies via active engagement and stewardship activities.

**How did this financial product perform compared to the reference benchmark?**

*[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]*

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

An index was not designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promoted.

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** JPMorgan China A-Shares Opportunities FAM Fund  
**Legal entity identifier:** 254900X39YSDFXAY5889

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: %</p> <p style="padding-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="padding-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: %</p>	<p><input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>No</b></p> <p><input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 45.70% of sustainable investments</p> <p style="padding-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="padding-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="padding-left: 20px;"><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Strategy set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 January 2022 - 31 December 2022). At the end of the reference period, the Strategy held 94.14% of investments with environmental and / or social characteristics and 45.70% of sustainable investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and / or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and / or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Strategy held 94.14% of investments with environmental and / or social characteristics and 45.70% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Strategy had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

● *...and compared to previous periods?*

Not applicable for 2022

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments that the Strategy partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Strategy was required to invest 10% in sustainable investments. At no time during the period did the Strategy hold sustainable investments below its committed minimum. At the end of the reference period, 45.70% of its assets were sustainable investments.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a “primary” indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company’s social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager’s approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Strategy prohibited relevant investments in these issuers.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The Strategy considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the “Do No Significant Harm” screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:  
01 January 2022 to  
31 December 2022

Largest Investments	Sector	% Assets	Country
CHINA MERCHANTS BANK-H	Financials	3.99	CHINA

### What was the proportion of sustainability-related investments?

#### Asset allocation

describes the share of investments in specific assets.

#### What was the asset allocation?

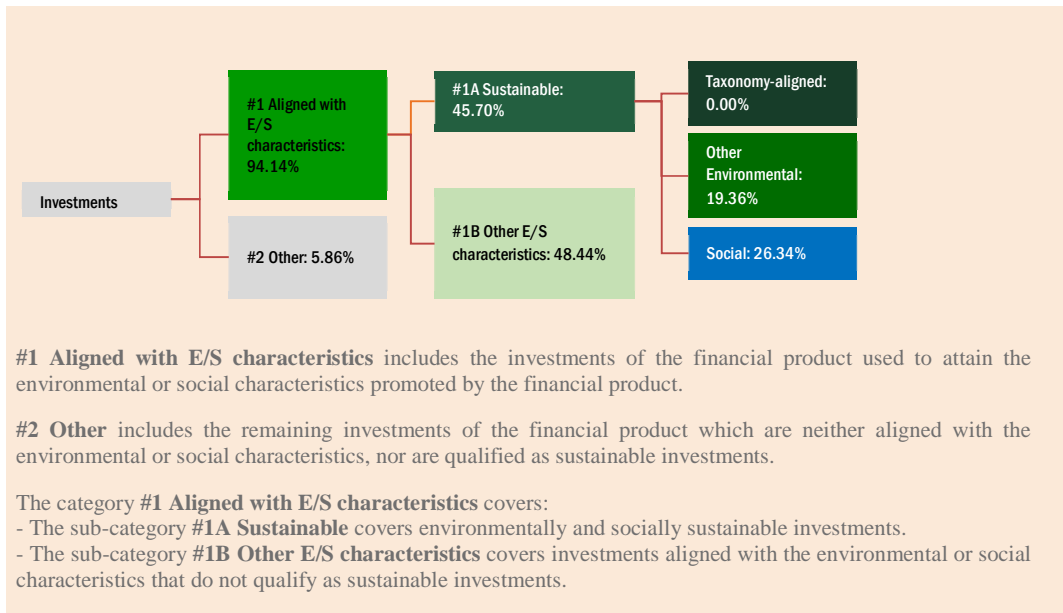

At the end of the reference period, the Strategy allocated 94.14% of its assets to companies that exhibited positive environmental and / or social characteristics and 45.70% of assets to sustainable investments. The Strategy did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments / funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *In which economic sectors were the investments made?*

Although the Strategy promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments / funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM are included in the denominator for the % of assets set out in the table below.

<b>Sector</b>	<b>Sub-sector</b>	<b>% Assets</b>
INDUSTRIALS	CAPITAL GOODS	17.2

CONSUMER STAPLES	HOUSEHOLD AND PERSONAL PRODUCTS	0.76
CONSUMER STAPLES	FOOD AND STAPLES RETAILING	0.59

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes available.

In the interim the Strategy has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

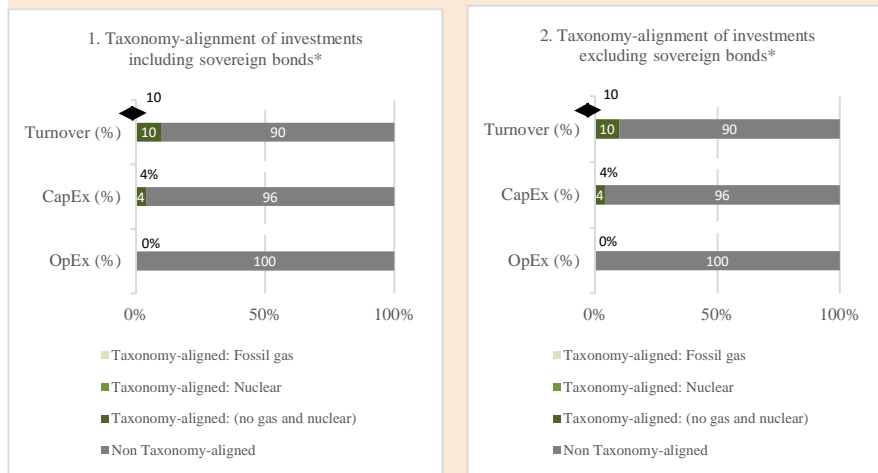

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- **capital expenditure (Capex)** shows the green investments made by investee companies, relevant to a transition to a green economy.
- **operational expenditure (Opex)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment or relation to the investments of the financial product other than sovereign bonds.

This graph represents 14% of the total investment.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● **What was the share of investments made in transitional and enabling activities?**

Further to the above, the Strategy has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 6.75%, at the end of the reference period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 19.36% of assets at the end of the reference period.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 26.34% of assets at the end of the reference period.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The 5.86% of assets in “other” investments were comprised of companies that did not meet the criteria described in response to above question entitled, “How did the sustainability indicators perform?” to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments / funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under “other”. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including “other” investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Strategy also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

**How did this financial product perform compared to the reference benchmark?**

## Sustainable investment objective

Did this financial product have a sustainable investment objective?	
<p><span style="color: green;">●</span> <span style="color: green;">●</span> <input checked="" type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 96.36%</b></p>	<p><span style="color: green;">●</span> <span style="color: gray;">●</span> <input type="checkbox"/> <b>No</b></p> <p><input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

### To what extent was the sustainable investment objective of this financial product met?

*The Fund's sustainable investment objective is to invest in companies that have demonstrable gender and/or ethnic diversity, or which provide solutions empowering social equality.*

*The sustainable investment objective was met by all sustainable investments with a social objective made for the Fund. The alignment percentage indicated in the graphic below shows the allocation to such investments.*

FAM Series UCITS ICAV

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

*The Fund's sustainability indicators to test its compliance with its sustainable investment approach were met at all times during the reporting period.*

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
<b>As at 31 December 2022</b>			
Year-on-Year Change of women on the board	No data coverage	96.45%	0.00%

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1<sup>st</sup> January 2022 to 31<sup>st</sup> December 2022

*data coverage was only 2.40% of the portfolio's NAV. Companies with board gender diversity of more than 30%, as reported by the company, accounted for 80.9% of NAV and coverage was for 95.02% of NAV. Companies with board ethnic diversity of more than 30%, as reported by the company, accounted for 13.2% of NAV, while coverage was for only 48.75% of NAV (as some companies choose not to or are unable to share data on employee ethnic diversity). We had no data coverage to report on the following sustainability indicators: year-on-year change of women on the board, year-on-year change of ethnic diversity in leadership roles, and percentage (%) of NAV considered by the Investment Manager to have leadership diversity, based on data reported by the company. Where data coverage is yet to be published, we shall seek to secure these data sets via direct engagement or through a market vendor.*

*With regards to the percentage (%) of NAV in investments aligned to the United Nations Sustainable Development Goals ("SDGs"), this can be seen in the table above. We consider companies to be aligned with the SDGs if they are impactful companies making intentional, measurable, material positive contributions towards one or more of the goals. The largest amount of NAV (10.7%) was aligned to SDG3 - Good Health and Wellbeing. Data coverage was available for 96.45% of NAV.*

*For each investment considered to be SDG-aligned, the strength of contribution to the relevant SDG as assessed by percentage of company revenues is decided. These can be seen in the table above. For certain companies, SDG alignment may be below 100% because some of its business activities may contribute towards secondary SDGs or other areas not related to its primary SDG.*

#### ● **...and compared to previous periods?**

*The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.*

#### ● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

*Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:*

- 1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.*
- 2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).*
- 3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment.*

#### — **How were the indicators for adverse impacts on sustainability factors taken into account?**

*The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.*

## FAM Series UCITS ICAV

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**What was the proportion of sustainability-related investments?**

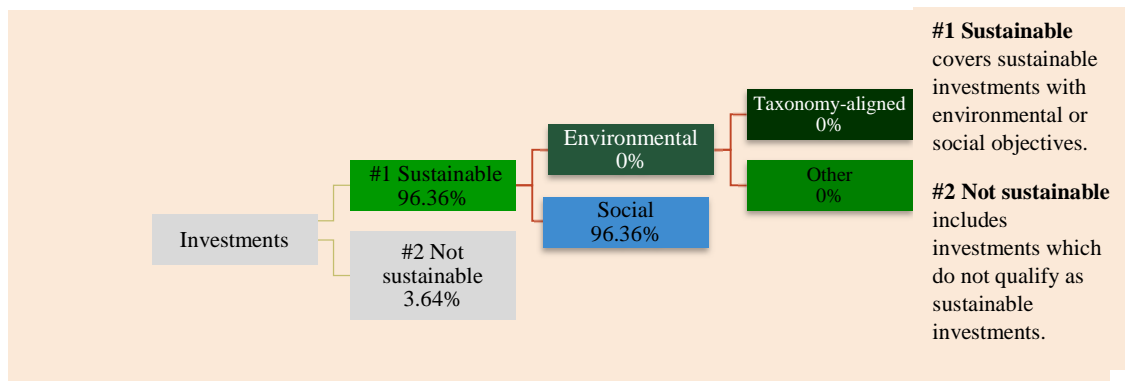

*In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 80% of the Fund's assets to be invested in social sustainable investments, in pursuit of the social sustainable investment objective. A minimum of 0% of the Fund's assets are to be invested in "Not sustainable" investments, and a minimum of 0% of the Fund's assets are to be invested in "Environmental sustainable" investments.*

*Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.*

*Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were sustainable investments was 96.36% of NAV as at 31 December 2022. This comprised 96.36% NAV relating to social sustainable investments which is above the 80% minimum commitment and 0% NAV for environmental sustainable investments. The remaining 3.64% NAV related to investments which were not sustainable.*

● **What was the asset allocation?**

The graphic below provides an overview of the asset allocation versus the established minimum thresholds.

● **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	30.32%
Financial and insurance activities	19.34%
Information and communication	17.08%
Wholesale and retail trade; repair of motor vehicles and mot	13.44%
Human health and social work activities	8.92%
Cash/other	3.64%
Construction	2.89%
Water supply; sewerage, waste management and remediation act	2.24%
Administrative and support service activities	2.13%

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund's investment objective is focused on making sustainable investments with a social objective. The Investment Manager expects at least 80% of the Fund to be invested in sustainable investments with a social objective.

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomy-aligned assets as part of its investment policy and recorded that 0% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

**How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

*The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 0%. This compares to the commitment of 0% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.*

**What was the share of socially sustainable investments?**

*The share of sustainable investments in the Fund with a social objective over the period was 96.36%. This compares to the commitment of 80% overall of socially sustainable investments made in the precontractual disclosure.*

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

*The Fund may hold cash, near cash and money market funds, and derivatives as “Other” investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below.*

*Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.*

*It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.*

*During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex*

**What actions have been taken to attain the sustainable investment objective during the reference period?**

*M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio’s assets.*

*Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.*

**How did this financial product perform compared to the reference sustainable benchmark?**

***How did the reference benchmark differ from a broad market index?***

*No reference benchmark was designated to determine whether this fund is aligned with its sustainable investment objective.*

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

*No reference benchmark was designated to determine whether this fund is aligned with its sustainable investment objective.*

- ***How did this financial product perform compared with the reference benchmark?***

*No reference benchmark was designated to determine whether this fund is aligned with its sustainable investment objective.*

- ***How did this financial product perform compared with the broad market index?***

*No reference benchmark was designated to determine whether this fund is aligned with its sustainable investment objective.*

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Global Listed Infrastructure FAM Fund  
**Legal entity identifier:** 254900K08VD3YVM3ZV45

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;">●● <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ____%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ____%</p>	<p style="text-align: center;">●○ <input checked="" type="checkbox"/> <b>No</b></p> <p><input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 57.87% of sustainable investments</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

*The Fund promotes the use of an Exclusionary Approach and it makes investments that are SDG-aligned (as defined below):*

*The Fund excludes certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes (“Exclusionary Approach”).*

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Fund considers the UN Sustainable Development Goals (SDGs) as part of its investment process and the sustainability themes considered by the Investment Manager are based on the SDGs as a relevant framework to measure contribution to sustainability factors (“SDG-alignment”). At least 70% of the Fund’s investments by value will be in investments considered by the Investment Manager to be related to sustainability themes.

No reference benchmark has been designated for the purpose of attaining the Fund’s promoted environmental and/or social characteristics.

The promoted environmental and social characteristics were generally met by all investments made for the Fund other than “Other” Investments. The alignment percentage indicated in the graphic below is tested against the Exclusionary Approach described below, showing the allocation between investments complying with the Exclusionary Approach and Investments which we as deem as “Other” as we don’t consider they can be considered as aligned against the Exclusionary Approach as described in the precontractual annex, such as cash. The SDG aligned characteristic is not used as part of this alignment percentage test – ie investments do not need to be “both” compatible with the Exclusionary Approach and SDG-aligned to be treated as “aligned”.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

**Exclusionary Approach:** The Fund’s sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

**SDG Aligned:**

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
As at 31 December 2022			
SDG-alignment: Percentage (%) of investments by value that is SDG-aligned	81.05%	98.81%	98.81%

The Fund maintained an SDG-alignment that was greater than 70% of the Fund’s investments by value excluding cash.

● **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund’s first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*1. Whether they represent significant exposure to businesses the Investment Manager considers harmful*

*2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)*

*3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment*

***How were the indicators for adverse impacts on sustainability factors taken into account?***

*The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.*

*The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.*

*Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.*

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

*All investments purchased by the Fund must pass the Investment Manager's good governance tests, and in addition, sustainable investments must also pass tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.*

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

*For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available, which allows the Investment Manager to make informed investment decisions, as explained above.*

*Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.*

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1<sup>st</sup> January 2022 to 31 December 2022

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 70% of the Fund's assets to be aligned to the environmental or social characteristics promoted. This includes a minimum 51% of the assets that are qualified as sustainable investments. A minimum of 0% of the Fund's assets are other investments not aligned to the environmental or social characteristics.

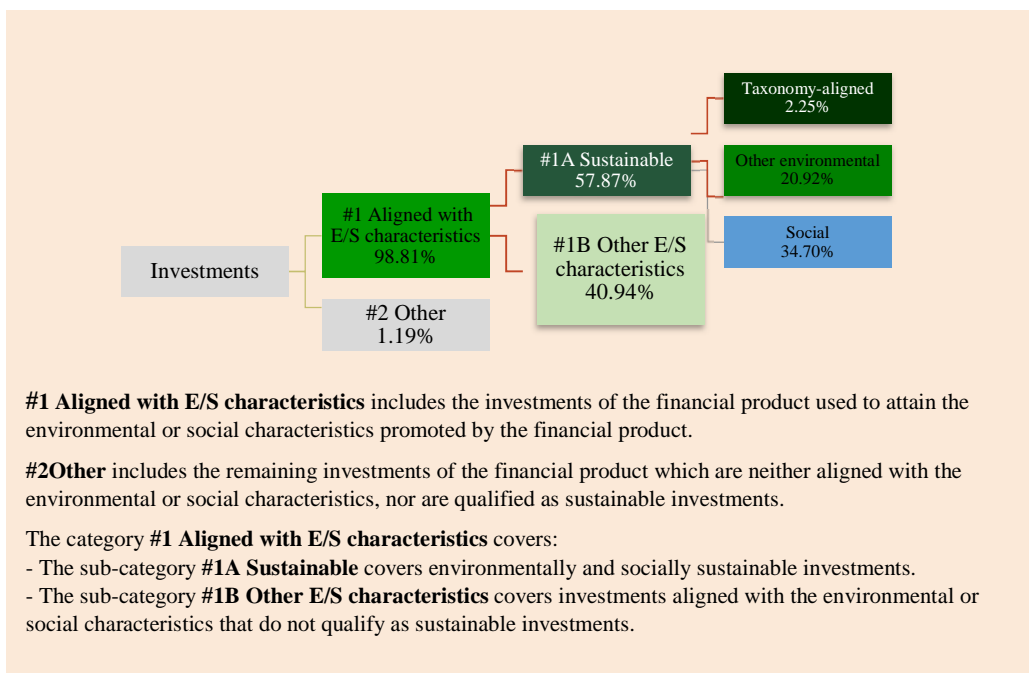

Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were aligned to the environmental or social characteristic promoted was 98.81% of NAV as at 31 December 2022, which is above the 70% minimum commitment. This comprised 57.87% NAV relating to sustainable investments which was above the 51% minimum threshold, and the remaining 40.94% NAV related to investments with other environmental and or social characteristics.

● What was the asset allocation?

The graphic below provides an overview of the asset allocation versus the established minimum thresholds.

**Asset Allocation** describes the share of investments in specific assets.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Electricity, gas, steam and air conditioning supply	30.75%
Financial and insurance activities	15.39%
Real estate activities	14.02%
Transportation and storage	12.12%
Information and communication	6.91%
Construction	6.50%
Wholesale and retail trade; repair of motor vehicles and mot	5.44%
Mining and quarrying	5.12%
Water supply; sewerage, waste management and remediation act	2.56%
Cash/other	1.19%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomy-aligned assets as part of its investment policy, but recorded that 2.25% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Both charts show 2.25% Turnover (other i.e. nil gas nil nuclear), 0% Capex, 0% Opex

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

*The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities was 2.2%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.*

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

*The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.*

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

*The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 23.17%. This compares to the commitment of 5% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.*

**What was the share of socially sustainable investments?**

*The share of sustainable investments in the Fund with a social objective over the period was 34.70%. This compares to the commitment of 5% overall of socially sustainable investments made in the precontractual disclosure.*

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

*During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex.*

*The Fund may hold cash, near cash and money market funds and derivatives as “Other” investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied, other than as set out below.*

*Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.*

*The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics. It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.*

**Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are**

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

*M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio's assets.*

*Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.*

### How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***

*No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.*

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

*No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.*

- ***How did this financial product perform compared with the reference benchmark?***

*No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.*

- ***How did this financial product perform compared with the broad market index?***

*No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.*

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:** European STARS Equity FAM Fund  
**Legal entity identifier:** 254900TOMCSFNB6RAO25

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 81% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The E/S characteristics of this product included:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Minimum proportion of sustainable investments** The product partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

**ESG scoring** The product invested in companies that have been analysed and scored in Nordea Asset Management’s proprietary ESG platform to ensure that only securities issued by companies that met the minimum required ESG score were eligible for inclusion.

**Sector- and value-based exclusions** Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

**Nordea Asset Management’s Paris-Aligned Fossil Fuel policy** whereby the product did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The product used a benchmark which is not aligned with the product’s E/S characteristics.

**How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	93 tCO2e / m€ invested	98.00%	98.00%
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00% involved in violations	98.00%	98.00%

**Eligibility:** The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

**Coverage:** The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● *...and compared to previous periods?*

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	Q4 2022	93 tCO2e / m€ invested	98.00%	98.00%
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Q4 2022	0.00% involved in violations	98.00%	98.00%

**Eligibility:** The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

**Coverage:** The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments that the product partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that supported the UN SDGs or Taxonomy aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The specific PAI indicators that were taken into consideration for this product were:

**CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS**

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	6.658 tCO <sub>2</sub> e	98.00%	98.00%
		Scope 2 GHG emissions	2.598 tCO <sub>2</sub> e	98.00%	98.00%
		From 1 January 2023, Scope 3 GHG emissions	31.000 tCO <sub>2</sub> e	98.00%	98.00%
		Total GHG emissions	9.256 tCO <sub>2</sub> e	98.00%	98.00%

NORSK HYDRO	Basic Materials	3.01%	NORWAY
DEUTSCHE TELEKOM	Communications	2.79%	GERMANY
UNICREDIT	Financial	2.73%	ITALY

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

### Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *In which economic sectors were the investments made?*

Sector	Assets
CONSUMER, NON-CYCLICAL	29.37%
FINANCIAL	21.45%
INDUSTRIAL	12.68%
BASIC MATERIALS	10.62%
TECHNOLOGY	8.11%
CONSUMER, CYCLICAL	6.47%
COMMUNICATIONS	5.56%
CASH	2.00%
UTILITIES	1.97%
ENERGY	1.77%
<b>Sum</b>	<b>100.00%</b>

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 63%.

#### **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 70%.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash may have been held as ancillary liquidity or for risk balancing purposes. The product may have used derivatives and other techniques for the purposes described in the investment guidelines. This category may also have included securities for which relevant data is not available.

#### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product have been monitored and documented on an ongoing basis.

**Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Global Sustain Paris Aligned FAM Fund

**Legal entity identifier:** 2549005BYRQXNZPSR450

**Sustainable investment objective**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> <b>97.41%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent was the sustainable investment objective of this financial product met?**

*The Fund's sustainable investment objective is to invest in companies that contribute towards the Paris Agreement climate change goal.*

*The sustainable investment objective was met by all sustainable investments with an environmental objective made for the Fund. The alignment percentage indicated in the graphic below shows the allocation to such investments.*

## FAM Series UCITS ICAV

### Unaudited Section (continued)

### Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability indicators** measure how the sustainable objectives of this financial product

#### ● How did the sustainability indicators perform?

*The Fund's sustainability indicators to test its compliance with its sustainable investment approach were met at all times during the reporting period.*

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
<b>As at 31 December 2022</b>			
% of NAV with ratified Science-Based Targets	44.4%	96.72%	83.29%
% of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	70.2%	96.72%	96.72%
Total renewable energy produced (megawatt hours)	No data coverage	96.72%	0%
The weighted average carbon intensity (WACI) of the Fund (tCO <sub>2</sub> per US\$million sales)	56.2	96.72%	96.72%
The weighted average carbon intensity (WACI) of the investment universe (tCO <sub>2</sub> per US\$million sales)	135.3	-	-

Security Level Sustainability Indicators	Value	Eligibility % NAV	Coverage % NAV
<b>As at 31 December 2022</b>			
Avoided carbon emissions – for companies that provide direct solutions to the climate challenge via their products and services (CO <sub>2</sub> eT Millions)	218.3	96.72%	12.99%
Schneider Electric	120.0		
Linde Plc	85.0		
Ball Corp	12.1		
Johnson Controls International Plc	1.2		

*As at 31 December 2022, companies accounting for 44.4% of the portfolio's NAV had ratified science-based targets. Data was available for companies accounting for 83.29% of NAV. Meanwhile, companies accounting for 70.2% of the portfolio's NAV said they were participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting. Data was available for companies accounting for 96.72% of NAV (in other words it excluded cash). We are unable to report on the total renewable energy produced (in megawatt hours) as we had no data coverage of companies in the portfolio.*

*The weighted average carbon intensity (WACI) of the portfolio (calculated as metric tonnes of CO<sub>2</sub> emitted per US\$ million of sales) indicates the intensity of the fund's carbon emissions. The number combines the carbon intensity of every holding in the fund, weighted to their proportions in the fund. As at 31 December 2022, this was 56.2 compared to 135.3 for the investment universe as represented by the MSCI World Net Return Index. 96.72% of the portfolio was covered by the calculation as it excluded cash and "other" investments.*

*At a security level, companies in the portfolio providing direct solutions to the climate challenge via their products and services (12.99% of the fund), avoided 218.3 million metric tonnes of CO<sub>2</sub>. The emissions avoided by the four holdings for which data was available, which together accounted for 12.99% of the portfolio's NAV, are shown in the table above*

#### ● ...and compared to previous periods?

*The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:

1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.
2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All investments purchased by the Fund must pass the Investment Manager's good governance tests, and in addition, sustainable investments must also pass tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

**How did this financial product consider principal adverse impacts on sustainability factors?**

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

**Asset allocation** describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

*In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 80% of the Fund's assets to be invested in environmental sustainable investments, in pursuit of the environmental sustainable investment objective. The Fund is not required to favour any specific type of environmental sustainable investment. A minimum of 0% of the Fund's assets are to be invested in "Not sustainable" investments, and a minimum of 0% of the Fund's assets are to be invested in "Social sustainable" investments.*

*Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.*

*Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were sustainable investments was 97.41% of NAV as at 31 December 2022. This comprised 97.41% NAV relating to environmental sustainable investments which is above the 80% minimum commitment and 0% NAV for social sustainable investments. The remaining 2.59% NAV related to investments which were not sustainable.*

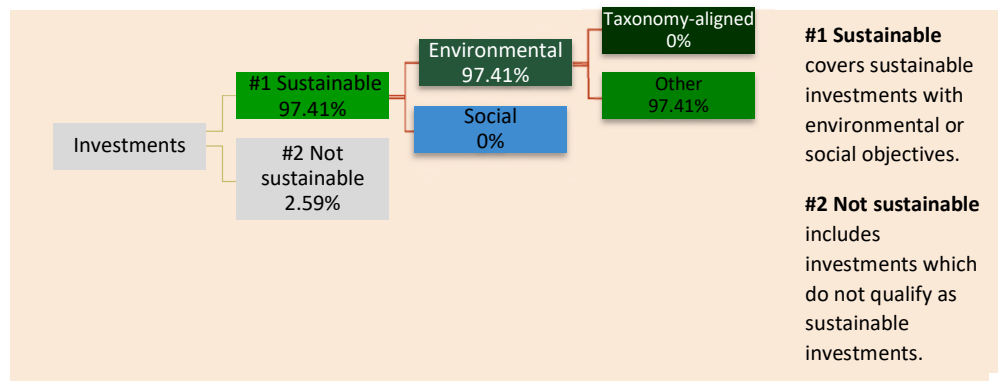

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

##### ● What was the asset allocation?

The graphic below provides an overview of the asset allocation versus the established minimum thresholds.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

##### *In which economic sectors were the investments made?*

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	36.40%
Financial and insurance activities	28.02%
Information and communication	20.43%
Wholesale and retail trade; repair of motor vehicles and mot	6.82%
Transportation and storage	2.63%
Cash/other	2.59%
Administrative and support service activities	1.76%
Other service activities	1.35%

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1<sup>st</sup> January 2022 to 31<sup>st</sup> December 2022

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

*Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.*

*The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomy-aligned assets as part of its investment policy and recorded that 0% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.*

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Zeros across all 6 bars

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**What was the share of investments made in transitional and enabling activities?**

*The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.*

**How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

*The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.*

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

*The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 97.41%. This compares to the commitment of 5% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.*

**What was the share of socially sustainable investments?**

*The share of sustainable investments in the Fund with a social objective over the period was 0%. This compares to the commitment of 0% overall of socially sustainable investments made in the precontractual disclosure.*

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

*During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex.*

*The Fund may hold cash, near cash and money market funds, and derivatives as “Other” investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below.*

*Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.*

*It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.*

**What actions have been taken to attain the sustainable investment objective during the reference period?**

*M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio’s assets.*

*Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.*

**How did this financial product perform compared to the reference sustainable benchmark?**

***How did the reference benchmark differ from a broad market index?***

*No reference benchmark was designated to determine whether this fund is aligned with its sustainable investment objective.*

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

*No reference benchmark was designated to determine whether this fund is aligned with its sustainable investment objective.*

- ***How did this financial product perform compared with the reference benchmark?***

*No reference benchmark was designated to determine whether this fund is aligned with its sustainable investment objective.*

- ***How did this financial product perform compared with the broad market index?***

*No reference benchmark was designated to determine whether this fund is aligned with its sustainable investment objective.*

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **North American STARS Equity FAM Fund**  
 Legal entity identifier: 254900AWYCN71JRUY496

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 74% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The E/S characteristics of this product included:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Minimum proportion of sustainable investments** The product partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

**ESG scoring** The product invested in companies that have been analysed and scored in Nordea Asset Management’s proprietary ESG platform to ensure that only securities issued by companies that met the minimum required ESG score were eligible for inclusion.

**Sector- and value-based exclusions** Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

**Nordea Asset Management’s Paris-Aligned Fossil Fuel policy** whereby the product did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The product used a benchmark which is not aligned with the product’s E/S characteristics.

### How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	27 tCO <sub>2</sub> e / m€ invested	96.65%	96.39%
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2.13% involved in violations	96.65%	96.65%

**Eligibility:** The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

**Coverage:** The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● *...and compared to previous periods?*

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	Q4 2022	27 tCO2e / m€ invested	96.65%	96.39%
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Q4 2022	2.13% involved in violations	96.65%	96.65%

**Eligibility:** The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

**Coverage:** The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments that the product partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that supported the UN SDGs or Taxonomy aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

### Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The specific PAI indicators that were taken into consideration for this product were:

**CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS**

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

#### In which economic sectors were the investments made?

Sector	Assets
CONSUMER, NON-CYCLICAL	31.26%
TECHNOLOGY	20.98%
FINANCIAL	16.79%
CONSUMER, CYCLICAL	7.47%
INDUSTRIAL	7.24%
COMMUNICATIONS	6.97%
CASH	3.35%
UTILITIES	3.23%
BASIC MATERIALS	2.72%
<b>Sum</b>	<b>100.00%</b>

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 60%.

#### **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 63%.

#### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash may have been held as ancillary liquidity or for risk balancing purposes. The product may have used derivatives and other techniques for the purposes described in the investment guidelines. This category may also have included securities for which relevant data is not available.

#### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product have been monitored and documented on an ongoing basis.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global STARS Equity FAM Fund**  
Legal entity identifier: 254900PEW9O0DN154A24

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

Yes    No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 72% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The E/S characteristics of this product included:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Minimum proportion of sustainable investments** The product partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

**ESG scoring** The product invested in companies that have been analysed and scored in Nordea Asset Management’s proprietary ESG platform to ensure that only securities issued by companies that met the minimum required ESG score were eligible for inclusion.

**Sector- and value-based exclusions** Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

**Nordea Asset Management’s Paris-Aligned Fossil Fuel policy** whereby the product did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The product used a benchmark which is not aligned with the product’s E/S characteristics.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	30 tCO2e / m€ invested	97.00%	97.00%
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	1.31% involved in violations	97.00%	97.00%

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

 *In which economic sectors were the investments made?*

Sector	Assets
CONSUMER, NON-CYCLICAL	31.62%
TECHNOLOGY	19.10%
FINANCIAL	16.86%
CONSUMER, CYCLICAL	8.34%
INDUSTRIAL	7.70%
COMMUNICATIONS	7.20%
BASIC MATERIALS	3.02%
CASH	3.00%
UTILITIES	2.57%
ENERGY	0.58%
<b>Sum</b>	<b>100.00%</b>

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 59%.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments was 62%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Cash may have been held as ancillary liquidity or for risk balancing purposes. The product may have used derivatives and other techniques for the purposes described in the investment guidelines. This category may also have included securities for which relevant data is not available.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GLOBAL DISRUPTIVE OPPORTUNITIES FAM FUND

Legal entity identifier: 254900PT325H9KEZSA22

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

**Yes**

**No**

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 50.67% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The product has respected all material aspects of the characteristics described in the prospectus

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- *How did the sustainability indicators perform?*

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is C-
- The weighted average ESG rating of the reference index is D+

- *... and compared to previous periods?*

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

- *What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

3. follow best environmental and social practices; and
4. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

-

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environment or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at [www.cpr-am.com](http://www.cpr-am.com)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**Taxonomy-aligned activities** are expressed as a share of:

-**turnover** reflecting the share of revenue from green activities of investee companies

-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Reliable data regarding the EU Taxonomy (including fossil gas and nuclear energy related activities) was not available during the period.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?*

Yes:

In fossil gas

In nuclear energy

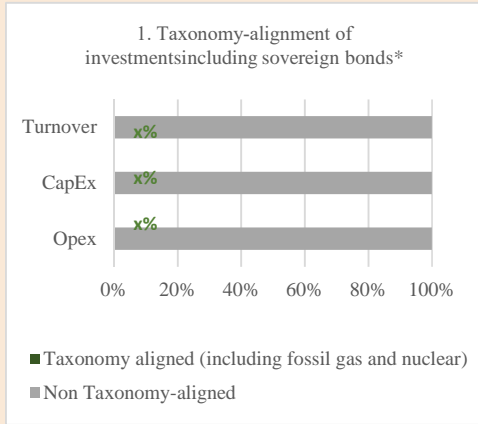

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

*The graphs below show in green the percentage of investments that were aligned with the EU*

*Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Data not yet available

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- *What was the share of investments in transitional and enabling activities?*

Reliable data regarding transitional and enabling activities was not available during the period.

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

In previous periods the regulation was not yet in force.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **40.82%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments?**

This product did not commit to have social sustainable investments over the period.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI’s control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI’s Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- *How does the reference benchmark differ from a broad market index?*

This product does not have an ESG Benchmark

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the reference benchmark?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the broad market index?*

This product does not have an ESG Benchmark.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Medtech Fam Fund

Legal entity identifier: 254900HQ05SNSPZCOS64

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

--	--

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The product has respected all material aspects of the characteristics described in the prospectus

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

the end of the period:

- The weighted average ESG rating of the portfolio is D+
- The weighted average ESG rating of the reference index is D+

● *... and compared to previous periods?*

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● *What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

5. follow best environmental and social practices; and
6. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi Group ESG Regulatory Statement available at [www.cpr-am.lu](http://www.cpr-am.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of CPR Invest’s Compartments.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at [www.cpr-am.lu](http://www.cpr-am.lu).

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01 January 2022 to 31 December 2022**

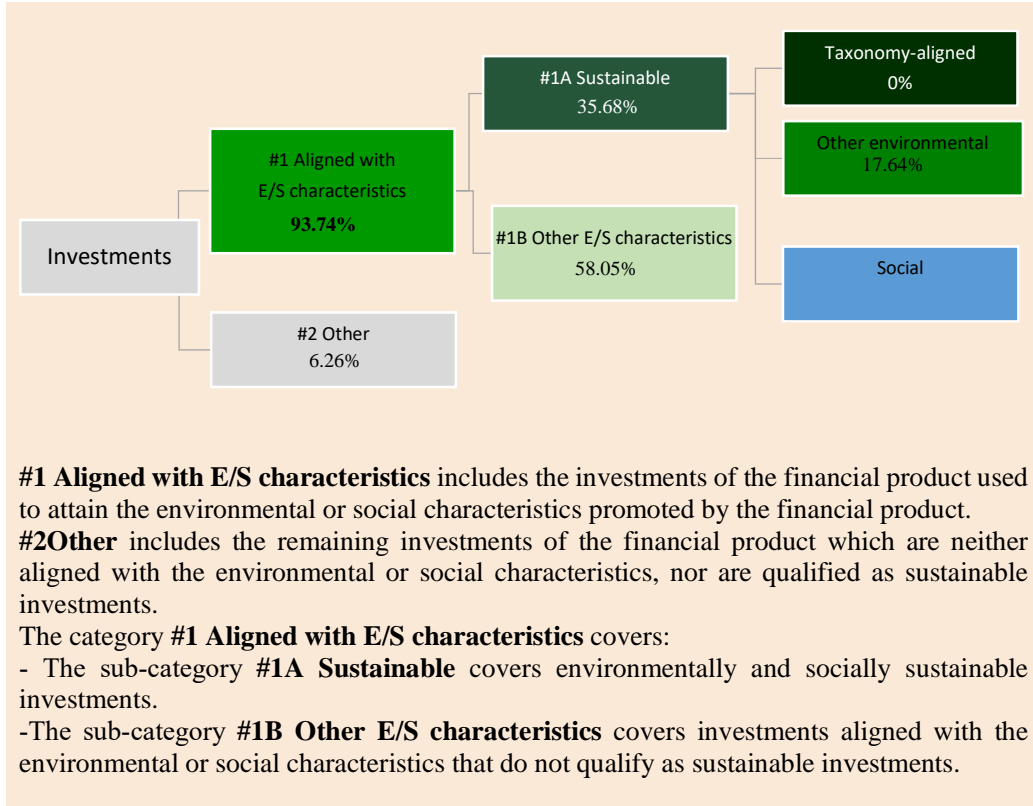

Largest Investments	Sector	% Assets	Country
ABBOTT LABORATORIES	Health Care Equipment & Supplies	9.24%	USA
BOSTON SCIENTIFIC	Health Care Equipment & Supplies	8.11%	USA
INTUITIVE SURGIC INC	Health Care Equipment & Supplies	8.01%	USA
MEDTRONIC PLC	Health Care Equipment & Supplies	7.25%	USA
BECTON DICKINSON	Health Care Equipment & Supplies	4.23%	USA
DEXCOM INC	Health Care Equipment & Supplies	4.15%	USA
EDWARDS LIFESCIENCES CORP	Health Care Equipment & Supplies	4.14%	USA
IDEXX LABORATORIES	Health Care Equipment & Supplies	3.35%	USA
HOYA	Health Care Equipment & Supplies	2.76%	JPN
ESSILORLUXOTTICA	Health Care Equipment & Supplies	2.71%	FRA
SIEMENS HEALTHINEERS AG	Health Care Equipment & Supplies	2.35%	DEU
SMITH & NEPHEW	Health Care Equipment & Supplies	2.35%	GBR
ALCON INC - CHF	Health Care Equipment & Supplies	2.18%	CHE
RESMED INC	Health Care Equipment & Supplies	2.16%	USA
TERUMO	Health Care Equipment & Supplies	2.05%	JPN

What was the proportion of sustainability-related investments?

What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	% Assets
HEALTH CARE EQUIPMENT & SUPPLIES	90.89%
LIFE SCIENCES TOOLS & SERVICES	5.51%
HEALTH CARE PROVIDERS & SERVICES	0.52%
TREASURIES	0.50%
PHARMACEUTICALS	0.45%
FOREX	0.31%

**Taxonomy-aligned activities** are expressed as a share of:

-**turnover** reflecting the share of revenue from green activities of investee companies

-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Reliable data regarding the EU Taxonomy was not available during the period

*The graphs below show in green the percentage of investments that were aligned with the EU*

*Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Data not yet available

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In previous periods the regulation was not yet in force.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **17.64%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, **or for which data is not yet available to perform an EU taxonomy assessment.**

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of socially sustainable investments?**

This product did not commit to have social sustainable investments over the period.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI’s control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI’s Group Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Amundi Group Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- *How does the reference benchmark differ from a broad market index?*

This product does not have an ESG Benchmark

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the reference benchmark?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the broad market index?*

This product does not have an ESG Benchmark.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/85**

**Product name:** Sustainable Future Connectivity FAM Fund  
**Legal entity identifier:** 254900RJHZPU7LT4ZQ41

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**The EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

<b>Did this financial product have a sustainable investment objective?</b> <i>[tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments]</i>	
<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 22.4% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. The Fund invested in the equity securities of companies throughout the world, that were linked to the theme of future connectivity (the enablers, networks and beneficiaries of next generation communications). Investments were made in companies that are involved in the roll out of cellular networks, wired networks, internet infrastructure and online content production.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

***How did the sustainability indicators perform?***

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- i. 93% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii. in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii. 22.4% of the mandate was invested in sustainable investments;
- iv. 8.8% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v. 13.6% of the mandate invested in sustainable investments with a social objective.

● ***...and compared to previous periods?***

Not applicable as this is the first reporting period

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

While it did not have as its objective a sustainable investment, it had a proportion of 22.4% of sustainable investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The mandate determined a sustainable investment as follows:

- (a) issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity’s existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a ‘Very Severe’ controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be ‘sustainable investments’ Fidelity’s fundamental research determined that the company was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts through effective management or transition.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

**How did this financial product consider principal adverse impacts on sustainability factors?**

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence - analysis of whether principle adverse impacts were material and negative. /
- (ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions - When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

In respect of its direct investments, the Fund was subjected to:

- 1) Firm-wide exclusions list, which included cluster munitions and anti-personnel landmines, and
- 2) a “Sustainable Fund Exclusion List”, which included, but was not limited to, tobacco, weapons and thermal coal and

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

- 3) a principle-based screening policy which included:
  - a) norms-based screening of issuers which the investment manager considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
  - b) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds was applied.
- 4) Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

The above exclusions and screens (the “Exclusions”) may be updated from time to time. Please refer to the website for further information on the Sustainable investing framework ([fidelityinternational.com](http://fidelityinternational.com)) and further details on the Exclusion Policy can be found on the Management Company’s website at the following link [FAM - Sustainability | Fineco FAM - Fineco FAM \(\[finecoassetmanagement.com\]\(http://finecoassetmanagement.com\)\)](#)

The investment manager also had discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- (i) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (ii) Voting - Fidelity’s voting policy includes explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (iii) Quarterly reviews - monitoring of principal adverse impacts through The Fund’s quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

**To what extent we re the sustainable investments with an environmental objective aligned with the EU Taxonomy?** *[include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]*

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the Mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the Mandate is measured by turnover.

*[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

Turnover - 0%  
 Capex - 0%  
 Opex - 0%

**What was the share of investments made in transitional and enabling activities?**

Due to data constraints, we aim to report the share of investments in transitional and enabling activities in our next periodic disclosure.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

*[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]*

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The fund invested 8.8% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

The fund invested 13.6% in sustainable investments with a social objective.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund was invested in securities of issuers that were able to demonstrate that they were on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which was used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment managers proprietary ESG ratings framework as well as their access to external ESG data providers and ratings agencies have allowed them to assess the ESG characteristics of fund holdings over the period, and maintain a consideration of Principle Adverse Impacts. Included in the assessment is to what extent the issuers of these securities deliver on our expectations for best practices. Additionally, the Investment manager have instated a Quarterly Sustainability Review for their Article 8 funds, which has created a specific forum for discussion of the funds qualitative and quantitative ESG characteristics, and whether they are consistent with requirements and client expectations. This is an extension of their pre-existing risk and compliance processes. Where appropriate they have utilised their spheres of influence on companies via active engagement and stewardship activities.

**How did this financial product perform compared to the reference benchmark?**

An index was not designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promoted.

- ***How does the reference benchmark differ from a broad market index?***  
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***  
Not applicable
- ***How did this financial product perform compared with the broad market index?***  
Not applicable

*[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]*

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

FAM Series UCITS ICAV

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product: Changing Lifestyles FAM Fund

Legal Entity Identifier: 254900QNFKPR5TD69926

Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Did this financial product have a sustainable investment objective?**

Yes
   No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments
<input type="checkbox"/> In economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> With an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> In economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> With an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> With a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager’s rating system. This means that the Fund’s weighted average score over a rolling six-month period up to the end of the reference period was higher than the benchmark’s weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders’ proprietary tool that provides an estimate of the net “impact” that an issuer may create in terms of social and environmental “costs” or “benefits”. It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders’ own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2022 to 31 December 2022.

Refer to page 1 comment. Here mentions from 1 August 2022. Are the percentages reflected on % sustainable investments reflects from this period?

#### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.3% and the benchmark's sustainability score for the reference period was -4.6%.

In each case the sustainability score is calculated as a notional percentage as described above.

As measured at the end of the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- Donations
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the MSCI All Country World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI All Country World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 67% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments over the four months prior to the end of the reference period, based on month-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

#### • *...and compared to previous periods?*

As this is our first reporting period, this question is not applicable.

#### • *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to increasing benefits by way of the following:

- Connectivity: the estimated societal benefits from companies that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue

The above examples of the objectives of the sustainable investments that the Fund made are based on data as at the end of the reference period. Other objectives may have applied during the reference period.

#### ***• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. The Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied certain exceptions to the list during the reference period.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found under "Sustainability Related Disclosures" on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

#### ***How were the indicators for adverse impacts on sustainability factors taken into account?***

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied certain exceptions to the list during the reference period.

In addition, the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

##### Climate Change

PAIs 1, 2, 3, 4, 5, 6 and 19 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

##### Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

##### Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

##### Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

##### Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

##### Corporate Governance

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

PAIs 20, 12 and 13 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

#### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments was aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

We used a list of UNGC violators as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors involved classifying the indicators into three categories:

##### 1. Set thresholds

For certain PAIs (e.g. PAI 10 on violations of UNGC principles), we set thresholds for considering an investment to be a sustainable investment. Investments in breach of these thresholds were not eligible to be held as sustainable investments. Compliance with these thresholds was monitored on an ongoing basis via the Investment Manager’s portfolio compliance framework.

##### 2. Active ownership

During the reference period, the Investment Manager engaged in line with the approach and expectations set out in our Engagement Blueprint (Link <https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf>) and as further described above. A summary of Schroders firm-wide engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
CLIMATE CHANGE	738
DIVERSITY AND INCLUSION	72
GOVERNANCE AND OVERSIGHT	3,096
HUMAN CAPITAL MANAGEMENT	130
HUMAN RIGHTS	121
NATURAL CAPITAL AND BIODIVERSITY	95

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

##### 3. Improve coverage

Some of the engagements identified in the table above involved discussions where the primary focus was to increase reporting on sustainability data. The purpose is to improve coverage of the PAIs, for example PAI 9 on hazardous waste ratio.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

#### What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **01 January 2022 to 31 December 2022**

Largest Investments	Sector	% Assets	Country
DOLLAR GENERAL CORPORATION COMMON STOCK USD0.875	CONSUMER DISCRETIONARY	4.07	UNITED STATES
TJX COS INCORPORATED COMMON STOCK USD1	CONSUMER DISCRETIONARY	3.50	UNITED STATES
AIA GROUP LIMITED USD1	FINANCIALS	3.35	HONG KONG
MASTERCARD INCORPORATED CLASS A COMMON STOCK USD0.0001	INFORMATION TECHNOLOGY	3.28	UNITED STATES
BAYERISCHE MOTOREN WERKE AG	CONSUMER DISCRETIONARY	3.25	GERMANY
RECKITT BENCKISER GROUP ORDINARY 10P	CONSUMER STAPLES	3.09	UNITED KINGDOM
BOOKING HOLDINGS INCORPORATED COMMON STOCK USD0.008	CONSUMER DISCRETIONARY	2.98	UNITED STATES
LOWE'S COMPANIES INCORPORATED COMMON STOCK USD0.50	CONSUMER DISCRETIONARY	2.95	UNITED STATES

MONCLER SPA NPV	CONSUMER DISCRETIONARY	2.57	ITALY
ALIBABA GROUP HOLDING LIMITED USD0.000003125	CONSUMER DISCRETIONARY	2.56	CHINA

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

#### What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

##### • What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S

## FAM Series UCITS ICAV

### Unaudited Section (continued)

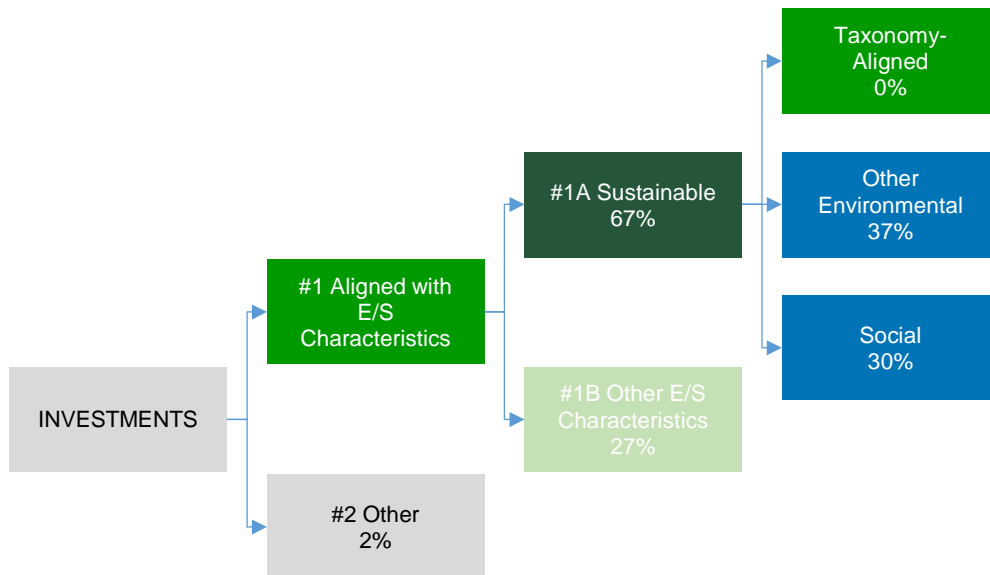

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

characteristics represents the average of the last four months of the reference period, based on month-end data. Also included within #1 is the proportion of assets that were invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 67% of its assets in sustainable investments. This percentage represents the average of the last four months of the reference period, based on month-end data. Within this, 37% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes.

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## FAM Series UCITS ICAV

### Unaudited Section (continued)

### Sustainable Finance Disclosure Regulation (SFDR) (continued)

#### • *In which economic sectors were the investments made?*

During the reference period investments were made in the following economic sectors:

Sector	% Assets
CONSUMER DISCRETIONARY	54.08
CONSUMER STAPLES	16.83
COMMUNICATION SERVICES	7.11
INDUSTRIALS	5.48
FINANCIALS	5.31
INFORMATION TECHNOLOGY	5.13
HEALTH CARE	4.03
CASH	2.03

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

#### • *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?*

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

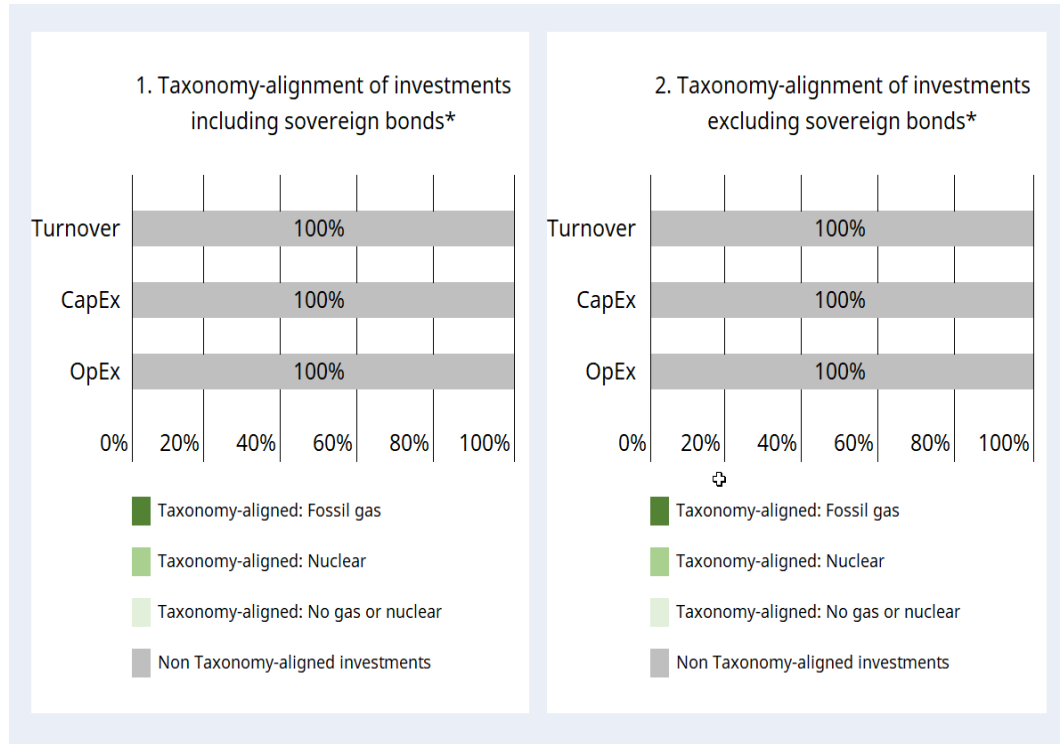

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**• What was the share of investments made in transitional and enabling activities?**

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## FAM Series UCITS ICAV

### Unaudited Section (continued)

#### Sustainable Finance Disclosure Regulation (SFDR) (continued)

**• How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

As this is our first reporting period, this question is not applicable.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

The Fund invested 37% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. This percentage is a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

**What was the share of socially sustainable investments?**

The Fund invested 30% of its assets in sustainable investments with a social objective. This percentage is a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period a number of counterparties were removed from the approved list for all funds in line with our policy and compliance requirements. This meant that such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

**What actions have been taken to attain the environmental and/or social characteristics during the reference period?**

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf>). A summary of Schroders engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies. We aim to drive change that protects and enhances the value of our investments.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**• How did the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

## **Investment Manager's Report (continued)**

### **STOXX Europe 600 Index FAM Fund (the "Sub-Fund")**

STOXX Europe 600 Index FAM Fund had a net return of -10.93% in 2022.

The war that emerged in Ukraine triggered a global shock in late February. The European countries have close economic ties with Ukraine and Russia and rely on Russian oil and gas. As a result, the European equities experienced substantial outflows as investors became concerned by the spike in energy prices, energy supply shocks and the resultant impact on business and consumer demand and economic activity.

The fund outflow in Europe appeared to be driven by investor panic to switch out of the region, which investors perceived to be the most vulnerable to the ongoing conflict in Ukraine. The markets continued to be under pressure through the second quarter. The US and the euro area were running inflation of around 8-9%, which triggered a policy response by the key central banks: the Fed introduced a 50 basis points hike in May, followed by another increase by 75 basis points in June. Any hopes of interest rate cuts were dashed as central banks reaffirmed their commitment to fighting inflation. The Federal Reserve, European Central Bank and Bank of England all raised interest rates in the Q3 2022. In the last quarter of 2022, gains came from a variety of sectors, notably economically-sensitive areas like energy, financials, industrials and consumer discretionary.

The sector contributing the most to the returns over the period was energy. Industrials and information technology contributed negatively the most followed by consumer discretionary and consumer staples.

### **FAM MSCI World Index Fund (the "Sub-Fund")**

FAM MSCI World Index Fund posted a net return of -12.88% in 2022.

In Q1 2022, Russia's invasion of Ukraine drew widespread condemnation and elicited a range of strict sanctions from the US and its allies. Similarly in Europe, the region has close economic ties with Ukraine and Russia, particularly when it comes to reliance on Russian oil and gas. This continued in second quarter along with higher inflation denting the consumer confidence. Meanwhile, in US Investor focus was trained on inflation and the policy response from the Federal Reserve (Fed) for much of the period. Any hopes of interest rate cuts were dashed as central banks reaffirmed their commitment to fighting inflation. The Federal Reserve, European Central Bank and Bank of England all raised interest rates in the Q3 2022. US equities made robust gains in Q4 2022, with much of the progress made in November. Investors balanced ongoing caution from the Federal Reserve (Fed) with indications that the pace of policy tightening would slow, and signs that elevated inflation could be cooling. There were also especially strong corporate earnings in certain sectors. In Europe, gains came from a variety of sectors, notably economically-sensitive areas like energy, financials, industrials and consumer discretionary.

In terms of sectors, Energy was the leading industry for the index with a +1.67% contribution. Information Technology was comfortably the biggest laggard as it severely dragged with its -6.14% contribution, followed by Consumer Discretionary (-3.54%) and Communication Services (-2.76%).

From a country perspective, Australia was the leading nation despite just +0.03% contribution. The United States however was by far the biggest laggard with -9.6% contribution.

### **S&P 500 Index FAM Fund (the "Sub-Fund")**

S&P 500 Index FAM Fund posted a net return of -13.26% in 2022.

The war that emerged in Ukraine triggered a global shock in late February. The consequent sanctions that the West introduced targeted various areas of the Russian economy. The spike in energy and food prices amplified existing concerns over inflation pressure. As the CPI in the US hit 7.9% in February, the Federal Reserve moved to raise rates by 25 basis points in March with expectations for more aggressive tightening in the future.

The markets continued to be under pressure through the second quarter. Despite the rhetoric by the Fed that the US economy is strong enough to withstand the tighter monetary policy, investors have been pricing in risks of the deterioration of economic growth. Any hopes of interest rate cuts were dashed as central banks reaffirmed their commitment to fighting inflation. The Federal Reserve, European Central Bank and Bank of England all raised interest rates in the Q3 2022.

US equities made robust gains in last quarter of 2022, with much of the progress made in November. Investors balanced ongoing caution from the Federal Reserve with indications that the pace of policy tightening would slow, and signs that elevated inflation could be cooling. There were also especially strong corporate earnings in certain sectors.

The sector contributing the most to the returns over the period was energy followed by health care and consumer staples. Information technology contributed negatively the most followed by consumer discretionary and communication services.

### **FAM MSCI AC Asia Pacific Ex Japan Index Fund (the "Sub-Fund")**

FAM MSCI AC Asia Pacific Ex Japan Index Fund had a net return of -12.51 % over the year of 2022. The product tracked its comparator closely in 2022. The product tracked its comparator closely in 2022.

Global equity markets experienced a tough 2022, posting their worst performance since GFC in 2018. Its negative performance was mainly driven by high valuation multiples, Russia's invasion of Ukraine and inflation. Continuation of persistent inflation, mainly driven by supply chain bottlenecks, in 2022 prompted central banks around the world to aggressively start hiking interest rates hurting stocks, in particular growth stocks which due to their higher valuation multiples and the nature of long duration earnings was hurt the most. On the contrary the cheaper part of the market held out relatively well as can be seen by the value style. In the US inflation reached a 40 year high above 9% in June which appears to have been the peak and eased to 6.5% in December. In Q1 2022, Chinese equities were negatively affected by renewed Covid-19 outbreaks, leading to new lockdowns in some major cities. Moving to Q2 2022, lockdown measures in certain cities were eased and macroeconomic indicators began to pick up. Meanwhile, additional economic support measures were announced. In Q3 2022, the concerns over rising interest rates, as countries around the world battle soaring inflation, affected Chinese market. In Q4 2022, China's relaxation of its zero-Covid policy helped the market. China's re-opening after dropping the zero-Covid policy in late December 2022 helped propel the advance.

In terms of sectors, best performance was achieved on Energy, being only sector which delivered a positive performance in 2022. Worst performing sectors were Information Technology and Communication Services. Information Technology was the biggest laggard followed by Communication Services and health care. In terms of geographical exposure, most of its negative exposure came from EM countries with China followed by Indonesia the largest detractors.

### **FAM MSCI Emerging Markets Index Fund (the "Sub-Fund")**

FAM MSCI Emerging Markets Index Fund posted a net return of -15.95% in 2022.

In Q1 2022, Chinese equities were negatively affected by renewed Covid-19 outbreaks, leading to new lockdowns in some major cities. Moving to Q2 2022, lockdown measures in certain cities were eased and macroeconomic indicators began to pick up. Meanwhile, additional economic support measures were announced. In Q3 2022, the concerns over rising interest rates, as countries around the world battle soaring inflation, affected Chinese market. In Q4 2022, China's relaxation of its zero-Covid policy helped the market. China's re-opening after dropping the zero-Covid policy in late December 2022 helped propel the advance.

The South Korean market was impacted by sectors such as financials, technology and energy being impacted negatively amid fears of recession. Taiwanese market was also impacted negatively with rising inflation and supply chain issues; similarly the case for other markets such as India.

From a sector perspective for the index, Financials was the leader of the pack, despite only contributing +0.33% as Utilities (+0.05%) and Energy (+0.01%) were the only other slightly positive segments. Information Technology was the clear laggard industry with its -6.51%, contribution as Communication Services (-2.29%) and Consumer Discretionary (-1.87%) also significantly dragged the index down.

In terms of countries, Brazil was the largest contributor with +0.82%. On the other hand, the laggards were much greater in volume, with China's significant -4.91% contribution being especially draining on the index.

### **Fineco AM Smart Factors Europe Fund (the "Sub-Fund")**

FAM Smart Factors Europe was down 11.2% in 2022. October saw investor sentiment improvement in the absence of bad news beyond what was already in the market price. European equities saw positive returns in October and November. In particular, the better-than-expected US inflation reading strengthened hopes that the Federal Reserve's pace of interest rate rises would slow going forward. Investors into European stocks anticipated that the European Central Bank would follow suit. Moreover, the signs of China loosening its strict Covid rules, which have weighed on economic activity, were positive for Europe. On a negative note, the overall economic picture remained grim as purchasing manager indices were in contraction territory, and layoffs have been increasing. Despite the market drifting lower in December, valuations for the region remained unchanged, offset by deterioration in fundamentals. The risk-off sentiment came back in December albeit didn't deteriorate fund returns for the quarter.

## **Investment Manager's Report (continued)**

### **Bluestar Global Logistics Index FAM Fund (the "Sub-Fund")**

Bluestar Global Logistics Index FAM Fund had a net return of -25.2% over the year of 2022.

The product tracked its comparator closely in 2022.

2022 was a tough year for the global logistics segment, as multiple macro headwinds converged on the industry. Amongst these factors that disrupted global logistics markets were the war in Ukraine and the steep rise in global commodity prices led by energy. The Baltic Dry Index lost about 30% in 2022 reflecting slowdown in Global Sea Freight Forwarding market and supply chain issues. Looking just at the fourth quarter of last year we saw notable strength in the logistics automation equipment stocks as all members of this segment experienced significant gains.

The war that emerged in Ukraine triggered a global shock in late February. The consequent sanctions that the West introduced targeted various areas of the Russian economy. The spike in energy and food prices amplified existing concerns over inflation pressure. As the CPI in the US hit 7.9% in February, the Federal Reserve moved to raise rates by 25 basis points in March with expectations for more aggressive tightening in the future.

The markets continued to be under pressure through the second quarter. Despite the rhetoric by the Fed that the US economy is strong enough to withstand the tighter monetary policy, investors have been pricing in risks of the deterioration of economic growth. Any hopes of interest rate cuts were dashed as central banks reaffirmed their commitment to fighting inflation. The Federal Reserve, European Central Bank and Bank of England all raised interest rates in the Q3 2022.

Industrials, worth around 63% of the Index, was the worst contributor to total return followed by Real Estate though all sectors contributed negatively to funds' 2022 negative performance.

March 2023**

# **FAM Series UCITS ICAV**

## **Investment Manager’s Report (continued)**

### **Fineco AM Euro Inflation-linked Government Bond Fund (the “Sub-Fund”)**

In 2022, the FAM Euro Inflation Linked Government Bond Fund heavily outperformed its index and overall performance in European inflation linked bonds was stronger than the corresponding conventional government bond indices as Inflation linked bond, while having negative returns still outperformed other bond sub asset classes. The reason for the outperformance of the asset class was the rise of inflation expectations over the period, dominated by post Covid supply bottlenecks and the Ukraine war. The fund was able to add additional value over the index through overlay strategies. Examples of which were our decision to underweight UK bonds during the brief Truss premiership and also strategic positioning underweight Japanese government bonds prior to the Bank of Japan partially moving yield curve control. Both positions benefitted performance. We also had a conviction to be long US bonds versus European bonds which also benefitted relative performance.

## Investment Manager's Report (continued)

### Ultra Short Term Bond SRI FAM Fund (the "Sub-Fund")

At the end of 2021, the tone of central bankers, adopting a "hawkish" stance, had already worried investors. The possibility of a more persistent inflation than expected led to growing fears of a cycle of rising key rates, particularly in the United States. The year 2022 has confirmed this trend: month after month, inflation figures have continued to reach record highs, driven by food and energy.

The upward trend in rates therefore continued and even intensified throughout 2022. The Fed, which was planning to raise its key rates three times at the end of 2021, raised them seven times in 2022 (including four 75 basis point hikes). The ECB raised its key rates four times, thus ending the era of negative rates that had lasted for more than 10 years.

The political and geopolitical situation did not help reassure the markets. Tensions between Russia and Ukraine developed into an armed conflict on February 23, which resulted in an immediate surge in oil and gas prices (\$128 per barrel of oil in March). The risk that the rise in energy prices could turn into a recession has complicated the equation for central banks, which were forced to arbitrate between the risk of inflation and recession.

Against this backdrop, Euro IG credit spreads showed some resilience in January, before widening significantly in the second half of the year.

The spread vs. Germany of the ICE Bofa 1-3 year Corp € index, which is a good proxy for the fund's investment universe, rose from 70 bp in early January to a high of 200 bp in October before closing the year at 140 bp.

Rising interest rates were the main driver of the widening of credit spreads over the year. The primary market was much quieter in 2022 than in 2021, with 20% fewer issues. This trend peaked in July before a fairly encouraging recovery in the second half of August, albeit in volumes half those of August 2021.

In this context, the fund displayed a net annual performance of +0.04% in 2022, mainly thanks to credit spreads effects. The modified duration was reduced progressively and neared 0 at year-end.

Looking ahead, we maintain our cautious stance on interest rate exposure: central banks seem determined to fight inflation, which will weigh on rates. We are more positive on credit: despite the significant tightening recorded at the end of 2022, spreads remain at very attractive levels, particularly in the 2-3 year segment. In terms of sectors, we favor the banking sector, which offers the most attractive credit quality/yield ratio, which should also benefit from the rate hike cycle, and which should finally be massively present in issuance in 2023.

## **Investment Manager's Report (continued)**

### **Fineco AM Bloomberg Euro Aggregate Treasury 5-7 Year Index Fund (the "Sub-Fund")**

2022 was a difficult year for all asset classes as central banks tried to get on top of inflation which came to be more structural than transitory as once thought. This was a surprise to the market as they were led to think interest rates would not rise too much due to a dovish ECB. It became more clear as the year progressed that the inflation that we were met with was actually not as transitory as Lagarde and Philip Lane believed it to be. As central banks globally began to fret that second round effects would take hold, the ECB were all but forced to raise interest rates. The fund returned -4.1% after fees in 2022 and in relative terms the fund slightly outperformed the benchmark.

## **DEPOSITARY'S REPORT TO THE SHAREHOLDERS OF FAM SERIES UCITS ICAV**

We, BNP Paribas S.A., Dublin Branch, appointed Depositary to the ICAV provide this report solely in favour of the investors of the Fund as a body for the year ended 31 December 2022 (“the Accounting Period”). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011) as amended, (“the UCITS Regulations”). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the UCITS Regulations, we have enquired into the conduct of the ICAV for the Accounting Period and we hereby report thereon to the investors of the Fund as follows;

We are of the opinion that the Fund has been managed during the Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Sub-Fund by the constitutional documents, the Regulations and by the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (“the Central Bank UCITS Regulations”); and
- (ii) otherwise in accordance with the provisions of the constitutional documents, the Regulations and the Central Bank UCITS Regulations.

# FAM Series UCITS ICAV

## Directors' Report

For the financial year ended 31 December 2022

The Directors of FAM Series UCITS ICAV (the "ICAV") submit their report together with the audited Financial Statements for the financial year ended 31 December 2022.

### Principal activities

The ICAV has been authorised by the Central Bank of Ireland (the "Central Bank") as an Irish Collective Asset-Management Vehicle pursuant to the Irish Collective Asset-Management Vehicles Act 2015 (the "ICAV Act"). The ICAV has been authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended).

The ICAV is structured as an umbrella entity composed of different Sub-Funds. Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

### Statement of Directors' Responsibilities in Respect of the Financial Statements

The Directors are responsible for preparing the Financial Statements in accordance with applicable Irish law and International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU").

Irish company law requires the Directors to prepare Financial Statements for each financial year, which give a true and fair view of the state of affairs of the ICAV and of the profit or loss of the ICAV for that year. In preparing those Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that the ICAV will not continue in business; and
- state whether the Financial Statements have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and reasons for any material departure from those standards.

The Directors confirm that they have complied with the above requirements in preparing the Financial Statements for the year ended 31 December 2022 (the "Financial Statements"). In carrying out these requirements, the Directors have appointed BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") to act as administrator to the ICAV.

### Review of the business and future developments

A comprehensive overview of the ICAV's and its Sub-Funds' activities and its future developments are set out in the Investment Manager's reports. Investment objectives may change from time to time, these will be reflected in the prospectus of the ICAV and the relevant Sub-Fund supplement.

### Risks and uncertainties

The principal risks and uncertainties which the ICAV faces relate to the use of financial instruments and are listed in note 13 "Financial Instruments and Associated Risks".

### Results and dividends

The results for the financial year are shown in the Statement of Comprehensive Income on pages 75-85.

### Corporate Governance

The Directors have voluntarily adopted the 'Corporate Governance Code for Collective Investment Schemes and Management Companies', as published by Irish Funds in December 2011 (the "IF Code"), as the ICAV's corporate governance code. In respect of the financial year ended 31 December 2022, the Directors confirm compliance with the provisions of the IF Code.

### Secretary

The Secretary that served during the financial year is listed on page 4.

# FAM Series UCITS ICAV

## Directors' Report (continued)

For the financial year ended 31 December 2022

### Directors

The Directors of the ICAV at 31 December 2022 were:

Jim Finn (Irish resident)\*

Fabio Melisso (Irish resident)\*\*

Ciaran Brady (Irish resident)\*\*

Lorenzo Di Pietrantonio (Irish resident)\*\*

\* Independent non-executive Director

\*\* Non-executive Director

### Transactions involving Directors

Other than as disclosed in Note 12 to the Financial Statements, there are no contracts or arrangements of any significance in relation to the business of the ICAV in which the Directors or Secretary had any interest as defined in the ICAV Act at any time during the financial year.

### Connected Persons

In accordance with the requirements of the UCITS Regulations, all transactions carried out with the ICAV by the promoter, manager, trustee, investment adviser and associates/group companies ("connected persons") must be conducted at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in the UCITS Regulations are applied to all transactions with connected persons and that transactions with connected persons entered into during the year complied with the obligations set out in the UCITS Regulations.

### Accounting Records

The measures taken by the Directors to secure compliance with the ICAV's obligation to keep adequate accounting records are the use of appropriate accounting systems and procedures and employment of competent persons through the appointment of the Administrator. The accounting records are kept at the registered address of the Administrator at Termini, 3 Arkle Road, Sandyford, Dublin 18, D18 T6T7, Ireland.

### Statement of Relevant Audit Information

The Directors acknowledge that they are responsible for providing all relevant audit information to the ICAV's statutory auditors in connection with preparing their report in accordance with section 330 of the Companies Act 2014 (as amended). The Directors confirm that:

- so far as the Directors are aware, there is no relevant audit information of which the ICAV's statutory auditors are not aware; and
- each of the Directors has taken all the steps that ought to have been taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the ICAV's statutory auditors are aware of that information.

### Going concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern.

### Independent Auditors

Deloitte Ireland LLP, Chartered Accountants and Statutory Audit Firm were appointed auditors for the financial year.

# FAM Series UCITS ICAV

## Directors' Report (continued)

For the financial year ended 31 December 2022

### Events during the financial year

#### Covid 19

The impact of the coronavirus outbreak was profound across all aspects of society. In developed economies, it is clear that the worst of the impact is now over. However, there is an expectation that seasonal peaks and new variants could give rise to renewed travel restrictions, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery and supply chain disruptions which will create ongoing challenges. Widescale and comprehensive vaccination programmes have been put in place in many countries which have had a positive effect. Nevertheless, the impact of COVID-19 continues to adversely affect the economies of many nations across the globe and this in turn may continue to impact investments held by each Fund.

#### Russia/Ukraine Conflict and sanctions

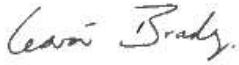

The outbreak of war in Ukraine and the related sanctions targeted against the Russian Federation has impacted the European and Global economies. The direct exposure to Ukraine, Russia or Belarus was and continues to be not material to the overall ICAV. However, the impact on the general economic situation may require in the future revisions of certain assumptions and estimates. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

All disclosures relating to events during the year ended 31 December 2022 are disclosed in Note 19 of the Financial Statements.

#### Events post financial year end

All disclosures relating to events after 31 December 2022 are disclosed in Note 20 of the Financial Statements.

Signed for and on behalf of the board of Directors by

Ciarán Brady

## INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FAM SERIES ICAV

### Report on the audit of the financial statements

#### Opinion on the financial statements of FAM Series ICAV (the 'ICAV')

---

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 December 2022 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the Applicable Regulations.

The financial statements we have audited comprise:

- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Schedule of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cashflows and
- the related notes 1 to 23 including a summary of significant accounting policies as set out in note 2.

The relevant financial reporting framework that has been applied in the preparation of the financial statements is the Irish Collective Asset-Management Vehicles Acts 2015-2020 ("the ICAV Act") and International Financial Reporting Standards (IFRS) as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

#### Basis for opinion

---

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "*Auditor's responsibilities for the audit of the financial statements*" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Summary of our audit approach

##### Key audit matters

The key audit matters that we identified in the current year were:

- Valuation of financial assets and liabilities at fair value through profit or loss
- Existence of financial assets and liabilities at fair value through profit or loss

<b>Materiality</b>	<p>The materiality that we used in the current year was 1% of average net assets determined in respect of each sub-fund and 0.50% of average net assets for the following sub-funds:</p> <ol style="list-style-type: none"> <li>1. Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF</li> <li>2. Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF</li> <li>3. Fineco AM MSCI World Metals and Mining UCITS ETF</li> <li>4. Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF</li> <li>5. Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF</li> <li>6. Fineco AM MSCI World Financials ESG Leaders UCITS ETF</li> <li>7. Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF</li> <li>8. Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF</li> <li>9. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF</li> <li>10. Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF</li> <li>11. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF</li> </ol>
<b>Scoping</b>	<p>Our audit is a risk-based approach taking into account the structure of the ICAV, types of investments, the involvement of the third-party service providers, the accounting processes and controls in place and the industry in which the ICAV operates.</p>
<b>Significant changes in our approach</b>	<p>There have been no significant changes in our approach from our prior year audit.</p>

## Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the ICAV's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls in place regarding going concern as part of our audit risk assessment procedures.
- Holding discussions with management on the directors' going concern assessment, the future plans for the ICAV and the feasibility of those plans.
- Challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- Reviewing all board meeting minutes during the period up to the date of approval of the financial statements, for evidence of any discussions and/or decisions that could impact the ICAV's ability to continue as a going concern.
- Reviewing the capital activity and NAV movements, subsequent to the financial year end.
- Assessing the adequacy of the relevant going concern disclosures made in the financial statements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

## Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

### Valuation of financial assets and liabilities at fair value through profit or loss

#### Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

The valuation of financial assets and liabilities at fair value through profit or loss is considered a key audit matter as it is the most significant number on the Statement of Financial Position, is a key driver of performance and due to the potential for management judgement and estimation in the valuation.

As financial assets and liabilities at fair value through profit or loss are a key driver of performance and due to their significance to the net asset value, there is a risk that these investments might not be correctly valued, in accordance with IFRS.

Refer also to note 14 in the financial statements.

#### How the scope of our audit responded to the key audit matter

- We considered the valuation basis used in light of the valuation policy as stipulated in the ICAV's Prospectus documents and the requirements of IFRS.
- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") ISAE 3402 Report and identified the key controls in place over the valuation process and reviewed those key controls for any exceptions.
- We independently valued all exchange traded securities using our own market feeds.
- We reviewed the adequacy of the fair value levelling disclosures in the financial statements.
- We revalued swap positions on a sample basis.
- We reviewed the fair value levelling disclosures in the financial statements to ensure they were appropriate.

### Existence of investments

#### Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

There is a risk that financial assets and liabilities at fair value through profit or loss recorded might not exist or might not be owned by the ICAV. Financial assets and liabilities at fair value through profit or loss are considered to be a key driver for the ICAV's performance.

Therefore, due to the significance of investments to the ICAV's financial statements, we have determined this as a key audit matter.

Refer also to note 14 in the financial statements.

## How the scope of our audit responded to the key audit matter

- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the “Administrator”) ISAE 3402 Report and identified the key controls in place over the reconciliation process and reviewed those key controls for any exceptions.
- We obtained direct confirmation of the investments of the ICAV from the Depository and brokers at year-end. Any reconciling items between the confirmations and the ICAV’s investment portfolios were investigated to ensure that trades were recorded in the correct reporting period.
- We completed alternative procedures in relation to a number of positions for which confirmations were not available at the issuance of this report.

Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the financial statements is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

## Our application of materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statement as a whole as follows:

<b>Basis for determining materiality</b>	<p>The materiality that we used in the current year was 1% of average net assets determined in respect of each sub-fund and 0.50% of average net assets for the following sub-funds:</p> <ol style="list-style-type: none"> <li>1. Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF</li> <li>2. Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF</li> <li>3. Fineco AM MSCI World Metals and Mining UCITS ETF</li> <li>4. Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF</li> <li>5. Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF</li> <li>6. Fineco AM MSCI World Financials ESG Leaders UCITS ETF</li> <li>7. Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF</li> <li>8. Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF</li> <li>9. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF</li> <li>10. Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF</li> <li>11. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF</li> </ol>
<b>Rationale for the benchmark applied</b>	<p>The Net Asset Value of the ICAV is the primary indicator of the size and performance of the ICAV and is considered the key area of interest for the shareholders, who are the primary users of the financial statements. The use of the average net Asset value is considered the industry practice benchmark for Investment Funds.</p>

The materiality used by the former auditor in the audit of the prior year financial statements was 1% of average net assets of the ICAV for all sub-funds.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole. Performance materiality was set at 50% of materiality for the 2022 audit. In determining performance materiality, we considered the following factors:

- our understanding of the ICAV;
- the quality of the control environment;
- the nature and extent of misstatements identified in previous audits; and
- our expectations in relation to misstatements in the current period.

We agreed with the Board of Directors that we would report to the Board of Directors all audit differences in excess of 5% of materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

## An overview of the scope of our audit

---

Our audit is a risk based approach taking into account the structure of the ICAV, types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the ICAV operates. The ICAV is incorporated as an Irish collective asset management vehicle with variable capital and segregated liability between sub-funds. The ICAV is authorised by the Central Bank of Ireland (the “Central Bank”) as a qualifying investor alternative investment fund.

The ICAV is organised as an umbrella fund with segregated liability between sub-funds. We assess the risks of each sub-fund separately. We have conducted our audit based on the books and records maintained by the administrator of FAM Series ICAV at 32 Molesworth Street, Dublin 2, Ireland.

## Other information

---

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor’s report thereon. The directors are responsible for the other information contained within.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

## Responsibilities of directors

---

As explained more fully in the Statement of Directors’ responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the ICAV’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

## Auditor's responsibilities for the audit of the financial statements

---

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>. This description forms part of our auditor's report.

## Extent to which the audit was considered capable of detecting irregularities, including fraud

---

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

### Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the ICAV's documentation of their policies and procedures relating to:
  - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
  - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
  - the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including IT and valuations regarding how and where fraud might occur in the financial statements and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas: Valuation of financial assets and liabilities at fair value through profit or loss and Revenue Recognition. In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the ICAV operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the ICAV Act, Listing Rules and the Applicable Regulations.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the ICAV's ability to operate or to avoid a material penalty. These included matters regulated by the Central Bank of Ireland.

## Audit response to risks identified

As a result of performing the above, we identified 'Valuation of financial assets at fair value through profit or loss as a key audit matter related to the potential risk of fraud. The key audit matters section of our report explains the matter in more detail and also describes the specific procedures we performed in response to that key audit matter.

In addition to the above, our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management and the Board of Directors concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance and reviewing correspondence with the Central Bank of Ireland; and
- In addressing the risk of fraud in Revenue Recognition, independently valuing all exchange traded securities using our own market feeds and completing an unrealised gain/loss reconciliation.
- In addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

## Report on other legal and regulatory requirements

### Matters on which we are required to report by the ICAV Act and the Applicable Regulations

---

In our opinion, the information given in the directors' report is consistent with the financial statements. The directors' report has been prepared in accordance with the ICAV Act.

### Matters on which we are required to report by exception

---

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration specified by the ICAV Act are not made.

## Opinion on other matters prescribed by the Applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

## Other matters which we are required to address

---

We were appointed by the Board of Directors on 23 November 2022 to audit the financial statements for the year ending 31 December 2022. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 5 years, covering the year ending 31 December 2022.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the ICAV in conducting the audit.

Our audit opinion is consistent with the additional report to the Board of Directors we are required to provide in accordance with ISA (Ireland) 260.

## Use of our report

---

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

## Notes to the Financial Statements for the financial year ended 31 December 2022

### 1. General Information

FAM Series UCITS ICAV (the “ICAV”) is an umbrella Irish Collective Asset-management Vehicle with segregated liability between its Sub-Funds and authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended). The ICAV was incorporated on 8 March 2018. On 7 October 2022, FAM Series UCITS ICAV listed on the Italian Stock Exchange (Borsa Italiana).

The ICAV is structured as an umbrella entity composed of different sub-funds (the “Sub-Funds”). Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

Effective 19 October 2022, the following Sub-Funds of the ICAV changed their name:

- Fineco AM Smart Factors Europe Fund was formerly known as Smart Factors Europe FAM Fund
- Fineco AM Smart Factors US Fund was formerly known as Smart Factors US FAM Fund
- Fineco AM Smart Factors World Fund was formerly known as Smart Factors World FAM Fund

Effective 25 November 2022, the following Sub-Fund of the ICAV changed their name:

- Fineco AM Euro Inflation-Linked Government Bond Fund was formerly known as FAM Euro Inflation-Linked Government Bond Fund

The investment objective of the below funds is to achieve long-term capital growth:

- FAM MSCI AC Asia Pacific Ex Japan Index Fund
- FAM MSCI Emerging Markets Index Fund
- FAM MSCI World Index Fund
- S&P 500 Index FAM Fund
- STOXX Europe 600 Index FAM Fund
- Fineco AM Smart Factors Europe Fund
- Fineco AM Smart Factors US Fund
- Fineco AM Smart Factors World Fund
- Bluestar Global Logistics Index FAM Fund

The investment objective of Global Defence FAM Fund is to provide a positive return at the Maturity Date linked to the performance of the Basket, to protect the Fund’s Net Asset Value per Share at 85% of the Initial Offer Price at the Maturity Date and to provide Shareholders with a Dividend on each Dividend Payment Date.

The investment objective of the below funds is to provide Shareholders with a Dividend on each Dividend Payment Date and to protect the Sub Fund’s Net Asset Value per Share at 100% of the Initial Offer Price at the Maturity Date:

- Global Defence FAM Fund 2023
- Smart Global Defence FAM Fund 2023
- Smart Global Defence FAM Fund 2023 II
- Smart Global Defence FAM Fund 2024
- Smart Global Defence FAM Fund 2024 USD

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 1. General Information (continued)

The investment objective of the below funds is to provide a positive return at the Maturity Date linked to the performance of the Basket and to provide Shareholders with a Dividend on each Dividend Payment Date.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 1. General Information (continued)

#### (a) Basis of Preparation

These Financial Statements have been prepared in accordance with International Financial Reporting Standards ('IFRS') issued by the International Accounting Standards Board ("IASB") and have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period.

#### Going Concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern. Therefore, the Financial Statements are prepared on the going concern basis.

#### New standards and interpretations effective

##### Onerous Contracts – Costs of Fulfilling a Contract – Amendments to IAS 37

In May 2020, the International Accounting Standards Board ("IASB") issued amendments to IAS 37 Provisions, Contingent Liabilities and Contingent Assets to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.

In particular, the amendments which clarify:

Entities that previously applied the incremental cost approach will see provisions increase to reflect the inclusion of costs related directly to contract activities, whilst entities that previously recognised contract loss provisions using the guidance from the former standard, IAS 11 Construction Contracts, will be required to exclude the allocation of indirect overheads from their provisions.

This amendment did not have a material impact on the ICAV.

There are no standards, interpretations or amendments to existing standards that are effective that would be expected to have a significant impact on the ICAV.

##### New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2022 and not early adopted

##### Classification of Liabilities as Current or Non-current - Amendments to IAS 1

In January 2020, the Board issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

In particular, the amendments which will become effective 1 January 2023 clarify:

- What is meant by a right to defer settlement.
- That a right to defer must exist at the end of the reporting period.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification.

This amendment is not expected to have a material impact on the ICAV.

# FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 1. General Information (continued)

### (a) Basis of Preparation (continued)

**New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2022 and not early adopted (continued)**

#### **Definition of Accounting Estimates - Amendments to IAS 8**

In February 2021, the Board issued amendments to IAS 8, in which it introduces a new definition of ‘accounting estimates’.

In particular, the amendments which will become effective 1 January 2023 clarify:

- the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors.
- how entities use measurement techniques and inputs to develop accounting estimates.

This amendment is not expected to have a material impact on the ICAV.

#### **Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2**

In February 2021, the Board issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements (the PS), in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures.

In particular, the amendments which will become effective 1 January 2023 clarify:

- that replacing the requirement for entities to disclose their ‘significant’ accounting policies with a requirement to disclose their ‘material’ accounting policies.
- that adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosure.

This amendment is not expected to have a material impact on the ICAV.

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the ICAV.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 2. Statement of Accounting Policies

The significant accounting policies adopted by the ICAV are as follows:

#### 2.1 Accounting Policies

##### (a) Financial Assets and Liabilities at Fair Value through Profit or Loss (“FVTPL”)

###### (i) Classification

The ICAV classifies financial assets and financial liabilities into the following categories:

Financial assets at FVTPL:

*Designated at FVTPL:*

- *Transferable Securities*
  - Bonds
  - Equities
- *Derivative Instruments*
  - Interest rate swaps
  - Total return swaps
  - Futures

Financial assets at amortised cost:

- *Loans and receivables: cash and cash equivalents and interest and other receivables.*

Financial liabilities at FVTPL:

*Designated at FVTPL:*

- *Derivative Instruments*
  - Interest rate swaps
  - Total return swaps
  - Futures

Financial liabilities at amortised cost:

- *Other liabilities: accrued expenses.*

The ICAV designates all equity securities, bonds, funds, treasury bills, exchange traded commodity, futures contracts, forward currency contracts, interest rate swaps, option contracts, contract for differences and rights and warrants at FVTPL on initial recognition because it manages these securities on a fair value basis in accordance with its documented investment strategy. Internal reporting and performance measurement of these securities are on a fair value basis.

A non-derivative financial asset with fixed or determinable payments may be classified as a loan and receivable unless it is quoted in an active market or is an asset for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

###### (ii) Initial Measurement

Financial assets and financial liabilities at FVTPL are initially recognised on the trade date, which is the date on which the ICAV becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised on the date on which they are originated.

Purchases and sales of financial instruments are accounted for on the trade date. Realised gains and losses on disposals of financial instruments are calculated using the First In, First Out (“FIFO”) method.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 2. Statement of Accounting Policies (continued)

#### 2.1 Accounting Policies (continued)

##### (a) Financial Assets and Liabilities at Fair Value through Profit or Loss (“FVTPL”) (continued)

###### (iii) Recognition

Financial instruments categorised at FVTPL are measured initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income. Financial assets and financial liabilities are recognised on the Statement of Financial Position when the ICAV becomes party to the contractual provisions of the instrument. A regular purchase of financial assets is recognised using trade date accounting. From this date any gains or losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

###### (iv) Fair Value Measurement

‘Fair value’ is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the ICAV has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the ICAV measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an on-going basis.

If there is no quoted price in an active market, then the ICAV uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

Investments in open-ended investment funds are valued at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the daily net asset value of these shares are recognised as net gains/losses on investment activities in the Statement of Comprehensive Income.

The ICAV recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

###### (v) Amortised Cost Measurement

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

###### (vi) Impairment

IFRS 9 replaces the ‘incurred loss’ model in IAS 39 with an ‘expected credit loss’ (“ECL”) model. The new impairment model applies to financial assets measured at amortised cost and debt investments at FVOCI, but not to investments in equity instruments. Under IFRS 9, credit losses are recognised earlier than under IAS 39.

A financial asset or liability not classified at FVTPL is assessed at each reporting date to determine whether there is objective evidence of impairment. A financial asset or a group of financial assets is ‘impaired’ if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset(s) and that loss event(s) had an impact on the estimated future cash flows of that asset(s) that can be estimated reliably.

# FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 2. Statement of Accounting Policies (continued)

### 2.1 Accounting Policies (continued)

#### (a) Financial Assets and Liabilities at Fair Value through Profit or Loss (“FVTPL”) (continued)

##### (vi) Impairment (continued)

Objective evidence that financial assets are impaired includes significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of the amount due on terms that the ICAV would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, or adverse changes in the payment status of the borrower.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset’s original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against receivables. Interest on the impaired asset continues to be recognised, if an event occurring after the impairment was recognised causes the amount of impairment loss to decrease, then the decrease in impairment loss is reversed through profit or loss.

##### (vii) Derecognition

The ICAV derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the ICAV neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest in such transferred financial assets that is created or retained by the ICAV is recognised as a separate asset or liability.

The ICAV enters into transactions whereby it transfers assets recognised on its Statement of Financial Position, but retains either all or substantially all of the risks and rewards of the transferred assets. If all or substantially all of the risks and rewards of the transferred assets are retained, then transferred assets are not derecognised. Transfer of assets usually includes sale and repurchase agreements where all or substantially all of the risks and rewards are retained.

The ICAV derecognises a financial liability when its contractual obligations are discharged, cancelled, or expired.

#### (b) Transferable Securities

##### Investment Funds

The Sub-Funds invest in a diversified portfolio of collective investment schemes, whether open or closed ended, regulated or unregulated, including investment companies, investment trusts and/or investment limited partnerships, which the Investment Manager considers will give consistent returns to investors in line with the target returns of the Sub-Funds and which may include investment in the other Sub-Funds of the ICAV (“Underlying Funds”).

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 2. Statement of Accounting Policies (continued)

#### 2.1 Accounting Policies (continued)

##### (c) Derivative Instruments

The Sub-Funds may enter into forward currency contracts and other derivative contracts mentioned below for the purposes of efficient portfolio management.

##### **Futures contracts**

Futures contracts are valued at the last traded price on the Sub-Fund's valuation date or if no price at the valuation date, the recent last traded price. Any gain or loss in fair value is recorded as unrealised gains or losses in the Statement of Comprehensive Income. Upon settlement a realised gain or loss is recognised in the Statement of Comprehensive Income.

##### **Interest rate swaps**

Interest rate swaps involve the exchange by the Sub-Fund with another party for their respective commitment to pay or receive interest on the notional amount of principal. The changes in contract values are recorded as unrealised gains or losses and the Sub-Funds recognise a realised gain or loss when the contract is closed. Movement of unrealised gains and losses on interest rate swaps are recognised in the Statement of Comprehensive Income.

##### **Total return swaps**

A total return swap is a derivative contract between two parties where they agree to exchange the investment return and income on an underlying asset or a basket of assets for the investment return and income on a different underlying asset or a basket of assets which is agreed between the parties. Realised and movement of unrealised gains and losses are recognized in the Statement of Comprehensive Income.

##### **Option contracts**

Option contracts give the right, but not the obligation, to buy or sell within a limited time, a specific financial instrument at a contracted price that may also be settled in cash, based on differentials between specified indices or prices. Options written create an obligation to buy or sell within a limited time, the specific financial instrument at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

There were open forward currency contracts, interest rate swaps, option contracts, futures contracts at 31 December 2022, and these are disclosed on the relevant Schedule of Investments of each Sub-Fund.

##### **Contracts for differences**

Contracts for differences are over-the-counter derivatives which take advantage of economic benefits which are not afforded through investing directly in certain securities markets. The Sub-Fund may purchase an equity contract for differences as a means of gaining exposure to the economic performance and cash flows of an equity security without the need for taking or making physical delivery of the security. A contract for differences is a financial instrument linked to an underlying share price. Consequently, no rights are acquired or obligations incurred relating to the underlying share and the Sub-Fund may buy or sell depending on the Investment Manager's view of a ICAV's share price. Contracts for differences are highly leveraged instruments and for a small deposit it is possible for the Sub-Fund to hold a position much greater than would be possible with a traditional investment. These are valued daily based on quoted market prices at the Statement of Financial Position dates. The fair value of contracts for differences is the difference between the contracted price and the volume weighted average price of the financial instrument multiplied by the number of shares specified within the contract.

##### **(d) Offsetting Financial Instruments**

Financial assets and liabilities are offset and the net amount reported on the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 2. Statement of Accounting Policies (continued)

#### 2.1 Accounting Policies (continued)

##### (e) Redeemable Participating Shares

The issued redeemable participating Shares (“Shares”) is at all times equal to the net asset value of the ICAV. The Shares are redeemable at the shareholders option and are classified as financial liabilities. The Shares can be put back to the ICAV at any time for cash equal to a proportionate share of the ICAV’s net asset value. The Shares are carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the share back to the ICAV. Each Sub-Fund’s Net Asset Value (“NAV”) per share is calculated by dividing the NAV of that Sub-Fund, being the value of its assets less its liabilities by the numbers of shares of that Sub-Fund then in issue.

##### (f) Use of Judgements and Estimates

The preparation of Financial Statements in conformity with IFRS as adopted by the EU requires management to make judgements, estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the Financial Statements. Estimates also affect the reported amounts of income and expenses for the reporting period in the Statement of Comprehensive Income. Actual results could differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised and in any future accounting periods affected. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year, as well as critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the Financial Statements are included in Note 13 and 14.

##### (g) Foreign Exchange

Items included in the ICAV’s Financial Statements are measured using the currency of the primary economic environment in which it operates (the “functional currency”). The functional currency for this ICAV is Euro (“EUR” or “€”) and each Sub-Fund’s base currency is disclosed below.

<b>Sub-Fund</b>	<b>Base currency</b>

The ICAV has adopted the functional currency of each Sub-Fund as the presentation currency for these Financial Statements. Assets and liabilities expressed in currencies other than the functional currency are converted into the functional currency using the exchange rates prevailing as at the Statement of Financial Position date. Transactions in foreign currencies are translated into EUR at exchange rates ruling at the transaction dates. Net currency gains and losses are recognised in the Statement of Comprehensive Income in determining the results for the financial year.

#### (h) Income

Interest income is recognised in the Statement of Comprehensive Income at the effective interest rate method.

Dividends are recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as “ex-dividend”. Dividend income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

#### (i) Expenses

All expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 2. Statement of Accounting Policies (continued)

#### 2.1 Accounting Policies (continued)

##### (j) Cash and Cash Equivalents

Cash comprises cash at banks and bank overdrafts. Cash equivalents are short term (up to three months), highly liquid investments, that are readily convertible to known amounts of cash and which are subject to insignificant changes in value. For the financial year ended 31 December 2022, cash equivalents held by the ICAV includes, commercial papers and treasury bills. They are held for the purpose of meeting short-term cash commitments rather than for investments or other purposes. The carrying amount of these assets is approximately equal to their fair value.

##### (k) Payable for Securities Purchased/Receivable for Securities Sold

Payable for securities purchased and receivable for securities sold include trades pending settlement.

##### (l) Redemptions Payable

Redemptions are recognized as liabilities when the amount requested by the unitholder in the irrevocable redemption notice becomes fixed.

##### (m) Subscriptions Receivable

Subscription receivable includes the amounts still to be collected from investor before the ICAV will issue the shares.

##### (n) Due from/to Brokers

Due from/to brokers represent margin accounts and cash collateral for borrowed securities. Margin accounts represent cash deposits with brokers, transferred as collateral against open derivative contracts.

##### (o) Organisational Costs

Costs incurred in organising the ICAV are amortised over the first five accounting periods of the ICAV in accordance the prospectus. This is not in accordance with IFRS but the Management assessed the costs to be immaterial to the ICAV and please refer to note 4 where Organisational Costs are outlined per sub fund.

##### (p) Management fee rebate

The ICAV has rebate agreements with certain investment managers of the Underlying Funds. These rebates are recorded on an accruals basis in the Statement of Comprehensive income.

##### (q) Anti-Dilution Levy

The Directors reserve the right to impose “an anti-dilution levy” representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought or sold), duties and charges and other dealing costs relating to the acquisition or disposal of assets and to preserve the value of the underlying assets of a Sub-Fund, in the event of receipt for processing of net subscriptions or net redemptions exceeding such percentage of the NAV of the Sub-Funds as determined by the Directors from time to time (including subscriptions and/or redemptions which would be effected as a result of requests for conversion from one Class into another Class). Any such provision will be deducted from the subscription proceeds in the case of net subscription requests exceeding the threshold of a Sub-Fund and deducted from the redemption proceeds in the case of net redemption requests exceeding the threshold of a Sub-Fund including the price of shares issued or redeemed as a result of requests for conversion. Any such sum will be paid into the account of the relevant Sub-Fund.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 7. Share Capital

The actual value of paid up share capital of the ICAV shall at all times equal to the NAV of the ICAV after deduction of liabilities. The Shares of the ICAV shall be divided into share capital of 5,000,000,000,000 Shares of no par value and 2 Subscriber Shares of €1.00 each and shall at all times be equal to the value for the time being of the issued share capital of the ICAV.

Each of the Shares (with the exception of the Subscriber Shares) entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of the relevant Sub-Fund attributable to the relevant class in respect of which they are issued save in the case of dividends declared prior to becoming a Shareholder.

The proceeds from the issue of Shares shall be applied in the books of the ICAV to the relevant Sub-Fund and shall be used on behalf of such Sub-Fund for the acquisition of assets in which a Fund may invest. The records and accounts of each Sub-Fund shall be maintained separately.

The Directors reserve the right to re-designate any class of Shares from time to time, provided that Shareholders in that class shall first have been notified by the ICAV that the Shares will be re-designated and shall have been given the opportunity to have their Shares redeemed by the ICAV, except that this requirement shall not apply where the Directors re-designate Shares in issue in order to facilitate the creation of an additional class.

Each of the Shares entitles the holder to attend and vote at meetings of the ICAV and of the relevant Sub-Fund represented by those Shares. No class of Shares confers on the holder there of any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other class of Shares or any voting rights in relation to matters relating solely to any other class of Shares.

Any resolution to alter the class rights of the Shares requires the approval of three quarters of the holders of the Shares of the relevant class represented or present and voting at a general meeting duly convened in accordance with the Instrument.

The Instrument of the ICAV empowers the Directors to issue fractional shares in the ICAV. Fractional shares will be issued where any part of the subscription monies for Shares represents less than the subscription price for one Share, provided however, that fractions shall not be less than 0.01 of a Share and shall not carry any voting rights at general meetings of the ICAV or a Sub-Fund and the NAV of any fractional share shall be the NAV per Share adjusted in proportion to the fraction.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 9. Directors' Fees

The Directors are entitled to a fee by way of remuneration for their services at a rate to be determined from time to time by the Directors. The aggregate amount of Directors' remuneration in any one year shall not exceed €30,000 (excluding Value Added Tax, ("VAT"), if any).

All Directors will be entitled to reimbursement by the ICAV of expenses properly incurred in connection with the business of the ICAV or the discharge of their duties. Fees related to the ICAV are charged to the trading Sub-Funds. Mr. Jim Finn is the only Director of the ICAV in receipt of a director's fee. All other Directors of the ICAV have each waived their entitlement to receive a director's fee.

The directors' fees charged for the year amounted to €6,816 (31 December 2021: €4,904). The directors' fees payable as at 31 December 2022 was €7,221 (31 December 2021: €7,455).

### 10. Administration Fees and Depositary Fees

The Manager and the Administrator entered into a new administration agreement which will be applicable for a three year period. The annual fee, payable out of the assets of the relevant Sub-Fund, is a rate of 0.05% (plus VAT, if any) and is a combined fee which includes both the fee of the Administrator and the fee of the Depositary. This fee is presented on the Statement of Comprehensive Income as Administration fees and Depositary fees.

The Administrator is also entitled to be reimbursed for all agreed registration and transaction fees and out of pocket expenses (plus VAT thereon, if any) properly incurred by it in the performance of its duties and responsibilities under the Administration Agreement.

### Depositary Fee

Prior to the new administration agreement, BNP Paribas S.A., Dublin Branch (the “Depositary”) was entitled to an annual fee of up to 0.2% per annum (plus VAT, if any) of the Net Asset Value of each Sub-Fund. The Depositary’s fees accrued daily and was payable monthly in arrears out of the assets of the relevant Sub-Fund.

The Depositary shall also be entitled to be reimbursed for all agreed transaction fees and out of pocket expenses properly incurred by it in the performance of its duties and responsibilities under the Depositary Agreement. The Depositary will also charge third party transaction fees and sub-custodian fees and charges at normal commercial rates. All such fees and expenses will be borne by the relevant Sub-Fund or Sub-Funds.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 11. Auditors Remuneration

The remuneration to the statutory audit firm in respect of the services rendered to the ICAV for the financial year is as follows:

	<b>2022</b>	<b>2021</b>
	<b>EUR</b>	<b>EUR</b>
Audit fee*	154,504	105,634

\*Audit fee amount shown is excluding VAT of 23%. There were no other fees paid to the statutory audit firm for tax or other assurance or non-audit work during the year.

### 12. Related and Connected Persons Transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The Directors of the ICAV are considered related parties. Details of Directors' fees charged during the year are disclosed in Note 9.

Mr. Fabio Melisso and Mr. Jim Finn (Independent director) are directors of the Manager and Mr. Ciaran Brady and Lorenzo Di Pietrantonio are employees of the Manager and will be considered to be interested in any agreement entered into by the ICAV with the Manager.

Sub-Funds of Core Series and FAM Evolution ICAV, which are also managed by the Manager, have made investments in the ICAV during the year. There were no other agreements entered into by the ICAV with either Core Series or FAM Evolution ICAV during the year. BNP Paribas Securities Services is also the securities lending agent.

The Investment Manager waived receipt of their management fee from ESG Target Global Coupon 2026 Fineco AM Fund V from launch date.

### Management Fee

The Manager is entitled to receive out of the assets of the ICAV a management fee in respect of each class, accrued daily and payable monthly in arrears at such annual percentage rate of the NAV of each class as set out in the relevant Sub-Fund supplement. Any out of pocket expenses incurred by the Manager in carrying out its role on behalf of the ICAV and its Sub-Funds shall be for its own account. These disclosed fees are the maximum charges capped as per the prospectus and actual fees charged may be lower. As per the prospectus the management fee rate can change during the year.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 13. Financial Instruments and Associated risks

Each Sub-Fund's investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the prospectus for a more detailed discussion of the risks inherent in investing in each Sub-Fund. The Sub-Funds' have exposure to the following risks from financial instruments:

- a) Market risk;
- b) Liquidity risk;
- c) Credit risk; and
- d) Operational risk;

#### **Risk Management framework**

The Directors review quarterly risk and investment performance reports and presentations from the Manager, or where applicable the Manager's delegate Investment Managers (together "the Manager" only for the purpose of Note 13), covering the Sub-Funds' performance and risk profile during the financial year.

The Manager is responsible for ensuring that each Sub-Fund is managed within the terms of their investment guidelines and limits set out in the prospectus. The Directors review the Manager's reporting on the investment performance, product risk monitoring and oversight activities and the monitoring and oversight of regulatory and operational risk for the Sub-Funds.

The Manager has been given discretionary authority to manage the assets in line with the investment objectives of each Sub-Fund. Compliance with the target asset allocations and the composition of the portfolio are monitored by the Directors on a quarterly basis. In instances where the portfolio has diverged from target asset allocations, the Manager is obliged to take actions to rebalance the portfolio in line with the established targets, within prescribed time limits.

#### **(a) Market risk**

Market risk arises mainly from uncertainty about future values of financial instruments influenced by price, interest rate and currency movements. It represents the potential loss each Sub-Fund may suffer through holding market positions in the face of market movements. The Manager's strategy for the management of market risk is driven by the Sub-Funds' investment objective as set out in Note 1. The ICAV's market risk is managed on a daily basis by the Manager. The Manager moderates this risk through a careful selection of securities and other financial instruments within specified limits. Details of the nature of the ICAV's investment portfolio at the Statement of Financial Position date are disclosed in the Schedule of Investments.

### (a) Market risk (continued)

#### Value at Risk

The Manager uses three approaches to measure the Sub-Funds' global risk exposures. These are the commitment approach, Absolute Value at Risk ("VaR") and Relative VaR. These approaches are described in the prospectus and the approach each Sub-Fund uses is outlined in the table below:

Sub-Fund	Base Currency	Risk approach	Risk Basis
STOXX Europe 600 Index FAM Fund	EUR	VAR	Relative
FAM MSCI World Index Fund	USD	VAR	Relative
S&P 500 Index FAM Fund	USD	VAR	Relative

Smart Global Defence 2028 Fineco AM Fund II	EUR	VAR	Absolute

Using the absolute VaR, the Manager estimates the potential loss in the Sub-Fund's portfolio over a set period at a certain confidence level, and is based on statistical analysis of historical price trends and volatilities. The VaR of the Sub-Funds shall be calculated daily and shall not exceed 13-20% per cent of the NAV of the Sub Fund, based on a 1 month holding period and a "one-tailed" 99 per cent confidence interval using a historical observation period of at least 1 year.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 13. Financial Instruments and Associated risks (continued)

### (a) Market risk (continued)

#### Value at Risk (continued)

Using the relative VaR, the Manager estimates the potential loss in the Sub-Fund's portfolio over a set period at a certain confidence level, and based on statistical analysis of historical price trends and volatilities. The VaR of the Sub-Fund's portfolio is measured relative to the benchmark index which the Manager consider a comparable benchmark to the Sub-Fund's portfolio. In compliance with the UCITS Regulations, the relative VaR of the Sub Fund's portfolio shall not exceed twice the VaR of the index, as determined daily using a one-tailed confidence interval of 99%, a holding period of one month and a historical observation period of at least 1 year.

The 1 day VaR as of 31 December 2022 and 31 December 2021 based on a 99% confidence level is outlined in the table below:

Absolute VaR	31 December 2022	31 December 2021

# FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 13. Financial Instruments and Associated risks (continued)

### (a) Market risk (continued)

#### Value at Risk (continued)

Some limitations of VaR analysis are:

- The models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns. As a consequence, VaR can be highly variable and a single date point analysis can be of limited value. VaR can fluctuate significantly over time;
- The composition of the ICAV can change significantly over a short period of time and, as such, the ICAV's risk profile including VaR may also change materially over a short time frame;
- The market price risk information is a relative estimate of risk rather than a precise and accurate number;
- The market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen);
- FX hedging for the benefit of a particular class are not included;
- Future market conditions could vary significantly from those experienced in the past.

#### (i) Price risk

Price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Any increase or decrease in the market price of investments would alter the ICAV's net asset value to the extent that it was invested at the time. The ICAV's investment portfolio complies with the investment restrictions as disclosed in its prospectus.

#### Exposure to price risk

The tables below summarises the overall market exposure of financial assets and liabilities at FVTPL as at 31 December 2022 and 31 December 2021:

<b>Financial assets at FVTPL</b>	<b>300,951,303</b>	<b>100.09%</b>

#### Sensitivity

Sensitivity analysis for the Sub-Fund where the Manager do not use VAR approach is disclosed below.

Any increase or decrease in the market price of investments would alter the Sub-Fund's net asset value to the extent that it was invested at the time. The Sub-Fund's investment portfolio complies with the investment restrictions as disclosed in its prospectus. As at 31 December 2022 and 31 December 2021, if the fair value of investments to which the Sub-Fund was exposed had changed by 5% with all other variables held constant, this would have resulted in a change of net assets attributable to the shareholders by the amounts detailed below:

<b>Sub-Fund</b>		<b>2022</b>	<b>2021</b>
Fineco AM Euro Inflation-linked Government Bond Fund	EUR	12,133,930	6,869,853
Ultra Short Term Bond SRI FAM Fund	EUR	10,745,053	-
Enhanced Ultra Short Term Bond SRI FAM Fund	EUR	3,788,453	-

#### Management of price risk

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the price risk of the asset considered in the transaction and in reference to the ICAV risk framework and the ICAV's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed ICAV risk framework.

##### (ii) Interest rate risk

The ICAV's financial assets include direct interest bearing instruments. As a result the ICAV is exposed to fair value interest rate risk due to fluctuations in the prevailing levels of market interest rates. The ICAV's interest rate risk is managed on a daily basis by the Manager.

Cash and cash equivalents are not considered to be significantly exposed to fair value interest rate risk due to the short term nature of the instruments. Cash earns interest at a variable interest rate.

The interest bearing financial instruments significantly exposed to fair value interest rate risk are the bond investments. Consequently, movements in interest rates would have an inverse effect on the movement of the net asset value of the Sub-Funds.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the interest rate risk of the asset considered in the transaction and in reference to the ICAV risk framework and the ICAV's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed ICAV risk framework.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 13. Financial Instruments and Associated risks (continued)

#### (a) Market risk (continued)

##### (iii) Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Each Sub-Fund may invest in securities denominated in currencies other than their functional currency. Consequently, each Sub-Fund is exposed to risks that the exchange rate of their functional currency relative to other currencies may change in a manner which has an adverse effect on the value of the portion of each Sub-Fund's assets which are denominated in currencies other than their own currency.

The currency risk is in relation to the notional exposure on the forward currency contracts held by the Sub-Funds. These are detailed on the Schedule of Investments.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the currency risk of the asset considered in the transaction and in reference to the fund risk framework and the fund's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed fund risk framework.

Sensitivity is not presented for the following Sub-Funds as VaR is presented for this Sub-Fund in the notes to the Financial Statements:

- STOXX Europe 600 Index FAM Fund
- FAM MSCI World Index Fund
- S&P 500 Index FAM Fund
- FAM MSCI AC Asia Pacific Ex Japan Index Fund
- FAM MSCI Emerging Markets Index Fund

# FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 13. Financial Instruments and Associated risks (continued)

### (a) Market risk (continued)

#### (iii) Currency risk (continued)

Sensitivity is not presented for the following Sub-Funds as VaR is presented for this Sub-Fund in the notes to the Financial Statements:

- Smart Defence Equity 2028 Fineco AM Fund II
- Smart Global Defence 2028 Fineco AM Fund
- Smart Global Defence 2028 Fineco AM Fund II

As at 31 December 2022 the Sub-Funds had the following currency exposures:

#### Fineco AM Euro Inflation-linked Government Bond Fund

Currency	Total Exposure EUR	Forward Foreign	Net Exposure EUR	5% increase/decrease EUR
		Contracts EUR		
EUR	246,807,977	-	246,807,977	12,340,399
	<b>246,807,977</b>	<b>-</b>	<b>246,807,977</b>	<b>12,340,399</b>

#### Ultra Short Term Bond SRI FAM Fund

	<b>234,253,172</b>	<b>-</b>	<b>234,253,172</b>	<b>11,712,659</b>

#### Enhanced Ultra Short Term Bond SRI FAM Fund

Currency	Total Exposure EUR	Forward Foreign	Net Exposure EUR	5% increase/decrease EUR
		Contracts EUR		
EUR	78,707,933	-	78,707,933	3,935,397
	<b>78,707,933</b>	<b>-</b>	<b>78,707,933</b>	<b>3,935,397</b>

### (b) Liquidity risk

Liquidity risk is the risk that the Sub-Funds' may not be able to generate sufficient cash resources to settle their obligations in full as they fall due or can do so only on terms that are materially disadvantageous.

Each Sub-Fund's principal liquidity risks arise from the ability of investors to effect redemption requests and the liquidity of the underlying investments each Fund has invested in.

Each Sub-Fund's Unitholders may redeem their units on the close of any daily dealing deadline for cash equal to a proportionate share of each Sub-Fund's NAV, excluding any duties and charges where applicable. Each Sub-Fund is therefore potentially exposed to the liquidity risk of meeting the unitholders' redemptions and may need to sell assets at prevailing market prices to meet liquidity demands.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio liquidity from the liquidity risk of the asset considered in the transaction and in reference to the fund risk framework and the fund's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed fund risk framework. The ICAV's overall liquidity risks are monitored on a quarterly basis by the Board of Directors.

All of the Sub-Funds financial assets and liabilities as of 31 December 2022 can be received or paid within or less than 1 month. While the accrued expenses can be paid within or less than 1 month not all are and some can be paid at a later date due to frequency or delay of invoicing. This delay can at times exceed 1 year.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 13. Financial Instruments and Associated risks (continued)

#### (c) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the ICAV. The carrying amount of financial assets as per the Statement of Financial Position best represents the maximum credit risk exposure as at its date. Credit risk on transactions with brokers relates to transactions awaiting settlement. Risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the broker used. Substantially all of the assets of the ICAV are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the ICAV's rights with respect to securities or cash held by the Depositary to be delayed or limited. The ICAV manages its risk by monitoring the credit quality and financial position of the Depositary. The credit rating for the Depositary as at 31 December 2022 was A+ (31 December 2021: A+) published by Standard & Poor's.

The cash and cash equivalents, balances due from brokers and balances due to brokers are held with bank and financial institution counterparties, which are rated BBB+ to AA (31 December 2021: BBB+ to AA), based on Standard & Poor's ratings. The derivatives are entered into with bank and financial institution counterparties, which are rated BBB+ to AA (31 December 2021: BB+ to AA), based on Standard & Poor's ratings.

The Manager manages issuer risk through building diversified portfolios to limit exposure to any one issuer in accordance with the ICAV's investment objectives. The ICAV employs well known counterparties and ensures that concentration of investment in any one stock or counterparty is monitored against set limits.

Additionally, if required, the Manager will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the ICAV's investment objectives. The Manager monitors compliance with these restrictions on a daily basis.

All transactions in listed securities are settled/paid upon delivery using approved brokers. The risk of default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The credit ratings of all derivative counterparties are monitored regularly. The risk managers review counterparty credit ratings and approve the use of such counterparties.

The below table shows the breakdown by credit rating of the bonds in the Sub-Funds' portfolios:

## 13. Financial Instruments and Associated risks (continued)

### (c) Credit risk (continued)

#### Offsetting and amounts subject to master netting arrangements

The ICAV has not offset any financial assets and financial liabilities in the statement of financial position. The disclosures set out in the tables below include financial assets and financial liabilities that are subject to an enforceable master netting or derivative clearing agreement that covers derivatives.

The International Swaps and Derivatives Association (“ISDA”) and similar master netting agreements do not meet the criteria for offsetting in the statement of financial position. This is because the ICAV does not have any currently legally enforceable right to offset recognised amounts, because the right to offset is enforceable only on the occurrence of future events such as a default of the ICAV or the counterparties or other credit events.

The collateral provided in respect of the above transactions is subject to the standard industry terms of ISDA’s Credit Support Annex. This means that securities received/given as collateral can be pledged or sold during the term of the transaction but have to be returned on maturity of the transaction. The terms also give each counterparty the right to terminate the related transactions on the counterparty’s failure to post collateral.

The following tables disclose the derivative financial assets and liabilities subject to enforceable netting and similar arrangements, presented on an aggregate basis across multiple counterparties. Counterparties are analysed on an individual basis, offsetting assets and liabilities with individual counterparties where appropriate to do so while incorporating the collateral held by or posted by the Sub-Funds with respect to the open positions. The following tables present the total net exposure to counterparties with respect to derivative assets and liabilities on a Sub-Fund by Sub-Fund basis.

## 13. Financial Instruments and Associated risks (continued)

### (d) Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the processes, technology and infrastructure supporting the Sub-Fund activities with financial instruments, either internally within the Sub-Fund or externally at the Sub-Fund's service providers, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of investment management behaviour.

The Sub-Funds' objectives are to manage operational risk so as to balance the limiting of financial losses and damage to its reputation with achieving its investment objective of generating returns to investors.

The primary responsibility for the development and implementation of controls over operational risk rests with the Directors. This responsibility is supported by the development of overall standards for the management of operational risk, which encompasses the controls and processes at the service providers and the establishment of service levels with the service providers, in the following areas:

- Documentation of controls and procedures;
- Requirements for:
  - Appropriate segregation of duties between various functions, roles and responsibilities;
  - Reconciliation and monitoring of transactions; and
  - Periodic assessment of operational risk faced.
- The adequacy of controls and procedures to address the risks identified;
- Compliance with regulatory and other legal requirements;
- Development of contingency plans;
- Training and professional development;
- Ethical and business standards; and
- Risk mitigation, including insurance if this is effective.

The Directors' assessment of the adequacy of the controls and processes in place at the service providers with respect to operational risk is carried out via regular discussions with the service providers and a review of the service providers' Service Organisation Controls reports on internal controls, if any are available.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 14. Fair Value of Financial Instruments

Each Sub-Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

- Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data; and
- Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. There were no transfers between levels for 2022 and 2021.

The determination of what constitutes 'observable' requires significant judgement. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable, verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables provide an analysis of each Sub-Fund's financial assets and financial liabilities measured at fair value as at 31 December 2022:

	2022	2021
CHF	0.92523	0.91114
EUR	0.93699	0.73831
GBP	0.83134	0.87935

## 16. Efficient Portfolio Management

The ICAV may employ investment techniques and instruments for efficient portfolio management of the assets of the ICAV and, in particular, the ICAV may, for the purpose of hedging (whether against currency, exchange or interest rate risks or otherwise), or for direct investment purposes, purchase or sell put options and call options, spot contracts, forward contracts, futures contracts and other derivative instruments and may also enter into sale and repurchase agreement.

Subject to the conditions and within the limits otherwise stated in the investment objective and policies of the ICAV, the Manager may employ investment techniques and instruments such as futures, options, forward foreign currency contracts and other derivatives for investment purposes, hedging or efficient portfolio management.

## 17. Cross Liability

Liabilities incurred by a Sub-Fund of the ICAV may be discharged solely out of the assets of that Sub-Fund such that creditors of Sub-Funds will not have recourse to the assets of the other Sub-Funds of the ICAV to settle any liabilities incurred.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 18. Taxation

Under current law and practice, the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. It is not chargeable to Irish tax on its income or capital gains. However, the ICAV is obliged to apply a withholding tax on any distribution payments to Irish residents or ordinarily resident shareholders on any encashment, redemption or transfer of units by an Irish resident or ordinarily resident shareholder, unless the shareholder is exempted under Section 739D of the Taxes Consolidation Act, 1997, as amended. Shareholders who complete a declaration confirming that they are not Irish residents are not liable to Irish tax on the income or gains arising from their investment in the ICAV and no withholding tax will be deducted on any payments made to them. Where the ICAV has a concession from the Revenue Commissioners it may be possible to obtain an exemption from the requirement to have a valid non-resident declaration in place.

If the ICAV fails to deduct the tax or fails to collect the appropriate signed declaration from any non-resident or exempted shareholders, the ICAV will remain liable for the tax. In these circumstances, the ICAV would seek to recover the tax paid from the relevant shareholder.

Capital gains and interest received by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its shareholders.

### 19. Events during the financial year

Effective 24 January 2022, Lorenzo Di Pietrantonio was appointed as a non-executive Director of the ICAV.

\* These Financial Statements exclude the Funds marked above which are presented separate sets of Financial Statements.

Effective 9 February 2022, the Manager appointed M&G Investment Management Limited to act as Investment Manager to Emerging Markets Debt FAM Fund, replacing Goldman Sachs Asset Management International.

### Covid 19

The impact of the coronavirus outbreak was profound across all aspects of society. In developed economies, it is clear that the worst of the impact is now over. However, there is an expectation that seasonal peaks and new variants could give rise to renewed travel restrictions, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery and supply chain disruptions which will create ongoing challenges. Widescale and comprehensive vaccination programmes have been put in place in many countries which have had a positive effect. Nevertheless, the impact of COVID-19 continues to adversely affect the economies of many nations across the globe and this in turn may continue to impact investments held by each Fund.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 19. Events during the financial year (continued)

#### Russia/Ukraine Conflict and sanctions

The outbreak of war in Ukraine and the related sanctions targeted against the Russian Federation has impacted the European and Global economies. The direct exposure to Ukraine, Russia or Belarus was and continues to be not material to the overall ICAV. However, the impact on the general economic situation may require in the future revisions of certain assumptions and estimates. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

There were no other significant events during the financial year.

### 20. Events post financial year end

Effective 1 January 2023, the Manager appointed Allianz Global Investors GmbH as investment advisor of Fineco AM Euro Credit Bond Fund, replacing HSBC Global Asset Management (France).

Effective 13 February 2023, the Manager appointed M&G Investment Management Limited to act as Investment Manager to the Jupiter Flexible Income FAM Fund, replacing Jupiter Asset Management Limited, and the Sub-Fund was also re-named as Flexible Income FAM Fund on this date.

There were no other events after the year end that had a material effect on the Financial Statements.

### 21. Soft commission arrangements

The Manager or the relevant Investment Managers of the Sub-Funds may effect transactions that will from time to time provide or procure the Manager or the Investment Managers goods and services and other benefits such as research and advisory services provided that the nature of which is such that their provision shall assist in the provision of investment services to the ICAV as a whole and which no direct payment is made but instead the Manager undertakes to place business with that party. In any event it is agreed that the execution of transactions will be on the basis of best execution standards and brokerage rates will not be in excess of customary institutional rates. Each Investment Manager shall also comply with additional regulations governing soft commission practices including where relevant requirements under MiFID II, which governs the extent to which commissions, inducements, research reports or other non-minor monetary benefits may be paid or received from brokers.

For the year ended 31 December 2022, the following Investment Managers has entered into soft commission arrangements for research purposes as permitted by applicable regulation on behalf of the Sub-Funds with broker counterparties.

Investment Manager	Sub-Fund
Invesco Advisers, Inc	US Equity Value FAM Fund
Infusive Asset Management Inc.	Infusive Consumer Alpha Global Leaders FAM Fund

The total aggregate amount of soft commissions is USD237,959 for 31 December 2022.

There were no other soft commission arrangements for the financial year ended 31 December 2022.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

### Value at Risk Approach

Value at Risk (“VaR”) is a statistical risk measure that estimates the potential loss from adverse market movements in an ordinary market environment.

Please refer to the financial risks note 13 to the Financial Statements for further details on the measure of VaR.

The Directors use Relative VaR to monitor and manage the global exposure of some of the Funds and Absolute VaR for others as set out below. For Relative VaR, the VaR of the respective Fund’s portfolio will not exceed twice the VaR of the reference portfolio. For Absolute VaR, the monthly VaR will not exceed 20% of the Fund’s NAV. Where a VaR calculation is performed using a horizon other than the one-month regulatory limit, this 20% limit shall be rescaled to reflect the appropriate risk horizon period as directed by the relevant regulatory guidelines. Utilisation refers to the level of risk taken in this context.

The table below details the highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the respective Absolute or Relative VaR regulatory limit.

Sub-Fund	Global Exposure Type	Risk Model	Reference Risk Portfolio	Highest utilisation of the VaR limit %	Lowest utilisation of the VaR limit %	Average utilisation of the VaR limit %
STOXX Europe 600 Index FAM Fund	Relative	VaR	STOXX Europe 600 Index	51%	50%	50%

### Value at Risk Approach (continued)

#### **LEVERAGE**

The use of FDIs may expose a Fund to a higher degree of risk. In particular, FDI contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on FDIs than on standard bonds or equities.

Leveraged FDI positions can therefore increase a Fund's volatility. Disclosed in the table below is the level of leverage employed by each relevant Fund during the financial year ended 31 December 2022.

<b>Sub-Fund</b>	<b>% Average Leverage Employed</b>
STOXX Europe 600 Index FAM Fund	100.00%

### UCITS V Remuneration Disclosure

Fineco Asset Management Designated Activity Company (the “Management Company”), the Management Company of FAM Series UCITS ICAV acts as the Management Company for two other umbrella UCITS.

The Management Company follows a remuneration policy which complies with the requirements of the UCITS regulation in Ireland and in particular the S.I. 143/2016.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of the talent, skills and competencies, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and the Management Company as a whole, and it is based on both financial and non-financial criteria, among other criteria.

The total remuneration paid by the Management Company to its staff for the financial year end 31 December 2022 is as follows:

#### Financial Year End 31 December 2022

	<u>Fixed</u>	<u>Variable</u>	<u>Total</u>
Employees	6,259,835	2,080,091	8,339,926
Executive Directors	1,120,687	757,346	1,878,033
Non-Executive Directors	85,000	-	85,000

The ICAV represents as at 31 December 2022 around 63% of the Total AUM of the Management Company.

The remuneration policy is reviewed at least annually.

### Sustainable Finance Disclosure Regulation (SFDR)

Environmental, social and governance (“ESG”) Integration describes the mechanism by which the Manager, acting through the Investment Manager as its delegate, may integrate sustainability risks into investment decision-making, which may, where relevant, require the Investment Manager to assess the potential sustainability risks associated with the purchase of investments.

Sustainability Risk means an ESG event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of a Sub-Fund’s investment. Sustainability risks can either represent a risk of their own or have an impact on other risks and may contribute significantly to risks, such as market risks, operational risks, liquidity risks or counterparty risks.

The ICAV reserves the right to reassess this classification at any time and shall keep this classification under review pending finalisation of the Regulatory Technical Standards (“RTS”).

If the ICAV determines at any future point that the Fund does not meet the criteria to qualify as a Sustainable Investment Fund, this disclosure shall be updated or withdrawn as appropriate, in accordance with the revised classification of the Fund.

The following Sub-Funds are classified as Article 6 under the Sustainable Finance Disclosure Regulation (“SFDR”):

STOXX Europe 600 Index FAM Fund	Target China Coupon 2026 FAM Fund
FAM MSCI World Index Fund	Bluestar Global Logistics Index FAM Fund

### Sustainable Finance Disclosure Regulation (SFDR) (continued)

The investments underlying the above named Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities. The classification of the above named Sub-Funds as Article 6 Funds means that the Sub-Funds do not promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR or have Sustainable Investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR. Accordingly, the Sub-Funds do not deem sustainability risks to be relevant and does not integrate sustainability risks into its investment decisions due to the investment strategy of the Sub-Funds. Accordingly, it is not anticipated that sustainability risks will materially impact the expected risk or return characteristics of the Sub-Fund. Please refer to the section of the Prospectus entitled “Sustainable Finance Disclosure” for further information.

**Sustainable Finance Disclosure Regulation (SFDR)**

ANNEX IV

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM Smart Factors Europe Fund

**Legal entity identifier:** 6354005QDHWPSX4NGJ31

**Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ____%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <b>No</b></p> <p><input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 28.57% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The equity instruments in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 2. Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
- 3. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● *How did the sustainability indicators perform?*

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund’s positive ESG tilt which was 98.01% as at 31 December 2022;
- iii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 98.01% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 98.01% as at 31 December 2022

● *...and compared to previous periods?*

Not applicable for the first periodic report.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives*

Not applicable

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not applicable

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

9. Hazardous waste ratio

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises

12. Unadjusted gender pay gap

13. Board gender diversity

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager’s SFDR disclosure statement; “*Statement on principal adverse impacts of investment decisions on sustainability factors*”.

**What were the top investments of this financial product?**

Largest investments	Sector	Country	% Assets
NOVARTIS AG-REG	PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	SWITZERLAND	7.76%
VALERO ENERGY CORP	DISTRIBUTION WATER GAZ ELECTRICITY ENERGY	UNITED-STATES (U.S.A.)	6.36%
AMERICAN ELECTRIC POWER	DISTRIBUTION WATER GAZ ELECTRICITY ENERGY	UNITED-STATES (U.S.A.)	6.01%
THERMO FISHER SCIENTIFIC INC	PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	UNITED-STATES (U.S.A.)	5.98%
SCHWAB (CHARLES) CORP	OTHER CREDIT INSTITUTIONS	UNITED-STATES (U.S.A.)	5.75%

MORGAN STANLEY	BANKS	UNITED-STATES (U.S.A.)	3.83%
APPLE INC	OFFICE EQUIPMENT AND MATERIAL	UNITED-STATES (U.S.A.)	3.55%

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2022

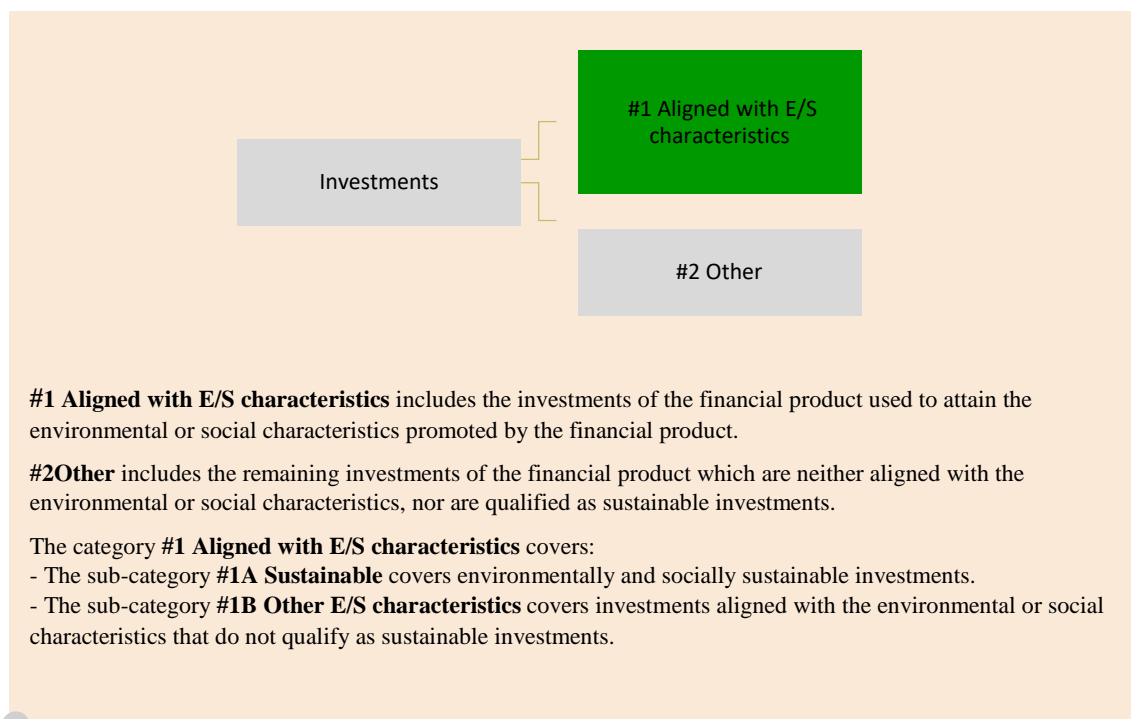

## What was the proportion of sustainability-related investments?

Not applicable

### ● *What was the asset allocation?*

98.01% of the Fund’s Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data..

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● *In which economic sectors were the investments made?*

Sector	% Assets
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	23.13%
DISTRIBUTION WATER GAZ ELECTRICITY ENERGY	20.21%
SOFTWARE	12.47%
INTERNET	11.28%
OFFICE EQUIPMENT AND MATERIAL	7.75%
OTHER CREDIT INSTITUTIONS	5.87%
TRANSPORTATION AND TRANSPORTATION MATERIALS	4.21%
INSURANCES	4.13%
BANKS	3.91%
CONSTRUCTION OF MACHINERY AND VEHICLES	2.90%
ELECTRICS/ ELECTRONICS	2.79%
DISTRIBUTION/ RETAIL TRADE	1.16%
MISCELLANEOUS SERVICES	0.18%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**What was the share of investments made in transitional and enabling activities?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable .

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**How did this financial product perform compared to the reference benchmark?**

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM Smart Factors US Fund

Legal entity identifier: 635400BBL1NUARC1GL46

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ___%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ___%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b></p> <p><input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 28.42% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

All actual data within this periodic report are calculated on the closing date of the accounting year.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

- 1. Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 28.42% of sustainable investments
- 2. Positive Screening:** Consideration of ESG factors were a key element of portfolio construction. The equity instruments in which the Fund invested were issued by companies that were only listed in ESG screened indices which promoted environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing ESG ratings attributed to such companies by the Manager and/or third party data providers with the exclusion of ESG “laggards” from the Fund’s direct investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 3. Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
- 4. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s);

- i. The percentage of the Fund portfolio made in sustainable investments which was 28.42% as at 31 December 2022;
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested in ESG screened index constituents which was 92.75% as at 31 December 2022;
- iv. The percentage of the underlying direct holdings of the fund rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 92.75% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 92.75% as at 31 December 2022.

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments inline with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 28.42% of sustainable investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Principal adverse impact (“PAI”) indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - a. Made in investee companies that demonstrate good governance:
  - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager’s SFDR disclosure statement; “*Statement on principal adverse impacts of investment decisions on sustainability factors*”.

**What were the top investments of this financial product?**

Largest investments	Sector	Country	% Assets
BERKSHIRE HATHAWAY INC-CL B	INSURANCES	UNITED-STATES (U.S.A.)	4.78%

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2022

## What was the proportion of sustainability-related investments?

28.42%

### What was the asset allocation?

92.75% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 15% in sustainable investments and as at 31 December the Fund had a proportion of 28.42% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

### In which economic sectors were the investments made?

Sector	% Assets
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	25.33%
INTERNET	12.76%
DISTRIBUTION WATER GAZ ELECTRICITY ENERGY	12.47%
SOFTWARE	11.65%
OFFICE EQUIPMENT AND MATERIAL	8.28%
INSURANCES	4.93%
OTHER CREDIT INSTITUTIONS	4.40%
CHEMICAL PRODUCTS	4.24%
BANKS	4.16%
MISCALLANEOUS SERVICES	4.13%
ELECTRICS/ ELECTRONICS	3.94%
DISTRIBUTION/ RETAIL TRADE	3.70%

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

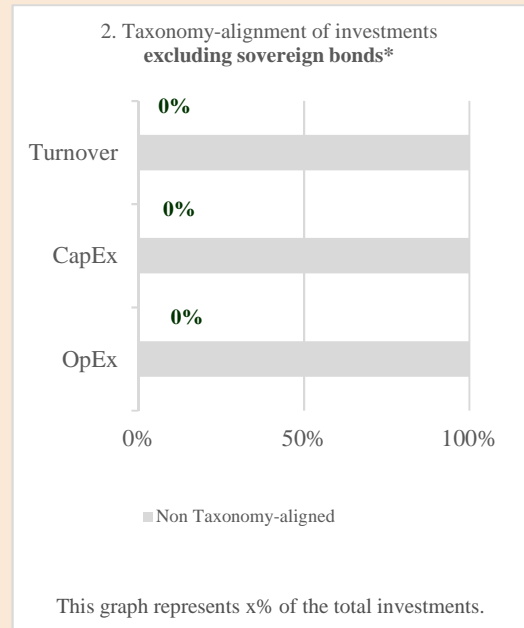

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable for the first periodic report.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 8.11%.

**What was the share of socially sustainable investments?**

Socially sustainable investments represented 20.31% of the financial product.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. The Fund principally used derivatives to attain its investment objective. However, it is only the direct holdings of the Fund that were measured for the purpose of determining alignment with environmental and/or social characteristics promoted by the Fund and not the underlying derivative exposure.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 28.42% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**How did this financial product perform compared to the reference benchmark?**

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM Smart Factors World Fund

**Legal entity identifier:** 635400Y2K6BEEDQHY471

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<b>Did this financial product have a sustainable investment objective?</b>	
<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 25.33% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

- 1. Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 25.33% of sustainable investments
- 2. Positive Screening:** Consideration of ESG factors were a key element of portfolio construction. The equity instruments in which the Fund invested were issued by companies that were only listed in ESG screened indices which promoted environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing ESG ratings attributed to such companies by the Manager and/or third party data providers with the exclusion of ESG “laggards” from the Fund’s direct investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 3. Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
- 4. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s);

- i. The percentage of the Fund portfolio made in sustainable investments which was 25.33% as at 31 December 2022;
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested in ESG screened index constituents which was 97.61% as at 31 December 2022;
- iv. The percentage of the underlying direct holdings of the fund rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 97.61% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 97.61% as at 31 December 2022.

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments inline with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 25.33% of sustainable investments.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

Principal adverse impact (“PAI”) indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - a. Made in investee companies that demonstrate good governance:
  - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager’s SFDR disclosure statement; “*Statement on principal adverse impacts of investment decisions on sustainability factors*”.

**What were the top investments of this financial product?**

Largest investments	Sector	Country	% Assets

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2022

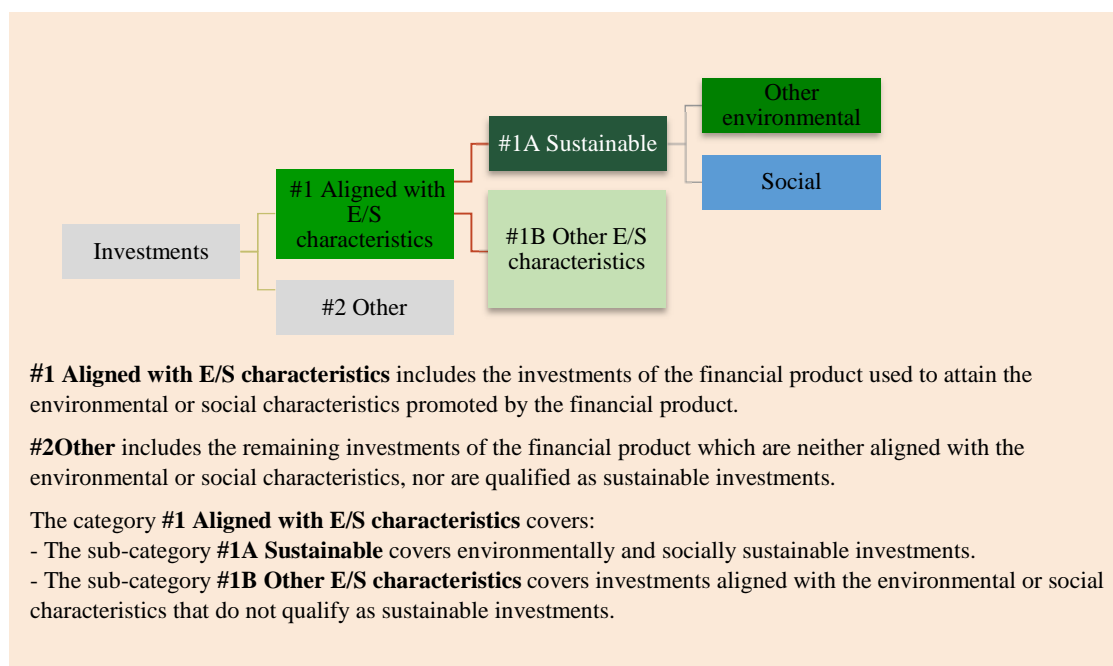

## What was the proportion of sustainability-related investments?

25.33%

### ● What was the asset allocation?

97.61% of the Fund’s Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 15% in sustainable investments and as at 31 December the Fund had a proportion of 25.33% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

### ● In which economic sectors were the investments made?

Sector	% Assets
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	20.28%
DISTRIBUTION WATER GAZ ELECTRICITY ENERGY	17.70%
INTERNET	15.36%
SOFTWARE	13.20%
OFFICE EQUIPMENT AND MATERIAL	7.77%
OTHER CREDIT INSTITUTIONS	7.13%
TRANSPORTATION AND TRANSPORTATION MATERIALS	4.40%
INSURANCES	4.21%
BANKS	3.99%
DISTRIBUTION/ RETAIL TRADE	3.00%
CONSTRUCTION OF MACHINERY AND VEHICLES	2.94%
MISCELLANEOUS SERVICES	0.01%

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

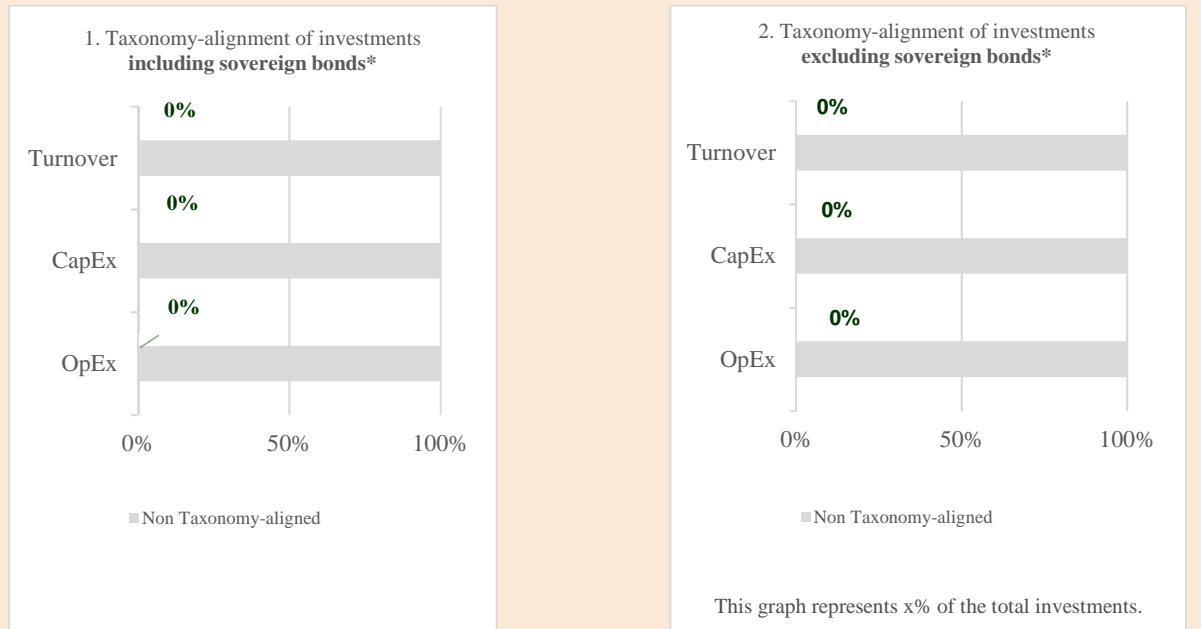

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable for the first periodic report.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 11.13%.

**What was the share of socially sustainable investments?**

Socially sustainable investments represented 14.20% of the financial product.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. The Fund principally used derivatives to attain its investment objective. However, it is only the direct holdings of the Fund that were measured for the purpose of determining alignment with environmental and/or social characteristics promoted by the Fund and not the underlying derivative exposure.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 25.33% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**How did this financial product perform compared to the reference benchmark?**

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors were a key element of portfolio construction. The equity instruments in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 2. Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- 3. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s);

- i. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund’s positive ESG tilt which was 98.42% as at 31 December 2022;
- iii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 98.42% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 98.42% as at 31 December 2022

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager’s SFDR disclosure statement; “*Statement on principal adverse impacts of investment decisions on sustainability factors*”.

**What were the top investments of this financial product?**

Largest investments	Sector	% Assets	Country

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

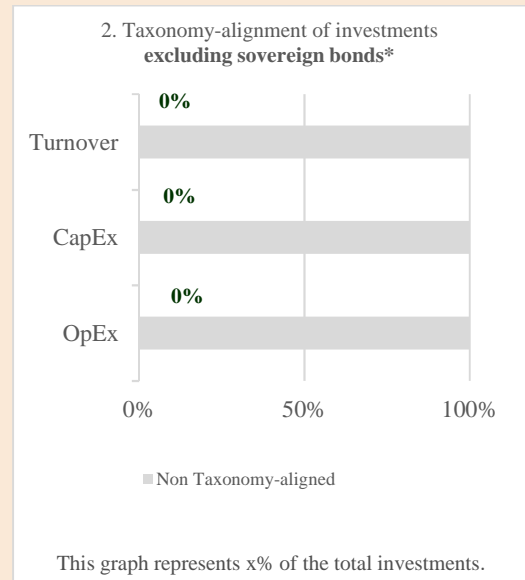

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

- *What was the share of investments made in transitional and enabling activities?*

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<b>Did this financial product have a sustainable investment objective?</b>	
<p> <input checked="" type="radio"/> <input type="radio"/> <b>Yes</b> </p> <p> <input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___%                     <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%                 </p> </p>	<p> <input checked="" type="radio"/> <input type="radio"/> <b>No</b> </p> <p> <input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments                     <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b> </p> </p>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 2. Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- 3. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 83.34% as at 31 December 2022; and
- iii. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 83.34% as at 31 December 2022

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas

Unaudited Section (continued)

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "Statement on principal adverse impacts of investment decisions on sustainability factors".

**What was the proportion of sustainability-related investments?**

Not applicable

● **What was the asset allocation?**

83.34% of the Fund’s Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

● **In which economic sectors were the investments made?**

Category	Fund - % TNA
BONDS STATES FEDERAL STATES	100.03%

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

**● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

- **What was the share of socially sustainable investments?**

Not applicable

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the managers exclusion policy.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

### How did this financial product perform compared to the reference benchmark?

--	--

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The product has respected all material aspects of the characteristics described in the prospectus

● ***How did the sustainability indicators perform?***

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is **C**
- The weighted average ESG rating of the reference index is **D+**

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi’s voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi’s Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at [www.amundi.com](http://www.amundi.com).

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### ● In which economic sectors were the investments made?

Sector	% Assets
BANKING	41.11%
CONSUMER DISCRETIONARY	11.69%
TREASURIES	8.27%
ELECTRIC	6.21%
INSURANCE	4.68%
COMMUNICATIONS	3.78%
OTHER FINANCIALS	2.67%
OWNED NO GUARANTEE	2.30%
CAPITAL GOODS	2.19%
CONSUMER STAPLES	1.66%
TECHNOLOGY	1.48%
NATURAL GAS	1.36%
REAL ESTATE INVESTMENT TRUST (REIT)	1.27%
TRANSPORTATION	0.95%
ENERGY	0.85%
BASIC INDUSTRY	0.35%

**Taxonomy-aligned activities** are expressed as a share of:

**-turnover** reflecting the share of revenue from green activities of investee companies

**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**-operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Reliable data regarding the EU Taxonomy was not available during the period

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Data not yet available

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In previous periods the regulation was not yet in force.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **41.42%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, **or for which data is not yet available to perform an EU taxonomy assessment.**

**What was the share of socially sustainable investments?**

This product did not commit to have social sustainable investments over the period.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI’s control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI’s Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How did this financial product perform compared to the reference benchmark?**

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index?***

This product does not have an ESG Benchmark

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index?***

This product does not have an ESG Benchmark.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Enhanced Ultra Short Term Bond SRI FAM Fund

Legal entity identifier: 254900YEN8J2I3YZBQ68

## Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.51% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made a **sustainable investments with a social objective:** \_\_\_\_\_%

It promotes E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The product has respected all material aspects of the characteristics described in the prospectus

● ***How did the sustainability indicators perform?***

Amundi has developed its own in-house ESG rating process based on the “Best-in-class” approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is **C**
- The weighted average ESG rating of the reference index is **D+**

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Reliable data regarding the EU Taxonomy was not available during the period

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Data not yet available

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

**-turnover** reflecting the share of revenue from green activities of investee companies

**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In previous periods the regulation was not yet in force.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **44.12%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, **or for which data is not yet available to perform an EU taxonomy assessment.**

**What was the share of socially sustainable investments?**

This product did not commit to have social sustainable investments over the period.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI’s control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI’s Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on <https://about.amundi.com/esg-documentation>, provides detailed reporting on this engagement and its results

**How did this financial product perform compared to the reference benchmark?**

This product does not have an ESG Benchmark.

- *How does the reference benchmark differ from a broad market index?*

This product does not have an ESG Benchmark

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the reference benchmark?*

This product does not have an ESG Benchmark.

- *How did this financial product perform compared with the broad market index?*

This product does not have an ESG Benchmark.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors were a key element of portfolio construction. The equity instruments in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 2. Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- 3. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● *How did the sustainability indicators perform?*

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s);

- i. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund’s positive ESG tilt which was 98.16% as at 31 December 2022;
- iii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 98.16% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 98.16% as at 31 December 2022

● *...and compared to previous periods?*

Not applicable for the first periodic report.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives*

Not applicable

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

9. Hazardous waste ratio

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises

12. Unadjusted gender pay gap

13. Board gender diversity

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2022

### What was the proportion of sustainability-related investments?

Not applicable

● *What was the asset allocation?*

98.16% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

**Asset allocation**  
describes the share  
of investments in  
specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

OFFICE EQUIPMENT AND MATERIAL	0.79%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *What was the share of investments made in transitional and enabling activities?*

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** ESG Target Global Infrastructure Coupon 2026 Fineco AM Fund

**Legal entity identifier:** 254900XJTDLKCK038V52

## Environmental and/or social characteristics

<b>Did this financial product have a sustainable investment objective?</b>	
<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ____%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b></p> <p><input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Positive Screening:** Consideration of ESG factors were a key element of portfolio construction. The equity instruments in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and/or social characteristics, such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 2. Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- 3. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *How did the sustainability indicators perform?*

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund (please note that reference to ESG scores means ESG score data received from third party data provider/s);

- i. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- ii. The percentage of the Fund invested in ESG screened index constituents which demonstrated the Fund’s positive ESG tilt which was 97.26% as at 31 December 2022;
- iii. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 97.26% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 97.26% as at 31 December 2022

● *...and compared to previous periods?*

Not applicable for the first periodic report.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives*

Not applicable

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

SOFINA	HOLDINGS	3.80%	BELGIUM
EURONEXT NV - W/I	OTHER CREDIT INSTITUTIONS	3.76%	NETHERLANDS
WOLTERS KLUWER	AUDIOVISUAL	3.65%	NETHERLANDS
STORA ENSO OYJ-R SHS	PACKAGING AND PAPER INDUSTRY	3.65%	FINLAND

### What was the proportion of sustainability-related investments?

Not applicable

● **What was the asset allocation?**

97.26% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

**Asset allocation**  
describes the share of investments in specific assets.

```
graph LR; Investments --> A["#1 Aligned with E/S characteristics"]; Investments --> B["#2 Other"];
```

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**FAM Series UCITS ICAV**

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

- *In which economic sectors were the investments made?*

Sector	% Assets
INSURANCES	24.00%

PACKAGING AND PAPER INDUSTRY	3.51%
ELECTRICS/ ELECTRONICS	3.45%
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	2.42%
MISCELLANEOUS SERVICES	0.86%
REAL ESTATE AND HOUSING	0.78%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

● ***What was the share of investments made in transitional and enabling activities?***

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**How did this financial product perform compared to the reference benchmark?**

- *How does the reference benchmark differ from a broad market index?*

## Investment Manager's Report

### Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (the "Sub-Fund")

FINECO AM MSCI WORLD SEMICONDUCTORS AND SEMICONDUCTOR EQUIPMENT UCITS ETF was launched in the end of September. Since it was launched, it recorded -9.3% in net terms.

October saw investor sentiment improvement in the absence of bad news beyond what is already in the market price. US equities saw positive returns in October and November. In particular, the better-than-expected US inflation reading strengthened hopes that the Federal Reserve's pace of interest rate rises would slow going forward. US inflation eased to 7.7% year-on-year in November from 8.2% in October, albeit at a high level. The Fed signalled that smaller interest rate increases were likely ahead and that the central bank was in a position to reduce the rate hikes as soon as December, albeit the monetary policy would stay restrictive until real signs of progress emerge on inflation.

The risk-off sentiment prevailed in December as Global Equities gave up most of positive gains from October and November. The positive sentiment spell wore off as the market declined about 8 percent in a month.

This fund underperformed during the early Q4 rally due to its defensive positioning and did not recover through the end of Q4.

<b>Benchmark Name</b>	<b>Investment Approach</b>	<b>Replication Strategy</b>	<b>Comment</b>
MSCI Daily TR World Semiconductors & Semiconductor Equipment Net USD	Index Tracking	Synthetic	The investment management approach consists of implementing synthetic replication techniques using over the counter Total Return Swaps that swap out the performance of the assets of the fund against the performance of the reference benchmark.

## Investment Manager's Report (continued)

### Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund")

#### Market environment:

The recession that is threatening the global economy should not prevent central banks from continuing their monetary tightening, at least in the first part of 2023, as the slow ebb of inflation will mean it remains at levels incompatible with the price stability target. Even so, the pace of rate hikes is likely to be less rapid than in the last six months, fuelling the idea of a monetary policy 'pivot'.

This could be crucial: Faced with a deteriorating economic environment, which is proving slow to be fully reflected in companies' earnings expectations, the assumption of a decline in bond yields in the coming months would likely support some stock market sectors. This is especially the case with growth stocks, which largely underperformed the value style in 2022 as a result of the sharp rise in real yields.

After the unprecedented losses and high volatility seen in bond markets in 2022, investors should consider returning to this asset class to take advantage of carry in a normalised rate environment. After years of 'lower for longer' rates, however, the transition to a new era in bond markets will not happen overnight. Volatility is likely to continue, especially after the sudden market movements, both upwards and downwards, in the last months of 2022. Our allocation has a significant position in Euro investment grade (IG) credit, where spread levels reflect, in our view, overly high default rates given companies' strength.

The change in Beijing's stance on Covid is an important factor that was rightly welcomed by investors at the end of 2022, since the authorities seem to be more concerned about growth and a little less about the health situation. In the short term, in the face of soaring contaminations, new lockdowns cannot be ruled out. Even so, the theme of the 'reopening of the Chinese economy' should reassure investors and support activity throughout emerging Asia.

Despite the geopolitical risks still present, we do not think it justified to remain totally out of equities. We favour the Chinese and US markets over eurozone equities, which corresponds to a neutral total exposure.

Commodities provide diversification to our portfolios.

#### Monetary Policy:

The 50 basis point (bp) rate increase announced at the 14 December Federal Open Market Committee (FOMC) meeting raised the federal funds target rate into the 4.25% -4.50% range, after a total rate rise of +425bp in 2022. During the quarter, the US Federal Reserve (Fed) kept investors informed about how big the next rate increase would be (+75bp in November and +50bp in December). What investors appear to have grasped less well was the Fed's intention to continue the tightening cycle in 2023 and to maintain policy rates in restrictive territory for a while longer. Yet this message was clearly communicated: Released in mid-October, the September FOMC meeting minutes had highlighted the Fed's willingness to lower inflation that was 'broad-based and unacceptably high'. The fact is that investors anticipate that higher key rates will provoke a recession that will then force the Fed to quickly cut rates. This so-called 'Fed pivot' assumption was supported by the smaller rate increase in December after four consecutive 75bp hikes, and by the deterioration of most business surveys at the end of the year. The inflexion in inflation data also played a part: In November, consumer prices rose by 7.1% YoY (after 7.7% in October) and core inflation (excluding food and energy) came in at 6.0% (after 6.3% in October and 6.6% in September, which may turn out to have marked the high point of this cycle). Nevertheless, the Fed indicated that it still has to be convinced that inflation is slowing. It revised up its inflation forecasts for Q4 2023 and Q4 2024 (to, respectively, 3.5% and 2.5% for core inflation as measured by the personal consumption expenditures excluding food and energy deflator, which stood at 4.7% in November). Even the employment situation is beginning to raise some questions: While monthly job creations remain high and wages are growing by more than 5%, announcements of massive layoffs in certain sectors are multiplying. A study by the Philadelphia Fed also caused confusion by concluding that job creations in Q2 may have been much lower than estimated by the Bureau of Labor Statistics. The Fed itself expects the unemployment rate to rise to 4.6% in 2023 (from 3.7% in November), reinforcing the belief among some observers that it is likely to do 'too much' tightening. In December, the Flash composite Purchasing Managers' Index (PMI) fell to 44.6 – the same level as in August, which was at that point the lowest since the pandemic. Manufacturing looked particularly challenging as the year drew to a close. According to the consensus of sell-side economists surveyed by Bloomberg, the probability of a downturn over the next 12 months rose to 70%. Fed Chair Jerome Powell said: 'I don't think anyone knows whether we're going to have a recession or not'.

## Investment Manager's Report (continued)

### Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

#### Monetary Policy: (continued)

The European Central Bank (ECB) raised its three key rates twice during the quarter. Following the Governing Council's meeting on 15 December, the interest rates on the main refinancing operations, marginal lending facility and deposit facility were increased to 2.50%, 2.75% and 2.00% respectively. Comments from senior ECB figures made it clear that rates will continue to rise: since the beginning of the quarter, the ECB has claimed it will ensure inflation returns to its 2% target as soon as possible. As is the case for the Fed, this message is not necessarily correctly perceived by investors, especially as the Governing Council may not be entirely unanimous. Eurozone inflation showed only a limited inflexion at the end of the year (from 10.6% in October to 10.1% in November, year-on-year). At her press conference, ECB president Christine Lagarde wasted no time in talking about raising interest rates 'at a 50 basis-point pace for a period of time'. She repeatedly said that moving from a 75bp rate hike in October to 50bp in December is 'not a pivot, we are not slowing down'. The ECB also announced that from the beginning of March 2023, the asset purchase programme (APP) portfolio will be reduced at a measured and predictable pace, and that the Eurosystem will not reinvest all principal payments from maturing securities. This reduction will average EUR 15 billion a month until the end of Q2 2023, and its pace will be adjusted over time. The details will be announced in February. So far, the reduction in the size of the ECB's balance sheet has only been achieved through the repayment of the sums borrowed by the banks under the TLTROs (Targeted longer-term refinancing operations). Nearly EUR 800 billion was repaid in November and December (out of EUR 2 100 billion borrowed). Eurozone GDP growth was stronger than expected in Q3, at 0.3%, and business surveys improved slightly at the end of the year (especially in Germany).

These results reflect a softening in the rate of decline in the eurozone economy. However, the average level of the PMI index for Q4 indicating the sharpest economic contraction since 2013 when pandemic lockdown months are excluded. Retail sales struggled at the start of Q4, falling by 1.8% in volume terms between September and October, and by 2.7% YoY. The ECB expects the eurozone to fall into a mild recession in the last quarter of 2022 and the first quarter of 2023. Despite the poor growth outlook, the ECB considers itself as having 'no choice but to act' as inflation is still uncomfortably high. At the end of the year, hawkish statements multiplied: ECB executive board member, Isabel Schnabel, indicated that the terminal rate has risen above 3.00% and that the aim of the December meeting had been to clarify this to the financial markets.

#### Bond Markets:

The yield of the US 10-year T-note varied widely during the quarter: It reached its year-high close at 4.25% on 24 October and then eased in November to move at around 3.50% during the first half of December, a threshold that had not been crossed since mid-September. The 10-year yield ended at 3.87%, a very limited rise from the end September (+5bp) which masked sharp swings triggered by inflation figures and expectations on Fed monetary policy. The release of consumer price indices had a major impact throughout the quarter: The acceleration in inflation excluding food and energy in September (to 6.6% year-on-year) gave cause for concern, causing the 10-year yield to rise above 4.00% on 13 October. The data published in November, on the contrary, seemed to support the notion of an inflexion of inflation, resulting in a sharp fall in bond yields. This was seen again in December, albeit on a smaller scale, when core inflation for November returned to 6.0% and total inflation to 7.1% (from a peak of the cycle at 9.1% in June). Even though the slowdown in inflation leaves it well above the 2% target, investors have favoured information consistent with their assumption that the Fed will slow the pace of rate hikes after having made four consecutive 75bp hikes in June, July, September and November.

Through various channels (speeches, press articles), the Fed's communications flagged up the December rate hike of 50bp while also insisting that the tightening cycle was not yet over. Investors largely ignored this, as well as Jerome Powell's comments that the Fed still has 'some ways to go', until it's 'really confident that inflation is coming down in a sustained way'. From 15 December, and despite business surveys showing a slowdown in activity in December, bond yields rose again for exogenous reasons. Firstly, the ECB's hawkish statements and, subsequently and probably more importantly, the unexpected decision of the Bank of Japan which, on 20 December, surprised markets by changing its yield curve control policy after stating only the previous day that it did not intend to do so. The front end of the US curve slightly underperformed, with the 2-year yield rising by 15bp to 4.43%, at around the mid-point of the broad range (4.10%-4.70%) in which it moved between October and December. The yield curve is largely inverted.

Bond Markets: (continued)

The yield on the German 10-year Bund (2.11% at the end of November), moved sharply in October and November, although trendless between 1.80% and 2.40%. The easing phases of eurozone long bond yields corresponded to the moves seen in US bonds, supported by the idea that the Fed's monetary policy was set to become less hawkish (the 'pivot' assumption). In contrast, rises in yields were seen when the consumer price indices rose in the eurozone (from 9.9% in September to 10.6% in October year-on-year) and when the ECB's tone hardened. Several members of the ECB Governing Council raised the question of possible second round effects on inflation from higher wages. In December, inflation forecasts were revised up for 2023 (from 5.5% to 6.3%) and for 2024 (from 2.3% to 3.4%). The ECB does not believe there is currently a wage-price spiral but wants to avoid inflation expectations starting to become de-anchored. This explains why it opted for a resolutely hawkish tone at the end of the year after the increases of 75bp in October and 50bp in December of its three key rates. On 15 December, the ECB's much more hawkish speech following the announcement of the 50bp increase in the three key rates, sent the German 10-year Bund yield well above 2.00%, while the 2-year yield rose by 25bp as Christine Lagarde hinted that the first three meetings in 2023 could lead to 50bp increases in key rates. Less than a week later, the Bank of Japan's unexpected decision to extend the Yield Curve Control (YCC) range weighed on European government bonds. The fear of Japanese investors disengaging massively from eurozone bond markets, which would become less attractive if the Japanese 10-year yield should rise to +0.50%, may have accentuated the deterioration. At a more basic level, seeing the last of the major G7 central banks join those engaged in normalising their monetary policy (even though the BoJ explained itself) added to investor nervousness. The 10-year Bund yield ended December at a year-high of 2.57%, up by 46bp compared to the end of September and by 275bp since the beginning of the year. The German 2-year yield ended at 2.76% (+100bp over the quarter), its highest since 2008.

Peripheral eurozone markets, which had outperformed since the beginning of the quarter, experienced a more difficult end to the year due to expectations of a sharper rise in key ECB rates and the prospect of smaller reinvestments of maturing securities (acquired under the APP) while eurozone sovereign issues will be large at the beginning of 2023. The spread between Italian and German 10-year yields, which had tightened from 240bp at the end of September to 180bp at the beginning of December, abruptly rose on 15 December to return above 215bp. The yield on the 10-year Italian BTP ended at 4.72%, a quarterly rise of 20bp.

Thanks to the risk appetite surge in October and November, and the rise in government bonds in November, the credit market posted positive total returns in Q4 after three consecutive quarters of declines. The quarter was characterised by a sharper tightening of credit spreads on euro IG (Investment Grade) after having widened considerably since the spring.

Fund: No substantial changes have been performed in the optimization since inception (13/09/2022).  
The rebalancing are mostly removing the bonds taken out from the benchmark to buy new ones.

### Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF (the "Sub-Fund")

FINECO AM MSCI WORLD CONSUMER STAPLES ESG LEADERS UCITS ETF was launched in the end of September. Since it was launched, it recorded 0.2% in net terms.

October saw investor sentiment improvement in the absence of bad news beyond what is already in the market price. US equities saw positive returns in October and November. In particular, the better-than-expected US inflation reading strengthened hopes that the Federal Reserve's pace of interest rate rises would slow going forward. US inflation eased to 7.7% year-on-year in November from 8.2% in October, albeit at a high level. The Fed signalled that smaller interest rate increases were likely ahead and that the central bank was in a position to reduce the rate hikes as soon as December, albeit the monetary policy would stay restrictive until real signs of progress emerge on inflation.

The risk-off sentiment prevailed in December as Global Equities gave up most of positive gains from October and November. The positive sentiment spell wore off as the market declined about 8 percent in a month.

Overall, the cyclical nature of consumer staples saw this fund follow both early Q4 the rally and subsequent December decline resulting in a small positive return.

## Investment Manager's Report (continued)

### Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund")

#### Market environment:

The recession that is threatening the global economy should not prevent central banks from continuing their monetary tightening, at least in the first part of 2023, as the slow ebb of inflation will mean it remains at levels incompatible with the price stability target. Even so, the pace of rate hikes is likely to be less rapid than in the last six months, fuelling the idea of a monetary policy 'pivot'.

This could be crucial: Faced with a deteriorating economic environment, which is proving slow to be fully reflected in companies' earnings expectations, the assumption of a decline in bond yields in the coming months would likely support some stock market sectors. This is especially the case with growth stocks, which largely underperformed the value style in 2022 as a result of the sharp rise in real yields.

After the unprecedented losses and high volatility seen in bond markets in 2022, investors should consider returning to this asset class to take advantage of carry in a normalised rate environment. After years of 'lower for longer' rates, however, the transition to a new era in bond markets will not happen overnight. Volatility is likely to continue, especially after the sudden market movements, both upwards and downwards, in the last months of 2022. Our allocation has a significant position in Euro investment grade (IG) credit, where spread levels reflect, in our view, overly high default rates given companies' strength.

The change in Beijing's stance on Covid is an important factor that was rightly welcomed by investors at the end of 2022, since the authorities seem to be more concerned about growth and a little less about the health situation. In the short term, in the face of soaring contaminations, new lockdowns cannot be ruled out. Even so, the theme of the 'reopening of the Chinese economy' should reassure investors and support activity throughout emerging Asia.

Despite the geopolitical risks still present, we do not think it justified to remain totally out of equities. We favour the Chinese and US markets over eurozone equities, which corresponds to a neutral total exposure.

Commodities provide diversification to our portfolios.

#### Monetary Policy:

The 50 basis point (bp) rate increase announced at the 14 December Federal Open Market Committee (FOMC) meeting raised the federal funds target rate into the 4.25% -4.50% range, after a total rate rise of +425bp in 2022. During the quarter, the US Federal Reserve (Fed) kept investors informed about how big the next rate increase would be (+75bp in November and +50bp in December). What investors appear to have grasped less well was the Fed's intention to continue the tightening cycle in 2023 and to maintain policy rates in restrictive territory for a while longer. Yet this message was clearly communicated: Released in mid-October, the September FOMC meeting minutes had highlighted the Fed's willingness to lower inflation that was 'broad-based and unacceptably high'. The fact is that investors anticipate that higher key rates will provoke a recession that will then force the Fed to quickly cut rates. This so-called 'Fed pivot' assumption was supported by the smaller rate increase in December after four consecutive 75bp hikes, and by the deterioration of most business surveys at the end of the year. The inflexion in inflation data also played a part: In November, consumer prices rose by 7.1% YoY (after 7.7% in October) and core inflation (excluding food and energy) came in at 6.0% (after 6.3% in October and 6.6% in September, which may turn out to have marked the high point of this cycle). Nevertheless, the Fed indicated that it still has to be convinced that inflation is slowing. It revised up its inflation forecasts for Q4 2023 and Q4 2024 (to, respectively, 3.5% and 2.5% for core inflation as measured by the personal consumption expenditures excluding food and energy deflator, which stood at 4.7% in November). Even the employment situation is beginning to raise some questions: While monthly job creations remain high and wages are growing by more than 5%, announcements of massive layoffs in certain sectors are multiplying. A study by the Philadelphia Fed also caused confusion by concluding that job creations in Q2 may have been much lower than estimated by the Bureau of Labor Statistics. The Fed itself expects the unemployment rate to rise to 4.6% in 2023 (from 3.7% in November), reinforcing the belief among some observers that it is likely to do 'too much' tightening. In December, the Flash composite Purchasing Managers' Index (PMI) fell to 44.6 – the same level as in August, which was at that point the lowest since the pandemic. Manufacturing looked particularly challenging as the year drew to a close. According to the consensus of sell-side economists surveyed by Bloomberg, the probability of a downturn over the next 12 months rose to 70%. Fed Chair Jerome Powell said: 'I don't think anyone knows whether we're going to have a recession or not'.

## Investment Manager's Report (continued)

### Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

Market environment: (continued)

The European Central Bank (ECB) raised its three key rates twice during the quarter. Following the Governing Council's meeting on 15 December, the interest rates on the main refinancing operations, marginal lending facility and deposit facility were increased to 2.50%, 2.75% and 2.00% respectively. Comments from senior ECB figures made it clear that rates will continue to rise: since the beginning of the quarter, the ECB has claimed it will ensure inflation returns to its 2% target as soon as possible. As is the case for the Fed, this message is not necessarily correctly perceived by investors, especially as the Governing Council may not be entirely unanimous. Eurozone inflation showed only a limited inflexion at the end of the year (from 10.6% in October to 10.1% in November, year-on-year). At her press conference, ECB president Christine Lagarde wasted no time in talking about raising interest rates 'at a 50 basis-point pace for a period of time'. She repeatedly said that moving from a 75bp rate hike in October to 50bp in December is 'not a pivot, we are not slowing down'. The ECB also announced that from the beginning of March 2023, the asset purchase programme (APP) portfolio will be reduced at a measured and predictable pace, and that the Eurosystem will not reinvest all principal payments from maturing securities. This reduction will average EUR 15 billion a month until the end of Q2 2023, and its pace will be adjusted over time. The details will be announced in February. So far, the reduction in the size of the ECB's balance sheet has only been achieved through the repayment of the sums borrowed by the banks under the TLTROs (Targeted longer-term refinancing operations). Nearly EUR 800 billion was repaid in November and December (out of EUR 2 100 billion borrowed). Eurozone GDP growth was stronger than expected in Q3, at 0.3%, and business surveys improved slightly at the end of the year (especially in Germany).

These results reflect a softening in the rate of decline in the eurozone economy. However, the average level of the PMI index for Q4 indicating the sharpest economic contraction since 2013 when pandemic lockdown months are excluded. Retail sales struggled at the start of Q4, falling by 1.8% in volume terms between September and October, and by 2.7% YoY. The ECB expects the eurozone to fall into a mild recession in the last quarter of 2022 and the first quarter of 2023. Despite the poor growth outlook, the ECB considers itself as having 'no choice but to act' as inflation is still uncomfortably high. At the end of the year, hawkish statements multiplied: ECB executive board member, Isabel Schnabel, indicated that the terminal rate has risen above 3.00% and that the aim of the December meeting had been to clarify this to the financial markets.

Bond Markets:

The yield of the US 10-year T-note varied widely during the quarter: It reached its year-high close at 4.25% on 24 October and then eased in November to move at around 3.50% during the first half of December, a threshold that had not been crossed since mid-September. The 10-year yield ended at 3.87%, a very limited rise from the end September (+5bp) which masked sharp swings triggered by inflation figures and expectations on Fed monetary policy. The release of consumer price indices had a major impact throughout the quarter: The acceleration in inflation excluding food and energy in September (to 6.6% year-on-year) gave cause for concern, causing the 10-year yield to rise above 4.00% on 13 October. The data published in November, on the contrary, seemed to support the notion of an inflexion of inflation, resulting in a sharp fall in bond yields. This was seen again in December, albeit on a smaller scale, when core inflation for November returned to 6.0% and total inflation to 7.1% (from a peak of the cycle at 9.1% in June). Even though the slowdown in inflation leaves it well above the 2% target, investors have favoured information consistent with their assumption that the Fed will slow the pace of rate hikes after having made four consecutive 75bp hikes in June, July, September and November.

Through various channels (speeches, press articles), the Fed's communications flagged up the December rate hike of 50bp while also insisting that the tightening cycle was not yet over. Investors largely ignored this, as well as Jerome Powell's comments that the Fed still has 'some ways to go', until it's 'really confident that inflation is coming down in a sustained way'. From 15 December, and despite business surveys showing a slowdown in activity in December, bond yields rose again for exogenous reasons. Firstly, the ECB's hawkish statements and, subsequently and probably more importantly, the unexpected decision of the Bank of Japan which, on 20 December, surprised markets by changing its yield curve control policy after stating only the previous day that it did not intend to do so. The front end of the US curve slightly underperformed, with the 2-year yield rising by 15bp to 4.43%, at around the mid-point of the broad range (4.10%-4.70%) in which it moved between October and December. The yield curve is largely inverted.

#### Bond Markets: (continued)

The yield on the German 10-year Bund (2.11% at the end of November), moved sharply in October and November, although trendless between 1.80% and 2.40%. The easing phases of eurozone long bond yields corresponded to the moves seen in US bonds, supported by the idea that the Fed's monetary policy was set to become less hawkish (the 'pivot' assumption). In contrast, rises in yields were seen when the consumer price indices rose in the eurozone (from 9.9% in September to 10.6% in October year-on-year) and when the ECB's tone hardened. Several members of the ECB Governing Council raised the question of possible second round effects on inflation from higher wages. In December, inflation forecasts were revised up for 2023 (from 5.5% to 6.3%) and for 2024 (from 2.3% to 3.4%). The ECB does not believe there is currently a wage-price spiral but wants to avoid inflation expectations starting to become de-anchored. This explains why it opted for a resolutely hawkish tone at the end of the year after the increases of 75bp in October and 50bp in December of its three key rates. On 15 December, the ECB's much more hawkish speech following the announcement of the 50bp increase in the three key rates, sent the German 10-year Bund yield well above 2.00%, while the 2-year yield rose by 25bp as Christine Lagarde hinted that the first three meetings in 2023 could lead to 50bp increases in key rates. Less than a week later, the Bank of Japan's unexpected decision to extend the Yield Curve Control (YCC) range weighed on European government bonds. The fear of Japanese investors disengaging massively from eurozone bond markets, which would become less attractive if the Japanese 10-year yield should rise to +0.50%, may have accentuated the deterioration. At a more basic level, seeing the last of the major G7 central banks join those engaged in normalising their monetary policy (even though the BoJ explained itself) added to investor nervousness. The 10-year Bund yield ended December at a year-high of 2.57%, up by 46bp compared to the end of September and by 275bp since the beginning of the year. The German 2-year yield ended at 2.76% (+100bp over the quarter), its highest since 2008.

Peripheral eurozone markets, which had outperformed since the beginning of the quarter, experienced a more difficult end to the year due to expectations of a sharper rise in key ECB rates and the prospect of smaller reinvestments of maturing securities (acquired under the APP) while eurozone sovereign issues will be large at the beginning of 2023. The spread between Italian and German 10-year yields, which had tightened from 240bp at the end of September to 180bp at the beginning of December, abruptly rose on 15 December to return above 215bp. The yield on the 10-year Italian BTP ended at 4.72%, a quarterly rise of 20bp.

Thanks to the risk appetite surge in October and November, and the rise in government bonds in November, the credit market posted positive total returns in Q4 after three consecutive quarters of declines. The quarter was characterised by a sharper tightening of credit spreads on euro IG (Investment Grade) after having widened considerably since the spring.

Monetary Policy: (continued)

The European Central Bank (ECB) raised its three key rates twice during the quarter. Following the Governing Council's meeting on 15 December, the interest rates on the main refinancing operations, marginal lending facility and deposit facility were increased to 2.50%, 2.75% and 2.00% respectively. Comments from senior ECB figures made it clear that rates will continue to rise: since the beginning of the quarter, the ECB has claimed it will ensure inflation returns to its 2% target as soon as possible. As is the case for the Fed, this message is not necessarily correctly perceived by investors, especially as the Governing Council may not be entirely unanimous. Eurozone inflation showed only a limited inflexion at the end of the year (from 10.6% in October to 10.1% in November, year-on-year). At her press conference, ECB president Christine Lagarde wasted no time in talking about raising interest rates 'at a 50 basis-point pace for a period of time'. She repeatedly said that moving from a 75bp rate hike in October to 50bp in December is 'not a pivot, we are not slowing down'. The ECB also announced that from the beginning of March 2023, the asset purchase programme (APP) portfolio will be reduced at a measured and predictable pace, and that the Eurosystem will not reinvest all principal payments from maturing securities. This reduction will average EUR 15 billion a month until the end of Q2 2023, and its pace will be adjusted over time. The details will be announced in February. So far, the reduction in the size of the ECB's balance sheet has only been achieved through the repayment of the sums borrowed by the banks under the TLTROs (Targeted longer-term refinancing operations). Nearly EUR 800 billion was repaid in November and December (out of EUR 2 100 billion borrowed). Eurozone GDP growth was stronger than expected in Q3, at 0.3%, and business surveys improved slightly at the end of the year (especially in Germany).

These results reflect a softening in the rate of decline in the eurozone economy. However, the average level of the PMI index for Q4 indicating the sharpest economic contraction since 2013 when pandemic lockdown months are excluded. Retail sales struggled at the start of Q4, falling by 1.8% in volume terms between September and October, and by 2.7% YoY. The ECB expects the eurozone to fall into a mild recession in the last quarter of 2022 and the first quarter of 2023. Despite the poor growth outlook, the ECB considers itself as having 'no choice but to act' as inflation is still uncomfortably high. At the end of the year, hawkish statements multiplied: ECB executive board member, Isabel Schnabel, indicated that the terminal rate has risen above 3.00% and that the aim of the December meeting had been to clarify this to the financial markets.

Bond Markets:

The yield of the US 10-year T-note varied widely during the quarter: It reached its year-high close at 4.25% on 24 October and then eased in November to move at around 3.50% during the first half of December, a threshold that had not been crossed since mid-September. The 10-year yield ended at 3.87%, a very limited rise from the end September (+5bp) which masked sharp swings triggered by inflation figures and expectations on Fed monetary policy. The release of consumer price indices had a major impact throughout the quarter: The acceleration in inflation excluding food and energy in September (to 6.6% year-on-year) gave cause for concern, causing the 10-year yield to rise above 4.00% on 13 October. The data published in November, on the contrary, seemed to support the notion of an inflexion of inflation, resulting in a sharp fall in bond yields. This was seen again in December, albeit on a smaller scale, when core inflation for November returned to 6.0% and total inflation to 7.1% (from a peak of the cycle at 9.1% in June). Even though the slowdown in inflation leaves it well above the 2% target, investors have favoured information consistent with their assumption that the Fed will slow the pace of rate hikes after having made four consecutive 75bp hikes in June, July, September and November.

Through various channels (speeches, press articles), the Fed's communications flagged up the December rate hike of 50bp while also insisting that the tightening cycle was not yet over. Investors largely ignored this, as well as Jerome Powell's comments that the Fed still has 'some ways to go', until it's 'really confident that inflation is coming down in a sustained way'. From 15 December, and despite business surveys showing a slowdown in activity in December, bond yields rose again for exogenous reasons. Firstly, the ECB's hawkish statements and, subsequently and probably more importantly, the unexpected decision of the Bank of Japan which, on 20 December, surprised markets by changing its yield curve control policy after stating only the previous day that it did not intend to do so. The front end of the US curve slightly underperformed, with the 2-year yield rising by 15bp to 4.43%, at around the mid-point of the broad range (4.10%-4.70%) in which it moved between October and December. The yield curve is largely inverted.

Bond Markets: (continued)

The yield on the German 10-year Bund (2.11% at the end of November), moved sharply in October and November, although trendless between 1.80% and 2.40%. The easing phases of eurozone long bond yields corresponded to the moves seen in US bonds, supported by the idea that the Fed's monetary policy was set to become less hawkish (the 'pivot' assumption). In contrast, rises in yields were seen when the consumer price indices rose in the eurozone (from 9.9% in September to 10.6% in October year-on-year) and when the ECB's tone hardened. Several members of the ECB Governing Council raised the question of possible second round effects on inflation from higher wages. In December, inflation forecasts were revised up for 2023 (from 5.5% to 6.3%) and for 2024 (from 2.3% to 3.4%). The ECB does not believe there is currently a wage-price spiral but wants to avoid inflation expectations starting to become de-anchored. This explains why it opted for a resolutely hawkish tone at the end of the year after the increases of 75bp in October and 50bp in December of its three key rates. On 15 December, the ECB's much more hawkish speech following the announcement of the 50bp increase in the three key rates, sent the German 10-year Bund yield well above 2.00%, while the 2-year yield rose by 25bp as Christine Lagarde hinted that the first three meetings in 2023 could lead to 50bp increases in key rates. Less than a week later, the Bank of Japan's unexpected decision to extend the Yield Curve Control (YCC) range weighed on European government bonds. The fear of Japanese investors disengaging massively from eurozone bond markets, which would become less attractive if the Japanese 10-year yield should rise to +0.50%, may have accentuated the deterioration. At a more basic level, seeing the last of the major G7 central banks join those engaged in normalising their monetary policy (even though the BoJ explained itself) added to investor nervousness. The 10-year Bund yield ended December at a year-high of 2.57%, up by 46bp compared to the end of September and by 275bp since the beginning of the year. The German 2-year yield ended at 2.76% (+100bp over the quarter), its highest since 2008.

Peripheral eurozone markets, which had outperformed since the beginning of the quarter, experienced a more difficult end to the year due to expectations of a sharper rise in key ECB rates and the prospect of smaller reinvestments of maturing securities (acquired under the APP) while eurozone sovereign issues will be large at the beginning of 2023. The spread between Italian and German 10-year yields, which had tightened from 240bp at the end of September to 180bp at the beginning of December, abruptly rose on 15 December to return above 215bp. The yield on the 10-year Italian BTP ended at 4.72%, a quarterly rise of 20bp.

Thanks to the risk appetite surge in October and November, and the rise in government bonds in November, the credit market posted positive total returns in Q4 after three consecutive quarters of declines. The quarter was characterised by a sharper tightening of credit spreads on euro IG (Investment Grade) after having widened considerably since the spring.

Fund: No substantial changes have been performed in the optimization since inception (16/09/2022).

The rebalancing are mostly removing the bonds taken out from the benchmark to buy new ones.

## Investment Manager's Report (continued)

### Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund")

#### Market environment:

The recession that is threatening the global economy should not prevent central banks from continuing their monetary tightening, at least in the first part of 2023, as the slow ebb of inflation will mean it remains at levels incompatible with the price stability target. Even so, the pace of rate hikes is likely to be less rapid than in the last six months, fuelling the idea of a monetary policy 'pivot'.

This could be crucial: Faced with a deteriorating economic environment, which is proving slow to be fully reflected in companies' earnings expectations, the assumption of a decline in bond yields in the coming months would likely support some stock market sectors. This is especially the case with growth stocks, which largely underperformed the value style in 2022 as a result of the sharp rise in real yields.

After the unprecedented losses and high volatility seen in bond markets in 2022, investors should consider returning to this asset class to take advantage of carry in a normalised rate environment. After years of 'lower for longer' rates, however, the transition to a new era in bond markets will not happen overnight. Volatility is likely to continue, especially after the sudden market movements, both upwards and downwards, in the last months of 2022. Our allocation has a significant position in Euro investment grade (IG) credit, where spread levels reflect, in our view, overly high default rates given companies' strength.

The change in Beijing's stance on Covid is an important factor that was rightly welcomed by investors at the end of 2022, since the authorities seem to be more concerned about growth and a little less about the health situation. In the short term, in the face of soaring contaminations, new lockdowns cannot be ruled out. Even so, the theme of the 'reopening of the Chinese economy' should reassure investors and support activity throughout emerging Asia.

Despite the geopolitical risks still present, we do not think it justified to remain totally out of equities. We favour the Chinese and US markets over eurozone equities, which corresponds to a neutral total exposure.

Commodities provide diversification to our portfolios.

**Monetary Policy:** The 50 basis point (bp) rate increase announced at the 14 December Federal Open Market Committee (FOMC) meeting raised the federal funds target rate into the 4.25% -4.50% range, after a total rate rise of +425bp in 2022. During the quarter, the US Federal Reserve (Fed) kept investors informed about how big the next rate increase would be (+75bp in November and +50bp in December). What investors appear to have grasped less well was the Fed's intention to continue the tightening cycle in 2023 and to maintain policy rates in restrictive territory for a while longer. Yet this message was clearly communicated: Released in mid-October, the September FOMC meeting minutes had highlighted the Fed's willingness to lower inflation that was 'broad-based and unacceptably high'. The fact is that investors anticipate that higher key rates will provoke a recession that will then force the Fed to quickly cut rates. This so-called 'Fed pivot' assumption was supported by the smaller rate increase in December after four consecutive 75bp hikes, and by the deterioration of most business surveys at the end of the year. The inflexion in inflation data also played a part: In November, consumer prices rose by 7.1% YoY (after 7.7% in October) and core inflation (excluding food and energy) came in at 6.0% (after 6.3% in October and 6.6% in September, which may turn out to have marked the high point of this cycle). Nevertheless, the Fed indicated that it still has to be convinced that inflation is slowing. It revised up its inflation forecasts for Q4 2023 and Q4 2024 (to, respectively, 3.5% and 2.5% for core inflation as measured by the personal consumption expenditures excluding food and energy deflator, which stood at 4.7% in November). Even the employment situation is beginning to raise some questions: While monthly job creations remain high and wages are growing by more than 5%, announcements of massive layoffs in certain sectors are multiplying. A study by the Philadelphia Fed also caused confusion by concluding that job creations in Q2 may have been much lower than estimated by the Bureau of Labor Statistics. The Fed itself expects the unemployment rate to rise to 4.6% in 2023 (from 3.7% in November), reinforcing the belief among some observers that it is likely to do 'too much' tightening. In December, the Flash composite Purchasing Managers' Index (PMI) fell to 44.6 – the same level as in August, which was at that point the lowest since the pandemic. Manufacturing looked particularly challenging as the year drew to a close. According to the consensus of sell-side economists surveyed by Bloomberg, the probability of a downturn over the next 12 months rose to 70%. Fed Chair Jerome Powell said: 'I don't think anyone knows whether we're going to have a recession or not'.

## Investment Manager's Report (continued)

### Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

Market environment: (continued)

The European Central Bank (ECB) raised its three key rates twice during the quarter. Following the Governing Council's meeting on 15 December, the interest rates on the main refinancing operations, marginal lending facility and deposit facility were increased to 2.50%, 2.75% and 2.00% respectively. Comments from senior ECB figures made it clear that rates will continue to rise: since the beginning of the quarter, the ECB has claimed it will ensure inflation returns to its 2% target as soon as possible. As is the case for the Fed, this message is not necessarily correctly perceived by investors, especially as the Governing Council may not be entirely unanimous. Eurozone inflation showed only a limited inflexion at the end of the year (from 10.6% in October to 10.1% in November, year-on-year). At her press conference, ECB president Christine Lagarde wasted no time in talking about raising interest rates 'at a 50 basis-point pace for a period of time'. She repeatedly said that moving from a 75bp rate hike in October to 50bp in December is 'not a pivot, we are not slowing down'. The ECB also announced that from the beginning of March 2023, the asset purchase programme (APP) portfolio will be reduced at a measured and predictable pace, and that the Eurosystem will not reinvest all principal payments from maturing securities. This reduction will average EUR 15 billion a month until the end of Q2 2023, and its pace will be adjusted over time. The details will be announced in February. So far, the reduction in the size of the ECB's balance sheet has only been achieved through the repayment of the sums borrowed by the banks under the TLTROs (Targeted longer-term refinancing operations). Nearly EUR 800 billion was repaid in November and December (out of EUR 2 100 billion borrowed). Eurozone GDP growth was stronger than expected in Q3, at 0.3%, and business surveys improved slightly at the end of the year (especially in Germany).

These results reflect a softening in the rate of decline in the eurozone economy. However, the average level of the PMI index for Q4 indicating the sharpest economic contraction since 2013 when pandemic lockdown months are excluded. Retail sales struggled at the start of Q4, falling by 1.8% in volume terms between September and October, and by 2.7% YoY. The ECB expects the eurozone to fall into a mild recession in the last quarter of 2022 and the first quarter of 2023. Despite the poor growth outlook, the ECB considers itself as having 'no choice but to act' as inflation is still uncomfortably high. At the end of the year, hawkish statements multiplied: ECB executive board member, Isabel Schnabel, indicated that the terminal rate has risen above 3.00% and that the aim of the December meeting had been to clarify this to the financial markets.

Bond Markets: The yield of the US 10-year T-note varied widely during the quarter: It reached its year-high close at 4.25% on 24 October and then eased in November to move at around 3.50% during the first half of December, a threshold that had not been crossed since mid-September. The 10-year yield ended at 3.87%, a very limited rise from the end September (+5bp) which masked sharp swings triggered by inflation figures and expectations on Fed monetary policy. The release of consumer price indices had a major impact throughout the quarter: The acceleration in inflation excluding food and energy in September (to 6.6% year-on-year) gave cause for concern, causing the 10-year yield to rise above 4.00% on 13 October. The data published in November, on the contrary, seemed to support the notion of an inflexion of inflation, resulting in a sharp fall in bond yields. This was seen again in December, albeit on a smaller scale, when core inflation for November returned to 6.0% and total inflation to 7.1% (from a peak of the cycle at 9.1% in June). Even though the slowdown in inflation leaves it well above the 2% target, investors have favoured information consistent with their assumption that the Fed will slow the pace of rate hikes after having made four consecutive 75bp hikes in June, July, September and November.

### Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF (the "Sub-Fund") (continued)

Monetary Policy: (continued)

The yield on the German 10-year Bund (2.11% at the end of November), moved sharply in October and November, although trendless between 1.80% and 2.40%. The easing phases of eurozone long bond yields corresponded to the moves seen in US bonds, supported by the idea that the Fed's monetary policy was set to become less hawkish (the 'pivot' assumption). In contrast, rises in yields were seen when the consumer price indices rose in the eurozone (from 9.9% in September to 10.6% in October year-on-year) and when the ECB's tone hardened. Several members of the ECB Governing Council raised the question of possible second round effects on inflation from higher wages. In December, inflation forecasts were revised up for 2023 (from 5.5% to 6.3%) and for 2024 (from 2.3% to 3.4%). The ECB does not believe there is currently a wage-price spiral but wants to avoid inflation expectations starting to become de-anchored. This explains why it opted for a resolutely hawkish tone at the end of the year after the increases of 75bp in October and 50bp in December of its three key rates. On 15 December, the ECB's much more hawkish speech following the announcement of the 50bp increase in the three key rates, sent the German 10-year Bund yield well above 2.00%, while the 2-year yield rose by 25bp as Christine Lagarde hinted that the first three meetings in 2023 could lead to 50bp increases in key rates. Less than a week later, the Bank of Japan's unexpected decision to extend the Yield Curve Control (YCC) range weighed on European government bonds. The fear of Japanese investors disengaging massively from eurozone bond markets, which would become less attractive if the Japanese 10-year yield should rise to +0.50%, may have accentuated the deterioration. At a more basic level, seeing the last of the major G7 central banks join those engaged in normalising their monetary policy (even though the BoJ explained itself) added to investor nervousness. The 10-year Bund yield ended December at a year-high of 2.57%, up by 46bp compared to the end of September and by 275bp since the beginning of the year. The German 2-year yield ended at 2.76% (+100bp over the quarter), its highest since 2008.

Peripheral eurozone markets, which had outperformed since the beginning of the quarter, experienced a more difficult end to the year due to expectations of a sharper rise in key ECB rates and the prospect of smaller reinvestments of maturing securities (acquired under the APP) while eurozone sovereign issues will be large at the beginning of 2023. The spread between Italian and German 10-year yields, which had tightened from 240bp at the end of September to 180bp at the beginning of December, abruptly rose on 15 December to return above 215bp. The yield on the 10-year Italian BTP ended at 4.72%, a quarterly rise of 20bp.

Thanks to the risk appetite surge in October and November, and the rise in government bonds in November, the credit market posted positive total returns in Q4 after three consecutive quarters of declines. The quarter was characterised by a sharper tightening of credit spreads on euro IG (Investment Grade) after having widened considerably since the spring.

Fund: No substantial changes have been performed in the optimization since inception (21/09/2022). The rebalancing are mostly removing the bonds taken out from the benchmark to buy new ones.

## **DEPOSITARY'S REPORT TO THE SHAREHOLDERS OF FAM SERIES UCITS ICAV**

We, BNP Paribas S.A., Dublin Branch, appointed Depositary to the ICAV provide this report solely in favour of the investors of the Fund as a body for the year ended 31 December 2022 (“the Accounting Period”). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011) as amended, (“the UCITS Regulations”). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the UCITS Regulations, we have enquired into the conduct of the ICAV for the Accounting Period and we hereby report thereon to the investors of the Fund as follows;

We are of the opinion that the Fund has been managed during the Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Sub-Fund by the constitutional documents, the Regulations and by the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (“the Central Bank UCITS Regulations”); and
- (ii) otherwise in accordance with the provisions of the constitutional documents, the Regulations and the Central Bank UCITS Regulations.

# FAM Series UCITS ICAV

## Directors' Report

For the financial year ended 31 December 2022

The Directors of FAM Series UCITS ICAV (the "ICAV") submit their report together with the audited Financial Statements for the financial year ended 31 December 2022.

### Principal activities

The ICAV has been authorised by the Central Bank of Ireland (the "Central Bank") as an Irish Collective Asset-Management Vehicle pursuant to the Irish Collective Asset-Management Vehicles Act 2015 (the "ICAV Act"). The ICAV has been authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended).

The ICAV is structured as an umbrella entity composed of different Sub-Funds. Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

This Financial Statement relate only to the Exchange Traded Funds ("ETFs"). On 7 October 2022, FAM Series UCITS ICAV listed on the Italian Stock Exchange (Borsa Italiana).

### Statement of Directors' Responsibilities in Respect of the Financial Statements

The Directors are responsible for preparing the Financial Statements in accordance with applicable Irish law and International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU").

Irish company law requires the Directors to prepare Financial Statements for each financial year, which give a true and fair view of the state of affairs of the ICAV and of the profit or loss of the ICAV for that year. In preparing those Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that the ICAV will not continue in business; and
- state whether the Financial Statements have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and reasons for any material departure from those standards.

The Directors confirm that they have complied with the above requirements in preparing the Financial Statements for the year ended 31 December 2022 (the "Financial Statements"). In carrying out these requirements, the Directors have appointed BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") to act as administrator to the ICAV.

### Review of the business and future developments

A comprehensive overview of the ICAV's and its Sub-Funds' activities and its future developments are set out in the Investment Manager's reports. Investment objectives may change from time to time, these will be reflected in the prospectus of the ICAV and the relevant Sub-Fund supplement.

### Risks and uncertainties

The principal risks and uncertainties which the ICAV faces relate to the use of financial instruments and are listed in note 13 "Financial Instruments and Associated Risks".

### Results and dividends

The results for the financial year are shown in the Statement of Comprehensive Income on pages 44-46.

### Corporate Governance

The Directors have voluntarily adopted the 'Corporate Governance Code for Collective Investment Schemes and Management Companies' as published by Irish Funds in December 2011 (the "IF Code"), as the ICAV's corporate governance code. In respect of the financial year ended 31 December 2022, the Directors confirm compliance with the provisions of the IF Code.

### Secretary

The Secretary that served during the financial year is listed on page 4.

# FAM Series UCITS ICAV

## Directors' Report (continued)

For the financial year ended 31 December 2022

### Directors

The Directors of the ICAV at 31 December 2022 were:

Jim Finn (Irish resident)\*

Fabio Melisso (Irish resident)\*\*

Ciaran Brady (Irish resident)\*\*

Lorenzo Di Pietrantonio (Irish resident)\*\* (appointed on 24 January 2022)

\* Independent non-executive Director

\*\* Non-executive Director

### Transactions involving Directors

Other than as disclosed in Note 12 to the Financial Statements, there are no contracts or arrangements of any significance in relation to the business of the ICAV in which the Directors or the Secretary had any interest as defined in the ICAV Act at any time during the financial year.

### Connected Persons

In accordance with the requirements of the UCITS Regulations, all transactions carried out with the ICAV by the promoter, manager, trustee, investment adviser and associates/group companies ("connected persons") must be conducted at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in the UCITS Regulations are applied to all transactions with connected persons and that transactions with connected persons entered into during the year complied with the obligations set out in the UCITS Regulations.

### Accounting Records

The measures taken by the Directors to secure compliance with the ICAV's obligation to keep adequate accounting records are the use of appropriate accounting systems and procedures and employment of competent persons through the appointment of the Administrator. The accounting records are kept at the registered address of the Administrator at Termini, 3 Arkle Road, Sandyford, Dublin 18, D18 T6T7, Ireland.

### Statement of Relevant Audit Information

The Directors acknowledge that they are responsible for providing all relevant audit information to the ICAV's statutory auditors in connection with preparing their report in accordance with section 330 of the Companies Act 2014 (as amended). The Directors confirm that:

- so far as the Directors are aware, there is no relevant audit information of which the ICAV's statutory auditors are not aware; and
- each of the Directors have taken all the steps that ought to have been taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the ICAV's statutory auditors are aware of that information.

### Going concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern.

### Independent Auditors

Deloitte Ireland LLP, Chartered Accountants and Statutory Audit Firm were appointed auditors for the financial year.

# FAM Series UCITS ICAV

## Directors' Report (continued)

For the financial year ended 31 December 2022

### Events during the financial year

#### Covid 19

The impact of the coronavirus outbreak was profound across all aspects of society. In developed economies, it is clear that the worst of the impact is now over. However, there is an expectation that seasonal peaks and new variants could give rise to renewed travel restrictions, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery and supply chain disruptions which will create ongoing challenges. Widescale and comprehensive vaccination programmes have been put in place in many countries which have had a positive effect. Nevertheless, the impact of COVID-19 continues to adversely affect the economies of many nations across the globe and this in turn may continue to impact investments held by each Fund.

#### Russia/Ukraine Conflict and sanctions

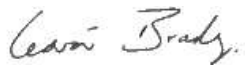

The outbreak of war in Ukraine and the related sanctions targeted against the Russian Federation has impacted the European and Global economies. The direct exposure to Ukraine, Russia or Belarus was and continues to be not material to the overall ICAV. However, the impact on the general economic situation may require in the future revisions of certain assumptions and estimates. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

All disclosures relating to events during the year ended 31 December 2022 are disclosed in Note 19 of the Financial Statements.

#### Events post financial year end

All disclosures relating to events after 31 December 2022 are disclosed in Note 20 of the Financial Statements.

Signed for and on behalf of the board of Directors by

Ciarán Brady

## INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FAM SERIES ICAV

### Report on the audit of the financial statements

#### Opinion on the financial statements of FAM Series ICAV (the 'ICAV')

---

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 December 2022 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the Applicable Regulations.

The financial statements we have audited comprise:

- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Schedule of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cashflows and
- the related notes 1 to 23 including a summary of significant accounting policies as set out in note 2.

The relevant financial reporting framework that has been applied in the preparation of the financial statements is the Irish Collective Asset-Management Vehicles Acts 2015-2020 ("the ICAV Act") and International Financial Reporting Standards (IFRS) as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

#### Basis for opinion

---

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "*Auditor's responsibilities for the audit of the financial statements*" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Summary of our audit approach

##### Key audit matters

The key audit matters that we identified in the current year were:

- Valuation of financial assets and liabilities at fair value through profit or loss
- Existence of financial assets and liabilities at fair value through profit or loss

<b>Materiality</b>	<p>The materiality that we used in the current year was 1% of average net assets determined in respect of each sub-fund and 0.50% of average net assets for the following sub-funds:</p> <ol style="list-style-type: none"> <li>1. Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF</li> <li>2. Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF</li> <li>3. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF</li> </ol>
<b>Scoping</b>	<p>Our audit is a risk-based approach taking into account the structure of the ICAV, types of investments, the involvement of the third-party service providers, the accounting processes and controls in place and the industry in which the ICAV operates.</p>
<b>Significant changes in our approach</b>	<p>There have been no significant changes in our approach from our prior year audit.</p>

## Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the ICAV's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls in place regarding going concern as part of our audit risk assessment procedures.
- Holding discussions with management on the directors' going concern assessment, the future plans for the ICAV and the feasibility of those plans.
- Challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- Reviewing all board meeting minutes during the period up to the date of approval of the financial statements, for evidence of any discussions and/or decisions that could impact the ICAV's ability to continue as a going concern.
- Reviewing the capital activity and NAV movements, subsequent to the financial year end.
- Assessing the adequacy of the relevant going concern disclosures made in the financial statements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

## Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

### Valuation of financial assets and liabilities at fair value through profit or loss

#### Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

The valuation of financial assets and liabilities at fair value through profit or loss is considered a key audit matter as it is the most significant number on the Statement of Financial Position, is a key driver of performance and due to the potential for management judgement and estimation in the valuation.

As financial assets and liabilities at fair value through profit or loss are a key driver of performance and due to their significance to the net asset value, there is a risk that these investments might not be correctly valued, in accordance with IFRS.

Refer also to note 14 in the financial statements.

#### How the scope of our audit responded to the key audit matter

- We considered the valuation basis used in light of the valuation policy as stipulated in the ICAV's Prospectus documents and the requirements of IFRS.
- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") ISAE 3402 Report and identified the key controls in place over the valuation process and reviewed those key controls for any exceptions.
- We independently valued all exchange traded securities using our own market feeds.
- We reviewed the adequacy of the fair value levelling disclosures in the financial statements.
- We revalued swap positions on a sample basis.
- We reviewed the fair value levelling disclosures in the financial statements to ensure they were appropriate.

### Existence of investments

#### Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

There is a risk that financial assets and liabilities at fair value through profit or loss recorded might not exist or might not be owned by the ICAV. Financial assets and liabilities at fair value through profit or loss are considered to be a key driver for the ICAV's performance.

Therefore, due to the significance of investments to the ICAV's financial statements, we have determined this as a key audit matter.

Refer also to note 14 in the financial statements.

## How the scope of our audit responded to the key audit matter

- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the “Administrator”) ISAE 3402 Report and identified the key controls in place over the reconciliation process and reviewed those key controls for any exceptions.
- We obtained direct confirmation of the investments of the ICAV from the Depository and brokers at year-end. Any reconciling items between the confirmations and the ICAV’s investment portfolios were investigated to ensure that trades were recorded in the correct reporting period.
- We completed alternative procedures in relation to a number of positions for which confirmations were not available at the issuance of this report.

Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the financial statements is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

## Our application of materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statement as a whole as follows:

<b>Basis for determining materiality</b>	<p>The materiality that we used in the current year was 1% of average net assets determined in respect of each sub-fund and 0.50% of average net assets for the following sub-funds:</p> <ol style="list-style-type: none"> <li>1. Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF</li> <li>2. Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF</li> <li>3. Fineco AM MSCI World Metals and Mining UCITS ETF</li> <li>4. Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF</li> <li>5. Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF</li> <li>6. Fineco AM MSCI World Financials ESG Leaders UCITS ETF</li> <li>7. Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF</li> <li>8. Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF</li> <li>9. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF</li> <li>10. Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF</li> <li>11. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF</li> </ol>
<b>Rationale for the benchmark applied</b>	<p>The Net Asset Value of the ICAV is the primary indicator of the size and performance of the ICAV and is considered the key area of interest for the shareholders, who are the primary users of the financial statements. The use of the average net Asset value is considered the industry practice benchmark for Investment Funds.</p>

The materiality used by the former auditor in the audit of the prior year financial statements was 1% of average net assets of the ICAV for all sub-funds.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole. Performance materiality was set at 50% of materiality for the 2022 audit. In determining performance materiality, we considered the following factors:

- our understanding of the ICAV;
- the quality of the control environment;
- the nature and extent of misstatements identified in previous audits; and
- our expectations in relation to misstatements in the current period.

We agreed with the Board of Directors that we would report to the Board of Directors all audit differences in excess of 5% of materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

## An overview of the scope of our audit

---

Our audit is a risk based approach taking into account the structure of the ICAV, types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the ICAV operates. The ICAV is incorporated as an Irish collective asset management vehicle with variable capital and segregated liability between sub-funds. The ICAV is authorised by the Central Bank of Ireland (the “Central Bank”) as a qualifying investor alternative investment fund.

The ICAV is organised as an umbrella fund with segregated liability between sub-funds. We assess the risks of each sub-fund separately. We have conducted our audit based on the books and records maintained by the administrator of FAM Series ICAV at 32 Molesworth Street, Dublin 2, Ireland.

## Other information

---

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor’s report thereon. The directors are responsible for the other information contained within.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

## Responsibilities of directors

---

As explained more fully in the Statement of Directors’ responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the ICAV’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

## Auditor's responsibilities for the audit of the financial statements

---

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/>. This description forms part of our auditor's report.

## Extent to which the audit was considered capable of detecting irregularities, including fraud

---

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

### Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the ICAV's documentation of their policies and procedures relating to:
  - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
  - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
  - the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including IT and valuations regarding how and where fraud might occur in the financial statements and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas: Valuation of financial assets and liabilities at fair value through profit or loss and Revenue Recognition. In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the ICAV operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the ICAV Act, Listing Rules and the Applicable Regulations.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the ICAV's ability to operate or to avoid a material penalty. These included matters regulated by the Central Bank of Ireland.

## **Audit response to risks identified**

As a result of performing the above, we identified 'Valuation of financial assets at fair value through profit or loss as a key audit matter related to the potential risk of fraud. The key audit matters section of our report explains the matter in more detail and also describes the specific procedures we performed in response to that key audit matter.

In addition to the above, our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management and the Board of Directors concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance and reviewing correspondence with the Central Bank of Ireland; and
- In addressing the risk of fraud in Revenue Recognition, independently valuing all exchange traded securities using our own market feeds and completing an unrealised gain/loss reconciliation.
- In addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

## **Report on other legal and regulatory requirements**

### **Matters on which we are required to report by the ICAV Act and the Applicable Regulations**

---

In our opinion, the information given in the directors' report is consistent with the financial statements. The directors' report has been prepared in accordance with the ICAV Act.

### **Matters on which we are required to report by exception**

---

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration specified by the ICAV Act are not made.

## Opinion on other matters prescribed by the Applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

## Other matters which we are required to address

---

We were appointed by the Board of Directors on 23 November 2022 to audit the financial statements for the year ending 31 December 2022. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 5 years, covering the year ending 31 December 2022.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the ICAV in conducting the audit.

Our audit opinion is consistent with the additional report to the Board of Directors we are required to provide in accordance with ISA (Ireland) 260.

## Use of our report

---

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Brian Forrester

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022

### 1. General Information

FAM Series UCITS ICAV (the “ICAV”) is an umbrella Irish Collective Asset-management Vehicle with segregated liability between its Sub-Funds and authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended). The ICAV was incorporated on 8 March 2018. On 7 October 2022, FAM Series UCITS ICAV listed on the Italian Stock Exchange (Borsa Italiana).

The ICAV is structured as an umbrella entity composed of different sub-funds (the “Sub-Funds”). Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

The investment objective of the below Sub-Funds is to achieve long term capital appreciation:

- Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF
- Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF
- Fineco AM MSCI World Metals and Mining UCITS ETF
- Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF
- Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF
- Fineco AM MSCI World Financials ESG Leaders UCITS ETF
- Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF
- Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF
- Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF
- Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF

The investment objective of Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF is to achieve total returns.

The assets of a Sub-Fund will be invested separately in accordance with the investment objectives and policies of the Sub-Fund as set out in the Prospectus.

In respect of each Sub-Fund, Fineco Asset Management Designated Activity Company (the “Investment Manager”) has appointed an Investment Manager to manage the assets and investments of the Sub-Fund in conformity with the Sub-Fund’s investment objectives and policies. The Investment Managers shall be entitled to receive annual management fees (see Note 12) which shall be paid out of the fees of the Manager and not out of the assets of the Sub-Fund.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 1. General Information (continued)

#### (a) Basis of Preparation

These Financial Statements have been prepared in accordance with International Financial Reporting Standards ('IFRS') issued by the International Accounting Standards Board ("IASB") and have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period.

#### Going Concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern. Therefore, the Financial Statements are prepared on the going concern basis.

#### New standards and interpretations effective

##### Onerous Contracts – Costs of Fulfilling a Contract – Amendments to IAS 37

In May 2020, the International Accounting Standards Board ("IASB") issued amendments to IAS 37 Provisions, Contingent Liabilities and Contingent Assets to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.

In particular, the amendments 1 January 2022 clarify:

Entities that previously applied the incremental cost approach will see provisions increase to reflect the inclusion of costs related directly to contract activities, whilst entities that previously recognised contract loss provisions using the guidance from the former standard, IAS 11 Construction Contracts, will be required to exclude the allocation of indirect overheads from their provisions.

This amendment did not have a material impact on the ICAV.

There are no standards, interpretations or amendments to existing standards that are effective that would be expected to have a significant impact on the ICAV.

##### (b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2022 and not early adopted

##### Classification of Liabilities as Current or Non-current - Amendments to IAS 1

In January 2020, the Board issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

In particular, the amendments which will become effective 1 January 2023 clarify:

- What is meant by a right to defer settlement.
- That a right to defer must exist at the end of the reporting period.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification.

This amendment is not expected to have a material impact on the ICAV.

# FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 1. General Information (continued)

**(b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2022 and not early adopted (continued)**

### Definition of Accounting Estimates - Amendments to IAS 8

In February 2021, the Board issued amendments to IAS 8, in which it introduces a new definition of ‘accounting estimates’.

In particular, the amendments which will become effective 1 January 2023 clarify:

- the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors.
- how entities use measurement techniques and inputs to develop accounting estimates.

This amendment is not expected to have a material impact on the ICAV.

### Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

In February 2021, the Board issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements (the PS), in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures.

In particular, the amendments which will become effective 1 January 2023 clarify:

- that replacing the requirement for entities to disclose their ‘significant’ accounting policies with a requirement to disclose their ‘material’ accounting policies.
- that adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosure.

This amendment is not expected to have a material impact on the ICAV.

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the ICAV.

## 2. Statement of Accounting Policies

The significant accounting policies adopted by the ICAV are as follows:

### 2.1 Accounting Policies

#### (a) Financial Assets and Liabilities at Fair Value through Profit or Loss (“FVTPL”)

##### (i) Classification

The ICAV classifies financial assets and financial liabilities into the following categories:

Financial assets at FVTPL:

*Designated at FVTPL:*

- *Transferable Securities*
  - Equities
  - Bonds
- *Derivative Instruments*
  - Total return swaps

Financial assets at amortised cost:

- *Loans and receivables: cash and cash equivalents and interest and other receivables.*

Financial liabilities at amortised cost:

- *Other liabilities: accrued expenses.*

# FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 2. Statement of Accounting Policies (continued)

### 2.1 Accounting Policies (continued)

#### (a) Financial Assets and Liabilities at Fair Value through Profit or Loss (“FVTPL”) (continued)

##### (i) Classification (continued)

The ICAV designates exchange traded funds at FVTPL on initial recognition because it manages these securities on a fair value basis in accordance with its documented investment strategy. Internal reporting and performance measurement of these securities are on a fair value basis.

A non-derivative financial asset with fixed or determinable payments may be classified as a loan and receivable unless it is quoted in an active market or is an asset for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

##### (ii) Initial Measurement

Financial assets at FVTPL are initially recognised on the trade date, which is the date on which the ICAV becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised on the date on which they are originated.

Purchases and sales of financial instruments are accounted for on the trade date. Realised gains and losses on disposals of financial instruments are calculated using the First In, First Out (“FIFO”) method.

##### (iii) Recognition

Financial instruments categorised at FVTPL are measured initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income. Financial assets and financial liabilities are recognised on the Statement of Financial Position when the ICAV becomes party to the contractual provisions of the instrument. A regular purchase of financial assets is recognised using trade date accounting. From this date any gains or losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

##### (iv) Fair Value Measurement

‘Fair value’ is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the ICAV has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the ICAV measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an on-going basis.

If there is no quoted price in an active market, then the ICAV uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

Investments in open-ended investment funds are valued at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the daily net asset value of these shares are recognised as net gains/losses on investment activities in the Statement of Comprehensive Income.

The ICAV recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

# FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 2. Statement of Accounting Policies (continued)

### 2.1 Accounting Policies (continued)

#### (a) Financial Assets and Liabilities at Fair Value through Profit or Loss (“FVTPL”) (continued)

##### (v) Amortised Cost Measurement

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

##### (vi) Impairment

IFRS 9 replaces the ‘incurred loss’ model in IAS 39 with an ‘expected credit loss’ (“ECL”) model. The new impairment model applies to financial assets measured at amortised cost and debt investments at FVOCI, but not to investments in equity instruments. Under IFRS 9, credit losses are recognised earlier than under IAS 39.

A financial asset or liability not classified at FVTPL is assessed at each reporting date to determine whether there is objective evidence of impairment. A financial asset or a group of financial assets is ‘impaired’ if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset(s) and that loss event(s) had an impact on the estimated future cash flows of that asset(s) that can be estimated reliably.

Objective evidence that financial assets are impaired includes significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of the amount due on terms that the ICAV would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, or adverse changes in the payment status of the borrower.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset’s original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against receivables. Interest on the impaired asset continues to be recognised, if an event occurring after the impairment was recognised causes the amount of impairment loss to decrease, then the decrease in impairment loss is reversed through profit or loss.

##### (vii) Derecognition

The ICAV derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the ICAV neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest in such transferred financial assets that is created or retained by the ICAV is recognised as a separate asset or liability.

The ICAV enters into transactions whereby it transfers assets recognised on its Statement of Financial Position, but retains either all or substantially all of the risks and rewards of the transferred assets. If all or substantially all of the risks and rewards of the transferred assets are retained, then transferred assets are not derecognised. Transfer of assets usually includes sale and repurchase agreements where all or substantially all of the risks and rewards are retained.

The ICAV derecognises a financial liability when its contractual obligations are discharged, cancelled, or expired.

# FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 2. Statement of Accounting Policies (continued)

### 2.1 Accounting Policies (continued)

#### (b) Transferable Securities

##### Investment Funds

The Sub-Funds invest in a diversified portfolio of collective investment schemes, whether open or closed ended, regulated or unregulated, including investment companies, investment trusts and/or investment limited partnerships, which the Investment Manager considers will give consistent returns to investors in line with the target returns of the Sub-Funds and which may include investment in the other Sub-Funds of the ICAV (“Underlying Funds”).

#### (c) Derivative Instruments

The Sub-Funds may enter into forward currency contracts and other derivative contracts mentioned below for the purposes of efficient portfolio management.

#### Total return swaps

A total return swap is a derivative contract between two parties where they agree to exchange the investment return and income on an underlying asset or a basket of assets for the investment return and income on a different underlying asset or a basket of assets which is agreed between the parties. Realised and movement of unrealised gains and losses are recognized in the Statement of Comprehensive Income.

#### (d) Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported on the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

#### (e) Redeemable Participating Shares

The issued redeemable participating Shares (“Shares”) is at all times equal to the net asset value of the ICAV. The Shares are redeemable at the shareholders option and are classified as financial liabilities. The Shares can be put back to the ICAV at any time for cash equal to a proportionate share of the ICAV’s net asset value. The Shares are carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the share back to the ICAV. Each Sub-Fund’s Net Asset Value (“NAV”) per share is calculated by dividing the NAV of that Sub-Fund, being the value of its assets less its liabilities by the numbers of shares of that Sub-Fund then in issue.

#### (f) Use of Judgements and Estimates

The preparation of Financial Statements in conformity with IFRS as adopted by the EU requires management to make judgements, estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the Financial Statements. Estimates also affect the reported amounts of income and expenses for the reporting period in the Statement of Comprehensive Income. Actual results could differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised and in any future accounting periods affected. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year, as well as critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the Financial Statements are included in Note 13 and 14.

# FAM Series UCITS ICAV

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 2. Statement of Accounting Policies (continued)

### 2.1 Accounting Policies (continued)

#### (g) Foreign Exchange

Items included in the ICAV's Financial Statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). The functional currency for this ICAV is Euro ("EUR" or "€") and each Sub-Fund's base currency is disclosed below.

Sub-Fund	Base currency
Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF	USD
Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF	USD
Fineco AM MSCI World Metals and Mining UCITS ETF	USD
Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF	USD
Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF	USD
Fineco AM MSCI World Financials ESG Leaders UCITS ETF	USD
Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF	USD
Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF	USD
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF	EUR
Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF	EUR
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF	EUR

The ICAV has adopted the functional currency of each Sub-Fund as the presentation currency for these Financial Statements. Assets and liabilities expressed in currencies other than the functional currency are converted into the functional currency using the exchange rates prevailing as at the Statement of Financial Position date. Transactions in foreign currencies are translated into the Sub-Fund's functional currency at the transaction dates. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the results for the financial year.

#### (h) Income

Interest income is recognised in the Statement of Comprehensive Income at the effective interest rate method.

Dividends are recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

#### (i) Expenses

All expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

#### (j) Cash and Cash Equivalents

Cash comprises cash at banks and bank overdrafts. Cash equivalents are short term (up to three months), highly liquid investments, that are readily convertible to known amounts of cash and which are subject to insignificant changes in value. For the financial year ended 31 December 2022, cash equivalents held by the ICAV includes, commercial papers and treasury bills. They are held for the purpose of meeting short-term cash commitments rather than for investments or other purposes. The carrying amount of these assets is approximately equal to their fair value.

#### (k) Payable for Securities Purchased/Receivable for Securities Sold

Payable for securities purchased and receivable for securities sold include trades pending settlement.

#### (l) Redemptions Payable

Redemptions are recognized as liabilities when the amount requested by the unitholder in the irrevocable redemption notice becomes fixed.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 2. Statement of Accounting Policies (continued)

#### 2.1 Accounting Policies (continued)

##### (m) Subscriptions Receivable

Subscription receivable includes the amounts still to be collected from investor before the company will issue the shares.

##### (n) Due from/to Brokers

Due from/to brokers represent margin accounts and cash collateral for borrowed securities. Margin accounts represent cash deposits with brokers, transferred as collateral against open derivative contracts.

##### (o) Organisational Costs

Costs incurred in organising the ICAV are amortised over the first five accounting periods of the ICAV in accordance the prospectus. This is not in accordance with IFRS but the Management assessed the costs to be immaterial to the ICAV and please refer to note 4 where Organisational Costs are outlined per sub fund.

##### (p) Management fee rebate

The ICAV has rebate agreements with certain investment managers of the Underlying Funds. These rebates are recorded on an accruals basis in the Statement of Comprehensive income.

##### (q) Anti-Dilution Levy

The Directors reserve the right to impose “an anti-dilution levy” representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought or sold), duties and charges and other dealing costs relating to the acquisition or disposal of assets and to preserve the value of the underlying assets of a Sub-Fund, in the event of receipt for processing of net subscriptions or net redemptions exceeding such percentage of the NAV of the Sub-Funds as determined by the Directors from time to time (including subscriptions and/or redemptions which would be effected as a result of requests for conversion from one Class into another Class). Any such provision will be deducted from the subscription proceeds in the case of net subscription requests exceeding the threshold of a Sub-Fund and deducted from the redemption proceeds in the case of net redemption requests exceeding the threshold of a Sub-Fund including the price of shares issued or redeemed as a result of requests for conversion. Any such sum will be paid into the account of the relevant Sub-Fund.

The ICAV started applying the policy on 1 January 2022. The table below shows the Anti-Dilution Levy amounts per Sub-Fund included in the Other income balance in the Statement of Comprehensive Income.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 7. Share Capital

The actual value of paid up share capital of the ICAV shall at all times equal to the NAV of the ICAV after deduction of liabilities. The Shares of the ICAV shall be divided into share capital of 5,000,000,000,000 Shares of no par value and 2 Subscriber Shares of €1.00 each and shall at all times be equal to the value for the time being of the issued share capital of the ICAV.

Each of the Shares (with the exception of the Subscriber Shares) entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of the relevant Sub-Fund attributable to the relevant class in respect of which they are issued save in the case of dividends declared prior to becoming a Shareholder.

The proceeds from the issue of Shares shall be applied in the books of the ICAV to the relevant Sub-Fund and shall be used on behalf of such Sub-Fund for the acquisition of assets in which a Fund may invest. The records and accounts of each Sub-Fund shall be maintained separately.

The Directors reserve the right to re-designate any class of Shares from time to time, provided that Shareholders in that class shall first have been notified by the ICAV that the Shares will be re-designated and shall have been given the opportunity to have their Shares redeemed by the ICAV, except that this requirement shall not apply where the Directors re-designate Shares in issue in order to facilitate the creation of an additional class.

Each of the Shares entitles the holder to attend and vote at meetings of the ICAV and of the relevant Sub-Fund represented by those Shares. No class of Shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other class of Shares or any voting rights in relation to matters relating solely to any other class of Shares.

Any resolution to alter the class rights of the Shares requires the approval of three quarters of the holders of the Shares of the relevant class represented or present and voting at a general meeting duly convened in accordance with the Instrument.

The Instrument of the ICAV empowers the Directors to issue fractional shares in the ICAV. Fractional shares will be issued where any part of the subscription monies for Shares represents less than the subscription price for one Share, provided however, that fractions shall not be less than 0.01 of a Share and shall not carry any voting rights at general meetings of the ICAV or a Sub-Fund and the NAV of any fractional share shall be the NAV per Share adjusted in proportion to the fraction.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 9. Directors' Fees

The Directors are entitled to a fee by way of remuneration for their services at a rate to be determined from time to time by the Directors. The aggregate amount of Directors' remuneration in any one year shall not exceed €30,000 (excluding Value Added Tax, ("VAT"), if any).

All Directors will be entitled to reimbursement by the ICAV of expenses properly incurred in connection with the business of the ICAV or the discharge of their duties. Fees related to the ICAV are charged to the trading Sub-Funds. Mr. Jim Finn is the only Director of the ICAV in receipt of a director's fee. All other Directors of the ICAV have each waived their entitlement to receive a director's fee.

The directors' fees charged for the year amounted to €138. The directors' fees payable as at 31 December 2022 was €138.

### 10. Administration Fees and Depositary Fees

The Manager and the Administrator entered into a new administration agreement which is applicable for a three year period. The annual fee, payable out of the assets of the relevant Sub-Fund, is at a rate of 0.05% (plus VAT, if any) and is a combined fee which includes both the Administrator and the fee of the Depositary. The fee is presented on the Statement of Comprehensive Income as Administration fees and Depositary fees.

The Administrator is also entitled to be reimbursed for all agreed registration and transaction fees and out of pocket expenses (plus VAT thereon, if any) properly incurred by it in the performance of its duties and responsibilities under the Administration Agreement.

<b>31 December 2022</b>		<b>Administration fees and Depositary fees</b>	<b>Administration fees and Depositary fees payable</b>

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 10. Administration and Depositary Fee (continued)

#### Depositary Fee

Prior to the new administration agreement, BNP Paribas S.A., Dublin Branch (the “Depositary”) was entitled to an annual fee of up to 0.2% per annum (plus VAT, if any) of the Net Asset Value of each Sub-Fund. The Depositary’s fees accrued daily and was payable monthly in arrears out of the assets of the relevant Sub-Fund.

The Depositary shall also be entitled to be reimbursed for all agreed transaction fees and out of pocket expenses properly incurred by it in the performance of its duties and responsibilities under the Depositary Agreement. The Depositary will also charge third party transaction fees and sub-custodian fees and charges at normal commercial rates. All such fees and expenses will be borne by the relevant Sub-Fund or Sub-Funds.

### 11. Auditors Remuneration

The remuneration to the statutory audit firm in respect of the services rendered to the ICAV for the financial year is as follows:

	<b>2022</b>
	<b>EUR</b>
Audit fee*	<u>33,060</u>

\* Audit fee amount shown is excluding VAT of 23%. There were no other fees paid to the statutory audit firm for tax or other assurance or non-audit work during the year.

### 12. Related and Connected Persons Transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The Directors of the ICAV are considered related parties. Details of Directors’ fees charged during the year are disclosed in Note 9.

Mr. Fabio Melisso and Mr. Jim Finn (Independent director) are directors of the Manager and Mr. Ciaran Brady and Lorenzo Di Pietrantonio are employees of the Manager and will be considered to be interested in any agreement entered into by the ICAV with the Manager.

Sub-funds of Core Series and FAM Evolution ICAV, which are also managed by the Manager, have made investments in the ICAV during the year. There were no other agreements entered into by the ICAV with either Core Series or FAM Evolution ICAV during the year. BNP Paribas Securities Services is also the securities lending agent.

## 12. Related and Connected Persons Transactions (continued)

### Management Fee

The Manager is entitled to receive out of the assets of the ICAV a management fee in respect of each class, accrued daily and payable monthly in arrears at such annual percentage rate of the NAV of each class as set out in the relevant Sub-Fund supplement. Any out of pocket expenses incurred by the Manager in carrying out its role on behalf of the ICAV and its Sub-Funds shall be for its own account. These disclosed fees are the maximum charges capped as per the prospectus and actual fees charged may be lower. As per the prospectus the management fee rate can change during the year.

### 13. Financial Instruments and Associated risks

Each Sub-Fund's investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the prospectus for a more detailed discussion of the risks inherent in investing in each Sub-Fund. The Sub-Funds' have exposure to the following risks from financial instruments:

- a) Market risk;
- b) Liquidity risk;
- c) Credit risk; and
- d) Operational risk;

#### Risk Management framework

The Directors review quarterly risk and investment performance reports and presentations from the Manager, or where applicable the Manager's delegate Investment Managers (together "the Manager" only for the purpose of Note 13), covering the Sub-Funds' performance and risk profile during the financial year.

The Manager is responsible for ensuring that each Sub-Fund is managed within the terms of their investment guidelines and limits set out in the prospectus. The Directors review the Manager's reporting on the investment performance, product risk monitoring and oversight activities and the monitoring and oversight of regulatory and operational risk for the Sub-Funds.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 13. Financial Instruments and Associated risks (continued)

#### Risk Management framework (continued)

The Manager has been given discretionary authority to manage the assets in line with the investment objectives of each Sub-Fund. Compliance with the target asset allocations and the composition of the portfolio are monitored by the Directors on a quarterly basis. In instances where the portfolio has diverged from target asset allocations, the Manager is obliged to take actions to rebalance the portfolio in line with the established targets, within prescribed time limits.

#### (a) Market risk

Market risk arises mainly from uncertainty about future values of financial instruments influenced by price, interest rate and currency movements. It represents the potential loss each Sub-Fund may suffer through holding market positions in the face of market movements. The Manager's strategy for the management of market risk is driven by the Sub-Funds' investment objective as set out in Note 1. The ICAV's market risk is managed on a daily basis by the Manager. The Manager moderates this risk through a careful selection of securities and other financial instruments within specified limits. Details of the nature of the ICAV's investment portfolio at the Statement of Financial Position date are disclosed in the Schedule of Investments.

#### Value at Risk

The Manager uses three approaches to measure the Sub-Funds' global risk exposures. These are the commitment approach, Absolute Value at Risk ("VaR") and Relative VaR. These approaches are described in the prospectus and the approach each Sub-Fund uses is outlined in the table below:

Sub-Fund	Base Currency	Risk approach	Risk Basis
Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF	USD	VAR	Relative
Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF	USD	VAR	Relative
Fineco AM MSCI World Metals and Mining UCITS ETF	USD	VAR	Relative
Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF	USD	Commitment	N/A
Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF	USD	VAR	Relative
Fineco AM MSCI World Financials ESG Leaders UCITS ETF	USD	VAR	Relative
Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF	USD	VAR	Relative
Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF	USD	Commitment	N/A
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF	EUR	Commitment	N/A
Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF	EUR	Commitment	N/A
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF	EUR	Commitment	N/A

Using the relative VaR, the Manager estimates the potential loss in the Sub-Fund's portfolio over a set period at a certain confidence level, and based on statistical analysis of historical price trends and volatilities. The VaR of the Sub-Fund's portfolio is measured relative to the benchmark index which the Manager consider a comparable benchmark to the Sub-Fund's portfolio. In compliance with the UCITS Regulations, the relative VaR of the Sub Fund's portfolio shall not exceed twice the VaR of the index, as determined daily using a one-tailed confidence interval of 99%, a holding period of one month and a historical observation period of at least 1 year.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 13. Financial Instruments and Associated risks (continued)

#### (a) Market risk (continued)

##### Value at Risk (continued)

The 1 day VaR as of 31 December 2022 based on a 99% confidence level is outlined in the table below:

Relative VaR	31 December 2022
Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF	4.00%
Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF	4.00%
Fineco AM MSCI World Metals and Mining UCITS ETF	5.00%
Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF	3.50%
Fineco AM MSCI World Financials ESG Leaders UCITS ETF	4.20%
Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF	3.40%

Some limitations of VaR analysis are:

- The models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns. As a consequence, VaR can be highly variable and a single date point analysis can be of limited value. VaR can fluctuate significantly over time;
- The composition of the ICAV can change significantly over a short period of time and, as such, the ICAV's risk profile including VaR may also change materially over a short time frame;
- The market price risk information is a relative estimate of risk rather than a precise and accurate number;
- The market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen);
- FX hedging for the benefit of a particular class are not included;
- Future market conditions could vary significantly from those experienced in the past.

#### (i) Price risk

Price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Any increase or decrease in the market price of investments would alter the ICAV's net asset value to the extent that it was invested at the time. The ICAV's investment portfolio complies with the investment restrictions as disclosed in its prospectus.

###### Sensitivity

Sensitivity analysis for the Sub-Fund where the Manager do not use VAR approach is disclosed below.

Any increase or decrease in the market price of investments would alter the Sub-Fund's net asset value to the extent that it was invested at the time. The Sub-Fund's investment portfolio complies with the investment restrictions as disclosed in its prospectus. As at 31 December 2022, if the fair value of investments to which the Sub-Fund was exposed had changed by 5% with all other variables held constant, this would have resulted in a change of net assets attributable to the shareholders by the amounts detailed below:

<b>Sub-Fund</b>		<b>2022</b>
Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF	USD	1,491,372
Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF	USD	1,967,776
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF	EUR	1,674,800
Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF	EUR	1,595,692
Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF	EUR	1,712,621

###### Management of price risk

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the price risk of the asset considered in the transaction and in reference to the ICAV risk framework and the ICAV's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed ICAV risk framework.

##### (ii) Interest rate risk

The ICAV's financial assets include direct interest bearing instruments. As a result the ICAV is exposed to fair value interest rate risk due to fluctuations in the prevailing levels of market interest rates. The ICAV's interest rate risk is managed on a daily basis by the Manager.

Cash and cash equivalents are not considered to be significantly exposed to fair value interest rate risk due to the short term nature of the instruments. Cash earns interest at a variable interest rate.

The interest bearing financial instruments significantly exposed to fair value interest rate risk are the bond investments. Consequently, movements in interest rates would have an inverse effect on the movement of the net asset value of the Sub-Funds.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the interest rate risk of the asset considered in the transaction and in reference to the ICAV risk framework and the ICAV's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed ICAV risk framework.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

## 13. Financial Instruments and Associated risks (continued)

### (a) Market risk (continued)

#### (iii) Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Each Sub-Fund may invest in securities denominated in currencies other than their functional currency. Consequently, each Sub-Fund is exposed to risks that the exchange rate of their functional currency relative to other currencies may change in a manner which has an adverse effect on the value of the portion of each Sub-Fund's assets which are denominated in currencies other than their own currency.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the currency risk of the asset considered in the transaction and in reference to the fund risk framework and the fund's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed fund risk framework.

Currency risk for Sub-Funds in the umbrella is controlled in either an absolute or relative (to a benchmark) manner as appropriate. In order to ensure Sub-Funds are not over exposed to currency risk one or more of the following Financial Derivative Instruments (FDIs) are employed: i) forward foreign exchange contracts, ii) swap contracts that reference foreign exchange rates or iii) currency futures.

As at 31 December 2022 the Sub-Funds had the following currency exposures:

#### Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF

Currency	Total Exposure USD	Net Exposure USD	5% increase/decrease USD
CHF	92,239	92,239	4,612

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 13. Financial Instruments and Associated risks (continued)

#### (b) Liquidity risk

Liquidity risk is the risk that the Sub-Funds' may not be able to generate sufficient cash resources to settle their obligations in full as they fall due or can do so only on terms that are materially disadvantageous.

Each Sub-Fund's principal liquidity risks arise from the ability of investors to effect redemption requests and the liquidity of the underlying investments each Fund has invested in.

Each Sub-Fund's Unitholders may redeem their units on the close of any daily dealing deadline for cash equal to a proportionate share of each Sub-Fund's NAV, excluding any duties and charges where applicable. Each Sub-Fund is therefore potentially exposed to the liquidity risk of meeting the unitholders' redemptions and may need to sell assets at prevailing market prices to meet liquidity demands.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio liquidity from the liquidity risk of the asset considered in the transaction and in reference to the fund risk framework and the fund's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed fund risk framework. The ICAV's overall liquidity risks are monitored on a quarterly basis by the Board of Directors.

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 13. Financial Instruments and Associated risks (continued)

#### (c) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the ICAV. The carrying amount of financial assets as per the Statement of Financial Position best represents the maximum credit risk exposure as at its date. Credit risk on transactions with brokers relates to transactions awaiting settlement. Risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the broker used. Substantially all of the assets of the ICAV are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the ICAV's rights with respect to securities or cash held by the Depositary to be delayed or limited. The ICAV manages its risk by monitoring the credit quality and financial position of the Depositary. The credit rating for the Depositary as at 31 December 2022 was A+ published by Standard & Poor's.

The cash and cash equivalents, balances due from brokers and balances due to brokers are held with bank and financial institution counterparties, which are rated BBB+ to AA, based on Standard & Poor's ratings. The derivatives are entered into with bank and financial institution counterparties, which are rated BBB+ to AA, based on Standard & Poor's ratings.

The Manager manages issuer risk through building diversified portfolios to limit exposure to any one issuer in accordance with the ICAV's investment objectives. The ICAV employs well known counterparties and ensures that concentration of investment in any one stock or counterparty is monitored against set limits.

Additionally, if required, the Manager will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the ICAV's investment objectives. The Manager monitors compliance with these restrictions on a daily basis.

All transactions in listed securities are settled/paid upon delivery using approved brokers. The risk of default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The credit ratings of all derivative counterparties are monitored regularly. The risk managers review counterparty credit ratings and approve the use of such counterparties.

The below table shows the breakdown by credit rating of the bonds and total return swaps in the Sub-Funds' portfolios:

## 13. Financial Instruments and Associated risks (continued)

### (c) Credit risk (continued)

#### Offsetting and amounts subject to master netting arrangements

The ICAV has not offset any financial assets and financial liabilities in the statement of financial position. The disclosures set out in the tables below include financial assets and financial liabilities that are subject to an enforceable master netting or derivative clearing agreement that covers derivatives.

The International Swaps and Derivatives Association (“ISDA”) and similar master netting agreements do not meet the criteria for offsetting in the statement of financial position. This is because the ICAV does not have any currently legally enforceable right to offset recognised amounts, because the right to offset is enforceable only on the occurrence of future events such as a default of the ICAV or the counterparties or other credit events.

The collateral provided in respect of the above transactions is subject to the standard industry terms of ISDA’s Credit Support Annex. This means that securities received/given as collateral can be pledged or sold during the term of the transaction but have to be returned on maturity of the transaction. The terms also give each counterparty the right to terminate the related transactions on the counterparty’s failure to post collateral.

The following tables disclose the derivative financial assets and liabilities subject to enforceable netting and similar arrangements, presented on an aggregate basis across multiple counterparties. Counterparties are analysed on an individual basis, offsetting assets and liabilities with individual counterparties where appropriate to do so while incorporating the collateral held by or posted by the Sub-Funds with respect to the open positions. The following tables present the total net exposure to counterparties with respect to derivative assets and liabilities on a Sub-Fund by Sub-Fund basis.

#### Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF

Financial assets subject to offsetting, enforceable master netting arrangements and similar agreements:

Description	Gross amounts of recognised financial assets	Gross amounts of recognised financial liabilities set-off in the statement of financial position	Net amounts of financial assets presented in the statement of financial position	Related amounts not set-off in the statement of financial position		Net amount

### 13. Financial Instruments and Associated risks (continued)

#### (d) Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the processes, technology and infrastructure supporting the Sub-Fund activities with financial instruments, either internally within the Sub-Fund or externally at the Sub-Fund's service providers, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of investment management behaviour.

The Sub-Funds' objectives are to manage operational risk so as to balance the limiting of financial losses and damage to its reputation with achieving its investment objective of generating returns to investors.

The primary responsibility for the development and implementation of controls over operational risk rests with the Directors. This responsibility is supported by the development of overall standards for the management of operational risk, which encompasses the controls and processes at the service providers and the establishment of service levels with the service providers, in the following areas:

- Documentation of controls and procedures;
- Requirements for:
  - Appropriate segregation of duties between various functions, roles and responsibilities;
  - Reconciliation and monitoring of transactions; and
  - Periodic assessment of operational risk faced.
- The adequacy of controls and procedures to address the risks identified;
- Compliance with regulatory and other legal requirements;
- Development of contingency plans;
- Training and professional development;
- Ethical and business standards; and
- Risk mitigation, including insurance if this is effective.

The Directors' assessment of the adequacy of the controls and processes in place at the service providers with respect to operational risk is carried out via regular discussions with the service providers and a review of the service providers' Service Organisation Controls reports on internal controls, if any are available.

### 14. Fair Value of Financial Instruments

Each Sub-Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

- Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data; and
- Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 14. Fair Value of Financial Instruments (continued)

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

The determination of what constitutes ‘observable’ requires significant judgement. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable, verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables provide an analysis of each Sub-Fund’s financial assets measured at fair value as at 31 December 2022:

	31 December 2022
CHF	0.92523
EUR	0.93699

### 16. Efficient Portfolio Management

The ICAV may employ investment techniques and instruments for efficient portfolio management of the assets of the ICAV and, in particular, the ICAV may, for the purpose of hedging (whether against currency, exchange or interest rate risks or otherwise), or for direct investment purposes, purchase or sell put options and call options, spot contracts, forward contracts, futures contracts and other derivative instruments and may also enter into sale and repurchase agreement.

Subject to the conditions and within the limits otherwise stated in the investment objective and policies of the ICAV, the Manager may employ investment techniques and instruments such as futures, options, forward foreign currency contracts and other derivatives for investment purposes, hedging or efficient portfolio management.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 17. Cross Liability

Liabilities incurred by a Sub-Fund of the ICAV may be discharged solely out of the assets of that Sub-Fund such that creditors of Sub-Funds will not have recourse to the assets of the other Sub-Funds of the ICAV to settle any liabilities incurred.

### 18. Taxation

Under current law and practice, the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. It is not chargeable to Irish tax on its income or capital gains. However, the ICAV is obliged to apply a withholding tax on any distribution payments to Irish residents or ordinarily resident shareholders on any encashment, redemption or transfer of units by an Irish resident or ordinarily resident shareholder, unless the shareholder is exempted under Section 739D of the Taxes Consolidation Act, 1997, as amended. Shareholders who complete a declaration confirming that they are not Irish residents are not liable to Irish tax on the income or gains arising from their investment in the ICAV and no withholding tax will be deducted on any payments made to them. Where the ICAV has a concession from the Revenue Commissioners it may be possible to obtain an exemption from the requirement to have a valid non-resident declaration in place.

If the ICAV fails to deduct the tax or fails to collect the appropriate signed declaration from any non-resident or exempted shareholders, the ICAV will remain liable for the tax. In these circumstances, the ICAV would seek to recover the tax paid from the relevant shareholder.

Capital gains and interest received by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its shareholders.

Fineco AM Global Equities Income Fund*	FAM Global Equities Income Fund	25 November 2022

\* These Financial Statements exclude the Funds marked above which are presented in a separate sets of Financial Statements, refer to Note 1.

Effective 9 February 2022, the Manager appointed M&G Investment Management Limited to act as Investment Manager to Emerging Markets Debt FAM Fund, replacing Goldman Sachs Asset Management International.

On 7 October 2022, FAM Series UCITS ICAV listed on the Italian Stock Exchange (Borsa Italiana).

### Covid 19

The impact of the coronavirus outbreak was profound across all aspects of society. In developed economies, it is clear that the worst of the impact is now over. However, there is an expectation that seasonal peaks and new variants could give rise to renewed travel restrictions, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery and supply chain disruptions which will create ongoing challenges. Widescale and comprehensive vaccination programmes have been put in place in many countries which have had a positive effect. Nevertheless, the impact of COVID-19 continues to adversely affect the economies of many nations across the globe and this in turn may continue to impact investments held by each Fund.

### Russia/Ukraine Conflict and sanctions

The outbreak of war in Ukraine and the related sanctions targeted against the Russian Federation may have impact on the European economies and globally. The direct exposure to Ukraine, Russia or Belarus is not material to the overall ICAV. However, the impact on the general economic situation may require in the future revisions of certain assumptions and estimates. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

There were no other significant events during the financial year.

### 20. Events post financial year end

Effective 1 January 2023, the Manager appointed Allianz Global Investors GmbH as investment advisor of Fineco AM Euro Credit Bond Fund, replacing HSBC Global Asset Management (France).

Effective 13 February 2023, the Manager appointed M&G Investment Management Limited to act as Investment Manager to the Jupiter Flexible Income FAM Fund, replacing Jupiter Asset Management Limited, and the Sub-Fund was also re-named as Flexible Income FAM Fund on this date.

There are no other events after the year end that had a material effect on the Financial Statements.

# FAM Series UCITS ICAV

## Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

### 21. Soft commission arrangements

The Manager or the relevant Investment Managers of the Sub-Funds may effect transactions that will from time to time provide or procure the Manager or the Investment Managers goods and services and other benefits such as research and advisory services provided that the nature of which is such that their provision shall assist in the provision of investment services to the ICAV as a whole and which no direct payment is made but instead the Manager undertakes to place business with that party. In any event it is agreed that the execution of transactions will be on the basis of best execution standards and brokerage rates will not be in excess of customary institutional rates. Each Investment Manager shall also comply with additional regulations governing soft commission practices including where relevant requirements under MiFID II, which governs the extent to which commissions, inducements, research reports or other non-minor monetary benefits may be paid or received from brokers.

For the year ended 31 December 2022, the following Investment Managers has entered into soft commission arrangements for research purposes as permitted by applicable regulation on behalf of the Sub-Funds with broker counterparties.

Investment Manager	Sub-Fund
Invesco Advisers, Inc	US Equity Value FAM Fund
Infusive Asset Management Inc.	Infusive Consumer Alpha Global Leaders FAM Fund

The total aggregate amount of soft commissions is USD237,959 for 31 December 2022.

There were no other soft commission arrangements for the financial year ended 31 December 2022.

### 22. Approval of the Financial Statements

The Financial Statements were approved and authorised for issue by the Board of Directors on 25 April 2023.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

### Value at Risk Approach

Value at Risk (“VaR”) is a statistical risk measure that estimates the potential loss from adverse market movements in an ordinary market environment.

Please refer to the financial risks note 13 to the Financial Statements for further details on the measure of VaR.

The Directors use Relative VaR to monitor and manage the global exposure of some of the Funds and Absolute VaR for others as set out below. For Relative VaR, the VaR of the respective Fund’s portfolio will not exceed twice the VaR of the reference portfolio. For Absolute VaR, the monthly VaR will not exceed 20% of the Fund’s NAV. Where a VaR calculation is performed using a horizon other than the one-month regulatory limit, this 20% limit shall be rescaled to reflect the appropriate risk horizon period as directed by the relevant regulatory guidelines. Utilisation refers to the level of risk taken in this context.

The table below details the highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the respective Absolute or Relative VaR regulatory limit.

Sub-Fund	Global Exposure Type	Risk Model	Reference Risk Portfolio	Highest utilisation of the VaR limit %	Lowest utilisation of the VaR limit %	Average utilisation of the VaR limit %

### Value at Risk Approach (continued)

#### **LEVERAGE**

The use of FDIs may expose a Fund to a higher degree of risk. In particular, FDI contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on FDIs than on standard bonds or equities.

Leveraged FDI positions can therefore increase a Fund's volatility. Disclosed in the table below is the level of leverage employed by each relevant Fund during the financial year ended 31 December 2022.

<b>Sub-Fund</b>	<b>% Average Leverage Employed</b>
Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF	94.05%

### UCITS V Remuneration Disclosure

Fineco Asset Management Designated Activity Company (the “Management Company”), the Management Company of FAM Series UCITS ICAV acts as the Management Company for two other umbrella UCITS.

The Management Company follows a remuneration policy which complies with the requirements of the UCITS regulation in Ireland and in particular the S.I. 143/2016.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of the talent, skills and competencies, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and the Management Company as a whole, and it is based on both financial and non-financial criteria, among other criteria.

The total remuneration paid by the Management Company to its staff for the financial year end 31 December 2022 is as follows:

#### Financial Year End 31 December 2022

	<u>Fixed</u>	<u>Variable</u>	<u>Total</u>
Employees	6,259,835	2,080,091	8,339,926
Executive Directors	1,120,687	757,346	1,878,033
Non-Executive Directors	85,000	-	85,000

The ICAV represents as at 31 December 2022 around 63% of the Total AUM of the Management Company.

The remuneration policy is reviewed at least annually.

### Securities Financing Transaction Regulations Disclosure (SFTR)

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

For the financial year ended 31 December 2022, the ICAV has not entered into any repos, securities borrowing and margin lending transactions.

The share of collateral reused, as at 31 December 2022 was: 0%

The cash collateral reinvestment returns to the fund was: 0%

The proportion of collateral held in segregated accounts, in pooled accounts or any other accounts is: 0%

## Sustainable Finance Disclosure Regulation (SFDR) (continued)

### Unaudited Section

#### Sustainable Finance Disclosure Regulation (SFDR)

Environmental, social and governance (“ESG”) Integration describes the mechanism by which the Manager, acting through the Investment Manager as its delegate, may integrate sustainability risks into investment decision-making, which may, where relevant, require the Investment Manager to assess the potential sustainability risks associated with the purchase of investments.

Sustainability Risk means an ESG event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of a Sub-Fund’s investment. Sustainability risks can either represent a risk of their own or have an impact on other risks and may contribute significantly to risks, such as market risks, operational risks, liquidity risks or counterparty risks.

The ICAV reserves the right to reassess this classification at any time and shall keep this classification under review pending finalisation of the Regulatory Technical Standards (“RTS”).

If the ICAV determines at any future point that the Fund does not meet the criteria to qualify as a Sustainable Investment Fund, this disclosure shall be updated or withdrawn as appropriate, in accordance with the revised classification of the Fund.

The following Sub-Funds are classified as Article 6 under the Sustainable Finance Disclosure Regulation (“SFDR”):

Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF	Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF
Fineco AM MSCI World Metals and Mining UCITS ETF	

The investments underlying the above named Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities. The classification of the above named Sub-Funds as Article 6 Funds means that the Sub-Funds do not promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR or have Sustainable Investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR. Accordingly, the Sub-Funds do not deem sustainability risks to be relevant and does not integrate sustainability risks into its investment decisions due to the investment strategy of the Sub-Funds. Accordingly, it is not anticipated that sustainability risks will materially impact the expected risk or return characteristics of the Sub-Fund. Please refer to the section of the Prospectus entitled "Sustainable Finance Disclosure" for further information.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF  
**Legal entity identifier:** 254900ZYS0PG3V8ECA96

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Did this financial product have a sustainable investment objective?**

**Yes**

It made **sustainable investments with an environmental objective: \_\_\_%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: \_\_\_%**

**No**

It promoted **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it had a proportion of 45.3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product (the “Fund”) promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within.

The Fund aims to improve its ESG profile compared to its investment universe.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers’ rights, human resources management (workers’ health and safety, diversity);
- Governance: Board of Directors independence, managers’ remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI USD IG Liquid SRI Sustainable Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”

### ● *How did the sustainability indicators perform?*

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund’s portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: **100%**;
- The percentage of the Fund’s assets covered by the ESG analysis based on the index provider ESG methodology: **100%**;
- The percentage of the Fund’s portfolio invested in “sustainable investments” as defined in Article 2 (17) of SFDR: **45.3%**;

### ● *...and compared to previous periods?*

Not applicable for the first periodic report.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*** The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodiversity loss;
  - b. Social: no poverty, zero hunger, food security, healthy lives and well-being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.
3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the Investment Manager ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;
  - b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: <https://www.bnpparibas-am.com/sustainability-documents/>

The share of financial product investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://www.bnpparibas-am.com/sustainability-documents/).

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Corporate voluntary indicators:

Environment

1. Investments in companies without carbon emission reduction initiatives

Social

1. Lack of a supplier code of conduct
2. Lack of a human rights policy

Sovereign mandatory indicator:

1. GHG intensity
2. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the Investment Manager’s Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

1. Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment;
2. How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top investments of this financial product?

STANDARD CHARTERED PLC 3.97 PCT 30-MAR-2026	Financials	0.63%	UNITED KINGDOM

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 30 December 2022

Source of data: the Investment Manager, as at 30 December 2022

The largest investments are based on official accounting data and are based on the transaction date.

\*Any percentage differences with the financial statement portfolios result from a rounding difference.

### What was the proportion of sustainability-related investments?

In order to determine the investments used to meet the environmental or social characteristics promoted by the Fund, taking into account all the binding elements of its investment strategy as mentioned above, the Investment Manager has decided to use its internal methodologies through the calculation of the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment.

The proportion of such investments used to meet the environmental or social characteristics promoted by the financial product is **72.8%**.

The proportion of sustainable investments of the financial product is **45.3%**.

The remaining proportion of the investments may include:

- The proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the financial product, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the BNPP AM ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager's internal processes, including the following minimum environmental or social safeguards:

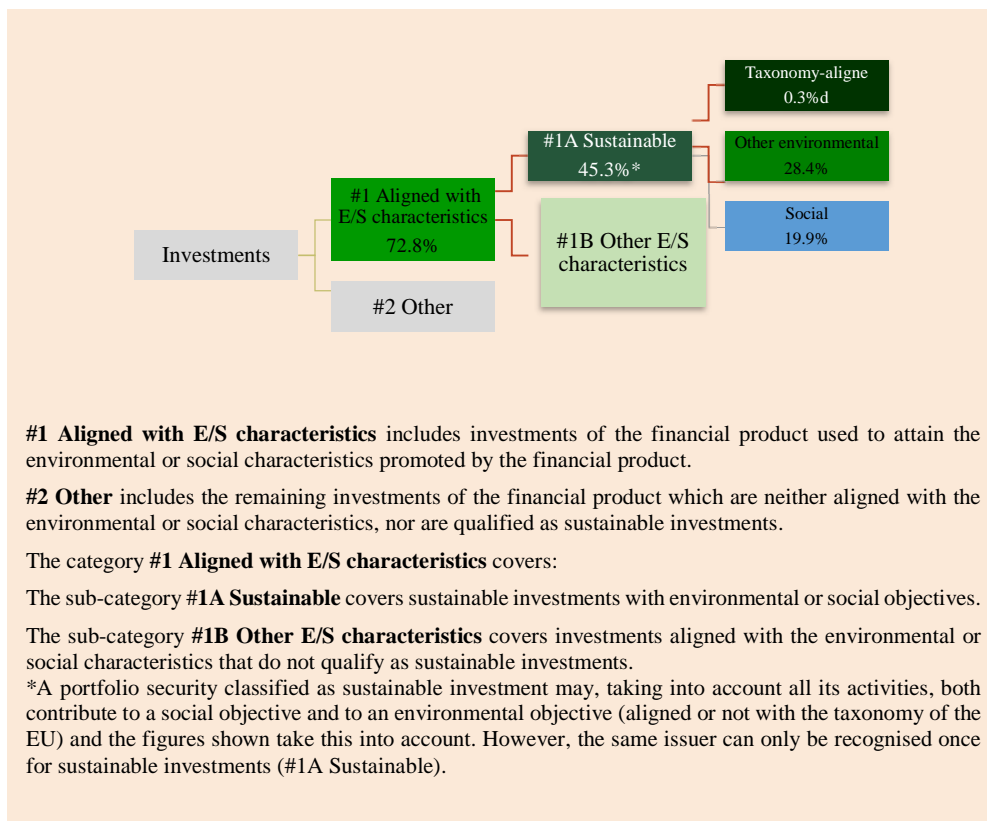

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- the Investment Manager's Responsible Business Conduct policy (RBC policy), where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **What was the asset allocation?**

● **In which economic sectors were the investments made?**

Sectors	% Asset
FINANCIALS	43.92%
TECHNOLOGY	12.76%
HEALTH CARE	12.48%
COMMUNICATIONS	9.86%
CONSUMER DISCRETIONARY	6.85%
INDUSTRIALS	4.11%
CONSUMER STAPLES	4.02%
ENERGY	1.78%
REAL ESTATE	1.72%
MATERIALS	1.34%
CASH	0.89%
UTILITIES	0.27%

Source of data: the Investment Manager, as at 30 December 2022

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The Investment Manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

### ● *Did the financial product invest in fossil gas and/or nuclear energy activities that comply with the EU Taxonomy <sup>1</sup>?*

Yes:

In fossil gas

In nuclear energy

No:

At the date of closure of the accounting year and preparation of the annual report, the data are not available and the management company does not have the information relating to the previous year.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the "greenness" of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies relevant for a transition to a green economy
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **28.4%**.

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Socially sustainable investments represent **19.9%** of the financial product.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include:

- the proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the Fund, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the Investment Manager’s ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund shall invest at least 30% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What are the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives*”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

## How did this financial product perform compared to the reference benchmark?

The MSCI USD IG Liquid SRI Sustainable Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product.

The methodology used for the calculation of the reference benchmark can be found at: [www.msci.com](http://www.msci.com)

### ● *How does the reference benchmark differ from a broad market index?*

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question “*How did the sustainability indicators perform?*”

### ● *How did this financial product perform compared with the reference benchmark?*

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

### ● *How did this financial product perform compared with the broad market index?*

	Carbon footprint (tCO <sub>2</sub> eq/EV) <sup>1,2</sup>	ESG score <sup>2</sup>
Financial product	14.56	57.64
Broad market index <sup>3</sup>	52.37	52.36

- (1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company’s scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company’s energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO<sub>2</sub> equivalent per million euros of enterprise value.
- (2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.
- (3) MSCI USD IG Corporate Bond Index

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF  
**Legal entity identifier:** 2549001FCUZW31EBKR77

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<b>Did this financial product have a sustainable investment objective?</b>	
<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: green;">●</span> <span style="color: white;">●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> <b>It made sustainable investments with an environmental objective: ___%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> <b>It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.63% of sustainable investments</b>  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> <b>It made sustainable investments with a social objective: ___%</b>	<input type="checkbox"/> <b>It promoted E/S characteristics, but did not make any sustainable investments</b>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

1. **Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 40.63% of sustainable investments.
2. **Positive Screening:** Consideration of ESG factors were a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The percentage of the Fund portfolio made in sustainable investments which was 40.63% as at 31 December 2022;
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested Assets selected from ESG screened indices which was 97.11% as at 31 December 2022;
- iv. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 97.11% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 97.11% as at 31 December 2022.

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments inline with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 40.63% of sustainable investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based screening applied by the Manager through its Exclusion Policy.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

When replicating the Reference Index via a Total Return Swap through the Invested Assets, principal adverse impact (“PAI”) indicators were calculated at Invested Assets level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Corporate voluntary indicators: Environment

1. Investments in companies without carbon emission reduction initiatives  
Social

Corporate voluntary indicators: Social

1. Lack of a human rights policy

Sovereign mandatory indicator:

1. GHG intensity
2. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - a. Made in investee companies that demonstrate good governance;
  - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

#### Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

1. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

1. Lack of a human rights policy

Sovereign mandatory indicator:

1. GHG intensity
2. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "*Statement on principal adverse impacts of investment decisions on sustainability factors*".

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2022

Largest investments	Sector	Country	% Assets
INTEL CORP	Electrics/ electronics	UNITED-STATES (U.S.A.)	6.45%
ALPHABET INC-CL C	Internet	UNITED-STATES (U.S.A.)	5.75%
CHUBB LTD	Insurances	SWITZERLAND	5.47%
VERTEX PHARMACEUTICALS INC	Pharmaceutics/ cosmetics/ biotechnology	UNITED-STATES (U.S.A.)	5.18%
ADOBE INC	Software	UNITED-STATES (U.S.A.)	5.07%
SCHWAB (CHARLES) CORP	Other credit institutions	UNITED-STATES (U.S.A.)	4.54%
PROCTER & GAMBLE CO/THE	Pharmaceutics/ cosmetics/ biotechnology	UNITED-STATES (U.S.A.)	4.48%
ELI LILLY & CO	Pharmaceutics/ cosmetics/ biotechnology	UNITED-STATES (U.S.A.)	4.28%
THERMO FISHER SCIENTIFIC INC	Pharmaceutics/ cosmetics/ biotechnology	UNITED-STATES (U.S.A.)	4.12%
GILEAD SCIENCES INC	Pharmaceutics/ cosmetics/ biotechnology	UNITED-STATES (U.S.A.)	4.06%
MERCK & CO. INC.	Pharmaceutics/ cosmetics/ biotechnology	UNITED-STATES (U.S.A.)	4.03%
MCDONALDS CORP	Distribution/ retail trade	UNITED-STATES (U.S.A.)	4.01%
TEXAS INSTRUMENTS INC	Electrics/ electronics	UNITED-STATES (U.S.A.)	3.99%
JOHNSON & JOHNSON	Pharmaceutics/ cosmetics/ biotechnology	UNITED-STATES (U.S.A.)	3.99%
MORGAN STANLEY	Banks	UNITED-STATES (U.S.A.)	3.94%

### What was the proportion of sustainability-related investments?

**40.63%**

**Asset allocation** describes the share of investments in specific assets.

#### ● *What was the asset allocation?*

97.11% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 20% in sustainable investments and as at 31 December the Fund had a proportion of 40.63% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

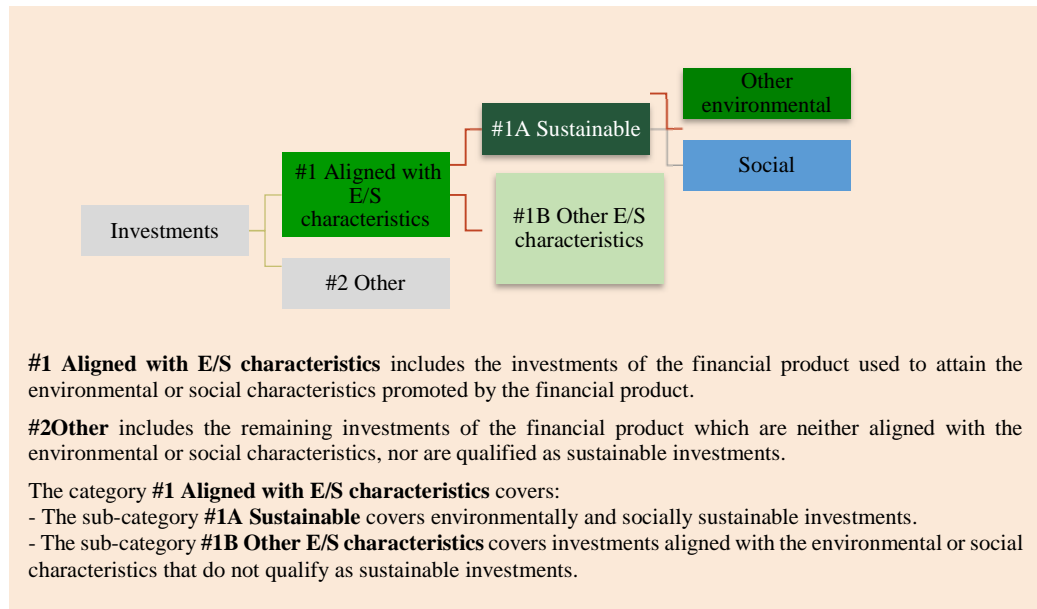

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● *In which economic sectors were the investments made?*

Sector	% Assets
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	34.93%
ELECTRICS/ ELECTRONICS	14.49%
SOFTWARE	10.99%
INTERNET	5.92%
INSURANCES	5.63%
BANKS	4.94%
OTHER CREDIT INSTITUTIONS	4.67%
DISTRIBUTION/ RETAIL TRADE	4.13%
CHEMICAL PRODUCTS	4.05%
MISCELLANEOUS SERVICES	4.02%
AUDIOVISUAL	3.45%
CONSTRUCTION OF MACHINERY AND VEHICLES	2.77%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund's portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 14.61%.

**What was the share of socially sustainable investments?**

Socially sustainable investments represented 26.02% of the financial product.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 40.63% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

**How did this financial product perform compared to the reference benchmark?**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<b>Did this financial product have a sustainable investment objective?</b>	
<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: green;">●</span> <span style="color: white;">●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> <b>It made sustainable investments with an environmental objective: ___%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> <b>It promoted Environmental/Social (E/S) characteristics and</b> while it did not have as its objective a sustainable investment, it had a proportion of 34.82% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> <b>It made sustainable investments with a social objective: ___%</b>	<input type="checkbox"/> <b>It promoted E/S characteristics, but did not make any sustainable investments</b>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product included;

- 1. Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 34.82% of sustainable investments.
- 2. Positive Screening:** Consideration of ESG factors were a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 3. Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- 4. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The percentage of the Fund portfolio made in sustainable investments which was 34.82% as at 31 December 2022
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested Assets selected from ESG screened indices which was 96.93% as at 31 December 2022;
- iv. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 96.93% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 96.93% as at 31 December 2022

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments inline with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 34.82% of sustainable investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

*How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based screening applied by the Manager through its Exclusion Policy.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

When replicating the Reference Index via a Total Return Swap through the Invested Assets, principal adverse impact (“PAI”) indicators were calculated at Invested Assets level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Corporate voluntary indicators: Environment

1. Investments in companies without carbon emission reduction initiatives  
Social

Corporate voluntary indicators: Social

1. Lack of a human rights policy

Sovereign mandatory indicator:

1. GHG intensity
2. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - a. Made in investee companies that demonstrate good governance;
  - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

#### Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

#### Corporate voluntary indicators: Environment

1. Investments in companies without carbon emission reduction initiatives Social

## What was the proportion of sustainability-related investments?

34.82%

**Asset allocation** describes the share of investments in specific assets.

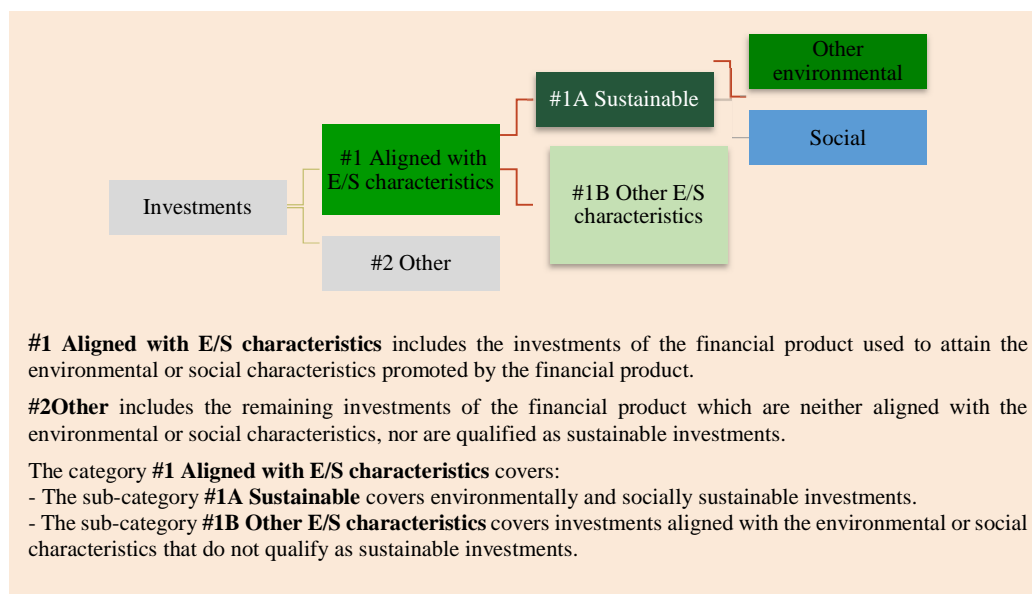

### What was the asset allocation?

96.93% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 20% in sustainable investments and as at 31 December the Fund had a proportion of 34.82% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### In which economic sectors were the investments made?

Sector	% Assets
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	30.11%
SOFTWARE	18.78%
ELECTRICS/ ELECTRONICS	12.76%
TRANSPORTATION AND TRANSPORTATION MATERIALS	8.10%
BANKS	5.77%
DISTRIBUTION/ RETAIL TRADE	4.62%
OTHER CREDIT INSTITUTIONS	4.61%
DISTRIBUTION WATER GAZ ELECTRICITY ENERGY	4.34%
INTERNET	4.12%
AUDIOVISUAL	2.92%
CONSTRUCTION OF MACHINERY AND VEHICLES	2.89%
MISCELLANEOUS SERVICES	0.98%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund’s portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

\* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report.

**Sustainability indicators**

measure how the environmental or social characteristics promoted by the financial product are attained.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 20.55%.

**What was the share of socially sustainable investments?**

Socially sustainable investments represented 14.27% of the financial product.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 34.82% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

**How did this financial product perform compared to the reference benchmark?**

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF  
**Legal entity identifier:** 2549006XCIKJ1TDGX308

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<p style="text-align: center;">●● <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ___%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ___%</p>	<p style="text-align: center;">●● <input checked="" type="checkbox"/> <b>No</b></p> <p><input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 42.65% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

1. **Sustainable Investments:** The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 42.65% of sustainable investments.
2. **Positive Screening:** Consideration of ESG factors were a key element of portfolio construction. The Invested Assets in which the Fund invested were issued by companies that were only listed in ESG screened indices which promote environmental and social characteristics such as the MSCI Europe ESG Screened Index. In addition, the Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social “laggards” from the Fund’s investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
3. **Fund Level ESG Scoring:** A monthly independent analysis and classification of the Fund’s ESG score was performed internally by the Manager. A minimum ESG score of “A” was applied at Fund Level to ensure that the Fund’s ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
4. **Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
  - United Nations Global Compact Principles
  - Controversial Weapons
  - Tobacco
  - Climate Change
  - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The percentage of the Fund portfolio made in sustainable investments which was 42.65% as at 31 December 2022.
- ii. The Fund level ESG score was rated MSCI “A” or above as at 31 December 2022;
- iii. The percentage of the Invested Assets selected from ESG screened indices which was 94.85% as at 31 December 2022;
- iv. The percentage of the Fund’s portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 94.85% as at 31 December 2022; and
- v. The percentage of the Fund investment universe subject to the Manager’s exclusion policy which was 94.85% as at 31 December 2022.

● ***...and compared to previous periods?***

Not applicable for the first periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives***

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying security and classified investment in issuers that met the below criteria as sustainable investments inline with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocates between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 42.65% of sustainable investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

*How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based screening applied by the Manager through its Exclusion Policy.

*How were the indicators for adverse impacts on sustainability factors taken into account?*

When replicating the Reference Index via a Total Return Swap through the Invested Assets, principal adverse impact (“PAI”) indicators were calculated at Invested Assets level. The results were compared with that of a chosen proxy benchmark representative of the Fund’s investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

1. Investments in companies without carbon emission reduction initiatives
- Social

Corporate voluntary indicators: Social

2. Lack of a human rights policy

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sovereign mandatory indicator:

1. GHG intensity
2. Investee countries subject to social violations

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

1. Via PAI monitoring of the following indicators;
  - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
  - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
2. Through ensuring that the sustainable investments that the Manager made are:
  - a. Made in investee companies that demonstrate good governance;
  - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
  - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

#### Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

#### Corporate voluntary indicators: Environment

## What was the proportion of sustainability-related investments?

42.65%

### Asset allocation

describes the share of investments in specific assets.

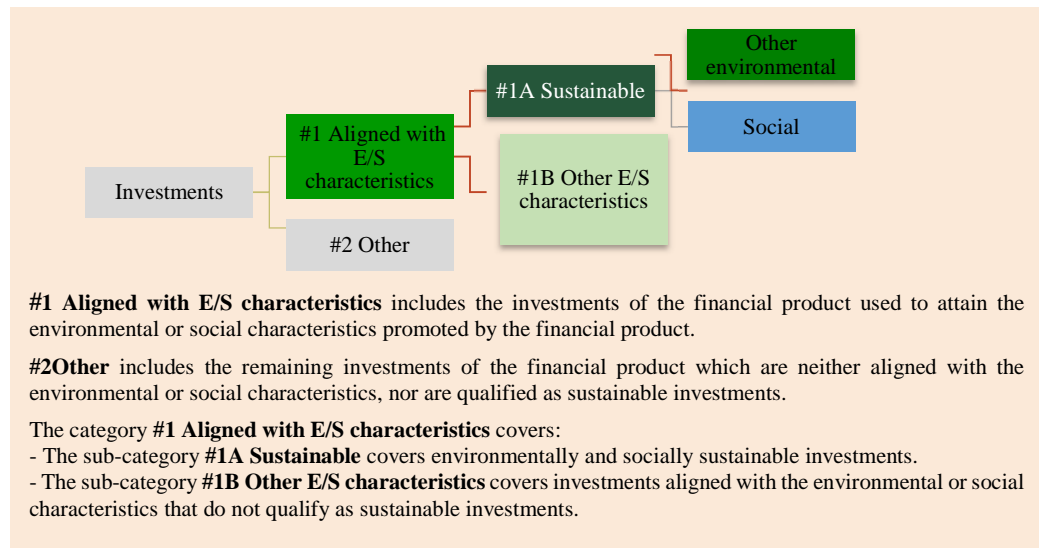

### What was the asset allocation?

94.85% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 20% in sustainable investments and as at 31 December the Fund had a proportion of 42.65% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### In which economic sectors were the investments made?

Sector	% Assets
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	32.80%
ELECTRICS/ ELECTRONICS	12.01%
OTHER CREDIT INSTITUTIONS	10.30%
SOFTWARE	9.57%

DISTRIBUTION/ RETAIL TRADE	2.44%
AUDIOVISUAL	2.15%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund's portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
- In fossil gas  In nuclear energy
- No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report.

**Sustainability indicators**

measure how the environmental or social characteristics promoted by the financial product are attained.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 18.43%.

- **What was the share of socially sustainable investments?**

Socially sustainable investments represented 32.15% of the financial product.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any “#2 Other” potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund pursued the environmental and/or social characteristics promoted by it through replicating the Reference Index synthetically, via investment in the Invested Assets.

Furthermore, the Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 42.65% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**How did this financial product perform compared to the reference benchmark?**

- *How does the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF

**Legal entity identifier:** 2549001UELK8FPXC712

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<b>Did this financial product have a sustainable investment objective?</b>	
<p> <input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b> </p> <p> <input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ____%                     <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p> <input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ____%                 </p> </p>	<p> <input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b> </p> <p> <input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it does not have as its objective a sustainable investment, it had a proportion of 23.4% of sustainable investments                     <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <p> <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b> </p> </p>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product (the “Fund”) promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within

The Fund aims to improve its ESG profile compared to its investment universe.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers’ rights, human resources management (workers’ health and safety, diversity);
- Governance: Board of Directors independence, managers’ remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI USD HY SRI Sustainable Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? “

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● *How did the sustainability indicators perform?*

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund’s portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: **100%**;
- The percentage of the Fund’s assets covered by the ESG analysis based on the index provider ESG methodology: **100%**;
- The percentage of the Fund’s portfolio invested in “sustainable investments” as defined in Article 2 (17) of SFDR: **23.4%**;

### ● *...and compared to previous periods?*

Not applicable for the first periodic report.

### ● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

**Unaudited Section (continued)**

**Sustainable Finance Disclosure Regulation (SFDR) (continued)**

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodiversity loss;
  - b. Social: no poverty, zero hunger, food security, healthy lives and well-being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.
3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;
4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the Investment Manager ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;
  - b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: <https://www.bnpparibas-am.com/sustainability-documents/>

The share of financial product investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://www.bnpparibas-am.com/sustainability-documents/).

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Corporate voluntary indicators:

Environment

1. Investments in companies without carbon emission reduction initiatives

Social

1. Lack of a supplier code of conduct
2. Lack of a human rights policy

Sovereign mandatory indicator:

1. GHG intensity
2. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the Investment Manager's Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

1. Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment;
2. How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 30 December 2022

Largest investments	Sector	% Assets	Country

Source of data: the Investment Manager, as at 30 December 2022

The largest investments are based on official accounting data and are based on the transaction date.

\*Any percentage differences with the financial statement portfolios result from a rounding difference.

### What was the proportion of sustainability-related investments?

In order to determine the investments used to meet the environmental or social characteristics promoted by the Fund, taking into account all the binding elements of its investment strategy as mentioned above, the Investment Manager has decided to use its internal methodologies through the calculation of the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment.

The proportion of such investments used to meet the environmental or social characteristics promoted by the financial product is **53.2%**.

The proportion of sustainable investments of the financial product is **23.4%**.

The remaining proportion of the investments may include:

- The proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the financial product, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the BNPP AM ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager's internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- the Investment Manager's Responsible Business Conduct policy (RBC policy), where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

● *What was the asset allocation?*

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● *In which economic sectors were the investments made?*

Sectors	% Asset
COMMUNICATIONS	16.19%
HEALTH CARE	13.16%
CONSUMER DISCRETIONARY	11.67%
TECHNOLOGY	9.42%
MATERIALS	9.38%
REAL ESTATE	8.51%
INDUSTRIALS	8.40%
ENERGY	7.63%
FINANCIALS	7.35%
CONSUMER STAPLES	4.47%
UTILITIES	2.11%
CASH	1.72%

Source of data: the Investment Manager, as at 30 December 2022

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The Investment Manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### ● *Did the financial product invest in fossil gas and/or nuclear energy activities that comply with the EU Taxonomy <sup>1</sup>?*

Yes:

In fossil gas

In nuclear energy

No:

At the date of closure of the accounting year and preparation of the annual report, the data are not available and the management company does not have the information relating to the previous year.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the "greenness" of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies relevant for a transition to a green economy
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **10.6%**.

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

Socially sustainable investments represent **15.4%** of the financial product

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining proportion of the investments may include:

- the proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the Fund, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the Investment Manager’s ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund shall invest at least 30% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What are the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

### How did this financial product perform compared to the reference benchmark?

The MSCI USD HY SRI Sustainable Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product.

The methodology used for the calculation of the reference benchmark can be found at: [www.msci.com](http://www.msci.com)

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question “How did the sustainability indicators perform?”

● **How did this financial product perform compared with the reference benchmark?**

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

● **How did this financial product perform compared with the broad market index?**

	Carbon footprint (tCO <sub>2</sub> eq/EV) <sup>1,2</sup>	ESG score <sup>2</sup>
Financial product	107.43	48.92
Broad market index <sup>3</sup>	148.83	43.07

- (1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company’s scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company’s energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO<sub>2</sub> equivalent per million euros of enterprise value.
- (2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.
- (3) MSCI USD HY Corporate Bond Index

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF

Legal entity identifier: 254900GLVO3BT65M5Z79

Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input checked="" type="radio"/> <b>No</b>

<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

All actual data within this periodic report are calculated on the closing date of the accounting year.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product (the “Fund”) promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within

The Fund aims to improve its ESG profile compared to its investment universe.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers’ rights, human resources management (workers’ health and safety, diversity);
- Governance: Board of Directors independence, managers’ remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? “

### ● *How did the sustainability indicators perform?*

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund’s portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: **100%**;
- The percentage of the Fund’s assets covered by the ESG analysis based on the index provider ESG methodology: **100%**;
- The percentage of the Fund’s portfolio invested in “sustainable investments” as defined in Article 2 (17) of SFDR: **47.6%**;

### ● *...and compared to previous periods?*

Not applicable for the first periodic report.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodiversity loss;
  - b. Social: no poverty, zero hunger, food security, healthy lives and well-being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.
3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the Investment Manager ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;
  - b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: <https://www.bnpparibas-am.com/sustainability-documents/>

The share of financial product investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://www.bnpparibas-am.com/sustainability-documents/).

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

1. Investments in companies without carbon emission reduction initiatives

Social

1. Lack of a supplier code of conduct
2. Lack of a human rights policy

Sovereign mandatory indicator:

1. GHG intensity
2. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the Investment Manager's Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

1. Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment;
2. How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager’s SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30 December 2022

Largest Investments	Sector	% Assets	Country
CREDIT AGRICOLE SA 2.50 PCT 29-AUG-2029	Financials	0.81%	FRANCE

Source of data: the Investment Manager, as at 30 December 2022

The largest investments are based on official accounting data and are based on the transaction date.

\*Any percentage differences with the financial statement portfolios result from a rounding difference.

## What was the proportion of sustainability-related investments?

In order to determine the investments used to meet the environmental or social characteristics promoted by the Fund, taking into account all the binding elements of its investment strategy as mentioned above, the Investment Manager has decided to use its internal methodologies through the calculation of the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment.

The proportion of such investments used to meet the environmental or social characteristics promoted by the financial product is **87.7%**.

The proportion of sustainable investments of the financial product is **47.6%**.

The remaining proportion of the investments may include:

- The proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the financial product, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the BNPP AM ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And

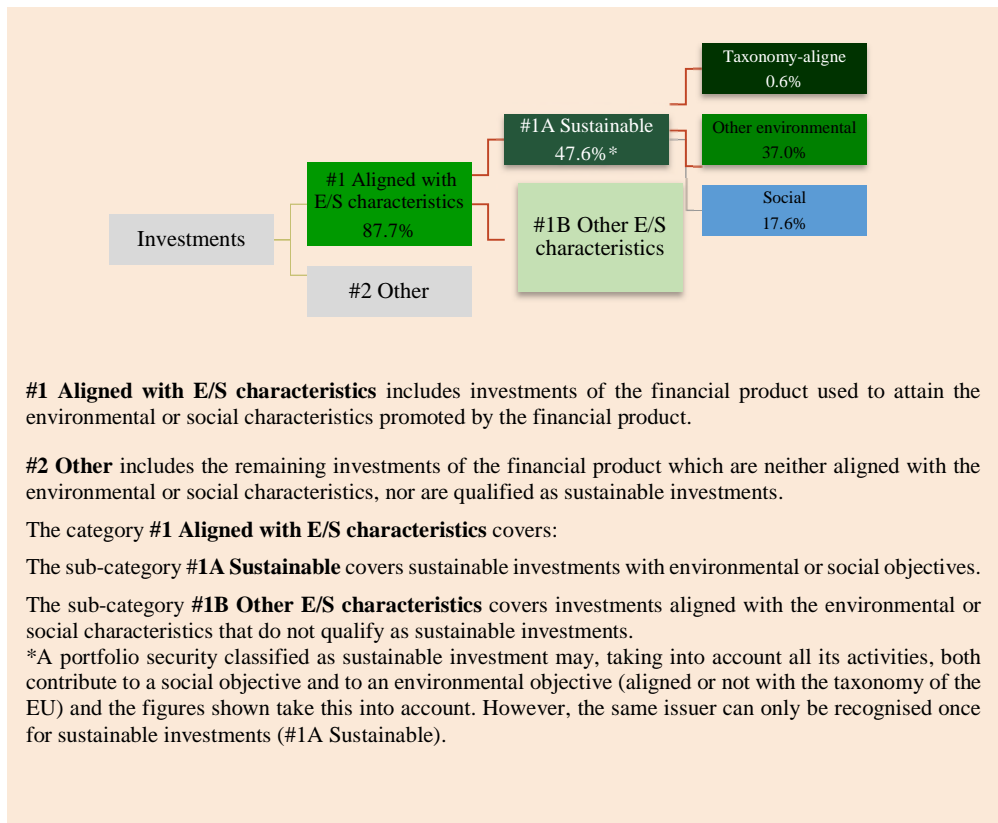

the Investment Manager’s Responsible Business Conduct policy (RBC policy), where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● *What was the asset allocation?*

COMMUNICATIONS	6.94%
CONSUMER STAPLES	6.23%
REAL ESTATE	5.60%
CONSUMER DISCRETIONARY	4.59%
TECHNOLOGY	3.68%
MATERIALS	2.49%
UTILITIES	1.12%
CASH	0.84%

Source of data: the Investment Manager, as at 30 December 2022

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The Investment Manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● *Did the financial product invest in fossil gas and/or nuclear energy activities that comply with the EU Taxonomy <sup>1</sup>?*

Yes:

In fossil gas     In nuclear energy

No:

At the date of closure of the accounting year and preparation of the annual report, the data are not available and the management company does not have the information relating to the previous year.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the "greenness" of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies relevant for a transition to a green economy
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **37.0%**.

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

Socially sustainable investments represent **17.6%** of the financial product

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include:

- the proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the Fund, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the Investment Manager’s ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund shall invest at least 30% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What are the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

### How did this financial product perform compared to the reference benchmark?

The MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product.

The methodology used for the calculation of the reference benchmark can be found at: [www.msci.com](http://www.msci.com)

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ● *How does the reference benchmark differ from a broad market index?*

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

#### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question “*How did the sustainability indicators perform?*”

#### ● *How did this financial product perform compared with the reference benchmark?*

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

● ***How did this financial product perform compared with the broad market index?***

	<b>Carbon footprint (tCO<sub>2</sub> eq/EV)<sup>1,2</sup></b>	<b>ESG score<sup>2</sup></b>
<b>Financial product</b>	27.31	60.97
<b>Broad market index<sup>3</sup></b>	73.84	58.89

- (1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company's scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company's energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO<sub>2</sub> equivalent per million euros of enterprise value.
- (2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.
- (3) MSCI EUR IG Corporate Bond Index

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF

**Legal entity identifier:** 2549007BLK93E2ZFCZ30

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<b>Did this financial product have a sustainable investment objective?</b>	
<p>●● <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b>: ___%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective</b>: ___%</p>	<p>●● <input checked="" type="checkbox"/> <b>No</b></p> <p><input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it does not have as its objective a sustainable investment, it had a proportion of 39.7% of sustainable investments</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

*All actual data within this periodic report are calculated on the closing date of the accounting year.*

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product (the “Fund”) promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within

The Fund aims to improve its ESG profile compared to its investment universe.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers’ rights, human resources management (workers’ health and safety, diversity);
- Governance: Board of Directors independence, managers’ remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI EUR HY SRI Sustainable Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? “

### ● *How did the sustainability indicators perform?*

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund’s portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: **100%**;
- The percentage of the Fund’s assets covered by the ESG analysis based on the index provider ESG methodology: **100%**;
- The percentage of the Fund’s portfolio invested in “sustainable investments” as defined in Article 2 (17) of SFDR: **39.7%**;

### ● *...and compared to previous periods?*

Not applicable for the first periodic report.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodiversity loss;
  - b. Social: no poverty, zero hunger, food security, healthy lives and well-being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.
3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the Investment Manager ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;
  - b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: <https://www.bnpparibas-am.com/sustainability-documents/>

The share of financial product investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://www.bnpparibas-am.com/sustainability-documents/).

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

1. Investments in companies without carbon emission reduction initiatives

Social

1. Lack of a supplier code of conduct
2. Lack of a human rights policy

Sovereign mandatory indicator:

1. GHG intensity
2. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the Investment Manager's Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

- 1- Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment;
- 2- How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager’s SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30 December 2022

Largest investments	Sector	% Assets	Country

Source of data: the Investment Manager, as at 30 December 2022

The largest investments are based on official accounting data and are based on the transaction date.

\*Any percentage differences with the financial statement portfolios result from a rounding difference.

## What was the proportion of sustainability-related investments?

In order to determine the investments used to meet the environmental or social characteristics promoted by the Fund, taking into account all the binding elements of its investment strategy as mentioned above, the Investment Manager has decided to use its internal methodologies through the calculation of the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment.

The proportion of such investments used to meet the environmental or social characteristics promoted by the financial product is **74.7%**.

The proportion of sustainable investments of the financial product is **39.7%**.

The remaining proportion of the investments may include:

- The proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the financial product, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the BNPP AM ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager's internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- the Investment Manager's Responsible Business Conduct policy (RBC policy), where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● *What was the asset allocation?*

## FAM Series UCITS ICAV

### Unaudited Section (continued)

### Sustainable Finance Disclosure Regulation (SFDR) (continued)

#### ● *In which economic sectors were the investments made?*

Sectors	% Asset
FINANCIALS	25.93%
INDUSTRIALS	19.34%
CONSUMER DISCRETIONARY	14.11%
COMMUNICATIONS	12.47%
MATERIALS	8.07%
HEALTH CARE	6.79%
TECHNOLOGY	5.01%
REAL ESTATE	2.54%
CONSUMER STAPLES	2.32%
CASH	1.39%
ENERGY	1.21%
UTILITIES	0.82%

Source of data: the Investment Manager, as at 30 December 2022

#### **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The Investment Manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

#### ● *Did the financial product invest in fossil gas and/or nuclear energy activities that comply with the EU Taxonomy <sup>1</sup>?*

Yes:

In fossil gas

In nuclear energy

No:

At the date of closure of the accounting year and preparation of the annual report, the data are not available and the management company does not have the information relating to the previous year.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the "greenness" of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies relevant for a transition to a green economy
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **24.8%**.

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Socially sustainable investments represent **18.3%** of the financial product

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include:

- the proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the Fund, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the Investment Manager’s ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund shall invest at least 30% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What are the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives*”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

## How did this financial product perform compared to the reference benchmark?

The MSCI EUR HY SRI Sustainable Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product.

The methodology used for the calculation of the reference benchmark can be found at: [www.msci.com](http://www.msci.com)

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question “How did the sustainability indicators perform?”

● **How did this financial product perform compared with the reference benchmark?**

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

● **How did this financial product perform compared with the broad market index?**

	Carbon footprint (tCO <sub>2</sub> eq/EV) <sup>1,2</sup>	ESG score <sup>2</sup>
<b>Financial product</b>	106.95	59.71
<b>Broad market index<sup>3</sup></b>	110.56	53.64

- (1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company’s scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company’s energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO<sub>2</sub> equivalent per million euros of enterprise value.
- (2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.
- (3) MSCI USD HY Corporate Bond Index

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF  
**Legal entity identifier:** 25490063PUNFFIDJ8F87

**Environmental and/or social characteristics**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ___%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input checked="" type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it does not have as its objective a sustainable investment, it had a proportion of 45% of sustainable investments <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

All actual data within this periodic report are calculated on the closing date of the accounting year.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product (the “Fund”) promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using the methodology of the index provider. As such, the Fund is exposed to issuers that demonstrate superior or improve environmental and social practices, while implementing robust corporate governance practices within

The Fund aims to improve its ESG profile compared to its investment universe.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers’ rights, human resources management (workers’ health and safety, diversity);
- Governance: Board of Directors independence, managers’ remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by external data providers.

The MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond Index, administrated by MSCI Limited, has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? “

### ● *How did the sustainability indicators perform?*

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, and are based on the reference benchmark ESG methodology:

- The percentage of the Fund’s portfolio compliant with the reference benchmark minimum ESG ratings standards and controversial business involvement exclusion criteria: 100%;
- The percentage of the Fund’s assets covered by the ESG analysis based on the index provider ESG methodology: 100%;
- The percentage of the Fund’s portfolio invested in “sustainable investments” as defined in Article 2 (17) of SFDR: 45%;

### ● *...and compared to previous periods?*

Not applicable for the first periodic report.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The Manager is using, as of the date of this document, the Investment Manager's internal methodology to determine sustainable investments. Such methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodiversity loss;
  - b. Social: no poverty, zero hunger, food security, healthy lives and well-being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.
3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the Investment Manager ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:
  - a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;
  - b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. The Investment Manager uses its proprietary methodology to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the Investment Manager: <https://www.bnpparibas-am.com/sustainability-documents/>

The share of financial product investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Sustainable investments that the Fund partially intends to make should not significantly harm any environmental or social objective (DNSH principle). In this respect, for such sustainable investments, the Investment Manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

The Investment Manager ensures that throughout its investment process, the sustainable investments of the Fund take into account principal adverse impact indicators by analysing within the investment process those indicators in respect of the sustainable investment pillars defined in the Investment Manager Global Sustainability Strategy (GSS). More information on the GSS can be found on: [Sustainability documents - BNPP AM Corporate English \(bnpparibas-am.com\)](https://www.bnpparibas-am.com/sustainability-documents/).

## FAM Series UCITS ICAV

### Unaudited Section (continued)

### Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Fund considers and addresses or mitigates the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

1. Investments in companies without carbon emission reduction initiatives

Social

1. Lack of a supplier code of conduct
2. Lack of a human rights policy

Sovereign mandatory indicator:

1. GHG intensity
2. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the Investment Manager SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments of the Fund exclude issuers that are in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the Investment Manager's Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considers principal adverse impacts on sustainability factors. In order for the Investment Manager to determine which PAI is considered and addressed or mitigated, ESG methodology and disclosures of the reference benchmark and/or the index provider are used.

The policy framework in order to analyse how principle adverse impacts are considered for the Fund mainly relies on both of the following pillars:

1. Analysis of the embedded exclusion process of the reference benchmark, leading the investment strategy to remove industries and behaviours that present a high risk of adverse impacts in violation of international norms and conventions and issues that are involved in activities presenting an unacceptable risk to society and/or the environment;
2. How the ESG ratings used throughout the investment process include in their methodology consideration of principal adverse impacts on sustainability factors, and to what extent those ratings are used in the investment strategy;

More detailed information on the manner in which the Investment Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager’s SFDR disclosure statement: [sustainability risk integration and Principal Adverse Impacts considerations](#).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 30 December 2022

Largest investments	Sector	% Assets	Country
NATWEST MARKETS PLC 2.75 PCT 02-APR-2025	Financials	1.22%	UNITED KINGDOM

Source of data: the Investment Manager, as at 30 December 2022

The largest investments are based on official accounting data and are based on the transaction date.

\*Any percentage differences with the financial statement portfolios result from a rounding difference.

## What was the proportion of sustainability-related investments?

In order to determine the investments used to meet the environmental or social characteristics promoted by the Fund, taking into account all the binding elements of its investment strategy as mentioned above, the Investment Manager has decided to use its internal methodologies through the calculation of the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment.

The proportion of such investments used to meet the environmental or social characteristics promoted by the financial product is **85.3%**.

The proportion of sustainable investments of the financial product is **45.0%**.

The remaining proportion of the investments may include:

- The proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the financial product, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the BNPP AM ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager's internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And

the Investment Manager's Responsible Business Conduct policy (RBC policy), where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

Unaudited Section (continued)

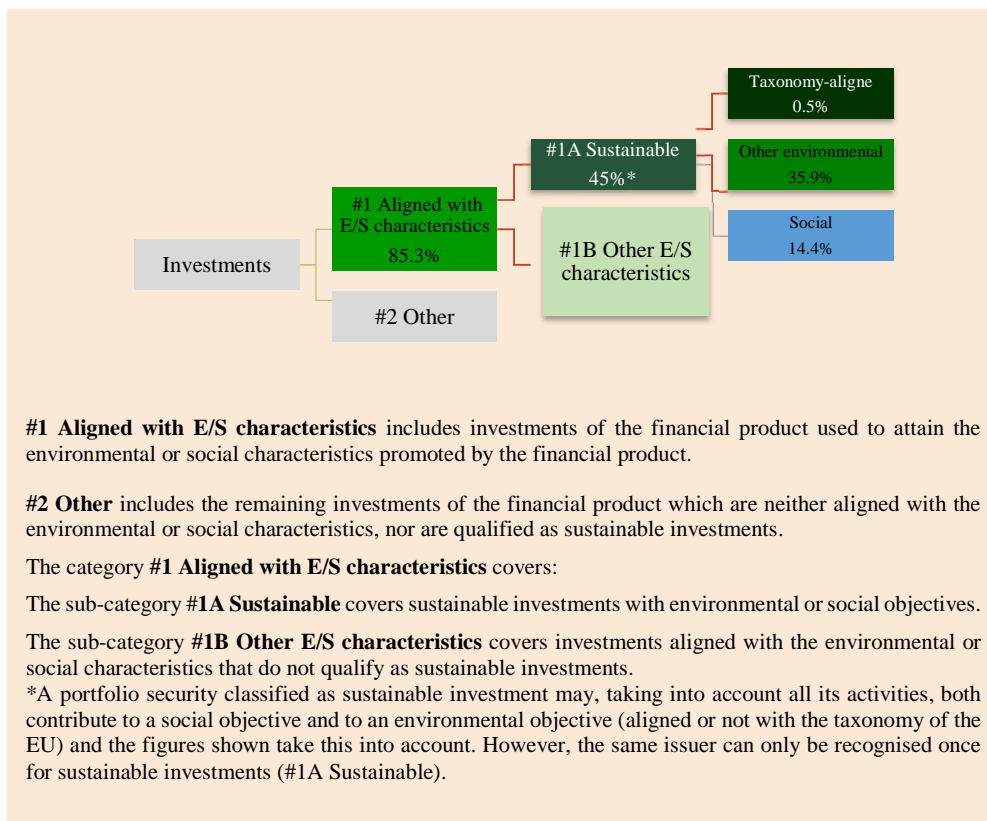

Sustainable Finance Disclosure Regulation (SFDR) (continued)

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● *What was the asset allocation?*

● *In which economic sectors were the investments made?*

Sectors	% Asset
FINANCIALS	61.50%
INDUSTRIALS	8.64%
CONSUMER DISCRETIONARY	6.58%
HEALTH CARE	6.18%
COMMUNICATIONS	5.14%
CONSUMER STAPLES	2.93%
REAL ESTATE	2.55%
TECHNOLOGY	2.54%
MATERIALS	2.53%
CASH	0.83%
UTILITIES	0.59%

Source of data: the Investment Manager, as at 30 December 2022

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The Investment Manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

### ● *Did the financial product invest in fossil gas and/or nuclear energy activities that comply with the EU Taxonomy<sup>1</sup>?*

Yes:

In fossil gas

In nuclear energy

No:

At the date of closure of the accounting year and preparation of the annual report, the data are not available and the management company does not have the information relating to the previous year.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the "greenness" of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies relevant for a transition to a green economy
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

**Enabling activities**

directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities**

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable for the first periodic report

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **35.9%**.

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Socially sustainable investments represent **14.4%** of the financial product.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include:

- the proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the Fund, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the Investment Manager’s ESG proprietary methodologies. These assets are used for investment purposes, or
- instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the Investment Manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the Fund. In addition, those investments are made in compliance with the Investment Manager’s internal processes, including the following minimum environmental or social safeguards:

- the risk management policy. The risk management policy comprises procedures as are necessary to enable the Investment Manager to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- the RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- The Fund shall comply with the reference benchmark minimum ESG rating standards and controversial business involvement exclusion criteria.
- The Fund shall have at least 90% of its investment strategy underlying securities covered by the ESG analysis based on the index provider methodology.
- The Fund shall invest at least 30% of its assets in “sustainable investments” as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as “sustainable investment” are indicated in the above question “*What are the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?*”.

There is no guarantee that extra-financial filter or criteria is applied at any moment. For instance, between two index reshuffles, if a company were deemed to not fulfil anymore an ESG criteria, it may be excluded only at the next reshuffle following the index provider rules.

### How did this financial product perform compared to the reference benchmark?

The MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond Index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product.

The methodology used for the calculation of the reference benchmark can be found at: [www.msci.com](http://www.msci.com)

● **How does the reference benchmark differ from a broad market index?**

The reference benchmark incorporates environmental or social criteria in its asset allocation methodology whereas a relevant broad market index does not and is usually market-capitalization weighted.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Due to the index nature of the Fund, its sustainability indicators are directly linked to the ones of the tracked index. Consequently the performance of the Fund with regard to sustainability indicators representative of the alignment of the reference benchmark with the environmental or social characteristics promoted are the ones disclosed above under the question “How did the sustainability indicators perform?”

● **How did this financial product perform compared with the reference benchmark?**

Due to the index nature of the Fund and its investment objective to replicate the performance of the reference benchmark while maintaining a tracking error between the Fund and the index below 1.5%, the performance of the Fund and the one of the reference benchmark are very close.

● **How did this financial product perform compared with the broad market index?**

	Carbon footprint (tCO <sub>2</sub> eq/EV) <sup>1,2</sup>	ESG score <sup>2</sup>
Financial product	41.86	59.97
Broad market index <sup>3</sup>	73.84	58.89

- (1) The carbon footprint is the sum of each carbon emission divided by its simplified enterprise value, multiplied by the weight in the portfolio. Carbon emissions represent the sum of a company’s scope 1 (direct emissions from installations) and scope 2 (indirect emissions linked to the company’s energy consumption) emissions. Simplified enterprise value measures a total value and is calculated as the sum of market capitalization and total debt. The footprint is expressed in tons of CO<sub>2</sub> equivalent per million euros of enterprise value.
- (2) **Source:** the Investment Manager. Another provider of extra-financial data (e.g. ESG score, carbon footprint) as well as a slightly different initial investment universe may be used to determine and implement extra-financial targets of the investment strategy. For data availability purposes regarding this periodic reporting, the figures provided are based on the Investment Manager data and may not strictly reflect these targets.
- (3) MSCI EUR IG Corporate Bond Index

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
